

USER PREFERRED ROUTES (UPR) TRIALS

TO SUPPORT FREE ROUTE AIRSPACE

IMPLEMENTATION IN THE CONTINENTAL AFI

AIRSPACE

Presented by AFRAA on behalf of the African Aviation Industry Group – AAIG

AAIG Members: AFRAA, IATA, AASA, CANSO Africa, ACI Africa, Boeing.

AAIG Observers: AFCAC, ICAO, AfDB

12 – 16 August 2024

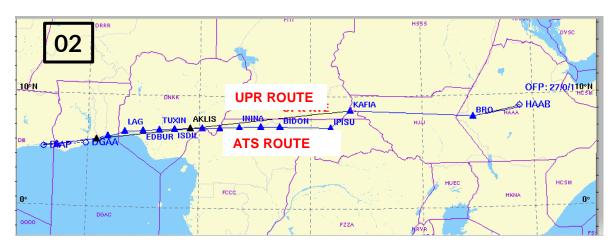

INTRODUCTION

Implementing User-Preferred Routes (UPRs) through trial flights is an essential practical phase that precedes the Free Routing Airspace (FRA)

OBJECTIVES

- Airspace management flexibility
- **❖** Fuel burnt & carbon footprint reduction
- Operating cost reduction
- Safety Enhancement

UPR/FRA CYCLE

ULTIMATE GOAL - FREE ROUTE AIRSPACE FOR AFRICA

SWOT ANALYSIS UPR/FRA

STRENGTH

OPPORTUNITIES

❖ PRACTICAL APPROACH

- ❖ IT ALLOWS MORE DIRECT ROUTES
- ❖ GIVE OPERATORS FLEXIBILITY TO PLAN & FLY THEIR OWN ROUTES

- **❖** COORDINATION
- ***** COMMUNICATION
- CROSS FIR BOUNDERIES
- **SHARING INFORMATIONS**

SWOT

- ❖ NEW ROUTES
- ❖ EFFICIENCY IN FLIGHT OPERATIONS
- ECONOMIC, REDUCING FLIGHT TIME, FUEL BURNED, AND CO2 EMMISSION AND COST
- SAFETY ENHANCEMENT

- CONTINGENCY AREA
- ❖ FLIGHT RESTRICTIONS
- ***** WHEATHER CONDITIONS

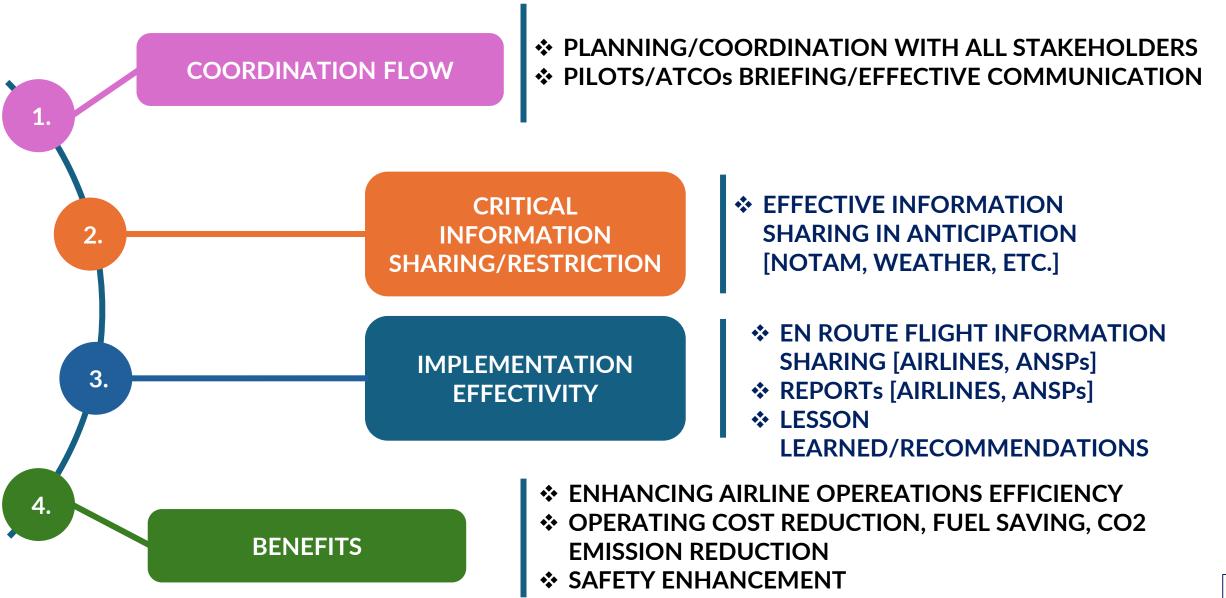

THREATS

WEAKNESS

DISCUSSIONS UPR/FRA

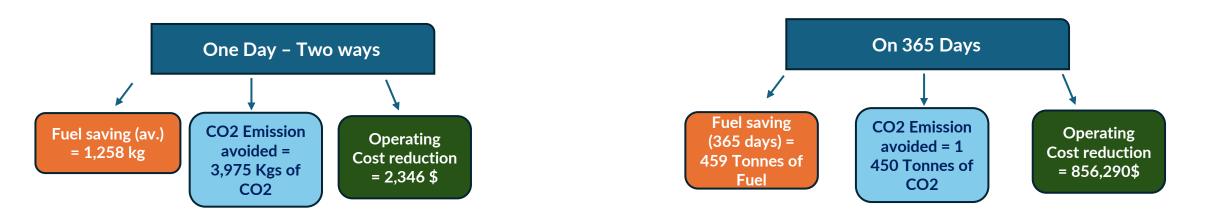

SOME OUTCOMES EAST-WEST-EAST

The outcomes of the Trial are successful, and the following have been observed: Some figures with the participant airlines are based on the savings realized and extended to one-year trial implementation.

ETHIOPIAN AIRLINES ETH935 [ADD-ABJ] & ETH934 [ABJ-ADD]

NOTE: AVERAGE FLIGHT TIME REDUCTION ~ 5 MINUTES PER FLIGHT LEG

SOME OUTCOMES EAST-SOUTH-EAST

The outcomes of the Trial are successful, and the following have been observed: Some figures with the participant airlines are based on the savings realized and extended to one-year trial implementation.

KENYA AIRWAYS KQA784 [NBO-CAPT] & KQA785 [CAPT-NBO] – 03 FLIGHTS A WEEK

NOTE: AVERAGE FLIGHT TIME REDUCTION > 10 MINUTES PER FLIGHT LEG

VOLUNTEER AIRLINES/SOME CONSTRAINTS

Volunteer Airlines

1 Ethiopian Airlines

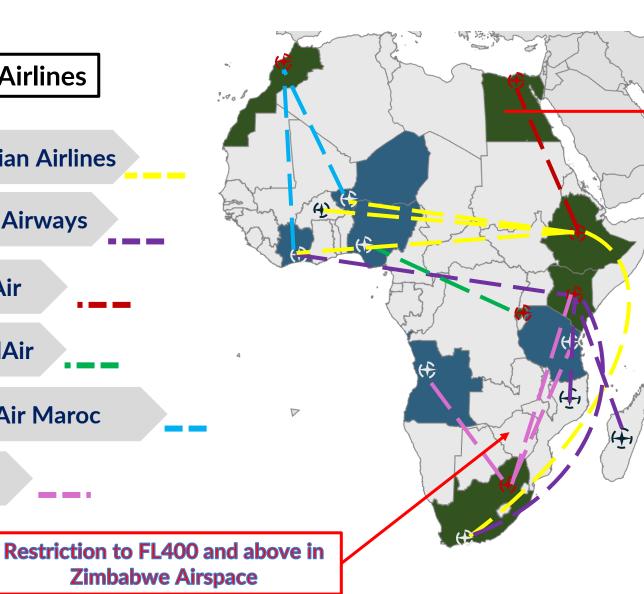

2 Kenya Airways

3 EgyptAir

4 RwandAir

5 Royal Air Maroc

6 Airlink

EGYPTAIR [CAI - ADD]

- ❖ Overfly charges of Sudan via the opened eastern portion ALEBA-TOKRA (Total overfly costs increase by about 2200 USD). To avoid EgyptAir flying a longer distance "8 minutes, 75 nm" over Saudi Arabia.
- ❖ Maximum direct distance Limitation in some AIPs - 10 UTA of ASECNA, have published, "The maximum permissible length of a direct segment is 200 NM between two significant points. If this problem is fixed, the time saving is a minimum 10 minutes

ACTIONS BY THE MEETING

AAO/SG7 - WP/X

1

Note the informations contained in this working paper

2

Recommend avenues for removing flight-level restrictions during the trials for effective FRA implementation in AFI.

3

Provide input to enhance the UPR/FRA trial flight implementation.

INTERNATIONAL CIVIL AVIATION ORGANIZATION

Seventh Meeting of the APIRG Airspace and Aerodrome Operations Sub-Group (AAO/SG7)

Nairobi, Kenya, 12 - 16 August 2024.

Agenda Item 3: Achievements in Airspace and Aerodrome Operations

3.xx USER PREFERRED ROUTES (UPR) TRIALS TO SUPPORT FREE ROUTE AIRSPACE IMPLEMENTATION IN THE CONTINENTAL AFI AIRSPACE

(Presented by AFRAA)

SUMMARY

The APIRG/26 Conclusion 26/09, passed in Cotonou, Benin, in 2023, encourages States, ANSPs, and the African Aviation Industry Group (AAIG) to continue conducting user preferred routes (UPR) trials and collecting critical operational data to support the implementation of the AFI free route airspace (FRA) Project in collaboration with the AFI FRA PMT.

Implementing user-preferred routes through trial flights has demonstrated that ANSPs and airline coordination safely brings significant benefits to flight operations across various FIRs for the participating airlines, including reduced fuel burned and avoided CO₂ emissions.

This paper presents the report of the work carried out by the African Aviation Industry Group (AAIG) on the UPR trials conducted in the AFI continent airspace since APIRG/26.

Action by Meeting

The Action by the meeting is as per paragraph 3 of this paper.

THANK YOU
