

International Civil Aviation Organization

Middle East Regional Monitoring Agency Board

Eleventh Meeting (MIDRMA Board/11)
(Cairo, 27 – 29 September 2011)

Agenda Item 5: Draft MIDRMA Manual

DRAFT MIDRMA MANUAL

(Presented by the Secretariat)

SUMMARY

This working paper proposes an updated version of the Draft MIDRMA Manual for review, update and endorsement by the meeting.

Action by the meeting is at paragraph 3.

- MIDRMA Board/7 Report
- MIDRMA Board/8 Report
- MIDRMA Board/9 Report
- MIDRMA Board/10 report

1. INTRODUCTION

1.1 The MIDRMA Board/7 noted with appreciation that the Secretariat developed a Draft MIDRMA Manual, which includes reference material related the initial set up, administrative management, membership, funding mechanism, duties and responsibilities of the MIDRMA as well as the requirements for RVSM safety assessment.

2. DISCUSSION

2.1 The meeting may wish to recall that the MIDRMA Board/8 meeting reviewed the Draft MIDRMA Manual (V 0.2), as updated by the Secretariat, taking into consideration the outcome of the MIDANPIRG/11 meeting and through Draft Conclusion 8/4 agreed that the MIDRMA Team and MIDRMA Board Members provide their comments on the Draft Version (V 0.2) to the ICAO MID Regional Office before 15 September 2009, in order to develop the Final Version of the MIDRMA Manual and present it to the ATM/SAR/AIS SG/11 meeting.

2.2 The MIDRMA Board/9 meeting noted with concern that comments were received only from the MIDRMA, which proposed to insert a number of documents/Forms in the Manual, i.e. *Explanation of Terms, List of Acronyms, MIDRMA RVSM Approved Aircraft List Form, MIDRMA Form F1-Point of Contact, MIDRMA Form F2-Record of RVSM Approval, MIDRMA Form F3-Withdrawal of RVSM Approval, MIDRMA RVSM Monitoring Application, Procedure for GMU Monitoring Request, Notes for the completion of the MIDRMA Forms with Country Codes And TFC Explanation of Columns.*

2.3 Based on the above, the MID RMA Board/9 meeting recognized that additional effort is needed to finalize the MIDRMA Manual and through Draft Conclusion 9/6 agreed that the MIDRMA Team and MIDRMA Board Members provide their comments on the Draft Version (V 0.2) of the MIDRMA Manual to the ICAO MID Regional Office before 1 April 2010; with a view to have the Draft MIDRMA Manual (V 0.3) ready for review by the MIDRMA Board/10 meeting. However, the MIDRMA Board/10 meeting noted that the ICAO MID Regional Office received comments only from Jordan, which were mainly of editorial nature. Accordingly, the meeting agreed to the following Draft Conclusion to replace and supersede Draft Conclusion 9/6:

DRAFT CONCLUSION 10/9: MIDRMA MANUAL

That:

- a) *the MIDRMA Team and MIDRMA Board Members provide their comments on the Draft Version of the MIDRMA Manual to the ICAO MID Regional Office before **31 December 2010**;*
- b) *the Final version of the MIDRMA Manual be consolidated based on the outcome of the MIDANPIRG/12 meeting, the comments/inputs received from the MIDRMA Team and MIDRMA Board Members, in order to be presented to the MIDRMA Board/11 meeting for final review.*

2.4 The meeting may wish to note that an updated version of the MIDRMA Manual has been developed taking into consideration the outcome of the MIDANPIRG/12 meeting and the inputs received from the MIDRMA.

3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) note the information contained in this working paper; and
- b) review, update as necessary and endorse the Draft MIDRMA Manual at **Appendix A** to this working paper.

DOCUMENT CHANGE RECORD

The following table records the complete history of the successive Versions/editions of the present document.

Manual Version Control

Version	Date	Author	Change Description
0.1	Oct. 2008	ICAO	Draft Version presented for review by the MIDRMA Board/7 meeting
0.2	May 2009	ICAO/ MIDRMA	Updated Draft Version presented for review by the MIDRMA Board/8 meeting
0.3	Sep. 2011	ICAO/ MIDRMA	Updated Draft Version presented for review by the MIDRMA Board/11 meeting

MIDRMA MANUAL

FOREWORD

The Manual of the Middle East Regional Monitoring Agency (MIDRMA) is a publication prepared by the ICAO Secretariat and adopted by the MIDRMA Board and MIDANPIRG. Its purpose is to provide, for easy reference of interested parties, a consolidation of material related to the administrative management, membership, funding mechanism of the MIDRMA, as well as its activities related to the sustained RVSM safety assessment and associated requirements for the provision of data. It contains the Terms of Reference (TOR) of the MIDRMA Board and a number of other provisions approved by the MIDRMA Board and MIDANPIRG.

A Table of Contents is provided which serves also as a subject index and as a checklist for the current pages.

The MIDRMA Manual will be distributed to the Members and Observers of the MIDRMA Board and to other States and International Organizations participating in meetings, contributing to, or having interest in the work of the MIDRMA.

EXPLANATION OF TERMS

The following definitions are intended to clarify specialized terms used in this document.

Aberrant aircraft. Aircraft which exhibit measured height-keeping performance that is significantly different from the core height-keeping performance measured for the whole population of aircraft operating in RVSM airspace.

Aircraft typegroup. Aircraft are considered to be members of the same group if they are designed and assembled by one manufacturer and are of nominally identical design and build with respect to all details that could influence the accuracy of height-keeping performance.

Altimetry system error (ASE). The difference between the altitude indicated by the altimeter display, assuming a correct altimeter barometric setting, and the pressure altitude corresponding to the undisturbed ambient pressure.

Altimetry system error stability. Altimetry system error for an individual aircraft is considered to be stable if the statistical distribution of altimetry system error is within agreed limits over an agreed period of time.

Altitude. The vertical distance of a level, point or an object considered as a point, measured from mean sea level (MSL).

Assigned altitude deviation (AAD). The difference between the transponder Mode C altitude and the assigned altitude/flight level.

Automatic altitude-control system. A system that is designed to automatically control the aircraft to a referenced pressure altitude.

Collision risk. The expected number of mid-air aircraft accidents in a prescribed volume of airspace for a specific number of flight hours due to loss of planned separation.

Exclusionary RVSM airspace. Airspace in which flight cannot be planned by civil aircraft which do not hold a valid RVSM approval from the appropriate State authority.

Flight level. A surface of constant atmospheric pressure which is related to a specific pressure datum, 1013.2 hectopascals (hPa), and is separated from other such surfaces by specific pressure intervals.

Note 1. – A pressure type altimeter calibrated in accordance with the standard atmosphere:

- a) when set to a QNH altimeter setting, will indicate altitude;*
- b) when set to a QFE altimeter setting, will indicate height above the QFE reference datum;*
- c) when set to 1013.2 hPa, may be used to indicate flight levels.*

Note 2. – The terms “height” and “altitude, used in Note 1 above, indicate altimetric rather than geometric heights and altitudes.

Flight technical error (FTE). The difference between the altitude indicated by the altimeter display being used to control the aircraft and the assigned altitude/flight level.

Height. The vertical distance of a level, a point or an object considered as a point, measured from a specified datum.

Height-keeping capability. Aircraft height-keeping performance that can be expected under nominal environmental operating conditions with proper aircraft operating practices and maintenance.

Height-keeping performance. The observed performance of an aircraft with respect to adherence to flight crew prescribed flight level. This includes both technical and operational errors.

Large Height deviation. A deviation of 90m (300ft) or more in magnitude from the cleared flight level.

Non-compliant aircraft. An aircraft configured to comply with the requirements of the RVSM MASPS which, through height monitoring, is found to have a total vertical error (TVE) or an assigned altitude deviation (AAD) of 90 m (300 ft) or greater, or an altimetry system error (ASE) greater than 75 m (245 ft) .

Non-exclusionary RVSM airspace. Airspace where a vertical separation of 300 m (1 000 ft) is applied between RVSM-approved aircraft, but in which flight may be planned by civil aircraft that do not hold a valid RVSM approval from the appropriate State authority. In such airspace, a vertical separation of 600 m (2 000ft) must be applied between any non-RVSM approved aircraft and all other aircraft.

Occupancy. A parameter of the collision risk model which is twice the number of aircraft proximate pairs in a single dimension divided by the total number of aircraft flying the candidate paths in the same time interval.

Operational error. Any vertical deviation of an aircraft from the correct flight level as a result of incorrect action by ATC or the flight crew.

Overall risk. The risk of collision due to all causes, which includes the technical risk (see definition) and the risk due to operational errors and in-flight emergencies.

Passing frequency. The frequency of events in which two aircraft are in longitudinal overlap when travelling in the same or opposite direction on the same route at adjacent flight levels and at the planned vertical separation.

RVSM Airworthiness approval. The process by which the State authority ensures that aircraft meet the RVSM minimum aviation system performance specification (MASPS). Typically, this would involve an operator meeting the requirements of the aircraft manufacturer service bulletin for the aircraft and having the State authority verify the successful completion of this work.

RVSM approval. The term is used synonymously with RVSM operational approval.

RVSM Operational approval. The process by which the State authority ensures that an operator meets all the requirements for operating aircraft in RVSM airspace. RVSM Airworthiness approval is a prerequisite for Operational approval.

Target level of safety (TLS). A generic term representing the level of risk which is considered acceptable in particular circumstances.

Technical risk. The risk of collision associated with aircraft technical height-keeping performance, which specifically refers to the performance affected by the avionics of the aircraft, not the flight crew.

Total vertical error (TVE). The vertical geometric difference between the actual pressure altitude flown by an aircraft and its assigned pressure altitude (flight level).

Track. The projection on the earth's surface of the path of an aircraft, the direction of which path at any point is usually expressed in degrees from North (true, magnetic, or grid).

Vertical separation. The spacing provided between aircraft in the vertical plane.

Vertical separation minimum (VSM). VSM is documented in the *Procedures for Air Navigation Services — Air Traffic Management* (PANS-ATM, Doc 4444) as being a nominal 300 m (1 000 ft) below FL 290 and 600 m (2 000 ft) above FL 290 except where, on the basis of regional agreement, a value of less than 600 m (2 000 ft) but not less than 300 m (1 000 ft) is prescribed for use by aircraft operating above FL 290 within designated portions of the airspace.

LIST OF ACRONYMS

AAD	Assigned altitude deviation
ACAS	Airborne collision avoidance system
ADR	Altitude deviation report
ACC	Area control centre
ASE	Altimetry system error
ATC	Air traffic control
ATS	Air traffic services
CFL	Cleared flight level
CFR	Coordination failure report
CMA	Central Monitoring Agency
CRM	Collision risk model
FTE	Flight technical error
GMS	GPS-based monitoring system
GMU	GPS-based monitoring unit
GPS	Global positioning system
HF	High frequency
HMU	Height monitoring unit
JAA	Joint Aviation Authorities
LHD	Large Height Deviation
MASPS	Minimum aircraft system performance specification
MIDRMA	Middle East Regional Monitoring Agency
MMR	Minimum Monitoring Requirements
RMA	Regional Monitoring Agency

RVSM	Reduced vertical separation minimum
SD	Standard deviation
SMR	Safety monitoring report
SSR	Secondary surveillance radar
TD	Traffic data
TLS	Target level of safety
TVE	Total vertical error
VSM	Vertical separation minimum

1 INTRODUCTION

1.1 Monitoring of aircraft height-keeping performance was one of the underlying assumptions of the safety studies on which RVSM was based. In all regions where RVSM has been implemented, Regional Monitoring Agencies (RMAs) have been established by the appropriate Planning and Implementation Regional Groups (PIRGs) to carry out this function.

1.2 Since the implementation of RVSM in the MID Region with effect from 27 November 2003 and until 1 June 2004, the United Arab Emirates provided full support both financial and technical to the activities of the Middle East Central Monitoring Agency (MECMA), in monitoring the height-keeping performance of aircraft operating in RVSM airspace in the MID Region. RVSM was successfully implemented in the FIRs/UIRs of eleven (11) MID States, i.e.: Bahrain, Egypt, Iran, Jordan, Kuwait, Lebanon, Oman, Saudi Arabia, Syria, UAE and Yemen.

1.3 After the closure of MECMA, MIDANPIRG/9 held in Cairo, Egypt, from 11 to 15 April 2005, under Conclusion 9/13 agreed that the Middle East Regional Monitoring Agency (MIDRMA) be established for carrying out RVSM and eventually, RNP and RNAV related duties and responsibilities in the MID Region as soon as possible and developed an Action Plan for the set up of the MIDRMA.

1.4 The MIDRMA/1 meeting held in Cairo, 14-15 June 2005, under Decision 5, agreed to the establishment of the MIDRMA Board, which agreed during its first meeting held in Cairo, 5-6 September 2005, that Bahrain hosts the MIDRMA. The meeting agreed also on the measures to be taken for the initial set up and management of the MIDRMA.

1.5 The MIDRMA/1 meeting and the MIDRMA Board/1 meeting further updated the initial action plan developed by MIDANPIRG/9 related to the establishment of the MIDRMA. All issues pertaining to the modalities, organizational structure and funding mechanism of the MIDRMA have been discussed, which lead to the establishment of the MIDRMA in Bahrain, effective 24 November 2005, with the help of EUROCONTROL and based on the offer made by Bahrain to establish and host the MIDRMA, providing the required resources and ensuring the administrative management (provision and management of Staff). Bahrain offered to pay for the set up of the MIDRMA without waiting for MID States' contributions, provided that Bahrain recover the cost through the agreed funding mechanism.

1.6 Based on the above, MIDANPIRG/10 held in Doha, Qatar, from 15 to 19 April 2007, agreed to the following Conclusion emanating from the MIDRMA Board:

CONCLUSION 10/28: INITIAL SET UP AND ADMINISTRATIVE MANAGEMENT OF THE MIDRMA

That,

- a) *Bahrain pays for the initial set up of the MIDRMA without waiting for MID States contributions and the cost is recovered through the agreed funding mechanism, in coordination with the ICAO Technical Cooperation Bureau; and*
- b) *Bahrain is responsible for the administrative management of the MIDRMA.*

2 MIDRMA PROJECT

2.1 MIDANPIRG/10, under Decision 10/29, agreed to the establishment of the MIDRMA Board as follows:

DECISION 10/29: ESTABLISHMENT OF THE MIDRMA BOARD

That,

- a) *aMIDRMA Board is established with Terms of Reference (TOR) as at Appendix 5.3J to the Report on Agenda Item 5.3; and*
- b) *theMIDRMA Board is to be composed of a focal point nominated by each Member State.*

2.2 The Terms of Reference of the MIDRMA Board is at **Appendix A**.

2.3 With a view to resolve the legal issues related to the MIDRMA membership, funding, duties and responsibilities, the MIDRMA Memorandum of Agreement (MOA) has been signed initially by the ten (10) participating States, i.e.: Bahrain, Egypt, Iran, Jordan, Lebanon, Kuwait, Oman, Saudi Arabia, Syria and Yemen.

2.4 A Custodian Agreement, which describes the support Administrative and Financial functions of ICAO in the MIDRMA Project was signed by the three concerned parties (the ICAO Secretary General, the Undersecretary for Civil Aviation Affairs of Bahrain and the MIDRMA Board Chairman) as reflected in **Appendix B**.

2.5 Based on the above MIDANPIRG/10 agreed to the following Conclusion related to the MIDRMA Project:

CONCLUSION 10/32: MIDRMA PROJECT

That,

- a) *the MOA at Appendix 5.3G to the Report on Agenda Item 5.3 constitute the legal document related to the establishment, funding and management of the MIDRMA; and;*
- b) *the Custodian Agreement between ICAO, the MIDRMA Board and Bahrain at Appendix 5.3H to the Report on Agenda Item 5.3, signed by the ICAO Secretary General, the Under Secretary for Civil Aviation Affairs of Bahrain and the MIDRMA Board Chairman on behalf of the MIDRMA participating States, represents the legal document which describes the support functions provided by ICAO in the MIDRMA project*

2.6 Taking into consideration the tremendous efforts deployed by UAE in the preparation for the successful and safe implementation of RVSM in the MID Region, MIDANPIRG/10, based on an offer from the MIDRMA Board, under Conclusion 10/30,, invited UAE to join the MIDRMA Project being exempted from the payment of contributions for the first ten (10) years of operation of the MIDRMA. Accordingly, and further to the follow-up actions taken

by the ICAO MID Regional Office, UAE joined officially the MIDRMA Project on 10 June 2008 and signed the MIDRMA Memorandum of Agreement (MOA) on 21 October 2008.

2.7 MIDANPIRG/12 held in Amman, Jordan, from 17 to 21 October 2010 recalled that the MIDRMA funding mechanism was agreed to by the MIDRMA Board/3 meeting held in Muscat, Oman, 24-25 November 2006, through Draft Conclusion 3/5 and endorsed by MIDANPIRG/10 through Conclusion 10/33 and accordingly, the MIDRMA Member States were divided into two categories:

- Category 1: Bahrain, Egypt, Iran, Oman and Saudi Arabia paying 15% each of the yearly total cost of operation of the MIDRMA, and
- Category 2: Jordan, Kuwait, Lebanon, Syria and Yemen paying 5% each of the yearly total cost of operation of the MIDRMA.

2.8 MIDANPIRG/12 noted with appreciation that Iraq joined the MIDRMA on 11 January 2010 by signing the MIDRMA Memorandum of Agreement (MOA), as reflected in **Appendix C**. Accordingly, with a view to further simplify the MIDRMA funding mechanism the MIDRMA Board/10 meeting held in Tehran, Iran Islamic Republic of, 3-5 May 2010, agreed that the contributions of the MIDRMA Member States shall be maintained as follows:

- Bahrain, Egypt, Iran, Oman and Saudi Arabia pay US\$ 30,000 each, and
- Iraq, Jordan, Kuwait, Lebanon, Syria and Yemen pay US\$ 10,000 each.

2.9 Based on the above, MIDANPIRG/12 agreed to the following Conclusions which replace and supersede MIDANPIRG/11 Conclusion 11/17 related to the Membership of the MIDRMA and MIDANPIRG/10 Conclusion 10/33 related to the MIDRMA funding mechanism:

CONCLUSION 12/11: MEMBERSHIP OF THE MID RMA

That, Bahrain, Egypt, Iran, Iraq, Jordan, Kuwait, Lebanon, Oman, Saudi Arabia, Syria, UAE and Yemen committed themselves to participate in the MIDRMA project, through the signature of the Memorandum of Agreement (MOA).

CONCLUSION 12/12: MIDRMA FUNDING MECHANISM

That,

- a) *the activities of the MIDRMA be ensured through contributions from all MIDRMA Member States, which could be recovered in accordance with ICAO Policies on charges for Airports and Air Navigation Services (Doc 9082), in coordination with IATA;*
- b) *the MIDRMA Member States pay their contributions on a yearly basis not later than 1 November of each year based on the invoices issued by ICAO;*

- c) *ICAO ensure that the year of contribution is clearly indicated in the invoices related to the MIDRMA Project;*
- d) *The annual amounts to be paid by the MIDRMA Member States are, as follows:*
 - i) *Bahrain, Egypt, Iran, Oman and Saudi Arabia annual contribution is US\$ 30,000 each; and*
 - ii) *Iraq, Jordan, Kuwait, Lebanon, Syria and Yemen annual contribution is US\$ 10,000 each;*
- e) *UAE is exempted from the payment of contributions to the MIDRMA for the first ten (10) years of operation (up-to end of 2015);*
- f) *the MIDRMA Member States comply with the payment instructions contained in the invoices sent by ICAO HQ (Project code, fund number, invoice number, Bank information, etc);*
- g) *the budget estimate for the MIDRMA operation for each year be prepared/approved by the MIDRMA Board before 31 May of previous year;*
- h) *in case a MIDRMA Member State does not pay the contribution to the MIDRMA Project in a timely manner, the MIDRMA Board might consider to take penalty measures against this State (exclusion from the MID RVSM Safety Monitoring Report, review of the Membership, etc);*
- i) *the MIDRMA Board Chairman, in compliance with the Custodian Agreement and based on the agreed funding mechanism and the estimation of the yearly operating budget of the MIDRMA, be delegated the authority to certify on behalf of the MIDRMA Member States the requests for advance payment from the MIDRMA account managed by ICAO HQ to the MIDRMA Bank account in Bahrain, as decided by the MIDRMA Board;*
- j) *the bills related to the MIDRMA expenses be certified by the MIDRMA Board Chairman and reviewed by the MIDRMA Board at each of its meetings;*
- k) *the MIDRMA funding mechanism be revised by the MIDRMA Board when necessary.*

2.10 MIDANPIRG/12 noted that the MIDRMA Board/10 meeting recognized that the scope of activities and work of the MIDRMA has increased significantly since its establishment. In this regard, it was highlighted that the work of the MIDRMA includes some tasks which are

carried out on daily basis, in particular, the required coordination and follow-up with Member States, Aircraft Operators, and other RMAs especially those adjacent to the MID Region. Accordingly, the meeting agreed that, in order to increase the efficiency of the MIDRMA, the appointment of a full-time employee to the MIDRMA became a necessity. Accordingly, the meeting agreed to the following Conclusion:

CONCLUSION 12/13: MIDRMA STAFFING

That, in accordance with the MIDRMA Memorandum of Agreement (MOA):

- a) *the MIDRMA staff is composed of local personnel provided by Bahrain, as follows:*
 - i) *MIDRMA Manager/Team Leader (Part Time)*
 - ii) *MIDRMA Officer (Full Time)*

- b) *the salaries of the MIDRMA staff are paid as monthly lump sums as follows:*
 - i) *MIDRMA Manager/Team Leader (PartTime) (500 BD)*
 - ii) *MIDRMA Officer (Full Time) (1,500 BD)*

- c) *the MIDRMA staff salaries be revised by the MIDRMA Board when necessary and as appropriate; and*

- d) *Bahrain is responsible of all administrative issues related to the MIDRMA staff, in coordination with the MIDRMA Board Chairman.*

3 RVSM SAFETY ASSESSMENT ACTIVITY

General Requirements

3.1 Implementation of RVSM should be based on a safety assessment, demonstrating that RVSM safety objectives have been satisfied. In accordance with the guidance material contained in the ICAO Manual on implementation of RVSM (Doc 9574), the RVSM safety objectives are set for both technical risk and overall risk as follows:

Safety objective for technical risk:

3.2 Technical risk is the risk of collision associated with aircraft height-keeping performance. Risk associated with operational errors (e.g. controller/pilot errors) and in-flight contingencies is not included.

3.3 The RVSM safety objective for technical risk is a TLS of 2.5×10^{-9} fatal accidents per aircraft flight hour. This value for technical risk was used to derive the global height-keeping performance specification and the global height-keeping performance specification.

Safety objective for overall risk:

3.4 Overall risk is the risk of collision due to all causes, which includes the technical risk and all risk due to operational errors and in-flight contingencies, such as controller/pilot errors, height deviations due to emergency procedures, and turbulence.

3.5 The RVSM safety objective for overall risk should be set by regional agreement.

Standards for Establishment and Operation of an RMA

3.6 Reference is made to Annex 11 para. 3.3.5.1, “*for all airspace where a reduced vertical separation minimum of 300 m (1 000 ft) is applied between FL 290 and FL 410 inclusive, a programme shall be instituted, on a regional basis, for monitoring the height-keeping performance of aircraft operating at these levels, in order to ensure that the implementation and continued application of this vertical separation minimum meets the safety objectives. The coverage of the height-monitoring facilities provided under this programme shall be adequate to permit monitoring of the relevant aircraft types of all operators that operate in RVSM airspace*”.

3.7 Recognizing the safety oversight responsibilities necessary to support the implementation and continued safe use of RVSM, the following standards apply to any organization intending to fill the role of an RMA:

- a) the organization must receive authority to act as an RMA as the result of a decision by a State, a group of States or a regional planning group, or by regional agreement;
- b) the organization acting as an RMA should have personnel with technical skills and experience to carry out the following main functions:
 - i) establish and maintain a database of State RVSM approvals,
 - ii) monitor height-keeping performance,
 - iii) conduct safety and readiness assessments,
 - iv) monitor operator compliance with State approval requirements after RVSM implementation, and

- v) initiate necessary remedial actions if RVSM requirements are not met.

MIDRMA Duties and Responsibilities

3.8 The duties and responsibilities of the MIDRMA are at **Appendix D**.

MID Region safety assessment activity

3.9 The RVSM pre-implementation safety assessment for the MID Region was carried out in 2003 by MECMA.

3.10 The MIDRMA is responsible for the development of the RVSM Safety Monitoring Reports (SMR), which should be presented to MIDANPIRG at each meeting in order to assess the RVSM safety objectives and demonstrate if they have been satisfied or not and propose preventive and corrective measures in order to improve the situation. The first RVSM post-implementation safety assessment was carried out by the MIDRMA in 2007. The safety assessment was based on four safety objectives endorsed by MIDANPIRG, under Conclusion 10/38 as follows:

CONCLUSION 10/38:

MID RVSM OPERATIONS SAFETY ASSESSMENT

That, the safety assessment of RVSM operations in the MID Region be based on the following safety objectives:

- a) *Safety Objective 1: that the vertical-collision risk in MID RVSM airspace due solely to technical height-keeping performance meets the ICAO target level of safety (TLS) of 2.5×10^{-9} fatal accidents per flight hour;*
- b) *Safety Objective 2: that the overall vertical-collision risk – i.e. the overall risk of mid-air collision in the vertical dimension in MID RVSM airspace meets the ICAO overall TLS of 5×10^{-9} fatal accidents per flight hour;*
- c) *Safety Objective 3: address any safety-related issues raised in the SMR by recommending improved procedures and practices; and*
- d) *Safety Objective 4: propose safety level improvements to ensure that any identified serious or risk-bearing situations do not increase and, where possible, that they decrease. This should set the basis for a continuous assurance that the operation of RVSM will not adversely affect the risk of en-route mid-air collision over the years.*

3.11 The MIDRMA Board/7 meeting questioned if for future SMRs, it would be better to consolidate safety objectives #3 and #4. In this regard it was highlighted that contrary to safety objectives #1 and #2 which are measurable, safety objectives #3 and #4 are subjective and inter-related. Accordingly, MIDANPIRG/11 agreed to the following Conclusion, which replaces and supersedes MIDANPIRG/10 Conclusion 10/38:

CONCLUSION 11/22: MID RVSM SAFETY OBJECTIVES

That, the safety assessment of RVSM operations in the MID Region be based on the following safety objectives:

- a) *Safety Objective 1: that the vertical-collision risk in MID RVSM airspace due solely to technical height-keeping performance meets the ICAO target level of safety (TLS) of 2.5×10^9 fatal accidents per flight hour;*
- b) *Safety Objective 2: that the overall vertical-collision risk – i.e. the overall risk of mid-air collision in the vertical dimension in MID RVSM airspace meets the ICAO overall TLS of 5×10^9 fatal accidents per flight hour; and*
- c) *Safety Objective 3: address any safety-related issues raised in the SMR by recommending improved procedures and practices; and propose safety level improvements to ensure that any identified serious or risk-bearing situations do not increase and, where possible, that they decrease. This should set the basis for a continuous assurance that the operation of RVSM will not adversely affect the risk of en-route mid-air collision over the years.*

3.12 MIDANPIRG/12 noted that the wording used for the definition of safety objectives 1 and 2, as endorsed by MIDANPIRG through Conclusion 11/22, is slightly different from the standard wording used in Doc 9574 and agreed accordingly to the following Conclusion to eliminate the differences and avoid any confusion:

CONCLUSION 12/16: MID RVSM SAFETY OBJECTIVES

That, the safety assessment of RVSM operations in the MID Region be based on the following safety objectives:

- e) *Safety Objective 1: The risk of collision in the MID RVSM airspace due solely to technical height-keeping performance meets the ICAO Target Level of Safety (TLS) of 2.5×10^9 fatal accidents per flight hour;*
- f) *Safety Objective 2: The overall risk of collision due to all causes which includes the technical risk and all risk due to operational errors and in-flight contingencies in MID RVSM airspace meets the ICAO overall TLS of 5×10^9 fatal accidents per flight hour; and*
- g) *Safety Objective 3: address any safety-related issues raised in the SMR by recommending improved procedures and practices; and propose safety level improvements to ensure that any identified serious or risk-bearing situations do not increase and, where possible, that they decrease. This should set the basis for a continuous assurance that the operation of RVSM will not adversely affect the risk of en-route mid-air collision over the years.*

3.13 The MIDRMA is responsible for the identification of the exact type and format of data necessary for performing collision risk calculations and the development of the appropriate

forms, accordingly. States are requested to provide the required data in a timely manner. The data includes, but is not necessarily limited to:

- a) approval of operators and aircraft for RVSM operations (monthly);
- b) altitude deviations of 300 ft or more (monthly);
- c) ATC/ATC coordination failures (monthly); and
- d) traffic data (as requested by the MIDRMA);

3.14 MIDANPIRG/10, under Conclusion 10/35, agreed that States not providing the required data to the MIDRMA, in accordance with the requirements of safety monitoring agencies, should be included in the list of air navigation deficiencies. MIDANPIRG/11 re-iterated the importance of provision of required data to the MIDRMA in a timely manner and continuous basis and agreed to the following Conclusion which replaces and supersedes MIDANPIRG/10 Conclusions 10/35 and 10/40:

CONCLUSION 11/21: *SUSTAINED RVSM SAFETY ASSESSMENT*
ACTIVITY IN THE MID REGION

That, considering the on-going requirement for RVSM safety assessment in the MID Region:

- a) *The MIDRMA is responsible for the development of the RVSM Safety Monitoring Reports (SMR);*
- b) *The MIDRMA determine the exact type and format of data necessary for performing collision risk calculations and inform States accordingly;*
- c) *States provide the required data in a timely manner. The data will include, but not necessarily be limited to:*
 - i) *approval of operators and aircraft for RVSM operations (on monthly basis);*
 - ii) *Altitude Deviation Reports (ADR) for deviations exceeding 300 ft (on monthly basis);*
 - iii) *Coordination Failure Reports (CFR) (on monthly basis); and*
 - iv) *traffic data (as requested by the MIDRMA Board);*
- d) *Bahrain, Kuwait, Oman, Saudi Arabia, UAE and Yemen are committed to provide their radar data to the MIDRMA, as, when and where required; and*
- e) *States not providing the required data to the MIDRMA on a regular basis and in a timely manner:*
 - i) *be included in the MIDANPIRG List of air navigation deficiencies; and*
 - ii) *might not be covered by the RVSM SMRs.*

3.15 The forms for reporting flight data, the Coordination Failures (CFRs) and the Altitude Deviation Reports at **Appendices E, F and G**, respectively are also available on the MIDRMA website: www.midrma.com

Requirements for Height Monitoring for aircraft/operators

3.16 In accordance with Annex 6 – Operation of Aircraft, Part I and Part II concerning long term monitoring requirements for height keeping performance, as of 18 November 2010, the State of Registry that had issued an RVSM approval to an operator would be required to establish a requirement which ensures that a minimum of two aeroplanes of each aircraft type grouping of the operator have their height-keeping performance monitored, at least once every two years or within intervals of 1000 flight hours per aeroplane, whichever period is longer. If an operator aircraft type grouping consists of a single aeroplane, monitoring of that aeroplane shall be accomplished within the specified period.

3.17 The MIDRMA has considered the new requirements for long-term height monitoring in some detail, and has agreed that the RVSM Minimum Monitoring Requirements (MMRs) that have been adopted for global application by all ICAO Regional Monitoring Agencies (RMAs) should be the basis for implementation of the Annex 6 requirements. A table detailing the minimum monitoring requirements is published by the MIDRMA in conjunction with ICAO & RMACG and is available on the MIDRMA website.

3.18 In connection with the above, MIDANPIRG/12 reviewed and approved the MID Region height-keeping monitoring Strategy developed by the MIDRMA Board/9 and Board/10 meetings as at **Appendix X** and agreed accordingly to the following Conclusion:

CONCLUSION 12/17: MID REGION HEIGHT-KEEPING MONITORING STRATEGY

*That, the MID Region height-keeping monitoring Strategy is adopted as at **Appendix 5.2D** to the Report on Agenda Item 5.2.*

3.19 (Further details to be added by the MIDRMA on the Vertical Collision Risk Model/Software, Large Height Deviations, Horizontal Overlap and RADAC software, etc)

Appendix A - MIDDLE EAST REGIONAL MONITORING AGENCY (MIDRMA) BOARD - TERMS OF REFERENCE

The Terms of Reference of the MIDRMA Board are as follows:

1. The Board is responsible for overall supervision, direction, and management of the MIDRMA project.
2. The Board shall elect a Chairperson.
3. The elected Chairperson acts as the contact point/coordinator on behalf of the MIDRMA Board members to oversee the MIDRMA project in coordination with ICAO.
4. The Board shall review and update the MIDRMA work plan on a yearly basis and/or whenever required.
5. The Board shall meet at least once a year or when deemed necessary to review/update, consider, and approve:
 - i. the MIDRMA safety reports;
 - ii. matters related to funding mechanism, costs, accounting, etc; and
 - iii. the duties, responsibilities and scope of the MIDRMA.
6. The MIDRMA Board meetings should be hosted by Participating States on rotation basis.
7. The Board reports its activity to MIDANPIRG through the ATM/SAR/AIS Sub Group.

Composition:

The MIDRMA Board shall consist of focal points nominated by each Participating MID RegionState as signatories on their behalf with ICAO Technical Cooperation Bureau (TCB) in relation with the MIDRMA project.

The MIDRMA Board meetings will be attended by:

- The Board members.
- ICAO Regional Office, as permanent observer.
- Other Organizations (EUROCONTROL, IATA, etc) as observes on ad-hoc basis and as required.

Appendix B-CUSTODIAN AGREEMENT

Custodian Agreement between ICAO, the Middle East Regional Monitoring Agency (MID RMA), and Bahrain.

Whereas the Middle East Regional Monitoring Agency (MID RMA) desires to request the International Civil Aviation Organization (ICAO) to perform certain custodian functions with respect to the funds collected from the member States of the MID RMA;

Whereas the member States of the MID RMA, under the Memorandum of Agreement on the Establishment, Operation and Management of the Middle East Regional Monitoring Agency (MID RMA) and its Funding by the Participating States, have authorized the MID RMA Board Chairman to negotiate on behalf of the MID RMA an agreement with ICAO and Bahrain specifying ICAO's role as the custodian of the funds collected for the purpose of the Memorandum of Agreement;

Whereas Bahrain agrees under the Memorandum of Agreement to host the MID RMA in Bahrain and undertakes to monitor the progress of the MID RMA, maintain financial accounting and provide general support and timely reporting;

The Parties have agreed as follows:

1. The Custodian Functions of ICAO

1.1 In accordance with the apportionment provided by the MID RMA Board, ICAO shall use its best efforts to assist in collecting the funds from each of the member States of the MID RMA by issuing a request for payment to each member State.

1.2 ICAO shall act as the custodian of the funds collected under subparagraph 1.1, to the extent defined as follows:

- a) Creating a fund for the MID RMA, in compliance with existing ICAO financial Rules and Regulations.
- b) depositing the funds received into the MID RMA fund mentioned in subparagraph 1.1 and issuing acknowledgements of receipts to individual States when funds are received;
- c) recording the funds received in the MID RMA fund and tracking accrued interest;
- d) reporting on funds received and balance of funds to the RMA Board via its chairman on a quarterly basis;
- e) subject to availability of funds, reimbursing Bahrain on the basis of a certified request for payment by the Chairman of the MID RMA Board on a semi-annual basis;

2. Administration Fees of ICAO

2.1 ICAO shall be entitled to receive ten per cent (10%) of the funds collected, as administration fees.

3. Exclusion of ICAO's Responsibility and Liability

3.1 ICAO has no responsibility to certify that funds spent by Bahrain are for the purpose for which they were intended. Nor shall any form of verification or audit be performed on expenditure related to the MID RMA. Any request for audit shall be commissioned by the MID RMA Board and contracted with an independent external auditor.

3.2 ICAO is under no obligation to provide an itemized statement of expenditure since it has no responsibility for the budget of the MID RMA Board.

3.3 ICAO shall not receive invoices for payment to third parties nor shall it be required to make any disbursements other than to Bahrain for reimbursement of their costs.

3.4 In no event shall ICAO be held liable for any claim or damage arising from the execution of this Agreement. Without limiting the generality of the foregoing, ICAO shall not be liable for:

- a) the failure to collect from member States which are in default. Following two reminders sent to the States by ICAO, it shall be the sole responsibility of the MID RMA Board to engage in further collection action or to enforce any applicable sanctions with respect to members States which are in default;
- b) the loss of the funds, such as in the course of their deposits, transmissions or transfers;
- c) any deficit position of the MID RMA fund.

3.5 The MID RMA shall indemnify, hold and save harmless, and defend, at its own expense, ICAO, its officials, agents, servants and employees, from and against all suits, claims, demands and liability of any nature or kind, including their costs and expenses, arising out of the acts or omissions of the MID RMA or the MID RMA's employees, officers, agents or sub-contractors, in the performance of this Agreement. This provision shall extend, *inter alia*, to claims and liability in the nature of workmen's compensation claims, product liability and liability arising out of the use of patented inventions or devices, copyrighted material or other intellectual property by the MID RMA, its employees, officers, agents, servants, or sub-contractors. The obligations under this clause do not lapse upon termination of this Agreement.

4. Compliance with ICAO Financial Regulations and Rules

4.1 ICAO shall be bound by its Financial Regulations and Rules in all matters under this Agreement. No provision of this agreement shall be interpreted in conflict with the Financial Regulations and Rules.

5. Settlement of Disputes

5.1 Any dispute, controversy or claim arising out of or relating to this Agreement shall be settled amicably through negotiation and consultation between the Parties.

6. Immunity of ICAO

6.1 Nothing in or relating to this Agreement shall be deemed a waiver, express or implied, of any immunity from suit or legal process or any privilege, exemption or other immunity enjoyed or which may be enjoyed by ICAO, its officers and staff, either pursuant to the Convention on the Privileges and Immunities of the Specialized Agencies or other conventions, agreements, laws or decrees of an international character.

7. Language of Correspondence

7.1 All reports, correspondence and other information shall be in English.

8. Notices

8.1 All correspondence between the Parties shall be sent in writing to the following offices and addresses:

- a) **ICAO:** International Civil Aviation Organization
Technical Co-operation Bureau
999 University Street
Montreal, Québec
H3C 5H7
Tel: ++ 514-954-8219 Ext. 8082
Fax: ++ 514-954-6287
E-mail: vdorofeyev@icao.int

- b) **MID RMA:** Middle East Regional Monitoring Agency
(MID RMA)
C/o Civil Aviation Affairs
P.O. Box: 586
Manama, Bahrain
Tel: ++ 973 17 32 91 50
Fax: ++ 973 17 32 91 60
E-mail: midrma@batelco.com.bh

- c) **Bahrain:** The Under Secretary
Civil Aviation Affairs
Bahrain International Airport
Tel: ++ 973 17 321 100
Fax: ++ 973 17 329 066
E-mail: aralgaoud@caa.gov.bh

9. Amendment to the Agreement

9.1 This Agreement may be amended by an instrument in writing signed by each of the Parties.

Termination or Renewal of the Agreement

10.1 This Agreement is concluded initially for a term of two (2) years. It shall be automatically renewed at the time of expiration, unless one Party notifies the other Parties by a prior written notice of three (3) months that it intends to terminate this Agreement at the end of the term.

10.2 ICAO may terminate this Agreement at any time by providing prior written notice of three (3) months.

11. Entry into Force

11.1 This Agreement shall come into force at the time of signature by all the Parties.

Acknowledged and agreed:

Appendix C -MEMORANDUM OF AGREEMENT

**MEMORANDUM OF AGREEMENT
on the establishment, operation and management of the
Middle East Regional Monitoring Agency (MID RMA)
and its funding by the Participating States**

1. PARTIES

1.1 The Parties to this memorandum of agreement are: Bahrain, Egypt, Iran, Jordan, Kuwait, Lebanon, Oman, Saudi Arabia, Syria and Yemen.

2. AGREEMENT

- CONSIDERING the urgent need to institute a programme, on a regional basis, for monitoring the height-keeping performance of aircraft operating in RVSM airspace;
- CONSIDERING the Parties' earlier decision that the Middle East Regional Monitoring Agency (MID RMA) will be funded entirely by the participating States and that the budget estimate for the first year, be paid by the Parties on equal basis;

The Parties have agreed as follows:

1. The Parties to this memorandum of agreement, referred to hereunder as Participating States agree to establish the Middle East Regional Monitoring Agency (MID RMA) and undertake to become its members;
2. The MID RMA shall be managed as a Regional programme; shall have legal personality and shall act through the MID RMA Board;
3. The overall objective of the MID RMA is the promotion of safety of air navigation in the Middle East Region through the operation and management, on a sound and efficient basis, of a permanent MID Regional Monitoring Agency;
4. The MID RMA Board, in which each Participating State is entitled to appoint one member, shall retain overall direction and responsibility for the supervision and operation of the MID RMA in accordance with the relevant obligations of the Participating States under the Convention on International Civil Aviation and its Annexes. The Board shall elect its chairman. It shall inter-alia, supervise and direct the MID RMA, follow-up its activities and reports and assign its priorities. It shall also secure the commitment of Participating States for funding the MID RMA in accordance with agreed funding mechanism and for provision of necessary data for the MID RMA;
5. The MID RMA's scope, duties and responsibilities will be those agreed by the Board's first meeting and could be revised by the Board. The MID RMA will be assigned clear tasks in a step-by-step approach starting with RVSM height monitoring and RVSM post-implementation safety assessment, having in mind the end objectives, which will include RNP/RNAV and SMS. The MID RMA duties and responsibilities will include, but will not be limited to the following:
 - collecting and analysing RVSM data received from MID States as well as from Eurocontrol/FAA, IATA and airlines;
 - collecting data on aircraft approved by various States for operation within RVSM airspace in the MID Region and enter such data in the MID RMA database;
 - verification of the effectiveness of the approval process by States;
 - establishing a database for reporting height deviations of aircraft;
 - verification that the target level of safety on implementation of RVSM is met and maintained;

MID RMA MOA dated 15 February 2006

ZiA

- 2 -

- monitoring the effectiveness of the altimetry system modifications to enable aircraft to meet the required height keeping performance criteria;
 - evaluation of the stability of altimetry system error;
 - undertake monitoring missions to States as required;
 - determine in the light of analysis made of data received and of missions conducted, whether compliance with required safety standards is maintained and initiate corrective action as needed in each case; and
 - submit a report to each Board meeting on MID RMA activities, its analysis of data and any identified departure from RVSM Safety limits, for its consideration and action as appropriate.
6. The Participating States have accepted Bahrain's offer to host the MID RMA in Bahrain to enable the early establishment and functioning of the MID RMA;
 7. Bahrain will provide the offices, equipment and local personnel needed for the MID RMA operations and pay for the initial set up of the MID RMA without waiting for MID States' contributions. The advance payment made by Bahrain shall be recovered through States' contributions in compliance with the agreed funding mechanism;
 8. Based on the agreed funding mechanism for the first year of operation of the MID RMA, the cost for the establishment of the MID RMA, its operation and management for the first year shall not exceed the estimated amount of US\$ 300,000, which shall be borne by the Participating States on equal basis;
 9. The funding mechanism and consequent contributions of Participating States may be modified in subsequent years by decision of the Board;
 10. The MID RMA staff shall be composed of:
 1. MID RMA Manager/Team Leader (Part Time)
 2. One Assistant MID RMA Officer (Full Time)
 3. Database Specialist (Part Time)
 11. The MID RMA Manager/Team Leader shall manage the project on day-to-day basis and effect coordination with the Chairman of the MID RMA Board. He shall submit the MID RMA reports to the Board with copies to the ICAO Regional Office in Cairo;
 12. Bahrain shall monitor the progress of the MID RMA, maintain financial accounting and provide general support and timely reporting;
 13. Participating States authorize the MID RMA Board Chairman to negotiate on behalf of the MID RMA an agreement with ICAO and Bahrain specifying ICAO's role as the custodian of the funds collected for the purpose of this agreement, in compliance with ICAO's Financial Regulations and Rules;
 14. This Memorandum of Agreement shall come into effect on the date it has been signed by the Participating States;
 15. Any amendment to this Memorandum of Agreement, shall be carried out by the parties to this agreement;
 16. Any dispute arising out of or relating to this Memorandum of Agreement, shall be settled by direct consultation between the Participating States concerned;
 17. Any Participating State may withdraw from this Memorandum of Agreement by giving a prior notice of **six (6) months** to other Participating States. The obligations assumed by the Participating States under this Memorandum of Agreement shall continue to exist after the

MID RMA MOA dated 15 February 2006

- 3 -

withdrawal from this Memorandum of Agreement to the extent necessary to permit the orderly finalization of activities, the withdrawal of personnel, the distribution of funds and assets and the settlement of contractual obligations. Additional funds, if necessary, to cover the above mentioned expenditures shall be provided by the Participating States.

18. The hosting of the MID RMA by Bahrain may be terminated at the request of Bahrain, with two years advance written notification to the MID RMA Board to allow sufficient time for selection of an alternative location and necessary arrangements for transfer of the MID RMA.
19. All correspondence relating to the implementation of this Agreement, shall be addressed to:

MID RMA
Chairman of the MID RMA Board
C/o Ministry of Transportation
P.O. Box 586
Bahrain International Airport
Manama - Bahrain

With copy to the:

ICAO Regional Director
ICAO Middle East Regional Office
Egyptian Civil Aviation Complex, Airport Road
P.O Box 85, Airport Post office, Terminal One
11776, Cairo, Egypt

MID RMA MOA dated 15 February 2006

Appendix D -DUTIES AND RESPONSIBILITIES OF THE MIDRMA

The Middle East Regional Monitoring Agency (MIDRMA) has the following duties and responsibilities:

- 1- To establish and maintain a central registry of State RVSM approvals of operators and aircraft using the Middle East Region airspace where RVSM is applied.
- 2- To initiate checks of the “approval status” of aircraft operating in the relevant RVSM airspace, identify non-approved operators and aircraft using RVSM airspace and notify the appropriate State of Registry/State of the Operator and other RMAs, accordingly.
- 3- To establish and maintain a database containing the results of height keeping performance monitoring and all altitude deviations of 300 ft or more within Middle East Region airspace, and to include in the database the results of MIDRMA requests to operators and States for information explaining the causes of observed large height deviations.
- 4- Provide timely information on changes of monitoring status of aircraft type classifications to State Authorities and operators.
- 5- To assume overall responsibility for assessing compliance of operators and aircraft with RVSM height keeping performance requirements in conjunction with RVSM introduction in the Middle East Region.
- 6- To facilitate the transfer of approval data to and from other RVSM Regional Monitoring Agencies.
- 7- To establish and maintain a database containing the results of navigation error monitoring.
- 8- To conduct safety analysis for RVSM operations in the MID Region and prepare RVSM Safety Monitoring Reports (SMR) as instructed by MIDANPIRG and the MIDRMA Board.
- 9- To conduct readiness and safety assessments to aid decision-making in preparation for RVSM implementation in those FIRs where RVSM is not yet implemented.
- 10- To carry out post-implementation safety assessments, as appropriate.
- 11- Based on information provided by States related to planned changes to the ATS routes structure, advise States and MIDANPIRG on the effects of such changes on the safe RVSM operations in the MID Region.
- 12- To liaise with other Regional Monitoring Agencies and organizations to harmonise implementation strategies.

Appendix F – MIDRMA FORMS FOR USE IN OBTAINING RECORD OF RVSM FROM A STATE AUTHORITY

NOTES TO AID COMPLETION OF MIDRMA FORMS F1, F2, AND F3

1. Please read these notes before attempting to complete forms MIDRMA F1, F2, and F3.
2. It is important that the MID Region Approvals have an accurate record of a point of contact for any queries that might arise. Recipients are therefore requested to include a completed MIDRMA F1 with their first reply to the MIDRMA. Thereafter, there is no further requirement unless there has been a change to the information requested on the form.
3. If recipients are unable to pass the information requested in the MIDRMA F2 to the MIDRMA through the Internet, by direct electronic transfer, a hard copy of MIDRMA F2 must be completed for each aircraft granted RVSM approval and fax it to the MIDRMA office on +97317329160. The numbers below refer to the superscript numbers on the blank MIDRMA F2.
 1. Enter the 1 or 2 letter ICAO identifier as contained in ICAO Doc 7910, Index to Nationality Letters for Location Indicators. In the case of there being more than one identifier designated for the State, use the identifier that appears first.
 2. Enter the operator's 3 letter ICAO identifier as contained in ICAO Doc 8585. For International General Aviation, enter "IGA". For military aircraft, enter "MIL". If none, place an X in this field and write the name of the operator/owner in the Remarks row.
 3. Enter the ICAO designator as contained in ICAO Doc 8643, e.g., for Airbus A320-211, enter A320; for Boeing B747-438 enter B744.
 4. Enter series of aircraft type or manufacturer's customer designation, e.g., for Airbus A320-211, enter 211; for Boeing B747-438, enter 400 or 438.
 5. Enter ICAO allocated Aircraft Mode S address code.
 6. Enter yes or no.
 7. Example: For August 27, 2011 write 27/08/2011.
 8. Use a separate sheet of paper if insufficient space available.
4. The above numbers also refer to those superscript numbers used in the MIDRMA F3 - "Withdrawal of Approval to Operate in MID Region RVSM Airspace." **MIDRMA F3 must be completed and forwarded to the MIDRMA immediately when the state of registry has cause to withdraw the approval of an operator/aircraft for operations within the MID Region RVSM Airspace.**

Tel: +973 17 329150
Fax: +973 17 329160

MIDRMA F1 FORM

**POINT OF CONTACT DETAILS/CHANGE OF POINT OF CONTACT DETAILS
FOR MATTERS RELATING TO MID APPROVALS**

This form should be completed and returned to the address above on the first reply to the MIDRMA or when there is a change to any of the details requested on the form (PLEASE USE BLOCK CAPITALS).

STATE OF REGISTRY:

STATE OF REGISTRY (ICAO 2 LETTER IDENTIFIER):
Enter the 1- or 2-letter ICAO identifier as contained in ICAO Doc 7910. In the event of there being more than one identifier for the same State, the one that appears first in the list should be used.

ADDRESS:

CONTACT PERSON:

Full Name:

Title: Surname: Initials:

Post/Position:

Telephone #: Fax #:

E-mail:

Initial Reply*/Change of Details* (*Delete as appropriate)

Tel: +973 17 329150
 Fax: +973 17 329160
 Email - midrma@midrma.com
 P.O. Box 50468
 Kingdom of Bahrain

MIDRMA F2 FORM

RECORD OF APPROVAL TO OPERATE IN MID RVSM AIRSPACE

1. When a State of Registry approves or amends the approval of an operator/aircraft for operations within the MID airspace, details of that approval must be recorded and sent to the Middle East Regional Monitoring Agency (MIDRAM) as soon as possible.

2. Before providing the information as requested below, reference should be made to the accompanying notes (**PLEASE USE BLOCK CAPITALS**).

State of Registry¹:

Name of Operator²:

State of Operator¹:

Aircraft Type³:

Aircraft Series⁴:

Manufacturers Serial No:

Registration No:

Mode S Address Code⁵:

Airworthiness Approval⁶:

Date Issued⁷:

RVSM Approval⁶:

Date Issued⁷:

Date of Expiry⁷ (If Applicable):

Remarks⁸:

Tel: +973 17 329150
Fax: +973 17 329160
Email - midrma@midrma.com
P.O. Box 50468
Kingdom of Bahrain

MIDRMA F3 FORM

WITHDRAWAL OF APPROVAL TO OPERATE IN MID REGION RVSM AIRSPACE

1. When a State of Registry has cause to withdraw the approval of an operator/aircraft for operations within the MID RVSM airspace, details as requested below, must be submitted to the Middle East Regional Monitoring Agency (MIDRAM) by the most appropriate method.
2. Before providing the information as requested below, reference below, reference should be made to the accompanying notes **(PLEASE USE BLOCK CAPITALS)**.

State of Registry¹:

Name of Operator²:

State of Operator¹:

Aircraft Type³:

Aircraft Series⁴:

Manufacturers Serial No:

Mode S Address Code⁵:

Date of Withdrawal of RVSM Approval⁷:

Reason of Withdrawal of RVSM Approval⁸:

Remarks⁸:

Appendix G – Format of RVSM Approvals Data exchanged between RMAs

Column	Field	Example	Notes
1	State of Registry	CP	ICAOState code
2	Operator	RYA	ICAO operator code
3	State of Operator	WA	ICAOState code
4	Aircraft Type	B744	ICAO type
5	Aircraft Monitoring Type	B744-10	MMR type
6	Series	100	Generic from manufacturer
7	Serial No	525B-0196	Manufacturer's number
8	Registration	VHZOO	No dashes or spaces
9	Hex Mode S	AB420F	Six hexadecimal digits 0..9A..F
10	Full RVSM Approval	Y	Y or N (operational approval)
11	Date Full RVSM Approval Issued	22/12/05	dd/mm/yy
12	RVSM Approval Expired/Withdrawn	Y	Y or N
13	Date RVSM Approval Expired/Withdrawn	23/12/05	dd/mm/yy
14	Deregistered	N	Y or N
15	Date of Deregistration		dd/mm/yy (blank if notderegistered)
16	Operator Name	RUDIMENTARY AIRLINES	Avoid commas and accented characters where possible
17	Date of Last Successful Local Monitoring	22/12/05	(Optional) Height-keeping monitoring only within this RMA
18	Remarks		(Optional free text)

Appendix H – REPORT OF LARGE HEIGHT DEVIATION OF 300 FT OR MORE BETWEEN FL 290 AND FL 410

NOTES TO AID COMPLETION OF MIDRMA FORM F4

SPECIFICATION OF THE FIELDS:

1. Enter today's date.
2. Enter the 4 (four) letter ICAO identifier for the FIR or enter the name of the reporting unit.
3. Enter the operator's 3 (three) letter ICAO identifier. For international general aviation, enter "IGA".
4. Enter the call sign and the ACFT registration number.
5. Enter the ICAO designator as contained in ICAO doc 8643, e.g., for airbus a320-211, enter a320; for Boeing b 747-438, enter b744.
6. Enter "yes" or "no". If "yes", inform the flight level.
7. Enter the date of occurrence.
8. Enter the time UTC of occurrence.
9. Enter the occurrence position (fix, Lat/Long or radial and nautical miles).
10. Enter the cleared route of flight (in case of direct or Aleatoric flights, enter "DCT").
11. Enter the cleared flight level.
12. Enter the estimated duration at incorrect flight level (in seconds).
13. Enter the observed deviation in feet (for upwards deviations, write "+", for downwards deviations, write "-").
14. Enter the other traffic involved, if any (call sign, registration number, flight level, aircraft type and route).
15. Enter the cause of deviation according to the **LHD taxonomy** table below:
16. Enter the observed/reported final flight level, providing the source of information (mode c and/or pilot).
17. And 18. Select one of the options: if the aircraft was above or below the cleared level.
18. Select one of the options: if the FL complied with the ICAO annex 2 tables of cruising levels.
19. Write a brief description of deviation.
20. Write the crew comments, if any.

LHD TAXONOMY

Code	LHD Cause
Operational Errors	
A	<p>Flight crew failing to climb/descend the aircraft as cleared</p> <p><i>Example: Aircraft A was at FL300 and assigned FL360. A CLAM alert was seen as the aircraft passed FL364. The Mode C level reached FL365 before descending back to FL360.</i></p>
B	<p>Flight crew climbing/descending without ATC Clearance</p> <p><i>Example: At 0648, Aircraft A reported leaving cruise level FL340. The last level clearance was coincident with STAR issue at 0623, when the flight was instructed to maintain FL340. ATC was applying vertical separation between Aircraft A and two other flights. The timing of the descent was such that Aircraft A had become clear of the first conflicting aircraft and there was sufficient time to apply positive separation with the other.</i></p>
C	<p>Incorrect operation or interpretation of airborne equipment (e.g. incorrect operation of fully functional FMS, incorrect transcription of ATC clearance or re-clearance, flight plan followed rather than ATC clearance, original clearance followed instead of re-clearance etc)</p> <p><i>Example: The aircraft was maintaining a flight level below the assigned altitude. The altimeters had not been reset at transition. The FL assigned was 350. The aircraft was maintaining FL346 for in excess of 4 minutes.</i></p>
D	<p>ATC system loop error; (e.g. ATC issues incorrect clearance or flight crew misunderstands clearance message. Includes situations where ATC delivery of operational information, including as the result of hear back and/or read back errors, is absent, delayed, incorrect or incomplete, and may result in a loss of separation.)</p> <p><i>Example: All communications between ATC and aircraft are by HF third party voice relay. Aircraft 1 was maintaining FL360 and requested FL380. A clearance to FL370 was issued, with an expectation for higher levels at a later point. A clearance was then issued to Aircraft 2 to climb to FL390, this was correctly read back by the HF operator, but was issued to Aircraft 1. The error was detected when Aircraft 1 reported maintaining FL390.</i></p>
E	<p>Coordination errors in the ATC to ATC transfer or control responsibility as a result of human factors issues (e.g. late or non-existent coordination, incorrect time estimate/actual, flight level, ATS route etc not in accordance with agreed parameters)</p> <p><i>Example 1: Sector A coordinated Aircraft 1 to Sector B at FL380. The aircraft was actually at FL400.</i></p> <p><i>Example 2: The Sector A controller received coordination on Aircraft 1 for Waypoint X at FL370 from Sector B. At 0504 Aircraft 1 was at Waypoint X at FL350 requesting FL370.</i></p>
F	<p>Coordination errors in the ATC to ATC transfer or control responsibility as a result of equipment outage or technical issues</p> <p><i>Example: Controller in FIR A attempts to send AIDC message to coordinate</i></p>

	<i>transfer of aircraft at FL320. Messaging unsuccessful and attempts to contact adjacent FIR by telephone fail. Aircraft contacts adjacent FIR without coordination being completed.</i>
Aircraft Contingency Events	
G	Deviation due to aircraft contingency event leading to sudden inability to maintain assigned flight level (e.g. pressurization failure, engine failure) <i>Example: Aircraft 1 descended from F400 to F300 with a pressurisation issue.</i>
H	Deviation due to airborne equipment failure leading to unintentional or undetected change of flight level <i>Example: Aircraft 1 cruising at FL380. ATC receives alert indicating aircraft climbing through FL383. Flight crew advises attempting to regain cleared level with autopilot and navigation system failure.</i>
Deviation due to Meteorological Condition	
I	Deviation due to turbulence or other weather related cause <i>Example: During the cruise at F400, the aircraft encountered severe turbulence, resulting the aircraft descending 1,000 ft without a clearance.</i>
Deviation due to TCAS RA	
J	Deviation due to TCAS resolution advisory, flight crew correctly following the resolution advisory <i>Example: Aircraft 1 was cruising at FL350. Flight crew received "Traffic Alert" from TCAS and almost immediately after an "RA Climb" instruction. Flight crew responded and climbed Aircraft 1 to approx FL353 to comply with TCAS instruction. TCAS display indicated that opposite direction Aircraft 2 descended to approx FL345 and passed below Aircraft 1.</i>
K	Deviation due to TCAS resolution advisory, flight crew incorrectly following the resolution advisory.
Other	
L	An aircraft being provided with RVSM separation is not RVSM approved (e.g. flight plan indicating RVSM approval but aircraft not approved, ATC misinterpretation of flight plan) <i>Example 1: Original flight plan details submitted by FIR A for outbound leg showed Aircraft 1 as negative RVSM. Subsequent flight plan submitted by FIR B showed Aircraft 1 as RVSM approved. FIR A controller checked with aircraft shortly after entering FIR A and pilot confirmed negative RVSM.</i> <i>Example 2: Aircraft 2 cruising FL310 was handed off to the Sector X controller who noticed the label of Aircraft 2 indicated RVSM approval. The Sector X controller had controlled the aircraft the day before. It was then a non-RVSM aircraft. The controller queried the status of Aircraft 2 with the pilot who advised the aircraft was negative RVSM.</i>
M	<i>Other – this includes situations where:</i> <i>i) There has been a failure to establish or maintain a separation standard between aircraft; or</i> <i>ii) Where flights are operating (including climbing/descending) in airspace where flight crews are unable to establish normal air-ground communications with the responsible ATS unit.</i>

	<p><i>Example 1: Aircraft 1 cruising at FL350. At time xxxx Aircraft 1 advised “Negative RVSM” due equipment failure. At that time Aircraft 2 on converging reciprocal track FL360 less than 10 minutes prior to time of passing.</i></p>

Appendix I – ACTUAL FLIGHT PLAN DATA FORM

The formulated excel sheet available in the MIDRMA website www.midrma.com that sheet has been prepared in order to collect all necessary actual/current flight plan data of traffic operating between FL 290 and FL 410 inclusive. The data to be reflected in the Excel sheet includes the following elements:

COLUMN	NAME	DESCRIPTION
A	DATE	Date of Flight – in the form of date/month/year
B	ACFT REG	Aircraft registration
C	ACFT TYPE	Aircraft type
D	ACFT C/S	Aircraft call sign used during the flight
E	DEP ADM	Departure aerodrome of the flight
F	DEST ADM	Destination aerodrome of the flight
G	ENTRY POINT	The point from which the aircraft has entered the FIR boundary or the RVSM airspace between FL 290 & FL410 inclusive, (in case of an aircraft is departing from an aerodrome within the same FIR and the point can not be determined, 0 value must be inserted in this field)
H	ENTRY LEVEL	The Flight level to which the aircraft has entered the relevant FIR (the level must correspond to the RVSM level only - between FL 290 & FL 410 inclusive)
I	ENTRY TIME	The actual time at which the aircraft has entered the FIR or the RVSM airspace (the time must be in UTC four figures time group without any space or dots in between)
J	EXIT POINT	The actual time to which the aircraft has left the FIR boundary or the RVSM airspace or in case of an aircraft is landing in an aerodrome within the same FIR, the point or the nearest point at which the aircraft has left the RVSM airspace, therefore, if this point can not be determined, 0 value must be inserted in this field)

COLUMN	NAME	DESCRIPTION
K	EXIT LEVEL	The Flight level to which the aircraft has exited the relevant FIR (the level must correspond to the RVSM level only - between FL 290 & FL 410 inclusive), for ACFT landing within the FIR, insert 0 value.
L	EXIT TIME	The actual time at which the aircraft has exited the FIR or the RVSM airspace (the time must be in UTC four figures time group without any space or dots in between).
M	TOTAL FLYING TIME	This column has to be left blank, as special formulas shall automatically calculate the flying time, however, the responsibility of filling this field shall solely rely on office.
N	OPERATE WITHIN THE RVSM AIRSPACE LETTER M MUST BE INSERTED.	EQUIPMENT Letter W must be inserted in this field as extracted from the flight plan, if non-RVSM aircraft was permitted to
O	REMARKS	Any other additional remarks or points related to the flight.

Appendix J – MINIMUM MONITORING REQUIREMENTS AS OF JUNE 2010

1. **UPDATE OF MONITORING REQUIREMENTS TABLE AND WEBSITE.** As significant data is obtained, monitoring requirements for specific aircraft types may change. When Table 1 below, is updated, The MIDRMA will advise all State members. The updated table will be posted on the MIDRMA website.

2. **MONITORING PROGRAM.** All operators that operate or intend to operate in the Middle East Region airspace where RVSM is applied are required to participate in the regional RVSM monitoring programme. Table 1 addresses requirements for monitoring the height-keeping performance of aircraft in order to meet regional safety objectives. In their application to the appropriate State authority for RVSM approval, operators must show a plan for meeting the applicable monitoring requirements. Initial monitoring should be completed as soon as possible but not later than 6 months after the issue of RVSM approval, the State of Registry that had issued an RVSM approval to an operator would be required to establish a requirement which ensures that a minimum of two aeroplanes of each aircraft type grouping of the operator have their height-keeping performance monitored, at least once every two years or within intervals of 1000 flight hours per aeroplane, whichever period is longer.

3. **AIRCRAFT STATUS FOR MONITORING.** Aircraft engineering work that is required for the aircraft to receive RVSM airworthiness approval must be completed prior to the aircraft being monitored. Any exception to this rule will be coordinated with the State authority.

4. **APPLICABILITY OF MONITORING FROM OTHER REGIONS.** Monitoring data obtained in conjunction with RVSM monitoring programmes from other Regions can be used to meet regional monitoring requirements. The RMAs, which are responsible for administering the monitoring programme, have access to monitoring data from other Regions and will coordinate with States and operators to inform them on the status of individual operator monitoring requirements.

5. **MONITORING PRIOR TO THE ISSUE OF RVSM OPERATIONAL APPROVAL IS NOT A REQUIREMENT.** Operators should submit monitoring plans to the responsible civil aviation authority and to the MIDRMA that show how they intend to meet the requirements specified in Table 1. Monitoring will be carried out in accordance with this table.

6. **AIRCRAFT GROUPS NOT LISTED IN TABLE 1.** Contact the MIDRMA for clarification if an aircraft group is not listed in Table 1 or for clarification of other monitoring related issues. An aircraft group not listed in Table 1 will probably be subject to Category 2 or Category 3 monitoring requirements.

7. **TABLE OF MONITORING GROUPS.** Table 2 shows the aircraft types and series that are grouped together for operator monitoring purposes.

8. **TRAILING CONE DATA.** Altimetry System Error estimations developed using Trailing Cone data collected during RVSM certification flights can be used to fulfill monitoring requirements. It must be documented, however, that aircraft RVSM systems were in the approved RVSM configuration for the flight.

9. **MONITORING OF AIRFRAMES THAT ARE RVSM COMPLIANT ON DELIVERY.** If an operator adds new RVSM compliant airframes of a type for which it already has RVSM operational approval and has completed monitoring requirements for the type in accordance with the attached table, the new airframes are not required to be monitored. If an operator adds new RVSM compliant airframes of an aircraft type for which it has NOT previously received RVSM operational approval, then the operator should complete monitoring in accordance with the attached table.

Table 1: MONITORING REQUIREMENTS TABLE

MONITORING IS REQUIRED IN ACCORDANCE WITH THIS TABLE			
NOTE: MONITORING PRIOR TO THE ISSUE OF RVSM APPROVAL IS NOT A REQUIREMENT			
CATEGORY	AIRCRAFT GROUP	MINIMUM OPERATOR MONITORING FOR EACH AIRCRAFT GROUP	
1	GROUP APPROVED: DATA INDICATES COMPLIANCE WITH THE RVSM MASPS	A124, A300, A306, A310-GE, A310-PW, A318, A320, A330, A340, A345, A346, A3ST, AVRO, B712, B727, B737CL, B737C, B737NX, B747CL, B74S, B744-5, B744-10, B752, B753, B767, B764, B772, B773, BD100, CL600, CL604, CL605, C17, C525, C560, C56X, C650, C680, C750, CARJ, CRJ7, CRJ9, DC10, E135-145, E170-190, F100, F900, FA10, GALX, GLEX, GLF4, GLF5, H25B-800, J328, KC135, LJ40, LJ45, LJ60, MD10, MD11, MD80, MD90, PRM1, T154	Two airframes from each fleet of an operator to be monitored
2	GROUP APPROVED: INSUFFICIENT DATA ON APPROVED AIRCRAFT	Other group aircraft other than those listed above including: A148, A380, AC95, AN72, ASTR, ASTR-SPX, B701, B703, B703-E3, B731, B732, BD700, BE20, BE30, BE40, B744-LCF, B748, C130, C500, C25A, C25B, C25C, C441, C5, C510, C550-552, C550-B, C550-II, C550-SII, D328, DC85, DC86-87, DC93, DC95, E120, E50P, EA50, F2TH, F70, FA20, FA50, FA7X, G150, GLF2, GLF2B, GLF3, H25B-700, H25B-750, H25C, HA4T, IL62, IL76, IL86, IL96, L101, L29B-2, L29B-731, LJ31, LJ35-36, LJ55, MU30, P180, PC12, SB20, SBR1, SBR2, T134, T204, T334, TBM, WW24, YK42	60% of airframes (round up if fractional) from each fleet of an operator or individual monitoring
3	Non-Group	Non-group approved aircraft	100% of aircraft shall be monitored

Note: The above table represents the minimum monitoring requirements; but RMAs may increase these requirements at their discretion.

Table 2: MONITORING GROUPS FOR AIRCRAFT CERTIFIED UNDER GROUP APPROVAL REQUIREMENTS

Monitoring Group	A/C ICAO	A/C Type	A/C Series

Appendix L – PROCEDURE TO BE FOLLOWED FOR CONDUCTING GMU MONITORING REQUEST:

1. The operators will fill out and submit an RVSM Monitoring Application (Available in the MIDRMA website www.midrma.com)
2. The MIDRMA will request the State CAA for Airworthiness Approval of the aircraft.
3. Upon the receipt of the Airworthiness Approval of the aircraft the MIDRMA is going to forward this certificate to monitoring unit/body as soon as possible with the RVSM Monitoring Application form filled by the operator.
4. The monitoring unit/body will submit a confirmation receipt back to the MIDRMA and will forward the application to their Monitoring Service Team.
5. The Monitoring Service Team will contact the MIDRM and the operator to discuss options and arrange for the Monitoring Services.
6. Operator accepts and agrees on the Monitoring Service proposed working program.
7. The Monitoring Service Team conducts the monitoring flight.
8. The monitoring unit/body will obtain the results from their Monitoring Service Team and shall forward the results to the MIDRMA and the operator.
9. The MIDRMA will issue an official letter to the State CAA and the operator.
10. The State shall issue the appropriate F2 form and send it to the MIDRMA or update all the state's RVSM approvals.
11. The MIDRMA will update the RVSM database accordingly.

Appendix M–ICAO STATE CODES

ICAO State Code	State
OA	Afghanistan
LA	Albania
DA	Algeria
NS	American Samoa
FN	Angola
TQ	Anguilla
TA	Antigua and Barbuda
LV	Areas Under The Control Of The Palestinian Authority
SA	Argentina
UD	Armenia
TN	Aruba
FH	Ascension I.
Y	Australia
LO	Austria
UB	Azerbaijan
MY	Bahamas
OB	Bahrain
VG	Bangladesh
TB	Barbados
