

WORKSHOP ON THE IMPLEMENTATION OF THE ICAO METEOROLOGICAL INFORMATION EXCHANGE MODEL (IWXXM) – AFI REGION

(15 to 16 September 2020)

EUR ANP VOL III – B1 - AMET

(Presented by the Secretariat)

SUMMARY

The workshop is invited to review the EUR Air Navigation Plan (ANP) Volume III tables related to B1-AMET.

1. Introduction

1.1 The workshop may recall that the Air Navigation Plan (ANP) contains three Volumes: Volume I which contains information related to designated regional and global centres such as Volcanic Ash Advisory Centres. Changes to this Volume require approval by the ICAO Council. Volume II contains information related to required services, such as OPMET data. Changes to this Volume are processed through an amendment proposal approved by the Regional Office. Volume III measures implementation of the elements in Volumes I and II. This Volume requires approval by the appropriate PIRG (e.g. EASPG).

2. Discussion

2.1 The workshop is also invited to review the EUR ANP Volume III table pertaining to ASBU B1-AMET as provided at **Appendix A**, and in tabular form at **Appendix B**. Updates to this table is based on information provided in the METNO messages for AIRAC dates. Note that the Secretariat is in consultation with ICAO HQ as to whether or not space weather advisory information should be listed in this table as it is not currently mentioned in the EUR ANP Volume I.

3. Action by the workshop

3.1 The workshop is invited to note the contents of this paper.
