

DRAFT DESCRIPTION OF THE PROPOSED HRYR FIR

The proposed Kigali FIR description is as follows:

Lateral Dimensions:

The area contained within the following points –

From a point **S02°24.81' E029°35.21'** (waypoint 01) then along the sovereign boundary between Rwanda and Burundi to a point **S02°44.65' E029°02.44'** (waypoint 02) along the sovereign boundary between Rwanda and DR Congo to a point **S01°23.64' E029°35.21'** (waypoint 03) along the sovereign boundary between Rwanda and Uganda to a point **S01°03.47' E030°28.38'** (waypoint 04) along the sovereign boundary between Rwanda and the Republic of Tanzania to a point **S02°24.81' E029°35.21'** (waypoint 01)

Vertical Dimensions:

GND/UNL

NB

Please take the following into account when confirming the points:

1. Each State apart from Rwanda needs to confirm at least two of the points which are at the intersection of the national borders with two other states.
2. The FIR differs from the current FIR in that it follows the national boundary and not current FIR boundary.
3. The coordinates provided are as a guideline to the points in question therefore, please use the software you have for determining coordinates to verify and provide the correct coordinates of the points as per standard requirement of WG84 (reporting them in **Deg Min Sec**).
4. Coordinate with each other to agree on the correct coordinates of each point i.e. each point will require the confirmation of the LAT LONG from three states e.g. waypoint 01 will require agreement from HRYR/HTDC/HBBA and waypoint 02 from HRYR/HBBA/FZZA.
5. Attached are copies of the MAPs from JeppView to help you identify where those points are on the Map.
