

3rd Meeting of CAPSCA Middle East Project

**Updates on Public Health Preparedness Guidelines
for Airport Operators**

Cairo | Egypt | 19 November 2013

**Adel Ramlawi, RO/AGA &
CAPSCA Reg. Coordinator
ICAO MID Regional Office**

On behalf of ACI World

Contents

- The Role of ACI
- Pandemics Preparedness Guidelines
- Business Continuity Management System
- Summary

ACI's vision: The Voice of the World's Airports

ACI's mission

To advance the collective interests of world's airports and promote professional excellence in airport management and operations.

Six priority areas

- Safety
- Security
- Customer Service
- Environment
- Economic Development
- Efficiency and Innovation

ACI's membership

- 573 members operating 1751 airports in 174 countries and territories

Europe:
180 members, 46 countries,
435 airports

North America:
186 members, 3 countries,
298 airports

Asia-Pacific:
95 members, 42 countries,
500 airports

Latin America-Caribbean:
58 members, 37 countries,
181 airports

Africa:
56 members, 47 countries,
250 airports

ACI's offices

- ACI World Office: Montreal, Canada
- 5 Regional Offices

1. Airport Guidelines for Pandemic Preparedness

Guidelines for airport pandemic preparedness

- ✈ Aviation can potentially increase the rate of disease propagation
- ✈ Main Responsibility: Local/Regional/National Health Authorities
- ✈ Fast, efficient, communication and collaborative decision-making is crucial
- ✈ Results ⇨ greater predictability of the various stakeholders measures

www.aci.aero/Media/aci/file/ACI_Priorities/Health/2010/Airport_preparedness_guidelines_for_outbreaks_of_communicable.pdf

2. Business Continuity Management for Airports

Introduction to Business Continuity Management System

The need of a generic BCMS framework

- ✈ It is not possible to foresee every conceivable type of airport emergency, not only pandemic outbreaks, but also:
 - ✈ ... safety emergencies, hurricanes, vulcanos, snow storms, floods, earthquakes, tsunamis, nuclear crisis, security crisis, strikes, ...
- ⇒ Therefore, our planning should focus on the possible impact to the airport's processes, systems and staff, from different events, since these could have a similar impact on airport operations.
- ⇒ Accordingly, ACI recommends that an airport establishes one generic Business Continuity Management System to cover the range of operational threats that it faces.
- ⇒ Risk-based approach to manage disruptions.

Business Continuity Management System (BCMS)

Framework – Terminology

'Business Continuity Management System' (BCMS)

An integrated , multi-layered, business driven, process based approach to plan for and manage business disruptions and crises.

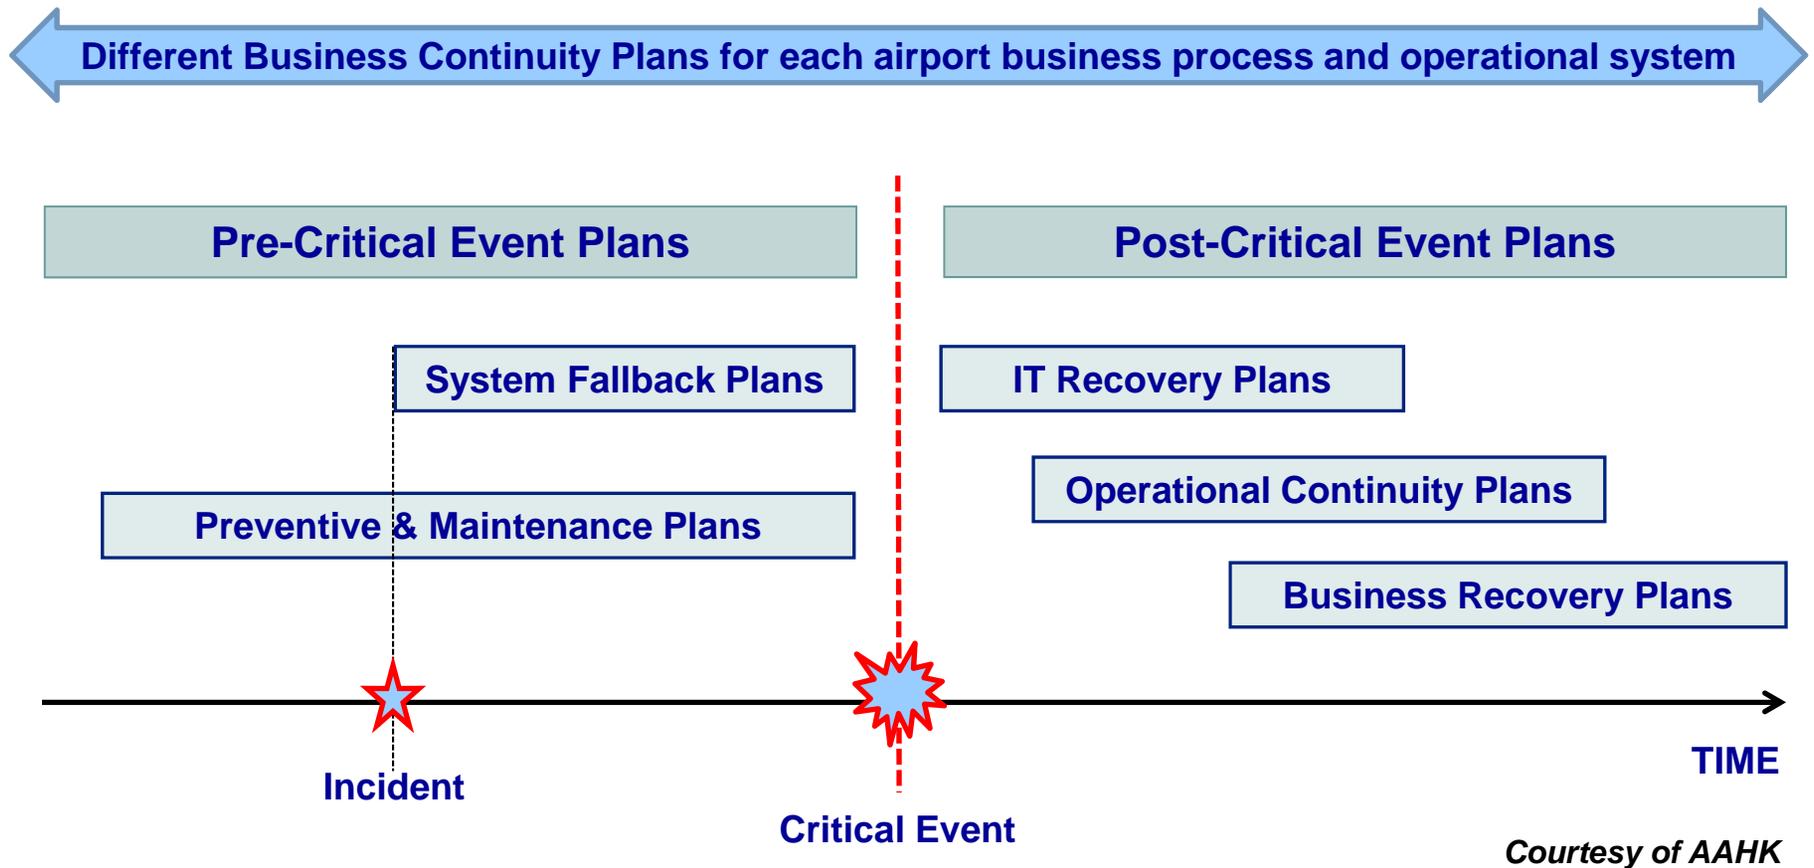

'Incident'

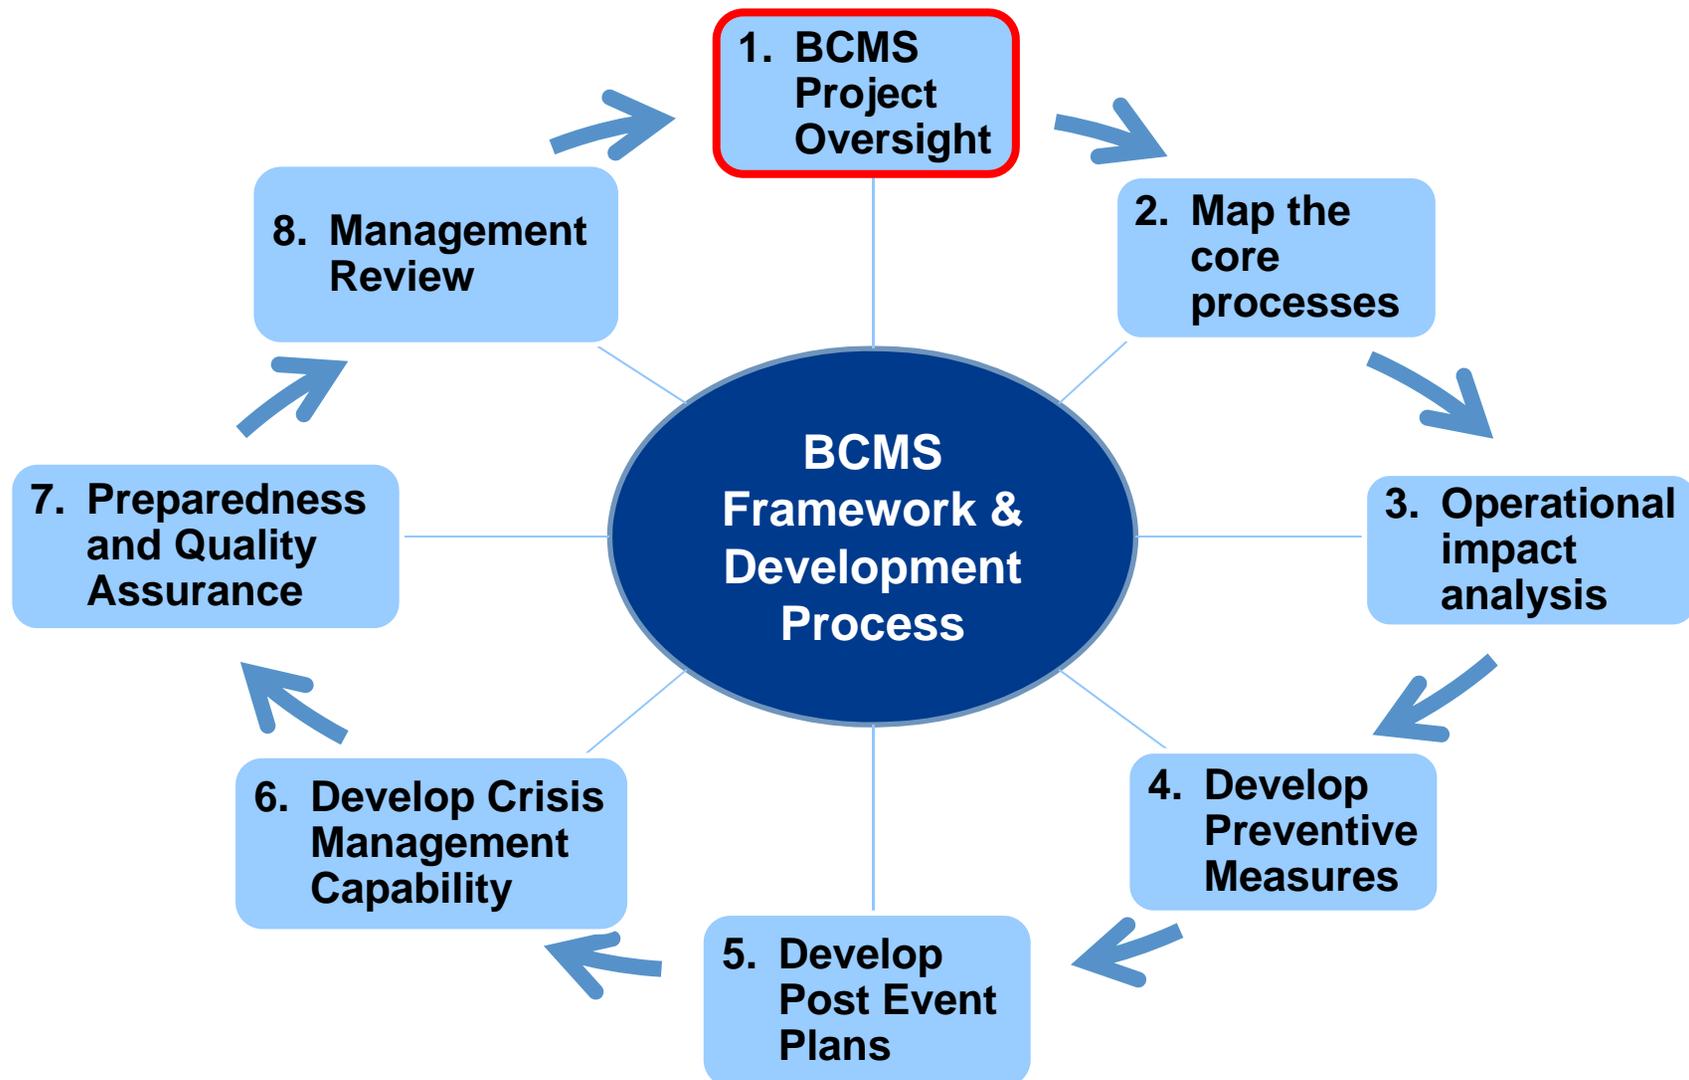

An event which causes an impact or has the potential to cause an impact or disruption to the normal operational flows at an airport.

'Crisis' or 'Critical Event'

Any event requiring an immediate, proactive response in order to minimize its negative impact to the airport operator's operations, reputation and profitability.

BCMS Framework – Event timeline

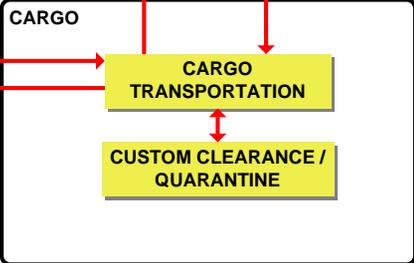

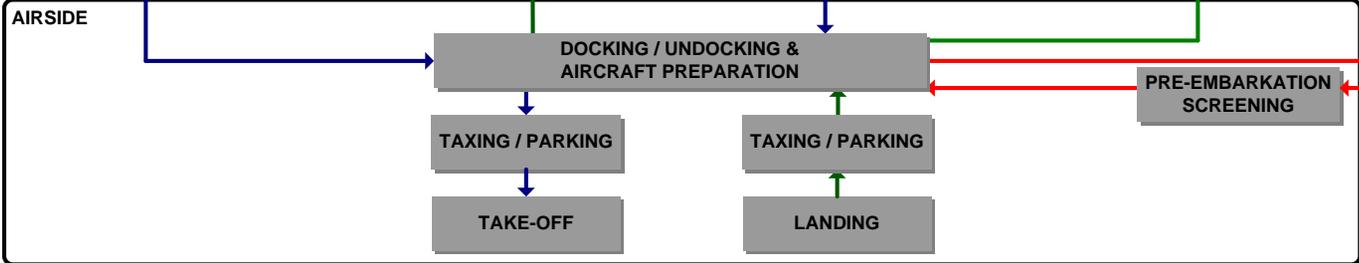

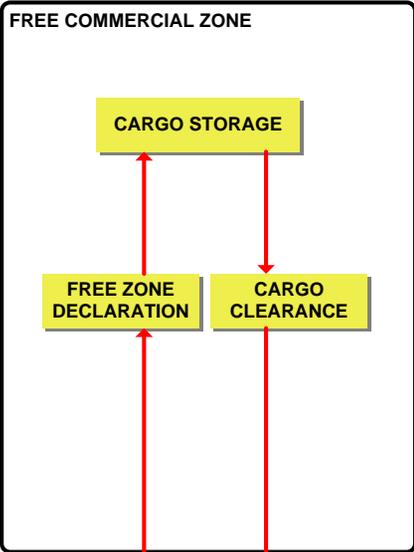

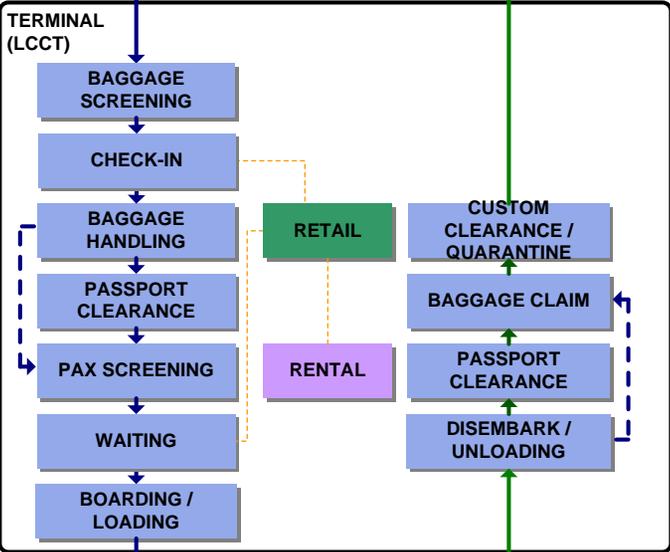

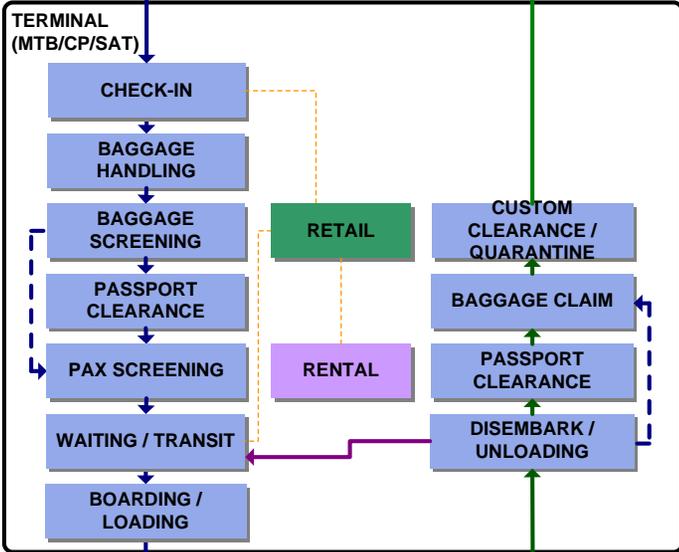

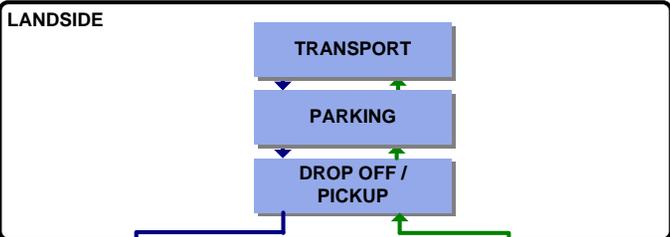

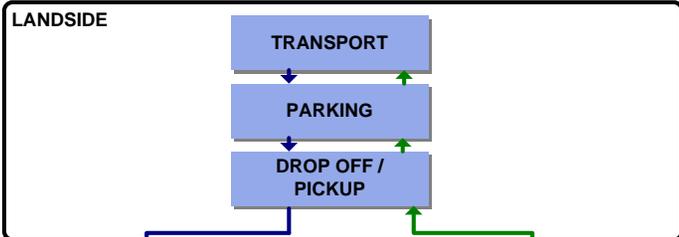

2. Map the core processes

Courtesy of Malaysia Airports

	Passenger Process
	Retail Process
	Rental Process
	Cargo Process
	Aircraft Process
	Airport Essential Services & Airport Services
→	Cargo Processes
→	Arrival Processes
→	Departure Processes
→	Transit Processes
- - -	Domestic Processes
- - -	Retailing & Rental

AIRPORT ESSENTIAL SERVICES

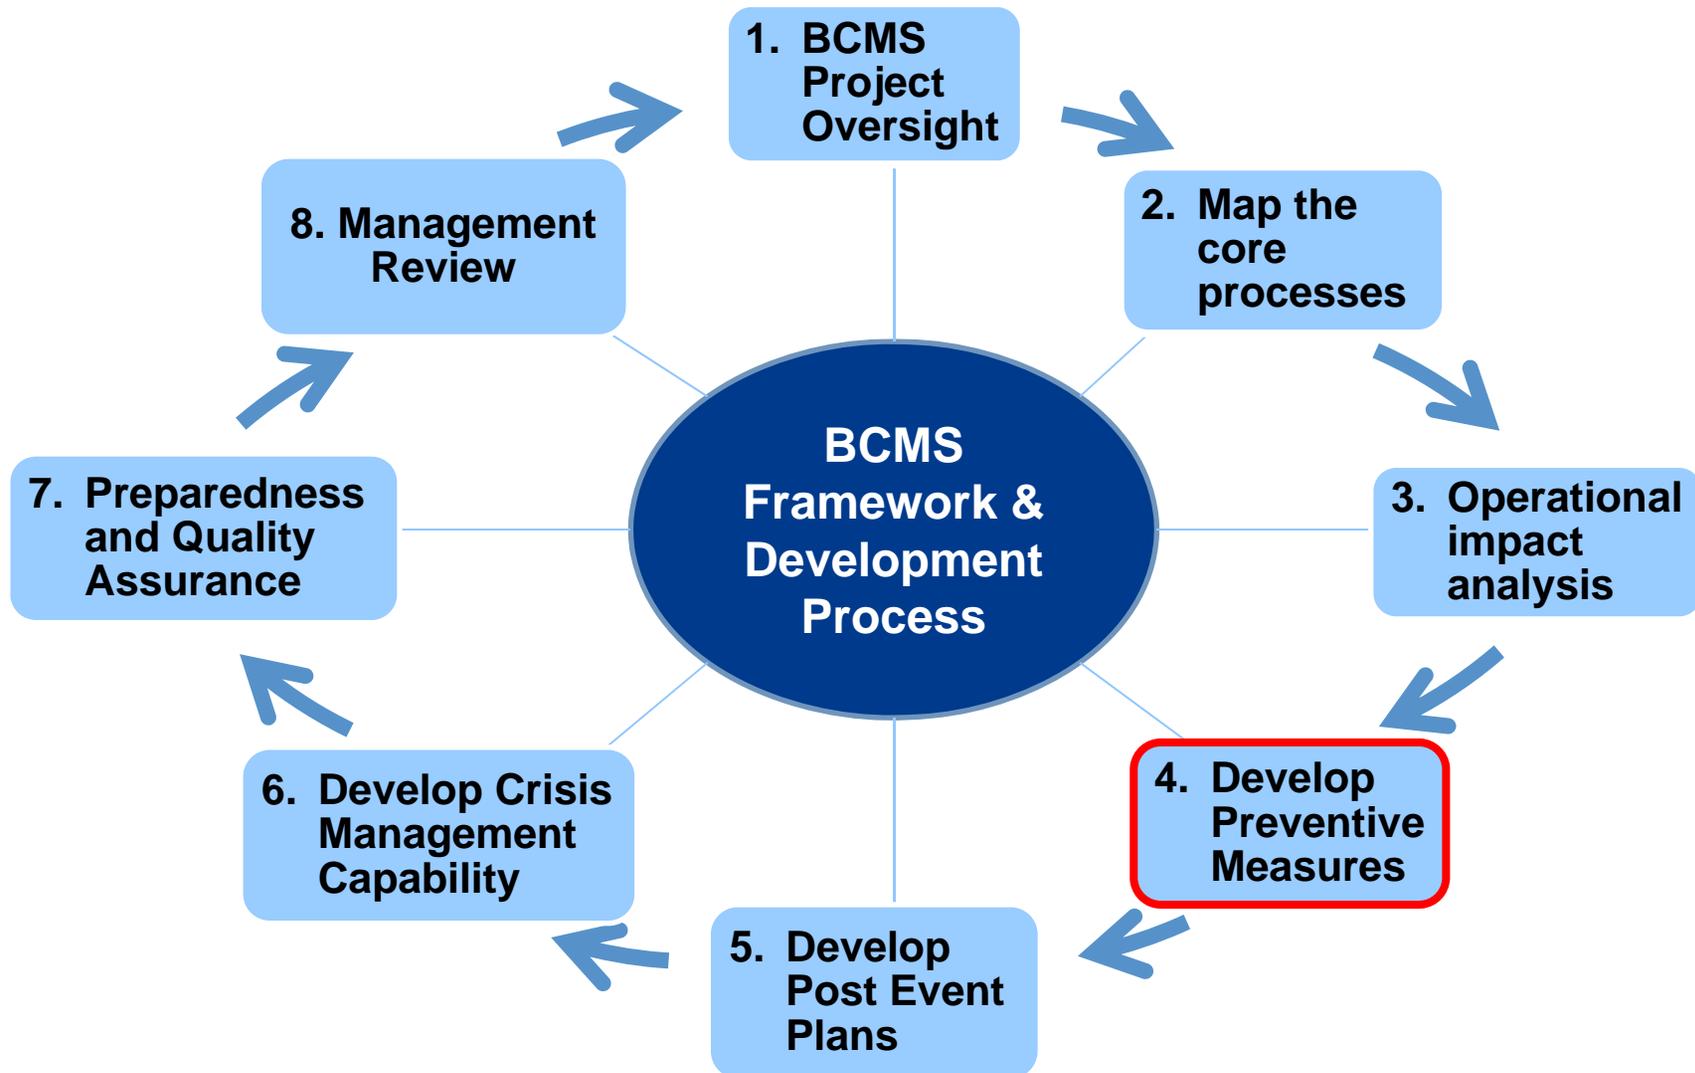

FIRE RESCUE SERVICES	SECURITY SERVICES	AIRPORT OPERATIONS	IT SERVICES	ENGINEERING SERVICES
----------------------	-------------------	--------------------	-------------	----------------------

AIRPORT SUPPORT SERVICES

FINANCIAL SERVICES	CORP COMM SERVICES	PROCUREMENT SERVICES	HR SERVICES	LEGAL & SECRETARIAL SERVICES
--------------------	--------------------	----------------------	-------------	------------------------------

**3. Operational
impact
analysis**

Normal operations	=	100% of agreed Service Delivery Standards
Degraded (Impact) Level 1	=	XX% of agreed Service Delivery Standards
Degraded (Impact) Level 2	=	YY% of agreed Service Delivery Standards

5. Develop Post Event Plans

Establishing the Recovery Time Objectives (RTO)

PASSENGER	Process Passengers (i.e. check-in, customs clearance, passport clearance, flight information services, information counters, passenger holding area, passenger loading & disembarkation facilities)	
	Process baggage (includes baggage reclaim area)	
AIRCRAFT	Ability for aircraft to land & take-off (at least 1 runway is available)	
RETAIL	Monitor and manage retailing activities at MA Niaga owned/ managed retail stores	
RENTAL	Manage FnB tenants at KLIA	
	Manage retail tenants at KLIA	
CARGO (FCZ)	Process Free Zone Declaration applications

Operational Status Coding

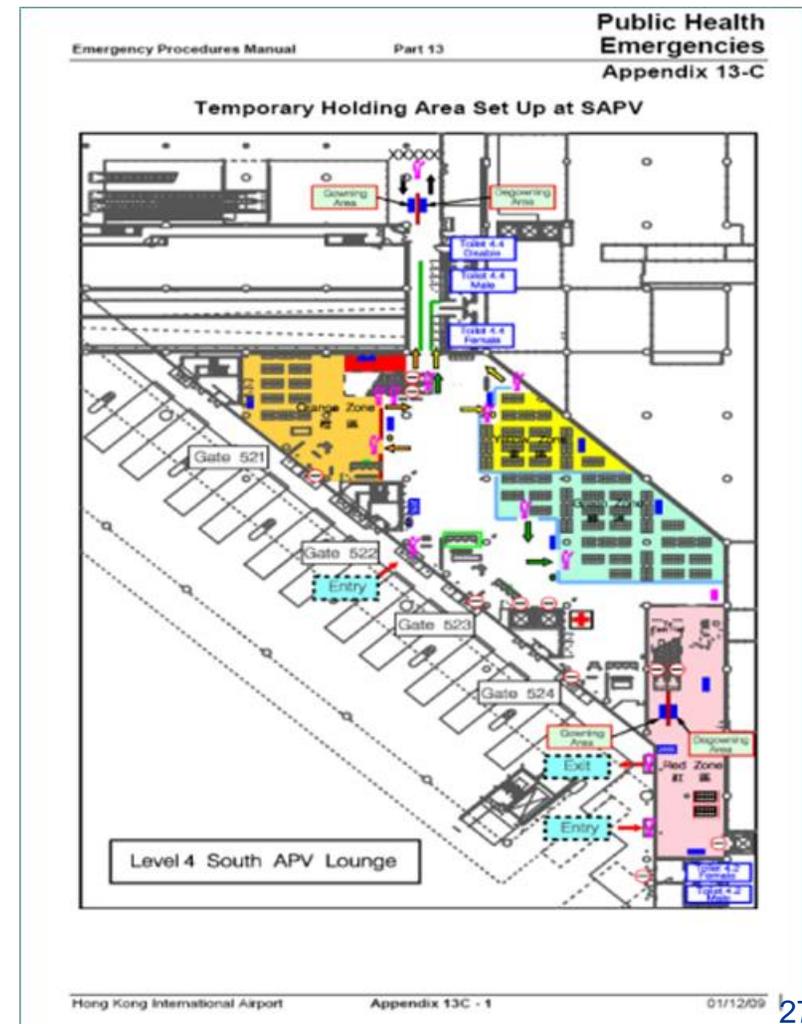

Courtesy of WHO

BCMS – Best Practices for Infectious Disease Pandemics

Use of existing infrastructure

- Passenger reception center that's used in an aircraft accident response
- Modified to be the temporary holding area in a possible aircraft quarantine situation

3. Summary

- ✈ Airport operators need to be ready for communicable disease outbreaks
- ✈ It is crucial to coordinate with the Health Authorities
- ✈ Communication with all stakeholders is critical
- ✈ Passengers need to be informed on the situation and procedures
- ✈ Consideration on screening should be taken according to WHO indications
- ✈ It is very important to execute tests involving all stakeholders
- ✈ An integrated, multi-layered, business driven, process based BCMS is very important to plan for and manage business disruptions and crises.
- ✈ Goal: keep the airport running safely for all passengers, users and staff
- ✈ For more information, please check:
