History of the Meeting

PART I – HISTORY OF THE MEETING

1. PLACE AND DURATION

1.1. The first Meeting of the MID Region AIS Database Study Group (MIDAD SG*/1) was held in the Conference hall of the ICAO Middle East (MID) Regional Office, Cairo, Egypt from 20 to 22 February 2012.

2. OPENING

2.1. Mr. Jehad Faqir, ICAO MID Regional Office, Deputy Regional Director, on behalf of Mr. Mohamed R. M. Khonji, the Regional Director, welcomed the participants to Cairo and wished them a successful and fruitful meeting. He highlighted that the successful transition from Aeronautical Information Services (AIS) to Aeronautical Information Management (AIM) is a collective goal. The need for a strategic evolution towards AIM in a manner that will ensure the availability of aeronautical information to any ATM user in a globally interoperable and fully digital environment was underlined.

2.2. Mr. Faqir stated that one of the main challenging projects in the MID Region would be the establishment of a MID Region AIS Database (MIDAD) which would expedite the transition from AIS to AIM in the Region in a harmonized manner. In this respect, he recalled that The DGCA-MID/1 meeting (Abu-Dhabi, UAE, 22-24 March 2011) agreed that the implementation of a Regional/Sub-Regional AIS Database in the MID Region could be a good solution to improve the quality, availability and timeliness of aeronautical information provided to users and pave the way for the transition from AIS to AIM. He highlighted that the MIDAD Study Group provides a good opportunity for all the participants to discuss all technical, financial, human, legal and institutional issues related to MIDAD in order to reach a common understanding of the different possible scenarios for the implementation of the project. However, he underlined that it was not mandatory to reach a final agreement on these issues during the First meeting.

2.3. In closing, Mr. Faqir highlighted that the Study Group has a challenging Work Programme, which needs the active participation and contribution of States, users and the industry. He thanked the participants for their presence and wished the meeting every success in its deliberations.

3. ATTENDANCE

3.1. The meeting was attended by a total of thirty three (32) participants, from nine (9) States (Bahrain, Egypt, Iraq, Islamic Republic of Iran, Jordan, Kuwait, Saudi Arabia, United Arab Emirates, and Yemen) and five (5) International Organizations and Industries (EUROCONTROL, IATA, AVITECH AG, COMSOFT and FREQUENTIS). The list of participants is at the **Attachment A** to the Report.

4. OFFICERS AND SECRETARIAT

4.1. The meeting was chaired by Mr. Moataz Abdel Aziz Ahmed, Director of AIS Publications, National Air Navigation Services Company (NANSC), Egypt. Mr. Mohamed Smaoui, Regional Officer, Air Navigation Services/Aeronautical Information Management (ANS/AIM) was the Secretary of the meeting.

History of the Meeting

5. LANGUAGE

5.1 Discussions were conducted in English and documentation was issued in English.

6. AGENDA

6.1. The following Agenda was adopted:

Agenda Item 1: Adoption of the Provisional Agenda and election of Chairperson

Agenda Item 2: Introduction

Agenda Item 3: Review of the MIDAD Study Report

Agenda Item 4: MIDAD Purpose and Scope

Agenda Item 5: Technical issues/scenarios for the implementation of MIDAD

Agenda Item 6: Operation of MIDAD and maintenance aspects

Agenda Item 7: MIDAD Financial Plan/Funding Mechanism

Agenda Item 8: Legal and Institutional issues associated with the implementation of MIDAD

Agenda Item 9: Future Work Programme

Agenda Item 10: Any other business

7. CONCLUSIONS AND DECISIONS - DEFINITIONS

7.1. All MIDANPIRG Sub-Groups and Task Forces record their actions in the form of Conclusions and Decisions with the following significance:

- a) **Conclusions** deal with the matters which, in accordance with the Group's terms of reference, merit directly the attention of States on which further action will be initiated by ICAO in accordance with established procedures; and
- b) **Decisions** deal with matters of concern only to the MIDANPIRG and its contributory bodies.

8. LIST OF DRAFT CONCLUSIONS AND DRAFT DECISIONS

DRAFT CONCLUSION 1/1: MIDAD PROJECT SECOND PHASE

DRAFT CONCLUSION 1/2: COMMITMENT TO THE MIDAD PROJECT

DRAFT CONCLUSION 1/3: MIDAD LEGAL FRAMEWORK

PART II: REPORT ON AGENDA ITEMS

**REPORT ON AGENDA ITEM 1: ADOPTION OF THE PROVISIONAL AGENDA AND ELECTION OF
CHAIRPERSON**

1.1 The meeting reviewed and adopted the Provisional Agenda as at Para 6 of the History of the Meeting.

1.2 In compliance with the MIDANPIRG Procedural Handbook and based on nomination by Jordan, supported by Bahrain, Saudi Arabia and UAE, the meeting unanimously elected Mr. Moataz Abdel Aziz Ahmed, Director of AIS Publications, National Air Navigation Services Company (NANSC), Egypt, as the Chairperson of the MIDAD Study Group.

Report on Agenda Item 2

REPORT ON AGENDA ITEM 2: INTRODUCTION

2.1 The meeting re-iterated that the implementation of a Regional/Sub-Regional AIS Database in the MID Region would improve the quality, availability and timeliness of aeronautical information provided to users and pave the way for the transition from AIS to AIM, in accordance with the ICAO Roadmap.

2.2 In connection with the above, the meeting recalled that taking into consideration the limitations and drawbacks related to the current operational structure and provision of AIS/AIM services in the MID Region, and the experience of adjacent Regions in the implementation of Regional AIS databases, especially the European AIS Database (EAD), the DGCA-MID/1 meeting held in Abu Dhabi, UAE from 22 to 24 March 2011, through DGCA-MID/1 Conclusion 1/5, agreed that a study/business case be carried out in the MID Region pertaining to the establishment of a MID Region AIS Database (MIDAD). In this respect, the meeting noted with appreciation that Jordan and Bahrain volunteered to take the lead in carrying out the study with the support of appropriate Consultant and in close coordination with ICAO.

2.3 The meeting recalled that the AIS/MAP TF/6 meeting held in Cairo, 6-8 June 2011, underlined that MIDAD would make it easier for users to access aeronautical data and to exchange it with other Regions. The meeting recognized that a project like MIDAD needs integrated programme management principles for the whole life-cycle of the concept/project and a good supporting documentation to allow the development of further actions. It was also highlighted that a strategic decision should be taken from the beginning to cover the whole data chain and to ensure that MIDAD would be compliant with the RTCA DO-200A standards.

2.4 In this respect, the AIS/MAP TF/6 meeting agreed to the establishment of the MIDAD Study Group (MIDAD SG*), to monitor the MIDAD Project and address all associated technical, operational, financial, legal and institutional issues. Accordingly, the meeting agreed to the following Draft Decision:

*DRAFT DECISION 6/7: ESTABLISHMENT OF THE MIDAD STUDY
GROUP*

That, the MID Region AIS Database (MIDAD) Study Group (MIDAD SG) is established with Terms of Reference as at Appendix 3D to the Report on Agenda Item 3.

2.5 The meeting noted that further to the AIS/MAP TF/6 meeting, a MIDAD Support Team (MIDAD ST) has been established in coordination between Bahrain, Jordan and the ICAO MID Regional Office, in order to carry out the missions to States and collect the necessary information. The MIDAD ST was composed of:

- Mrs. Hanan, Qabartai from Jordan;
- Mr. Salah Al-Humood from Bahrain;
- Mr. Mohamed Smaoui, RO/ANS/AIM, ICAO MID Office; and
- Mr. Peter Rudolph from Avitech AG, Germany (Consultant).

MIDAD SG*/1
Report on Agenda Item 2

2.6 The meeting noted that on 30 June 2011, the ICAO MID Regional Office issued State Letter Ref.: AN 8/4.2 – 11/174 for the conduct of missions to States, as part of the first phase of the MIDAD study, requesting States to provide all necessary information and support to the MIDAD ST.

2.7 The meeting noted that, based on the DGCA-MID/1 Conclusion 1/5, the 13 MID States have been divided into two Groups, as follows:

- **Group lead by Jordan:**

Egypt, Iran, Iraq, Jordan, Lebanon and Syria; and

- **Group lead by Bahrain:**

Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, UAE and Yemen.

2.8 The meeting was apprised of Jordan's experience with EAD. In particular, it was highlighted that Jordan migrated to EAD in three phases.

2.9 Based on the above, the meeting acknowledged the challenges associated with the implementation of an important project such as MIDAD. In this respect, it was recognized that the legal, institutional and human resources (training) issues are the most challenging. With regard to human resources and training issues, it was highlighted that one of the main objectives of MIDAD would be to facilitate the transfer of know-how; and accordingly, it was emphasized that the training plan and requirements (skills and knowledge) need to be developed from the beginning of the project.

2.10 In connection with the above, it was underlined that the success of the MIDAD project is directly linked to the effectiveness of the MIDAD Study Group. Accordingly, the meeting urged States to provide all necessary support to the MIDAD Study Group and participate actively in the decision-making process.

2.11 The meeting agreed that the MIDAD Study Group provides a good opportunity for all its members to discuss all technical, financial, human, legal and institutional issues related to MIDAD in order to reach a common understanding of the different possible scenarios for the implementation of the project as well as the project tasks and objectives. However, it was highlighted that it's not necessary to reach a final agreement on these issues during the first meeting of the Study Group, since some of the decisions might need a more detailed study and the endorsement of MIDANPIRG or the DGCA-MID meeting(s).

MIDAD SG*/1
Report on Agenda Item 3

REPORT ON AGENDA ITEM 3: REVIEW OF THE MIDAD STUDY REPORT

3.1 The meeting recalled that the objective of the MIDAD study, at its first step, was to collect data from States in order to get a realistic and sound picture of the situation in the AIS Offices in the Region in terms of organization, staffing, facilities and infrastructure, workload, automation, transition to AIM, and most importantly to identify the States' commitment, support and interest in MIDAD and its inclusion in the planning process for the transition to AIM.

3.2 The meeting was apprised of the questionnaire, which was developed by the MIDAD ST to support the interviews during the missions to States.

3.3 The meeting further noted that the missions to States were intentionally used by the MIDAD ST to explain the MIDAD concept and the different possible scenarios for the implementation of MIDAD as well as to clarify the different steps of the transition from AIS to AIM, answer States' questions in this respect and generate ownership in the MIDAD project.

3.4 In connection with the above, the meeting noted that Missions were conducted to Bahrain, Egypt, Iran, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia and Syria. The Missions to Iraq, UAE and Yemen could not be conducted; however, information has been provided by these States through emails.

3.5 The meeting reviewed and updated the Report related to the Initial MIDAD Study (First Phase) and the analysis of the information gathered from States as at **Appendix 3A** to the Report on Agenda Item 3. It was highlighted in this respect that the majority of States expect many advantages from MIDAD and would like to play an active role in the MIDAD Project, which is very encouraging. In particular, it was noted with appreciation that:

- a) 10 out of 13 States plan to include MIDAD into their national planning for AIS/AIM;
- b) 10 out of 13 States are committed to MIDAD;
- c) 10 out of 13 States believe that MIDAD has a realistic chance to be realized. The overall success probability of MIDAD is around 70%;
- d) 9 out of 13 States like to play an active role in the MIDAD project;
- e) 7 out of 13 States like to provide contributions to the MIDAD set-up;
- f) 8 out of 13 States like to participate in the operation of MIDAD;
- g) 9 to 10 States believe that MIDAD would improve safety and efficiency and bring environmental benefits; and
- h) currently, 7 States have no preferred method of funding of the MIDAD project, and no preferred legal framework/institutional scenario or option.

3.6 The meeting agreed that further analysis of the replies to the questionnaires provided by States might be conducted in the second phase of the MIDAD study.

3.7 The meeting agreed that the first phase of the MIDAD study is considered completed and has achieved the expected goals. Based on the Recommendations contained in the Initial MIDAD Study Report, the meeting agreed to move ahead with the Project.

MIDAD SG*/1
Report on Agenda Item 3

3.8 Based on the above, the meeting agreed that the commitment of States to the MIDAD Project should be officially recorded in a legal document. This would be part of the second phase of the study. Accordingly, the meeting agreed to the following Draft Conclusions:

DRAFT CONCLUSION 1/1: MIDAD PROJECT SECOND PHASE

That, taking into consideration the results of the first phase of the MIDAD Study, States, Users and all concerned stakeholders be invited to provide all necessary support for the achievement of the second phase of the MIDAD Project.

DRAFT CONCLUSION 1/2: COMMITMENT TO THE MIDAD PROJECT

That, as part of the second phase of the MIDAD Project:

- a) a Memorandum of Agreement (MOA) be signed by Bahrain, Iran, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria and Yemen in order to legally reflect their commitment to the MIDAD Project; and*
- b) other States from within and outside the MID Region, interested to participate in the MIDAD Project, be invited to sign the MOA.*

CHAPTER 1 - FORWARD

1.1 Rational

1.1.1 This Initial Study Report is intended to describe, summarise, and analyse the position of 13 States in the ICAO Middle East Region regarding the establishment of a MID Region AIS Database (MIDAD).

1.1.2 The Initial Study Report is a follow-up action on the DGCA-MID/1 Conclusion1/5, AIS/MAP TF/6 Draft Decision 6/7, ATM/SAR/AIS SG/12 Draft Decision 12/14 and subsequent set-up and work of the MIDAD Support Team (MIDAD ST).

1.1.3 The MIDAD ST was set-up in collaboration between Bahrain, Jordan, and the ICAO Middle East Office.

1.1.4 The Initial Study Report is consolidated based on the data and information made available by States through the replies to the MIDAD Questionnaires and/or interviews conducted during the MIDAD Missions.

1.1.5 It initially analyses this material for presentation to the MIDAD SG*/1 meeting.

1.1.6 Further detailed analysis might be developed for the purpose of the MIDAD detailed Study during the Second Phase of the Project.

1.2 Structure of the Initial Study Report

Chapter 2 - Introduction

This chapter describes the background, the objectives of the Study, the team which conducted the study, the questionnaire used and the missions conducted.

Chapter 3 – Analysis

This chapter contains the initial analysis of the filled questionnaires.

Chapter 4 – Summary / Recommendations

This chapter contains a short summary and recommendations for future work based on the findings of the initial MIDAD study.

Appendices

Appendix A contains the completed MIDAD questionnaires provided by States;
Appendix B contains the empty MIDAD questionnaire; and
Appendix C provides a general analysis of States' replies to the MIDAD Questionnaires.

CHAPTER 2 - INTRODUCTION

2.1 Background

2.1.1 The role and importance of aeronautical data has changed significantly with the implementation of Area Navigation (RNAV), Required Navigation Performance (RNP), and airborne computer-based navigation systems, including Global Navigation Satellite Systems (GNSS). These systems are all data-dependent, and in that respect aeronautical data has become the necessary critical component of the system. Consequently corrupt or erroneous aeronautical data can potentially affect the safety of air navigation.

2.1.2 The advent of RNP Authorisation Required (RNP AR) for terminal operations will enhance the requirements again. Therefore ICAO has established standards and recommended practices which require all contracting States to introduce a properly organised quality system. This quality system must provide users with the assurance and confidence that distributed aeronautical data satisfy defined operational requirements for data quality (accuracy, resolution and integrity) and timeliness.

2.1.3 The required data integrity classification of Annex 15, Appendix 7 and 8, and Annex 4, Appendix 6, is not achieved yet; re-entry or manual transfer of data is one of the major factors for data integrity loss and missing verification processes cause data corruptions.

2.1.4 Consequently MIDANPIRG and its subgroups have addressed the above-subject and the DGCA-MID/1 Meeting concluded that measures shall be undertaken to pave the way for a sub regional activity in the MID Region to enhance aeronautical data quality and availability across the Region. The Conclusion 1/5 – (MID Region AIS Database – MIDAD) of DGCA-MID/1 states inter alia:

That,

- a) Jordan and Bahrain take the lead in carrying out a study/business case pertaining to the establishment of a MID Region AIS Database (MIDAD), in close coordination with ICAO;*
- b) States provide all necessary information and support for the achievement of the study; and*
- c) Jordan and Bahrain present the outcome of the study to the appropriate MIDANPIRG subsidiary bodies (AIS/MAP TF and ATM/SAR/AIS SG).*

2.1.5 Subsequently, the AIS/MAP TF/6 and ATM/SAR/AIS SG/12 took appropriate action by establishing the MID Region AIS Database Study Group (MIDAD SG) and the MIDAD Support Team (MIDAD ST).

2.1.6 The MIDAD ST conducted missions to 10 of the 13 ICAO Middle East Region States during the year 2011.

2.1.7 This Report documents and summarises the analyses and findings of the MIDAD ST.

2.2 Objectives of the Study

2.2.1 The objective of the MIDAD Initial Study is to collect data from States in order to get a realistic and sound picture of the situation in the AIS Offices in the Region in terms of organization, staffing, facilities and infrastructure, workload, automation, transition to AIM, and most importantly to identify States' commitment, support and interest in MIDAD and its

inclusion in the planning process for the transition to AIM. Therefore, the method of face-to-face meetings (mission interviews) with the States' representatives was the chosen methodology for increased efficiency in order to get, as much as possible, realistic overview.

2.2.2 On the other side the MIDAD missions were intentionally used by the Support Team to explain the MIDAD initiative and its relationship with the AIM concept, the different scenarios for the implementation of MIDAD as well as to clarify the different steps of the transition from AIS to AIM and answer States' questions in this respect.

2.2.3 In addition, the MIDAD Initial Study was used to:

- a) identify interest in shareholder ship;
- b) document initial discussions about requirements;
- c) document States' suggestions; and
- d) generate ownership in the MIDAD project.

2.2.4 Finally the MIDAD interviews/questionnaires results shall be documented in a study report as a basis for future work.

2.3 The Team

2.3.1 Initiated by Bahrain and Jordan, and based on Conclusion 1/5 of the DGCA-MID/1 meeting, Bahrain, Jordan, and the ICAO Middle East Office established the MIDAD Support Team (MIDAD ST) consisting of the following persons:

NAME	CONTACT DETAILS

2.3.2 The MIDAD ST prepared the questionnaires, conducted the missions, evaluated the results from the filled questionnaires and consolidated this Initial Study Report.

2.4 The Questionnaire

2.4.1 The empty questionnaire is contained in **0** to this Report.

2.4.2 Based on the agreed subjects to be covered by the MIDAD questionnaire (Appendix 3C to the AIS/MAP TF/6 Report), the following question blocks were included in the questionnaire, to support the interviews to be conducted during the missions to States:

- a) 0.1 – Cover Sheet
- b) 0.2 – Instructions for Use
- c) 1 – Organisational Structure
- d) 2 – Volume of Activities
- e) 3 – AIS/AIM Facilities

2.5 The Missions to States

2.5.1 The missions to States were coordinated with States by the ICAO MID Regional Office through State Letter Ref.: AN 8/4.2 – 11/174 dated 30 June 2011.

2.5.2 The schedule of the missions was as follows:

	State	Starting Mission	Ending Mission	Team ¹
1	Jordan	17 July 2011	17 July 2011	H & P
2	Egypt	19 July 2011	19 July 2011	H & P

2.5.3 The missions have been conducted as planned to Bahrain, Egypt, Iran, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia and Syria. (*)The Missions to Iraq, UAE and Yemen could not be conducted; however, information has been provided by these States through correspondence.

2.5.4 **Figure 1** shows the two management groups lead by Bahrain and Jordan and those States which have been interviewed remotely.

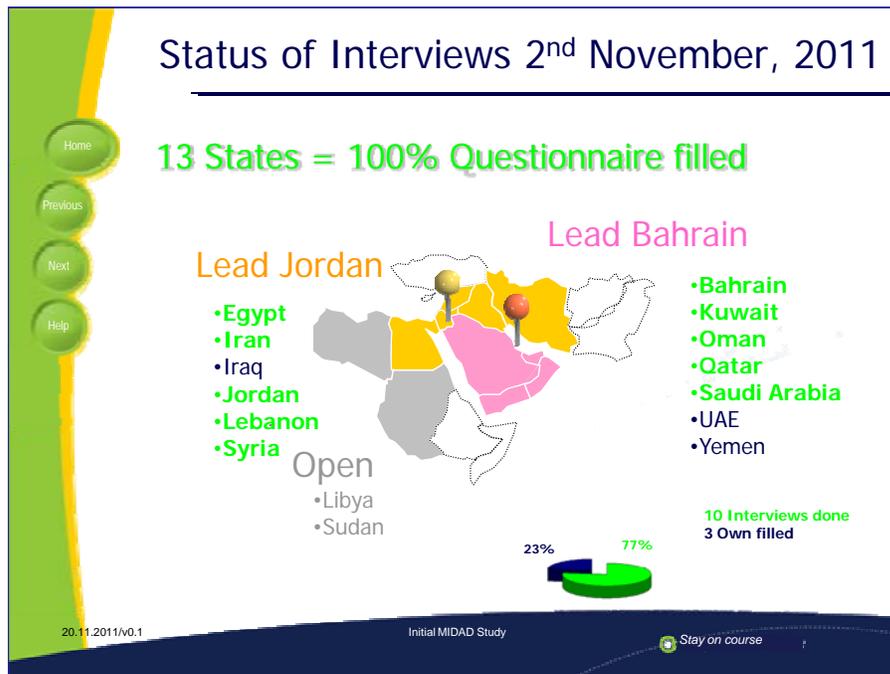

Figure 1: Conducted Missions

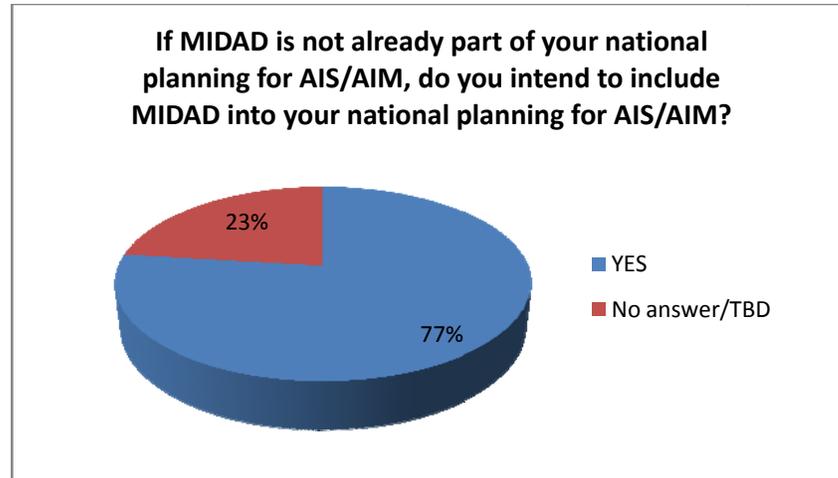

2.5.5 Personal note from the MIDAD ST: The meetings and interviews during the missions have happened in a very cooperative, friendly and supporting open atmosphere. The Support Team wishes to express its thanks and appreciation to all participants of those meetings for that. The MIDAD ST would like also to take this opportunity to express its sincere appreciation and gratitude for the generous hospitality the visited States extended to the Team. The support provided by the Civil Aviation Authorities contributed to the success of the Missions.

CHAPTER 3 - ANALYSIS

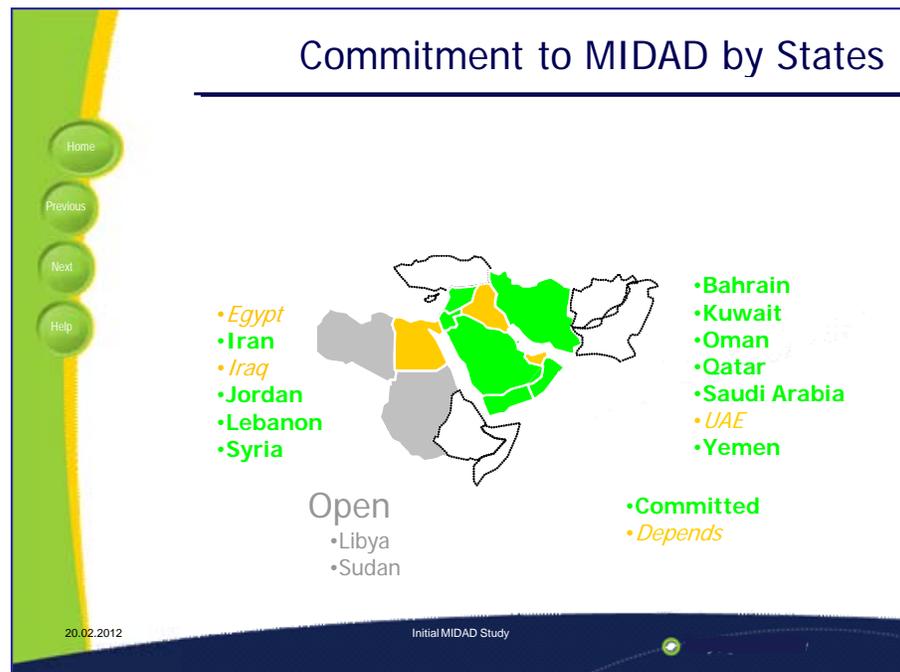

3.1 Initial Analysis

3.1.1 The Table at **Appendix C** provides the States' replies to selected questions from the different blocks of the MIDAD Questionnaire for the analysis purpose in order to get an overview of the most important issues related to MIDAD. In particular, it's to be highlighted that:

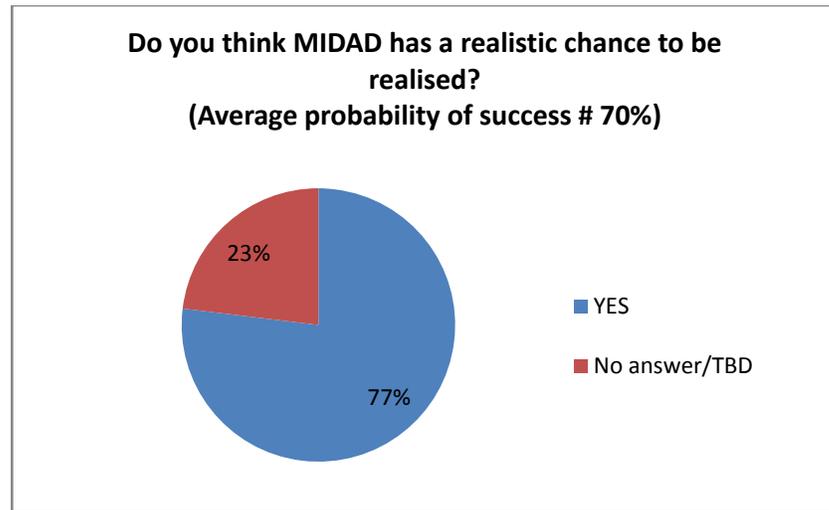

- a) 10 out of 13 States plan to include MIDAD into their national planning for AIS/AIM;

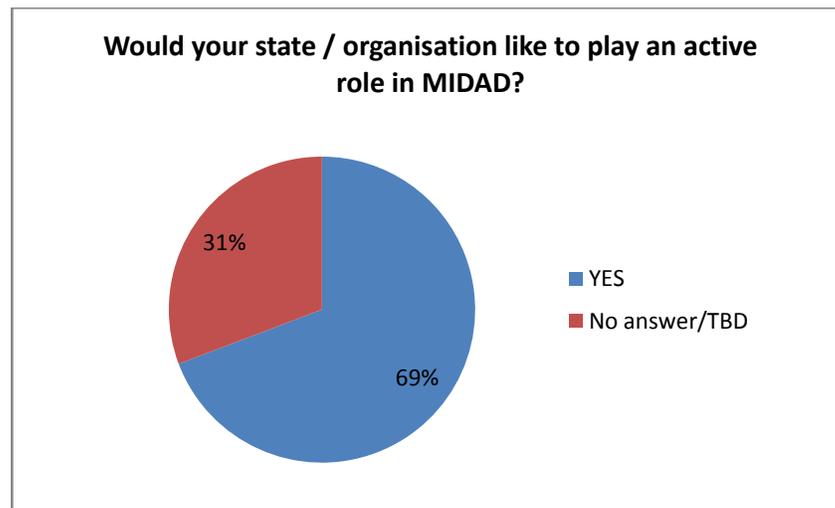

- b) 10 out of 13 States are committed to MIDAD;

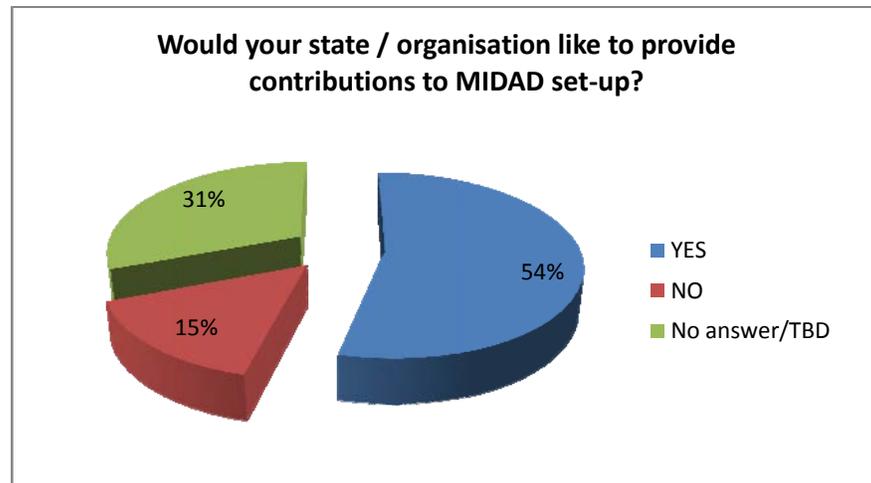

- c) 10 out of 13 States believe that MIDAD has a realistic chance to be realised. The overall success probability of MIDAD is around 70%;

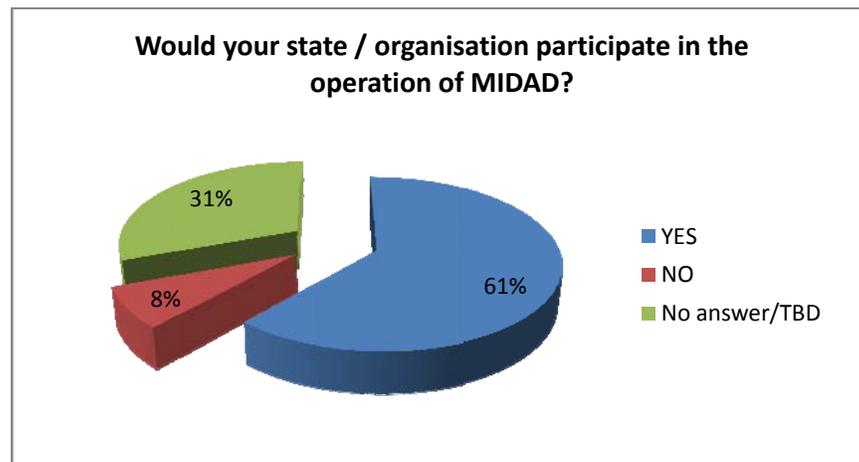

- d) 9 out of 13 States like to play an active role in the MIDAD project;

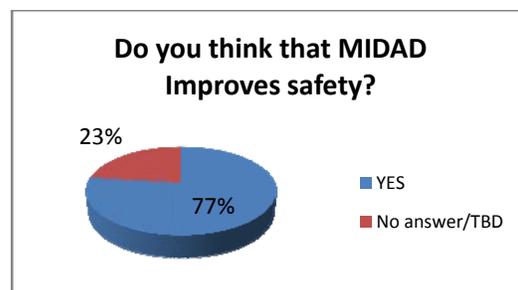

- e) 7 out of 13 States like to provide contributions to the MIDAD set-up;

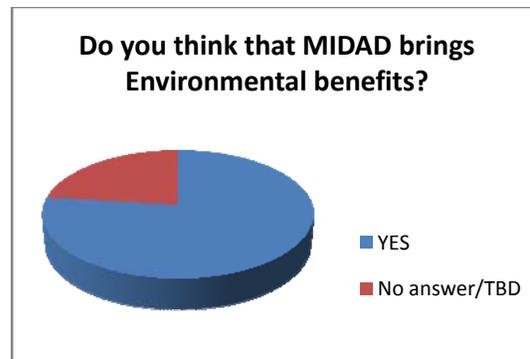

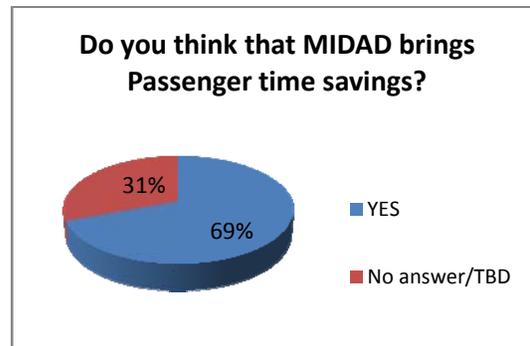

f) 8 out of 13 States like to participate in the operation of MIDAD;

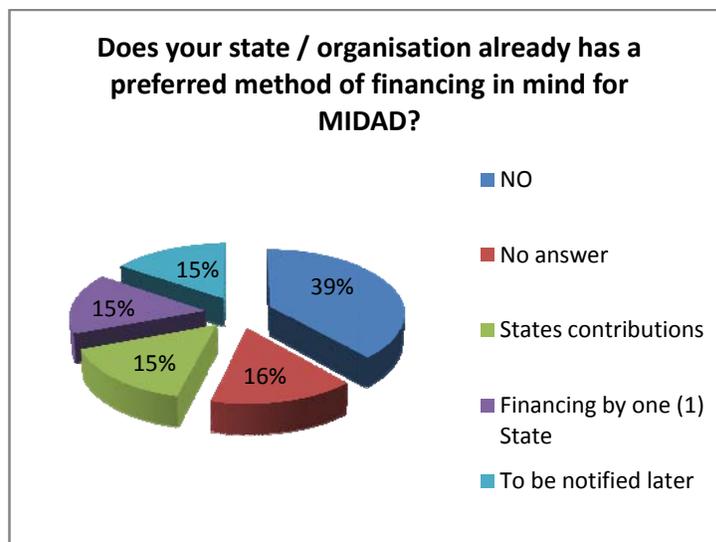

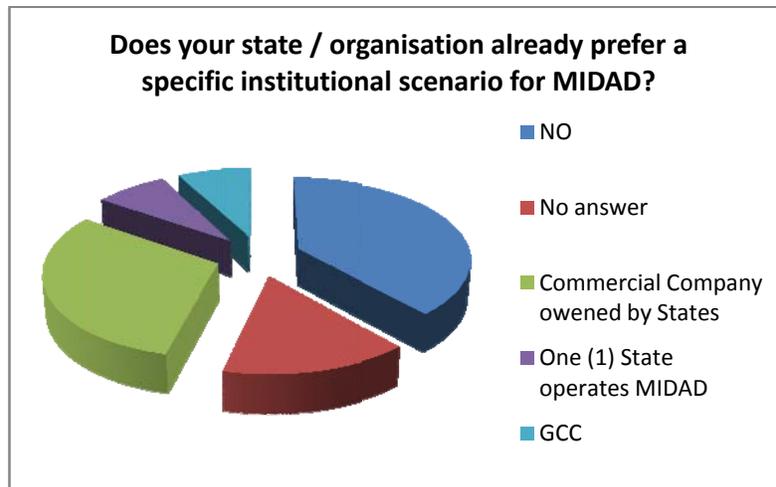

g) 9 to 10 States believe that MIDAD would improve safety and efficiency and bring environmental benefits;

h) currently, 7 States have no preferred method of funding of the MIDAD project, and no preferred legal framework/institutional scenario or option.

3.2 Further Analysis

Further detailed analysis might be developed for the purpose of the MIDAD detailed Study during the Second Phase of the Project.

CHAPTER 4 – SUMMARY / RECOMMENDATIONS

4.1.1 The missions have been very successful. The States' support and interest were excellent and the filled questionnaires form a very good basis for future analysis and help in the future project plan.

4.1.2 The first phase of the MIDAD Study is considered completed and has achieved the expected goals. The MIDAD Support Team suggests moving forward with the planning for MIDAD as the level of commitment to MIDAD by States at such an early stage is a good basis for a successful finalisation and final implementation and operation of MIDAD.

4.1.3 MIDAD would enhance the aeronautical data quality, availability and timeliness in the MID Region.

4.1.4 For an efficient operation of MIDAD, a clear and documented Concept of Operation based on the target aeronautical data chain as published in RTCA DO-200A/EUROCAE ED76 standards should be developed.

4.1.5 The MIDAD Project should follow a phased implementation approach. It's necessary to reach first an agreement on the MIDAD legal framework and then the funding of the second phase of the MIDAD project, which will include, inter-alia, the development of the Financial Plan/Model for the whole MIDAD Project phases (set-up, operations, maintenance, etc).

4.1.6 The potential users' organizations and stakeholders (IATA, CANSO, AACO, GCC, etc), as well as the Military Authorities, should be made aware of the MIDAD Project and invited to participate actively in its development to generate ownership.

4.1.7 MIDAD should be designed not only to support the present users' needs but also the future ATM requirements as defined in the ATM Operational Concept (Doc 9584), in particular, the Collaborative Decision Making (CDM) and the System Wide Information Management (SWIM);

4.1.8 Human resources and training issues associated with MIDAD should be given utmost attention.

4.1.9 The establishment of a MIDAD Supervisory Management Board might be necessary for the supervision of the MIDAD Project. Another Alternative is to leave this task to the DGCA's themselves through direct correspondence and/or through the DGCA-MID meetings.

Instruction for use of the Questionnaire

With answering the questions in this Questionnaire you and your organisation can contribute to pave the way for MIDAD into the right direction!

Please answer the questions carefully. If you think that some questions can not be answered or shall not be answered please indicate this accordingly.

Answering the questions is voluntarily.

If there are questions about the questions please contact one of the contact persons of the Mission Team mentioned under the "Contacts Tab". These are the same persons as mentioned in Attachment A to ICAO State Letter AN 8/4.2 - 11/174.

Thank you very much for your help!

Instruction for use of the Questionnaire

With answering the questions in this Questionnaire you and your organisation can contribute to pave the way for MIDAD into the right direction!

Please answer the questions carefully. If you think that some questions can not be answered or shall not be answered please indicate this accordingly.

Answering the questions is voluntarily.

If there are questions about the questions please contact one of the contact persons of the Mission Team mentioned under the "Contacts Tab". These are the same persons as mentioned in Attachment A to ICAO State Letter AN 8/4.2 - 11/174.

Thank you very much for your help!

Instruction for use of the Questionnaire

With answering the questions in this Questionnaire you and your organisation can contribute to pave the way for MIDAD into the right direction!

Please answer the questions carefully. If you think that some questions can not be answered or shall not be answered please indicate this accordingly.

Answering the questions is voluntarily.

If there are questions about the questions please contact one of the contact persons of the Mission Team mentioned under the "Contacts Tab". These are the same persons as mentioned in Attachment A to ICAO State Letter AN 8/4.2 - 11/174.

Thank you very much for your help!

Instruction for use of the Questionnaire

With answering the questions in this Questionnaire you and your organisation can contribute to pave the way for MIDAD into the right direction!

Please answer the questions carefully. If you think that some questions can not be answered or shall not be answered please indicate this accordingly.

Answering the questions is voluntarily.

If there are questions about the questions please contact one of the contact persons of the Mission Team mentioned under the "Contacts Tab". These are the same persons as mentioned in Attachment A to ICAO State Letter AN 8/4.2 - 11/174.

Thank you very much for your help!

Instruction for use of the Questionnaire

With answering the questions in this Questionnaire you and your organisation can contribute to pave the way for MIDAD into the right direction!

Please answer the questions carefully. If you think that some questions can not be answered or shall not be answered please indicate this accordingly.

Answering the questions is voluntarily.

If there are questions about the questions please contact one of the contact persons of the Mission Team mentioned under the "Contacts Tab". These are the same persons as mentioned in Attachment A to ICAO State Letter AN 8/4.2 - 11/174.

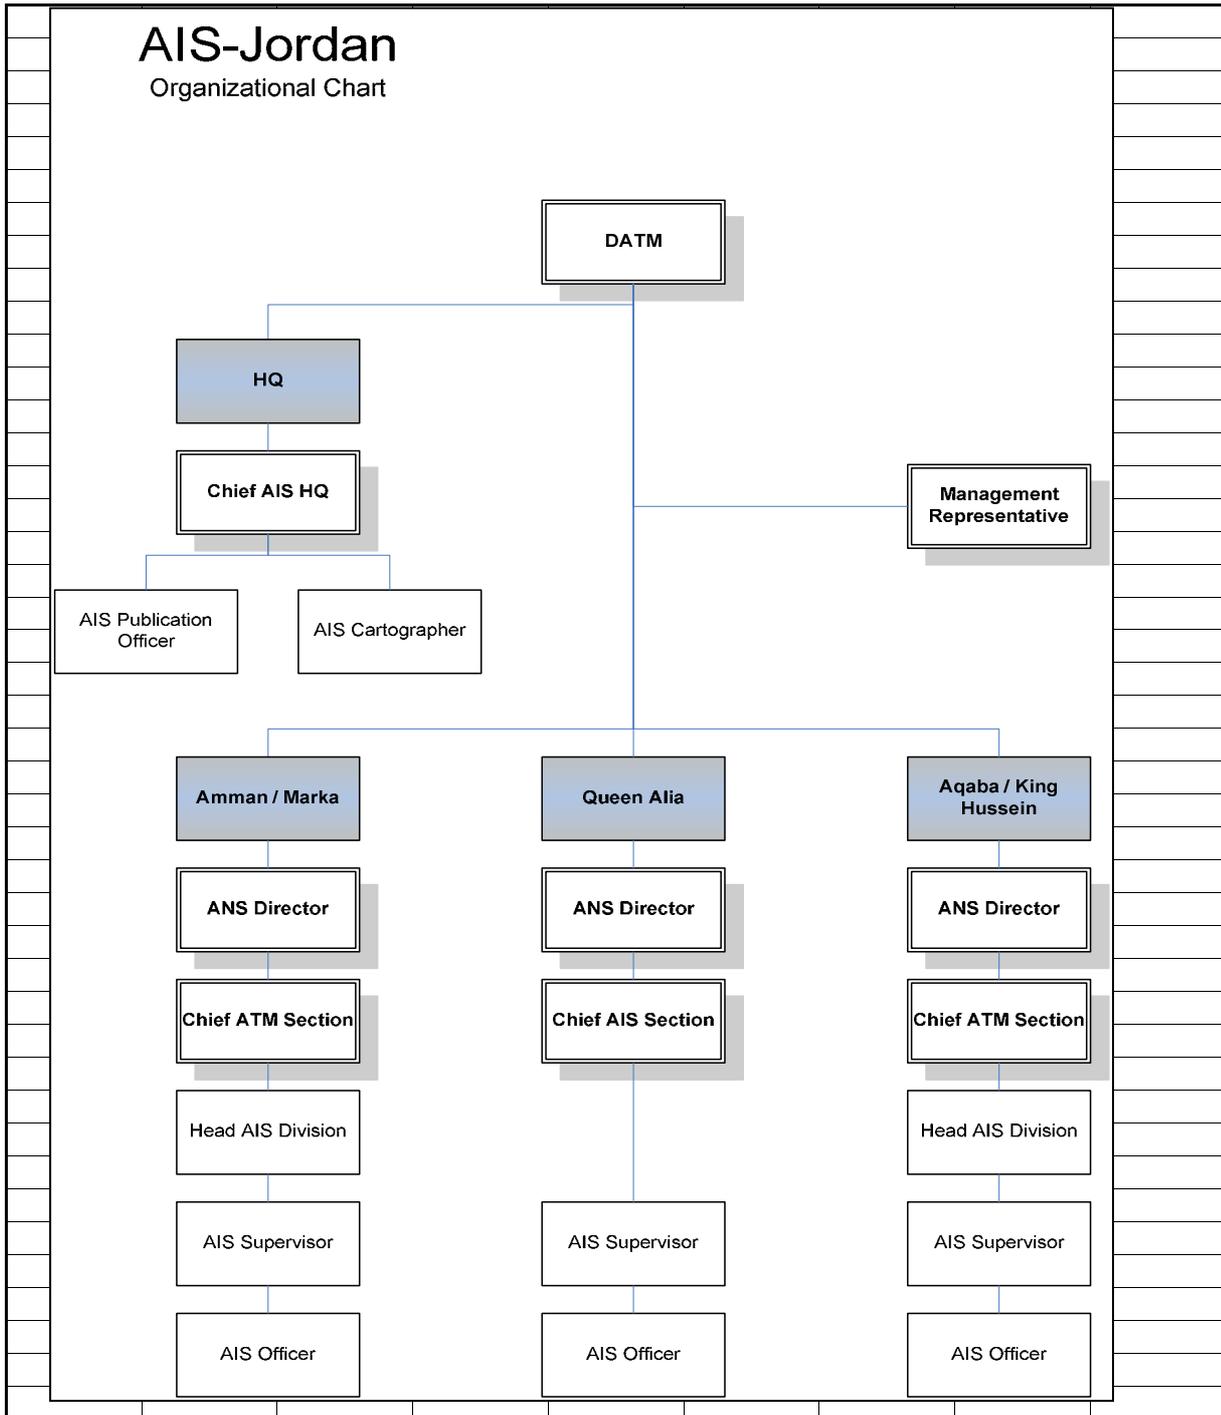

Thank you very much for your help!

Report on Agenda Item 4

REPORT ON AGENDA ITEM 4: MIDAD PURPOSE AND SCOPE

4.1 The meeting was apprised of the European AIS Database (EAD) and AFI Centralized AIS Database (AF-CAD) experiences and the lessons learned from these experiences.

4.2 The meeting was apprised of the latest and future developments related to AIM, in particular, the outcome of the ICAO AIS-AIM SG and the plans/timelines for the development of:

- Amendments 37 (date of applicability Nov 2013) and 38 (date of applicability 2016) to Annex 15;
- Amendments 57 (date of applicability Nov 2013) and 58 (date of applicability 2016) to Annex 4;
- the new Roadmap for the transition from AIS to AIM which will be presented to the 12th Air navigation Conference (ANConf/12) to be held in Montreal, 19-30 November 2012, as well as the endorsement of the Aviation System Block Upgrades (ASBUs);
- the new AIM Operational Concept and PANS-AIM Document; and
- the AIM/MET Divisional Meeting planned for 2014.

4.3 The meeting agreed that, in addition to the users' requirements, all of the above should be taken into consideration when developing the MIDAD scope, which needs finally to be documented in a User Requirements Document.

4.4 The meeting agreed that MIDAD should be designed not only to support the present users' needs but also the future ATM requirements as defined in the ATM Operational Concept (Doc 9584), in particular, the Collaborative Decision Making (CDM) and the System Wide Information Management (SWIM).

4.5 The meeting agreed that as part of the second phase of the MIDAD Project, the users of MIDAD shall be clearly identified and their requirements associated with MIDAD need to be agreed upon, and included in the MIDAD phased implementation plan. The identification of the users' requirements could be done through face-to-face meetings, questionnaires, interviews, etc. It was recognized that a phased implementation plan based on an agreed schedule with the users can reduce the complexity and risk of implementation.

4.6 In connection with the above, the meeting agreed that the potential users' organizations and stakeholders (IATA, CANSO, AACO, GCC, etc), as well as the Military Authorities, should be made aware of the MIDAD Project and invited to participate actively in its development to generate ownership. In this respect, it was agreed that this could be facilitated through the presentation of MIDAD to the IATA RCG meetings, CANSO ME Conference, ICAO MID AIM Seminar and Civil/Military Coordination Seminar, GCC meetings, etc.

4.7 The meeting agreed that the development of the Requirements Document is the responsibility of the ICAO MIDAD Study Group, which might need assistance to fulfill this task.

REPORT ON AGENDA ITEM 5: TECHNICAL ISSUES/SCENARIOS FOR THE IMPLEMENTATION OF MIDAD

5.1 The meeting noted that in a collaborative environment like MIDAD there are always different possible topology solutions. The finally chosen topology must be based on sound requirements which have been assessed very carefully.

5.2 There are basically three different possible topologies for a regional AIS database:

- Central solution;
- Replicated solution; and
- Distributed solution.

5.3 Each topology has advantages and disadvantages. The best scenario should be based on the agreed user requirements and associated technical specifications.

Central Solution

5.4 A centralized database has all its data in one place, which is different from the distributed or replicated databases where data is available in different places. Therefore, problem of bottle-neck can occur, and data availability is not efficient as in distributed database. A centralized database requires reliable connectivity and real-time coordination of activity. A single centralized database is usually easier to set up and administer from the database end. But the connection setup might be more complex, and lag time could be a problem.

Replicated Solution

5.5 Database replication is the creation and maintenance of multiple copies of the same database. In most implementations of database replication, one database server maintains the master copy of the database and additional database servers maintain slave copies of the database. The central server will then replicate all data to the Data Provider systems. Data User Systems can be connected at the central server and at the Data Provider server.

5.6 Database replication turns out to be complicated since it increases in size and magnitude. It establishes considerably bigger expenses and intricacy which may make it not viable in several circumstances.

Distributed Solution

5.7 Distributed system is a collection of independent computers that appear to the users of the system as a single computer. A distributed database is a collection of multiple, logically interrelated databases distributed over a computer network. A distributed database is a database in which portions of the database are stored on multiple computers within a network. Users have access to the portion of the database at their location so that they can access the data relevant to their tasks without interfering with the work of others. A centralized distributed database management system (DDBMS) manages the database as if it were all stored on the same computer. The DDBMS synchronizes all the data periodically and, in cases where multiple users must access the same data, ensures that updates and deletes performed on the data at one location will be automatically reflected in the data stored elsewhere.

MIDAD SG*/1
Report on Agenda Item 5

5.8 Local autonomy is another reason for a business to implement a DDBMS. Since the nature of today's applications usually requires data in geographic areas that are often decentralized, it often makes sense to implement a distributed system. In this way, data can physically reside nearest to where it is most often accessed, thus providing users with local control of data that they interact with.

5.9 The disadvantages of distributed database systems are:

- complexity: greater potential for bugs in software;
- cost: software development can be much more complex and therefore costly;
- security: since the system is distributed the chances of security lapses are greater;
- distribution of control: no single database administrator controls the whole system;
- difficult to change: since all sites have control of their own sites;
- lack of experience: enough experience is not available in developing distributed systems.

5.10 Based on the above, the meeting recognized that depending on the identified user requirements and operational needs, the chosen topology could be a combination of different technical solutions (central, replicated and distributed). This would depend also on the kind of data to be processed and exchanged i.e.: NOTAMs, static data, eTOD, etc. However, it was highlighted that, from a strategic and operational point of view, the chosen topology should include a central database, which might be in one location or replicated in 2 or more locations/servers.

Interfaces

5.11 The meeting noted that internal and external interfaces of MIDAD shall be identified. The data contents and structure shall be agreed. Physical implementation and error handling shall also be explored.

Communication

5.12 The meeting recognized that communication capabilities are the pre-requisite for any interoperability between national AIS/AIM systems, MIDAD and other Regional AIS databases in other ICAO Regions (EAD, AFI-CAD, etc). It was highlighted that the AFTN Network cannot be used for the purpose of MIDAD, except for NOTAM reception and distribution. Therefore, it was agreed that other means of communications (VSAT, public internet, AMHS, ICAO IPS¹ conform networks, etc) should be explored. This should be done in close coordination with the CNS Sub-Group and the ATN/IPS Working Group.

REPORT ON AGENDA ITEM 6: OPERATION OF MIDAD AND MAINTENANCE ASPECTS

6.1 The meeting recognized that the Concept of Operation for MIDAD is very important for an efficient operation. Therefore, it was mentioned that a clear and documented Concept of Operation forms the basis for all common work and shared responsibilities. The Concept of Operation shall be based on the target aeronautical data chain as published in RTCA DO-200A/EUROCAE ED76 standards.

6.2 It was highlighted that the target aeronautical data chain defines the responsibility of each actor related to the data in the data chain and is the basis for traceability.

6.3 The data modeling is an inventory to identify:

- the aeronautical data ownership in the existing chain;
- data exchange points (to the next intended users); and
- gaps.

6.4 The meeting underlined the importance of having the right number of staff available with the right competence, knowledge and skills for the whole undertaking of MIDAD. Therefore, recruitment, staff selection, ab-initio training, specialized training, and follow up-training in the following essential areas were highlighted:

1. Aeronautical Conceptual Model Data Contents;
2. Aeronautical Exchange Model Principles and Contents;
3. Electronic AIP advantages and publication;
4. Electronic Charting advantages and publication;
5. Generic approaches to publish AIS products;
6. Difference between product centred approach and data centred approach;
7. Aeronautical Data Chain Modelling; and
8. Operational Concept Description Methodology.

6.5 It was also highlighted that the above list is not exhaustive and that training should be started well in advance of the implementation phase of MIDAD.

6.6 The meeting agreed that the migration from the existing environment to the use of MIDAD shall also be studied and an outline concept needs to be part of the MIDAD study, including at least the following:

1. data conversion concepts;
2. data conversion plan and schedule;
3. data migration concepts;
4. data migration plan and schedule; and
5. data migration in cases of version changes of the AIXM (backward compatibility).

REPORT ON AGENDA ITEM 7: MIDAD FINANCIAL PLAN/FUNDING MECHANISM

7.1 The meeting agreed that the Appendix E “Cost-Benefit and Economic Impacts” and Appendix F “Financial Aspects” of the ICAO Global ANP (Doc 9750-AN/963, 3rd Edition 2007) should be used as guidance material for the development of the MIDAD Financial Model.

7.2 It was re-iterated that the most important benefits of MIDAD are the cost reductions generated from more efficient flight operations, reduced flight times and the enhancements of safety and security which are expected to emerge as MIDAD is implemented.

7.3 The meeting noted that a rigorous approach to developing a measure of the expected economic performance of an investment project is the net present value (NPV) or life-cycle approach, which focuses on the annual flows of costs and benefits (cash flows) related to the project. Estimation of the future flows of the costs and benefits, and hence the NPV associated with the implementation of MIDAD requires many assumptions about the prices and quantities of communications, equipment, services, and about the amount of potential savings in aircraft operating costs. Therefore, there is an element of uncertainty and risk in the NPV results.

7.4 The meeting agreed that the ICAO CNS/ATM Business Case Analysis Tool (DFACS)¹ might be helpful during the development of the MIDAD Financial Model.

7.5 It was highlighted that, whatever approach is taken by a State or group of States collectively to provide the MIDAD services within the airspace for which responsibility has been assumed, the resultant cost recovery through charges must be in conformity with basic ICAO policies on charges for airports and air navigation services. This policy is contained in Article 15 of the Chicago Convention and is supplemented by ICAO’s Policies on Charges for Airports and Air Navigation Services (Doc 9082).

7.6 The meeting agreed that costs, in the form of payments made by a State to the service provider offering MIDAD services, will need to be allocated amongst the different participating States. That, in turn, will require an agreement between the parties concerned as to how such an allocation should proceed. Assuming a uniform level of service, such allocation could be based on either distance flown or the number of flights in the airspace for which each State has accepted responsibility, or others. Both are viable options. Distance flown would offer more precision while using number of flights as the basis would be simpler to administer. Other schemas could relate number of airports to be provided or similar.

7.7 The meeting recognized the importance of addressing the treatment of costs and cost recovery during the three initial stages of the MIDAD Project: (1) Set-Up Phase, (2) Call for Tender Phase, (3) Implementation Phase.

7.8 In accordance with Doc 9082, paragraphs 23 to 26, the meeting agreed that users should be consulted as early as possible when major air navigation services are being planned and increased or new air navigation services charges might be observed. This should be the case for the implementation of the MIDAD Project.

7.9 The meeting noted that the purpose of the financial plan is to provide basic information on the following:

¹ ICAO Catalogue 2007, CD-109.

MIDAD SG*/1
Report on Agenda Item 7

- (i) estimates of the element costs (labour, materials, equipment, etc.) of each distinct part of the overall project;
- (ii) the funds required to make disbursements at various stages in the project's progress;
- (iii) the currencies in which payments are to be made; and
- (iv) the sources from which the funds are to be forthcoming, whether from:
 - a. sources generated by the entity providing the MIDAD services from its operations, which would primarily include user charges, and possibly retained earnings, but could in some circumstances also include contractual payments; or
 - b. other sources, including information on the applicable conditions, i.e. interest rate, repayment period, etc.

7.10 The meeting noted that potential sources of funds vary considerably from project to project and State to State and they could be grouped as follows:

- (i) direct contributions from government(s);
- (ii) loans or debt financing;
- (iii) internally generated resources; and
- (iv) equity financing and leasing.

7.11 It was highlighted that, although the development of the MIDAD Financial Model is not part of the scope of the MIDAD SG/1 meeting, the following could be considered:

- a) Set-up Capital: the business plan to be adopted should define the set-up costs and from where this capital would be obtained (eg.: States contributions, donations/aids, loans, etc). The States responsibility in this regard should be defined and enforceable in any MIDAD membership agreement;
- b) Financial sustainability: the business plan to be adopted should also define how financial sustainability will be ensured (eg.: States contributions, fees to be charged for access by users, air navigation charges, etc);

7.12 Based on the above, the meeting agreed that, as a priority, it's necessary to reach first an agreement on the MIDASD legal framework and then the funding of the second phase of the MIDAD project, which will include, inter-alia, the development of the Financial Plan/Model for the whole MIDAD Project phases (set-up, operations, maintenance, etc).

MIDAD SG*/1
Report on Agenda Item 8

REPORT ON AGENDA ITEM 8: LEGAL & INSTITUTIONAL ISSUES ASSOCIATED WITH THE MIDAD IMPLEMENTATION

8.1 The meeting noted that the initial establishment of an organizational kernel of MIDAD is very important to start working on the project and to establish initial funding. It was noted with appreciation that currently this kernel is composed of the MIDAD Study Group (MIDAD SG), assisted by the MIDAD Support Team (MIDAD ST) which fulfilled successfully its mandate by carrying out the MIDAD Study (First phase) with the leadership of Bahrain and Jordan and developing all the documentation for the first meeting of the MIDAD Study Group. In this respect, it was highlighted that for the future phases of the project, the MIDAD ST mandate and composition might be changed.

8.2 The meeting agreed that starting from phase 2 of the project (detailed study) and taking into consideration the huge amount of work to be done and Documents to be developed, it's not realistic that this task be achieved on a voluntary basis and accordingly, the outsourcing is necessary, which raises legal, institutional and financial implications.

8.3 Based on the above, the meeting agreed that, in order to move ahead with the future phases of the project, an agreement should be reached first regarding the legal, institutional and financial issues. The following options were identified:

1. the MIDAD project to be implemented under the umbrella (legal framework) of one of the international/regional organizations i.e.: ACAC, GCC or IATA;
2. a volunteer State/Group of States provides the legal framework by hosting the project;
3. an ICAO TCB Project for the implementation of MIDAD, including the establishment of a MIDAD legal entity or agency (similar to the MIDRMA); or
4. a limited liable private company owned by the member States.

8.4 Depending on the chosen option, the funding mechanism should be agreed upon by the member States and the users and has to be clearly documented in the financial model.

8.5 The meeting noted that the establishment of a MIDAD Supervisory Management Board might be necessary. This Board would be composed of Representatives appointed by the Directors General of Civil Aviation and should be empowered to take decisions. Another Alternative is to leave the task of supervision of the MIDAD Project to the DGCA's themselves through direct correspondence and/or through the DGCA-MID meetings.

8.6 As part of the legal and institutional issues, it was highlighted that the MIDAD Supervisory Management Board should agree on the MIDAD Centres/Sub-Centres location(s), based on agreed set of criteria (geographical location, communication infrastructure, political stability, human resources availability, etc).

8.7 Other institutional issues such as, States sovereignty, responsibility and accountability, intellectual property rights should be addressed.

8.8 The MIDAD Agency/Service Provider could be responsible for the development, establishment and operation of MIDAD.

MIDAD SG*/1
Report on Agenda Item 8

8.9 Based on all of the foregoing, the meeting agreed that States should inform MIDANPIRG/13 (Abu Dhabi, UAE, 22-26 April 2012) about the preferred legal/institutional option for the implementation of MIDAD. The feedback from users on the subject is also very important. It was decided that the AIM TF/7 meeting (Cairo, 25-27 September) might need to further address the subject and decide if a second meeting of the MIDAD SG would be needed before the DGCA-MID/2 meeting planned to be held in Saudi Arabia in the spring of 2013, which will have the final decision on the legal, institutional and financial issues related to the MIDAD project. Accordingly, the meeting agreed to the following Draft Conclusion:

DRAFT CONCLUSION 1/3: MIDAD LEGAL FRAMEWORK

That, States study the different options related to the MIDAD legal framework and inform the ICAO MID Office of their preferred option, before 1 April 2012, in order to be reported to MIDANPIRG/13 for further action.

MIDAD SG*/1
Report on Agenda Item 9

REPORT ON AGENDA ITEM 9: FUTURE WORK PROGRAMME

Project management and Timelines for the development and implementation of MIDAD

9.1 The meeting recognized the need for the development of timelines for the development, set-up, implementation and operation of the MIDAD project, based on a project management approach. In this respect, it was noted that the V-Model methodology could be used.

9.2 The meeting agreed that the timelines need to be divided into phases containing well defined and clear working packages each with clear:

- pre-requisites (required input);
- statement of work; and
- requested output (result).

9.3 It was highlighted that the MIDAD project timelines will be influenced by existing planning and timelines of the major stakeholders, i.e.: ICAO (MIDANPIRG, MSG, ATM/AIM/SAR SG, AIM TF, MIDAD SG and the DGCA-MID meetings), ACAC, GCC, IATA, etc.

9.4 The meeting emphasized that it will be very important to promote and present MIDAD and its advantages to those stakeholders and to gather their expertise and assistance.

9.5 The MIDAD project needs also a proper project set-up especially because of its size and complexity. Different documents are needed for the different phases of the project. The following list represents the minimum set of Project Documents:

4.1	Configuration and Change Management	Problem Report - Change Request	External	-
4.2		Change Status List	Internal	-
4.3		Problem Change Evaluation	Internal	-
4.4		Change Decision	External	-

9.6 *Note: the documents marked in the Audience Column as “Internal” are important for setting up the internal process of the study and later implementation. The documents marked “External” need to be sent to the potential bidders or implementation body during the tender process (if any) or to be used during program execution process, as appropriate. The documents marked in the Priority Column as “High” shall be developed in parallel to the Requirements Specification. The documents with no priority shall be developed when the process for the set-up of the MIDAD is more settled.*

9.7 The meeting noted that the timelines for the implementation of MIDAD can be divided into many phases, such as:

1. Study phase;
2. Project set-up phase;
3. Call for tender preparation phase, or other implementation methods;
4. Tender phase, or other method;
5. Contract negotiation phase, or other negotiation phase;
6. Implementation phase;
7. Operation phase; and
8. Maintenance phase.

9.8 The phases will need to be executed basically in sequence where the work result of one phase is the prerequisite for the beginning of the next phase.

Review of the MIDAD SG Terms of Reference (TOR)

9.9 The meeting reviewed the TOR of the MIDAD SG as endorsed by the AIS/MAP TF/6 and ATM/SAR/AIS SG/12 meetings and agreed to introduce minor changes as reflected in **Appendix 9A** to the Report on Agenda Item 9.

9.10 The meeting agreed that the MIDAD SG*/2 meeting be held in the first half of 2013. The venue will be Cairo, unless a State is willing to host the meeting. The exact date of the MIDAD SG*/2 meeting (before or after the DGCA-MID/2 meeting) is to be decided by AIM TF/7 meeting (Cairo, 25-27 September 2012).

9.11 The meeting agreed that it’s necessary to reinforce the MIDAD Support Team (MIDAD ST), in order to monitor the developments related to MIDAD until the MIDAD SG*/2 meeting, promote the project and prepare the necessary documentation for the upcoming AIM TF/7, DGCA-MID/2 meeting and the MIDAD SG*/2 meeting. It was underlined that the MIDAD ST will continue to work on a voluntary basis, using mainly the electronic means of communications (emails, teleconferencing, etc) to achieve the assigned tasks. Accordingly, the meeting agreed with appreciation to the new composition of the MIDAD ST:
