

IFALPA Vision on ASBU Implementation in Africa

- Implementation requires:
- Full participation;
- Sufficient resources;
- Cooperation/collaboration;
- Interoperability/harmonization
- Guidance/training material;
- Training for both controllers and pilots

IFALPA requirements for implementation of ASBUs

- Single air navigation system
- One set of procedures worldwide
- Technology requirements
 - Communication
 - Navigation
 - Surveillance
- Human vs Automation
- Operational considerations

IFALPA position on implementation of the ASBUs

- Implementation needs to be coordinated worldwide, incentives need to be in place to ensure deployment for both air and ground services;
- Better global coordination and cooperation

IFALPA position on implementation of the ASBUs

- Global harmonization & interoperability is key
- Early development of guidance/training material
- Realistic timelines to enable adequate training and familiarization.
