

Twenty First Meeting of the Africa-Indian Ocean Planning and Implementation Regional Group (APIRG/21)
(Nairobi, Kenya, 9 – 11 October 2017)

Agenda Item 3: Performance Framework for Regional Air Navigation Planning and Implementation

**PERFORMANCE FRAMEWORK FOR REGIONAL AIR NAVIGATION PLANNING AND IMPLEMENTATION
 PERFORMANCE OF THE AERONAUTICAL FIXED SERVICE (AFS)**

[Presented by ASECNA]

| SUMMARY | |
|---|--|
| This paper presents ASECNA's efforts to improve aeronautical telecommunications services in the AFI region and calls for coordination actions between ANSPs for a smooth migration to new aeronautical telecommunications services. | |
| Strategic Objectives | This Working Paper is related to Strategic Objectives: A, B & E |
| References: | <ul style="list-style-type: none"> - Conclusion 20/20 APIRG / 20: Restoration of the performance of SFA circuits - Decision 20/21 APIRG / 20: Adoption of the AMHS Implementation Manual and Guidelines for IP Tests - Conclusion 20/22 APIRG / 20: Implementation of AMHS - Conclusion 20/23 APIRG / 20: Strengthening the backbone VSAT network to support the interconnection and operation of AMHS |

1. INTRODUCTION

1.1. The continuous improvement of aeronautical telecommunications, and in particular the fixed-line service for aeronautics, is a constant concern for ASECNA to ensure the provision of quality air navigation services.

1.2. As part of the regional and interregional coordination and in line with the recommendations, conclusions and decisions of the RAN/AFI and APIRG meetings, ASECNA is continuing to improve telecommunications services through the extension of the AFISNET network, balanced interconnections with other VSAT networks in the AFI Region and other regions and the modernization of end systems.

1.3. To date, and in line with the overall plan for air navigation, the regional navigation plan and the ASBU concept, ASECNA is making the smooth transition to new telecommunications services with the coordinated implementation of AMHS and AIDC.

2. DISCUSSION

2.1. At the level of the Aeronautical Fixed Service Network, all the fifty-one (51) circuits registered in the AFTN Streamlined Plan are 100% implemented. In addition, fifty-seven (57) bilateral circuits were implemented. All of these circuits provide a relatively satisfactory service. All intra-ASECNA circuits have been upgraded to IP pending infrastructure upgrading at the regional level for migration of the remaining circuits. Table 1 in the Annex shows the implementation status.

2.2. With regard to ATS/DS, 96% of the circuits have been implemented and function satisfactorily, with IP-compatible VCSS. Actions are underway to address the existing gaps.

2.3. In accordance with conclusion 18/19, ASECNA has been implementing since 2014 an AMHS project for the gradual migration of AFTN systems to ATS messaging (AMHS). To date, ten centers have fully operational AMHS systems between the ASECNA centers including the main centers of Dakar, Brazzaville and Niamey. Co-ordination with adjacent centers is underway to finalize interoperability testing for full operational implementation of the systems.

Table 2 in the Annex details the state of operational implementation of AMHS in the ASECNA area.

2.4. With the implementation of ATM systems with ADS/CPDLC capabilities, ASECNA has progressively deployed AIDC between its centers. Table 3 in the Annex details the state of operational implementation and the forecasting schedule for the implementation of AEBC ASECNA. With the adjacent non-member centers of ASECNA, automatic coordination actions are under way.

- Thus, with Angola conclusive tests have been carried out and the system is under surveillance.
- With the GCAA, promising tests are continuing.
- AIDC is operational between Brazzaville and Khartoum
- etc.

2.5. On the other hand, with some centers such as CABO VERDE, the question of AIDC's interoperability with the system used by Cape Verde (OLDI) did not allow the tests to be carried out despite the actions carried out. It is important that all States in the region comply with the protocol adopted for the region to facilitate interconnections.

3. ACTION BY THE MEETING

The meeting is invited to:

- Take note of the information provided above;
- Take all suppliers in the region to comply with the protocols adopted for the region by implementing systems and technologies that are acceptable to facilitate interoperability issues
- Encourage ASECNA and other ANSPs to take all necessary cooperative measures to implement the AMHS and AIDC services in the AFI region.

| Dakar | Nouakchott | 02-févr-18 | |
| Niamey | Dakar | 02-févr-18 | |
| Brazzaville | Dakar | 02-févr-18 | |

Tableau 3 : Mise en œuvre de l'AIDC

| Centres ATS | centres Adjacents | Mise en œuvre des échanges de données AIDC | Observations |
|--------------------|--------------------------|---|--|
| Abidjan | Ouagadougou | Non | planifié pour décembre 2017 |
| | Roberts | Non | coordination en cours |
| | Accra | Oui | tests en cours depuis juillet 2017 |
| | Bamako | Non | planifié pour décembre 2017 |
| | Atlantico | Non | coordination en cours dans le cadre de la SAT |
| | Luanda | Non | coordination en cours |
| | Dakar | Oui | Fonctionnel |
| Antananarivo | Moroni | Non | Possibilité d'échanger des données AIDC |
| | Seychelles | Non | coordination en cours |
| | Maurice | Oui | Fonctionnel |
| | Johannesburg | Non | Test technique entre TNR et JNB prévu la semaine 25 |
| | Beira | Non | coordination en cours |
| | Dar es Salam | Non | coordination en cours |
| DAKAR | Abidjan | Oui | Fonctionnel depuis 2014 |
| | Bamako | Non | planifié pour décembre 2017 |
| | Bissau | Non | planifié pour décembre 2017 |
| | Nouakchott | Non | planifié pour décembre 2017 |
| | Roberts | Non | coordination en cours |
| | Las Palmas | Non | coordination en cours |
| | SAL | Non | coordination en cours |
| | Cayenne | Non | Cayenne n'est prêt qu'en fin d'année 2017 |
| | Recife | Non | Planifié pour septembre 2017 |
| Niamey | N'Djamena | Non | planifié pour décembre 2017 |
| | Ouagadougou | Non | Planifié pour décembre 2017 |
| | Bamako | Non | Niamey reçoit correctement mais Bamako ne reçoit pas |
| | Cotonou | Non | Planifié pour décembre 2017 |
| | Lomé | Non | Niamey reçoit correctement mais Lomé ne reçoit pas |

| Centres ATS | centres Adjacents | Mise en œuvre des échanges de données AIDC | Observations |
|-------------|-------------------|--|---|
| N'Djamena | Nouakchott | Non | Planifié pour décembre 2017 |
| | Kano | Non | en attente de la solution des d'interopérabilité des systèmes |
| | Maiduguri | Non | Données AIDC non disponibles à Maiduguri |
| | Alger | Non | Paramétré |
| | Accra | Non | En attente des tests Abidjan/Accra |
| Brazzaville | Bangui | Non | |
| | Brazzaville | Oui | Fonctionnel |
| | Maiduguri | Non | en attente de la solution des d'interopérabilité des systèmes |
| | Niamey | Non | |
| | Kano | Non | en attente de la solution des d'interopérabilité des systèmes |
| | Khartoum | Oui | Fonctionnel |
| | Tripoli | Non | |
| Nouakchott | N'Djamena | Oui | Fonctionnel |
| | Douala | Non | planifié pour décembre 2017 |
| | Libreville | Non | planifié pour décembre 2017 |
| | Kinshasa | Non | coordination en cours |
| | Luanda | Non | coordination en cours |
| | Khartoum | Oui | Fonctionnel |
| Lomé | Dakar | Non | planifié pour décembre 2017 |
| | Bamako | Non | planifié pour décembre 2017 |
| | Canarias | Non | coordination en cours |
| | Casablanca | Non | coordination en cours |
| Cotonou | Niamey | Non | AIDC opérationnel seulement dans le sens Lomé-Niamey |
| | Cotonou | Oui | Fonctionnel |
| | Accra | Non | En attente des tests Abidjan/Accra |
| | Lagos | Non | en attente de la solution des d'interopérabilité des systèmes |
| | Kano | Non | en attente de la solution des d'interopérabilité des systèmes |
| Cotonou | Niamey | Oui | Fonctionnel |
| | Lomé | Oui | Fonctionnel |

| Centres ATS | centres Adjacents | Mise en œuvre des échanges de données AIDC | Observations |
|--------------------|--------------------------|---|-----------------------------|
