

Kenya airports authority

# ASBU BLOCK 0-ACDM:

(Improved airport operations through Airport-CDM)

- ▶ implemented collaborative applications that allows;
  - ▶ the sharing of airfield operations data among the different stakeholders on the airport.
  - ▶ These helps improve air traffic management reducing delays on movement and manoeuvring areas and enhance safety, efficiency and situational awareness.

# Operational safety during construction

- ▶ airfield operations, especially the turnaround phase, involve all operational **stakeholders** at an airport.
- ▶ The process includes proper construction planning that includes work schedules and other programs to be deliberated at ACDM.
- ▶ The MOWP and safety plans are delivered to CAA for approvals and shared to all stakeholders (promulgations of necessary NOTAMs are done)

# Operational safety

1. Wildlife hazard management.
  - ▶ Mapping out and generating Information on wildlife hazards within aerodromes
2. OLS surveys / mapping
  - ▶ In consultation with CAA and submitted for publication

# Key stakeholders

- ▶ KCAA regulator
  - ▶ KCAA ATC / ANS
  - ▶ MET
  - ▶ ENGINEERS AND SURVEYORS
-
