Pino Acampora
NMD/ACD/Head of PCI Unit
8-11 August 2023

Ensuring a 'Flexible Use of Airspace'....

Presenter Biography

- **EUROCONTROL, Network Manager, Head of Network Strategic Projects Coordination and Implementation Unit. (2020)**
- **EUROCONTROL, Network Manager, Head of ASM/ATFCM processes/procedures Section. (2013 – 2020)**
- **EUROCONTROL, Network Manager, Senior ASM/ATFCM processes/procedures expert. (2008 – 2013)**
- **EUROCONTROL, CEATS Project, Senior ASM/ATFCM processes/procedures expert. (2003 – 2008)**
- **EUROCONTROL, Italian Military Liaison Officer as ASM/ATFCM processes/procedures expert. (1999 – 2003)**
- **Italian Air Force, Head of ASM and Instrumental procedures design Section. (1997 – 1999)**
- **Italian Air Force, ASM and Instrumental procedures design Expert. (1995 – 1997)**
- **Italian Air Force, Head of ATS service in Rimini. (1990-1995)**
- **Italian Air Force, military ATCO TWR, APP, TMA, CGA. (1982 – 1990)**

What is the airspace?

Economic resource

As the global economy is becoming more and more connected, the aviation industry is one of the fastest transportation sectors. The aviation industry provides a total of **87.7 million jobs worldwide**. It directly generates employment opportunities within the airlines, air navigation services providers and airport operators, and additionally creates jobs via the supply chain in the transportation of goods and services. Air transportation also plays an important role for tourism, contributing to economic growth, especially in developing countries.

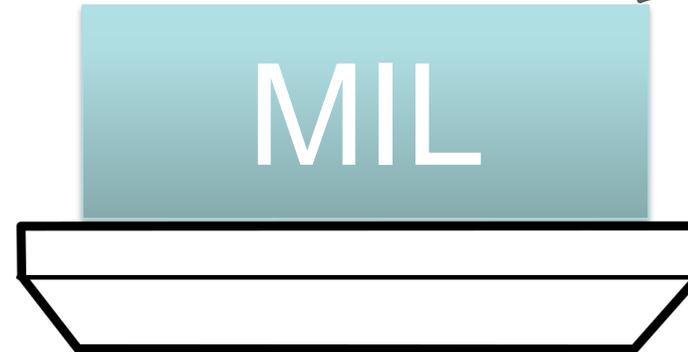

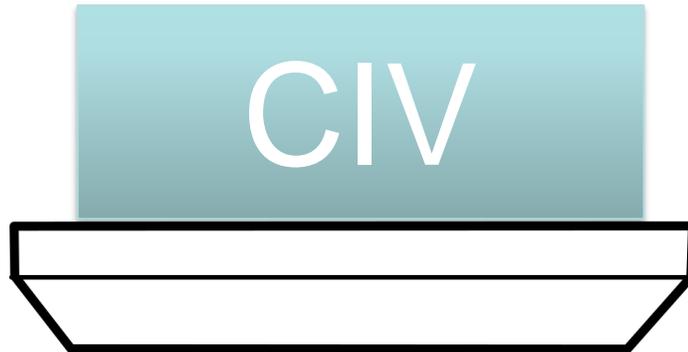

Source: Statista, art. by Erick Burgueño Salas

In 2023, the global airline industry's passenger air traffic revenue is expected to amount to **522 billion U.S. dollars**, a 19 percent increase compared to the previous year. In the period of consideration, the passenger revenue peaked at 607 billion U.S. dollars, just before dipping to 189 billion U.S. dollars due to the coronavirus pandemic. The airline industry was one of the most affected businesses worldwide by the coronavirus pandemic.

How to manage?

How to satisfy all the stakeholders' requirements ?

Since 1996 through ...

**FLEXIBLE
USE OF
AIRSPACE**

...and since 2005 backed up legally by EC

FUA - Basic Principles

What is Flexible Use of Airspace?

- Airspace is no longer designated as purely “civil” or “military” airspace, but considered as one continuum and allocated according to user requirements.
- Any necessary airspace segregation is temporary based on real-time usage within a specific time period.

FUA Components

- Dynamic airspace management process;
- Selection of airspace options by ATM community;
- Users' requirements to be accommodated to the greatest extent possible;
- Balancing equitably the different interests;
- Most efficient use of airspace;
- Avoid permanent airspace segregation;
- Improve ATM system performance;
- Feed ATFM process.

Where to start?

- Talk together:
 - Informal;
 - Formal;
 - Develop mutual understanding.
- High-level commitment on both sides:
 - MoT, MoD, DG, Defence Generals;
 - High-level policy and guidance.
- Develop flexible structures and working methods:
 - FUA levels;
 - Airspace structures;
 - Airspace management processes.

Within 3 ASM levels

ASM Level 1

Establishment
of pre-determined
airspace structures

Strategic Level

ASM Level 2

Day-to-day
allocation of airspace
according to users'
requirements

Pre-tactical Level

ASM Level 3

Real-time use
of airspace allowing
a safe OAT/GAT
separation

Tactical Level

Through civil-military coordination

ASM Level 1

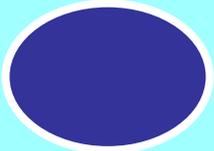

Strategic Level

Definition and review of national airspace policy and organisation

High-Level
Civil / Military
Airspace Policy
Body

ASM Level 2

Pre-tactical Level

Day-to day airspace allocation according to user requirements

Joint
Civil / Military
Cell (AMC)

ASM Level 3

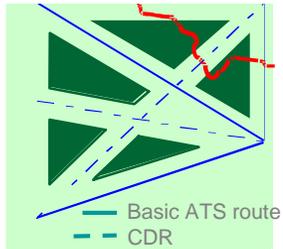

Tactical Level

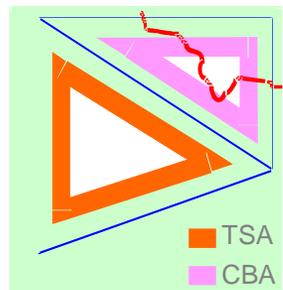

Real-time use of airspace allowing a safe separation between civil and military aircraft

Appropriate
Civil / Military
ATS Units

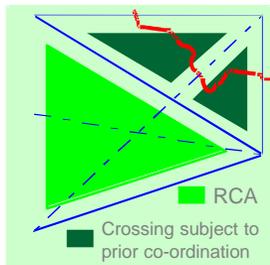

ERNIP Part 3- Using flexible airspace structures

- **Conditional Route (CDR)**
Non-permanent ATS route or portion thereof which can be planned and used under specified conditions

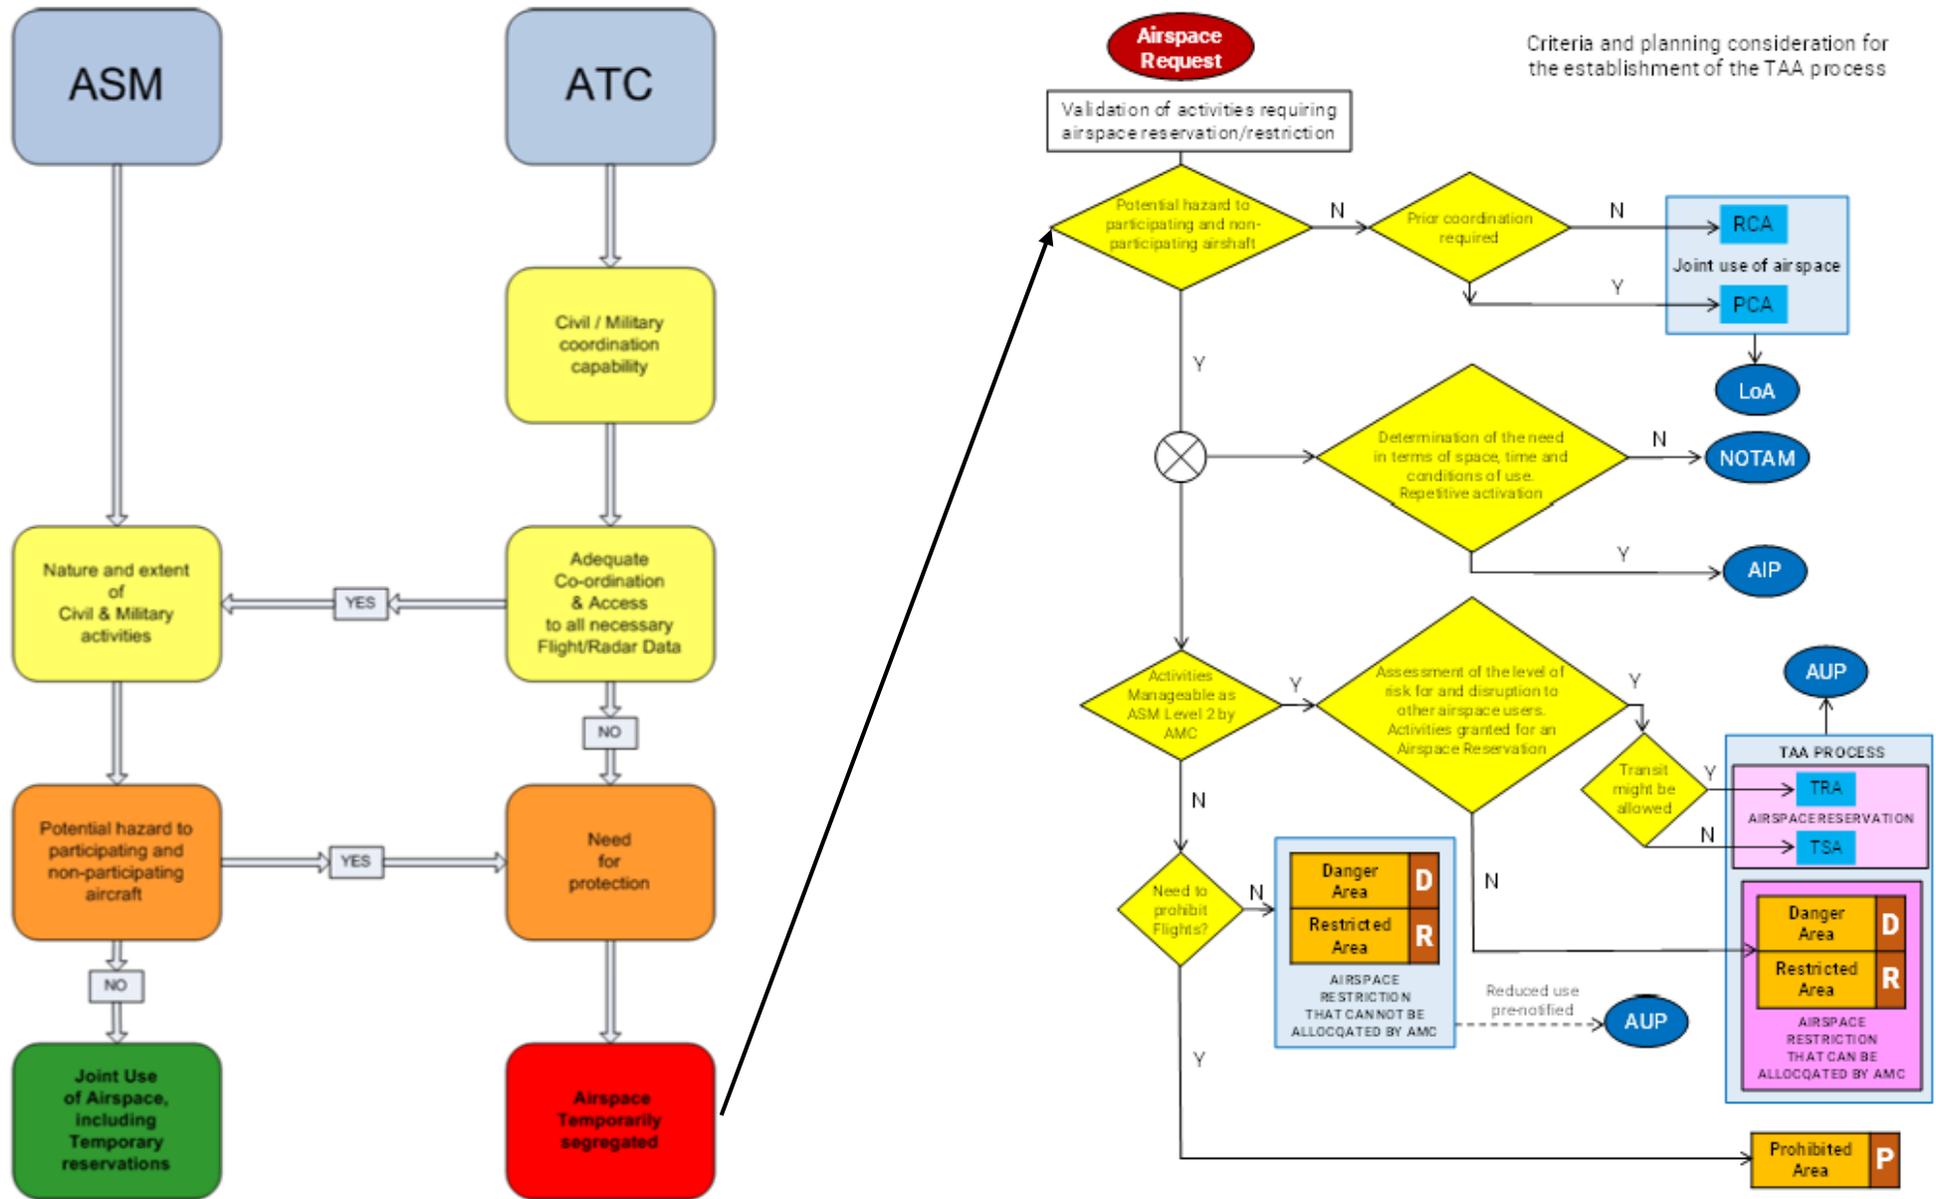

- **Temporary Reserved/Segregated Area (TRA/TSA)**
Airspace temporarily reserved or segregated
- **Cross-Border Area (CBA)**
- **R and D AMC manageable**

- **Reduced Coordination Airspace (RCA)**
Specified portion of airspace within which GAT is permitted “off-route” without requiring prior co-ordination.
- **Prior Coordination Airspace (PCA)**
Specified portion of airspace within which GAT is permitted “off-route” only with prior co-ordination.

ERNIP Part 1/3 – need & type of segregation

ERNIP Part 3- CDR categorisation

- | | | |
|--------------|--|---|
| CDR 1 | Permanently plannable during the times published in AIP | <ul style="list-style-type: none">● Expected to be available most of the time● Plannable same way as permanent ATS routes |
| CDR 2 | Non-permanently plannable | <ul style="list-style-type: none">● Daily allocated as negotiated● Plannable only in accordance with daily AUP/eAMI● Part of pre-defined routing scenario |
| CDR 3 | Not Plannable | <ul style="list-style-type: none">● Usable upon ATC instructions only as short notice routing |

FUA Organisation - Who Does What?

**NO Blueprint
Solution!**

National Stakeholders

Strategic

- Definition and review of national airspace policy and organisation taking into account both national and international airspace requirements

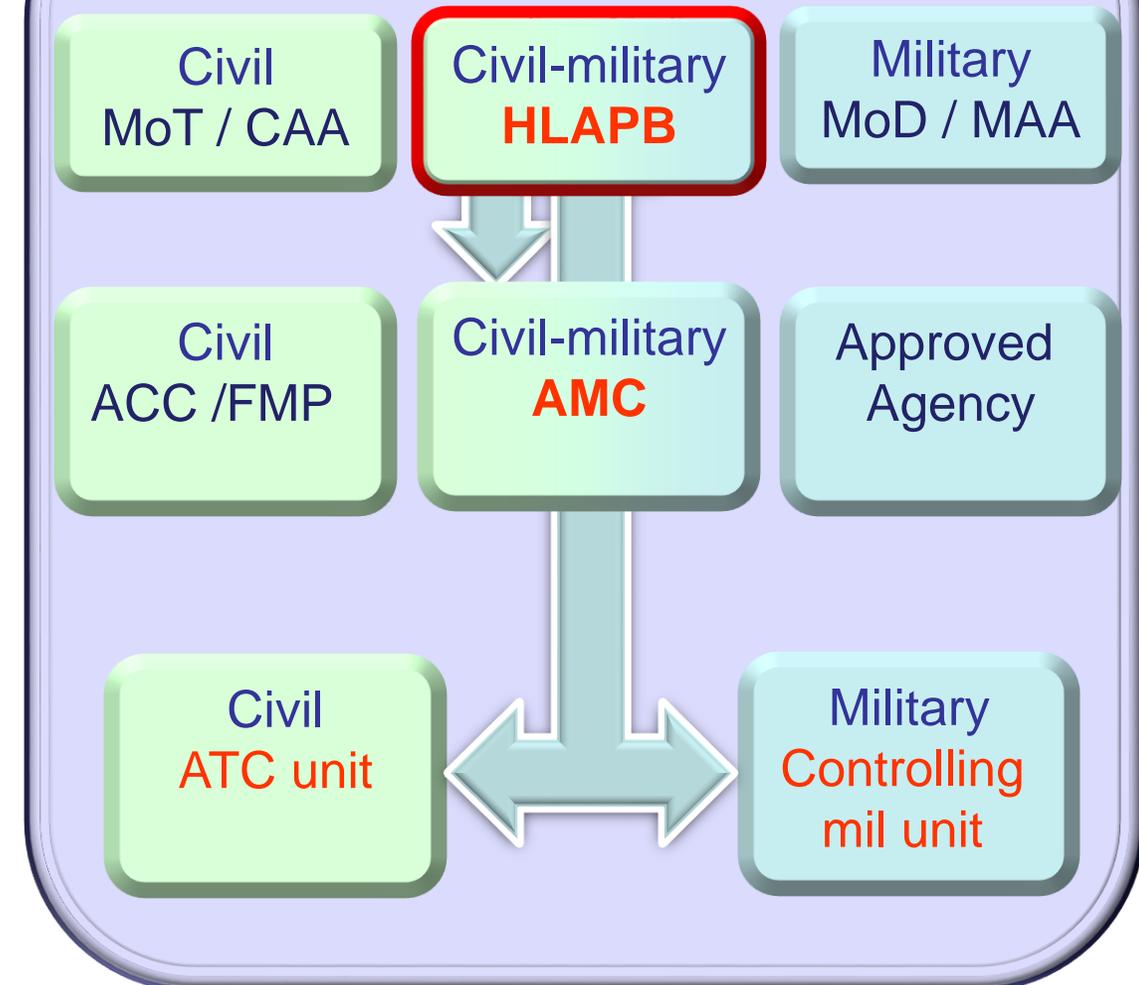

Pre tactical

- Is the conduct of operational management within the Framework of the structures/procedures/priorities defined at Level 1
- Day-to day airspace allocation according to user requirements

Tactical

- Real-time use of airspace allowing a safe separation between civil and military aircraft
- Consists of the real-time use of the airspace allocated in Level 2 and the resolution of specific airspace problems and /or individual traffic situations in real time.

Roles and tasks of L1

NETWORK
MANAGER

Strategic ASM Level 1

Main Strategic Level Objective

High level defining and reviewing of the national airspace policy and organisation taking into account both national and international airspace requirements.

Strategic ASM Level 1

Who is responsible?

National High-Level
Civil / Military Airspace Policy Body

- maintains and improves management of airspace and its infrastructure;
- regulates the airspace organisation and management;
- accommodates shared use of national airspace by all user groups;
- harmonises airspace management procedures with neighbouring States;
- conducts regular monitoring of compliance to the FUA Concept;
- defines processes & procedures for Civil/Military coordination;
- establishes AMC;
- ensures priority rules;
- more...

ASM Level 1 Organisation

- HLAPB practice in majority of States (CMAB in DOC 10088)
 - Decision makers: MoT & MoD;
 - They can delegate: e.g. to CAA or NSA or ANSPs
 - Advisors: Airspace Users & ANSPs, e.g. National Airspace Advisory Committee
 - Technical support delegated to: CAA/NSA, MAA; ANSPs...

- National Airspace Management Advisory Committee (NASMAC) – (CAOM in DOC 10088)
 - HLAPB establishes NASMAC
 - The main task of Advisory Committee is to assist HLAPB
 - Committee may be chaired by the Chairman of the HLAPB,
 - Membership covering the whole spectrum of the State aviation community
 - Sub-committee or working group may be set up by the HLAPB
 - Where it is possible HLAPB and NASMAC could be combined

ICAO DOC 10088 – Appendix E

COMPOSITION of CMAB

- a) **Chair of the Board.** The Board shall elect co-chairpersons and their vice-chairpersons (one each from the civil aviation authority and the military authority) for a cycle of three meetings, unless otherwise re-elected.
- b) **Members.** Representatives of the civil aviation authority, military authorities, appropriate ANSPs and military unit(s) and involved members from ministries and authorities which have an impact on aviation operations.
- c) **Observers** could be invited on an ad hoc basis

| <i>Name</i> | <i>Title/Function</i> | <i>Organization</i> | <i>Status in CMAB</i> |
|-------------|-----------------------|---------------------|-----------------------|
| | | | |
| | | | |
| | | | |
| | | | |

ICAO DOC 10088 – Appendix F

COMPOSITION of CAOM

- a) **Chairperson.** The Committee shall elect co-chairpersons and their vice-chairpersons (one each from the civil aviation authority and the military authority) for a cycle of three meetings, unless otherwise re-elected.
- b) **Members.** Representatives of the civil aviation authority, military authorities, appropriate ANSPs and appropriate military unit(s).
- c) **Observers** could be invited on an ad hoc basis.

Roles and tasks of L2

NETWORK
MANAGER

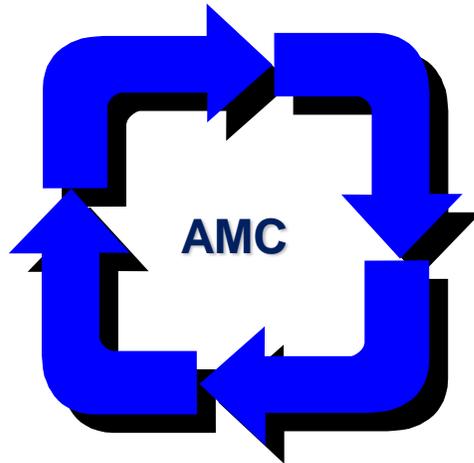

Pre-tactical ASM Level 2

Main Pre-tactical Level Objective

Conduct of operational management within the framework of the structures and procedures defined at Level 1.

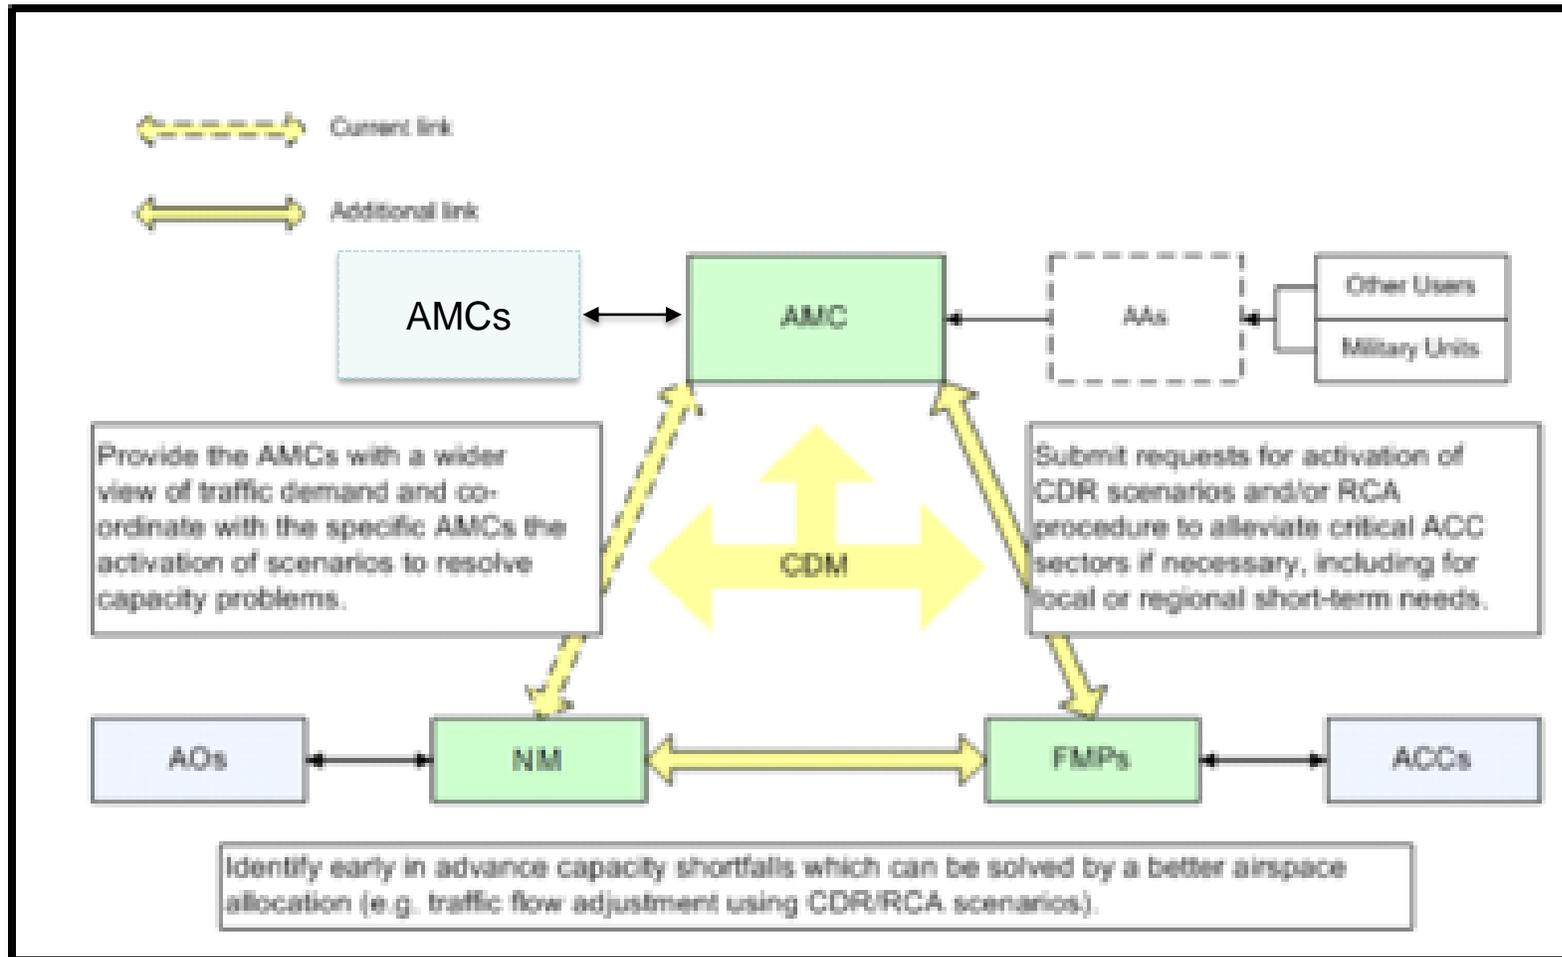

Day-to day airspace allocation according to user requirements.

Airspace Management Cell

- **Joint Civil / Military Body**
- **Established by National Authority**
- **Allocates airspace identified as TRA, TSA, CBA or CDR**
- **Allocation decision notified by Airspace Use Plan (AUP)**

Airspace Management Level 2

Airspace Management Level 2

- AMC: Joint Civil/Military staff;
 - Sometimes integrated with FMP (UK, Netherlands, Germany)
 - Most cases co-located in ACCs
- Main decision principle: Consensus or priority rules application
- National partners: Approved Agency (AA) or Squadrons and FMP
- International partners: Network Manager, neighbouring countries (FABs)

Supporting
European
Aviation

Roles and tasks of L3

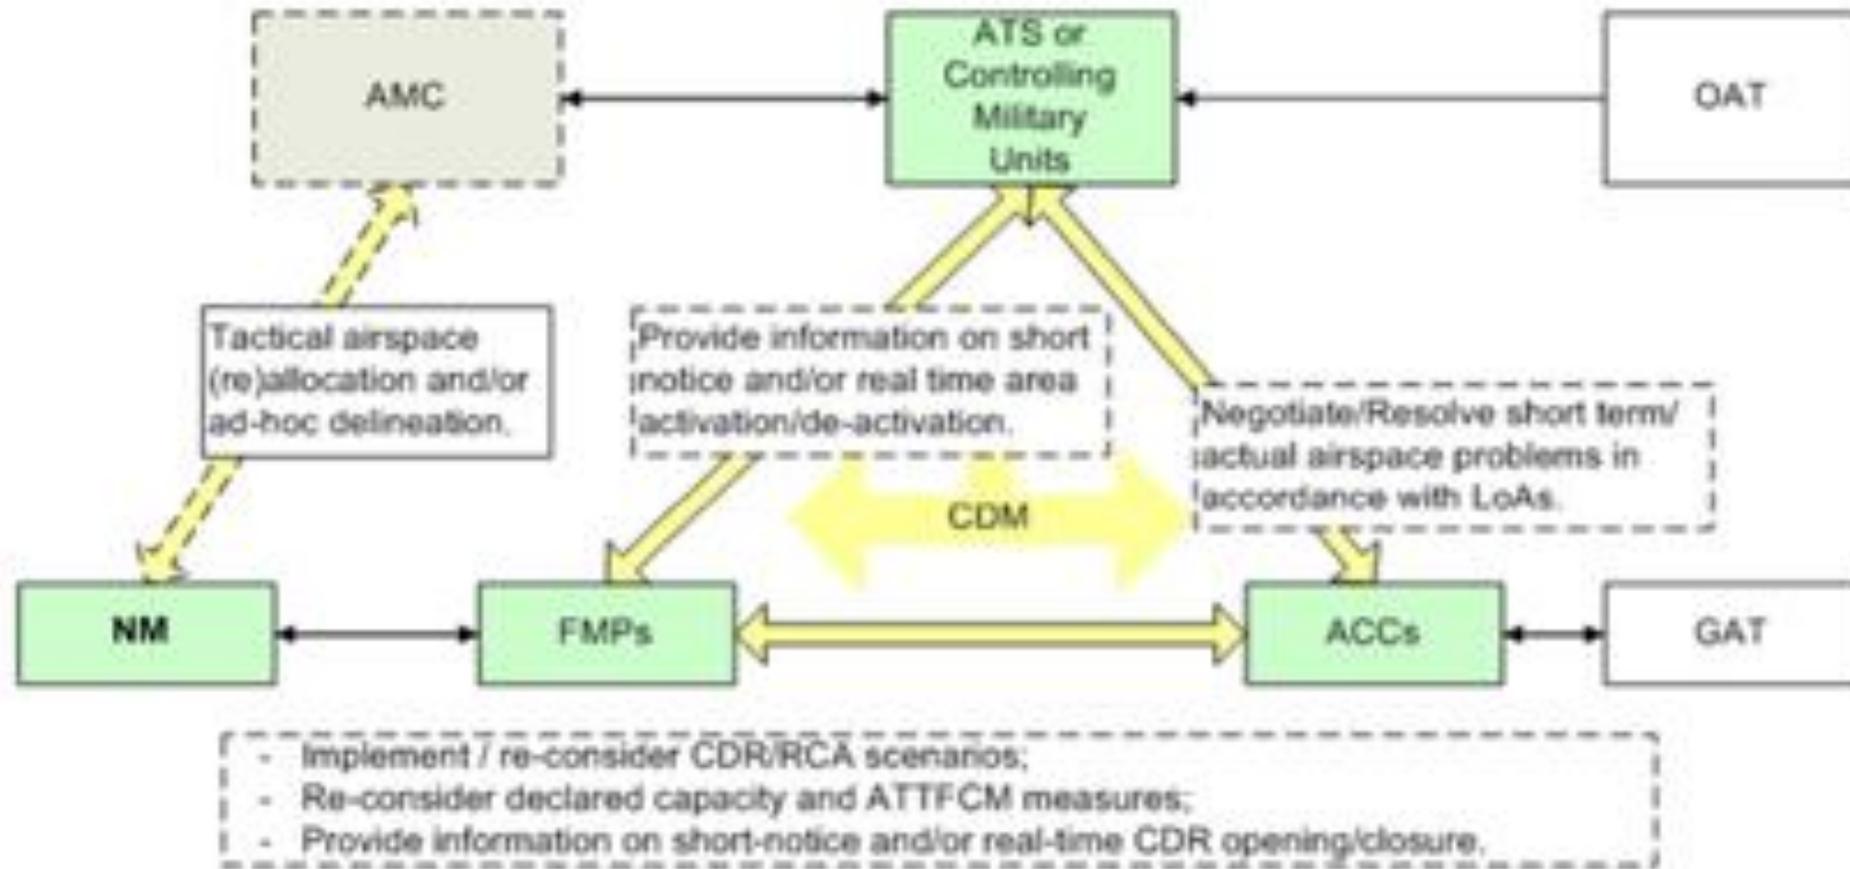

Tactical ASM Level 3

Tactical Level Objective:

Ensure real-time use of the airspace allocated at Level 2 and the resolution of specific airspace problems and/or individual traffic situations in real time.

Ensure a safe OAT/GAT Separation.

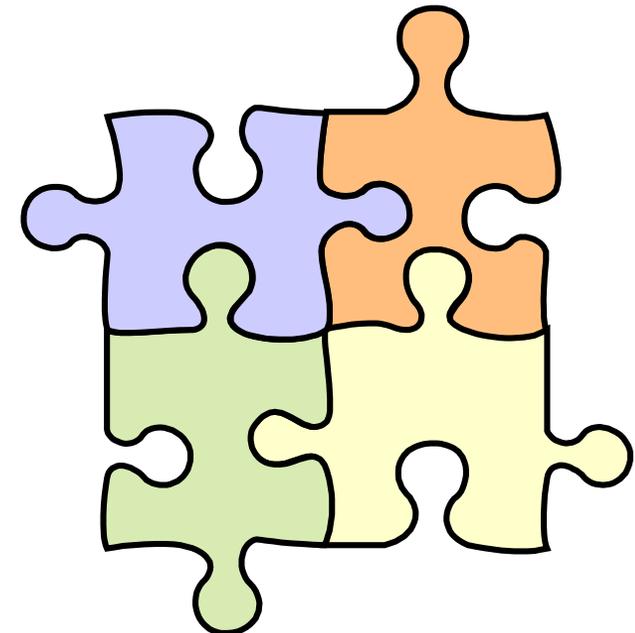

Tactical ASM Level 3

Tactical ASM Level 3 - models

- **Separate civil/military ATS organisations (side-by-side)**
 - **Co-located ATS units**
 - **Separated ATS units**
- **Total Integration of ATS services (single unified ANSP)**

- **Separation responsibilities**
 - **Civil ATCOs and Military ATCOs**
 - **Civil ATCOs and Military Air Defence**
 - **Civil / Military ATCOs (double licence)**
