

GNSS Performance Monitoring System (GPMS)

GACA/ANS

GNSS Performance Monitoring System (GPMS)

- Comply with ICAO – Annex 10.
- Monitoring and Recording of GNSS Data.
- Wide Area RAIM Prediction .
- GNSS NOTAMs.

GNSS Performance Monitoring System (GPMS)

It is an ICAO requirement for:

- ATC shall be provided with operational status of radio navigation aids authorized to be used for civil aviation. This will include GNSS.
- State approving GNSS operations should ensure relevant GNSS data are recorded to be used in incident/accident investigation.
- State approving GNSS shall issue NOTAMs for changes on the operational status.

GNSS Performance Monitoring System (GPMS)

- GPMS continually monitors actual GNSS (GPS) satellites in view, determining real-time availability of GNSS (GPS) and alerts during periods of unavailability.
- GNSS (GPS) data recorded for playback and analysis.
- GPMS predicts GNSS (GPS) Receiver Autonomous Integrity Monitoring (RAIM) for FIR regions and airports.

KSA GPMS Architecture

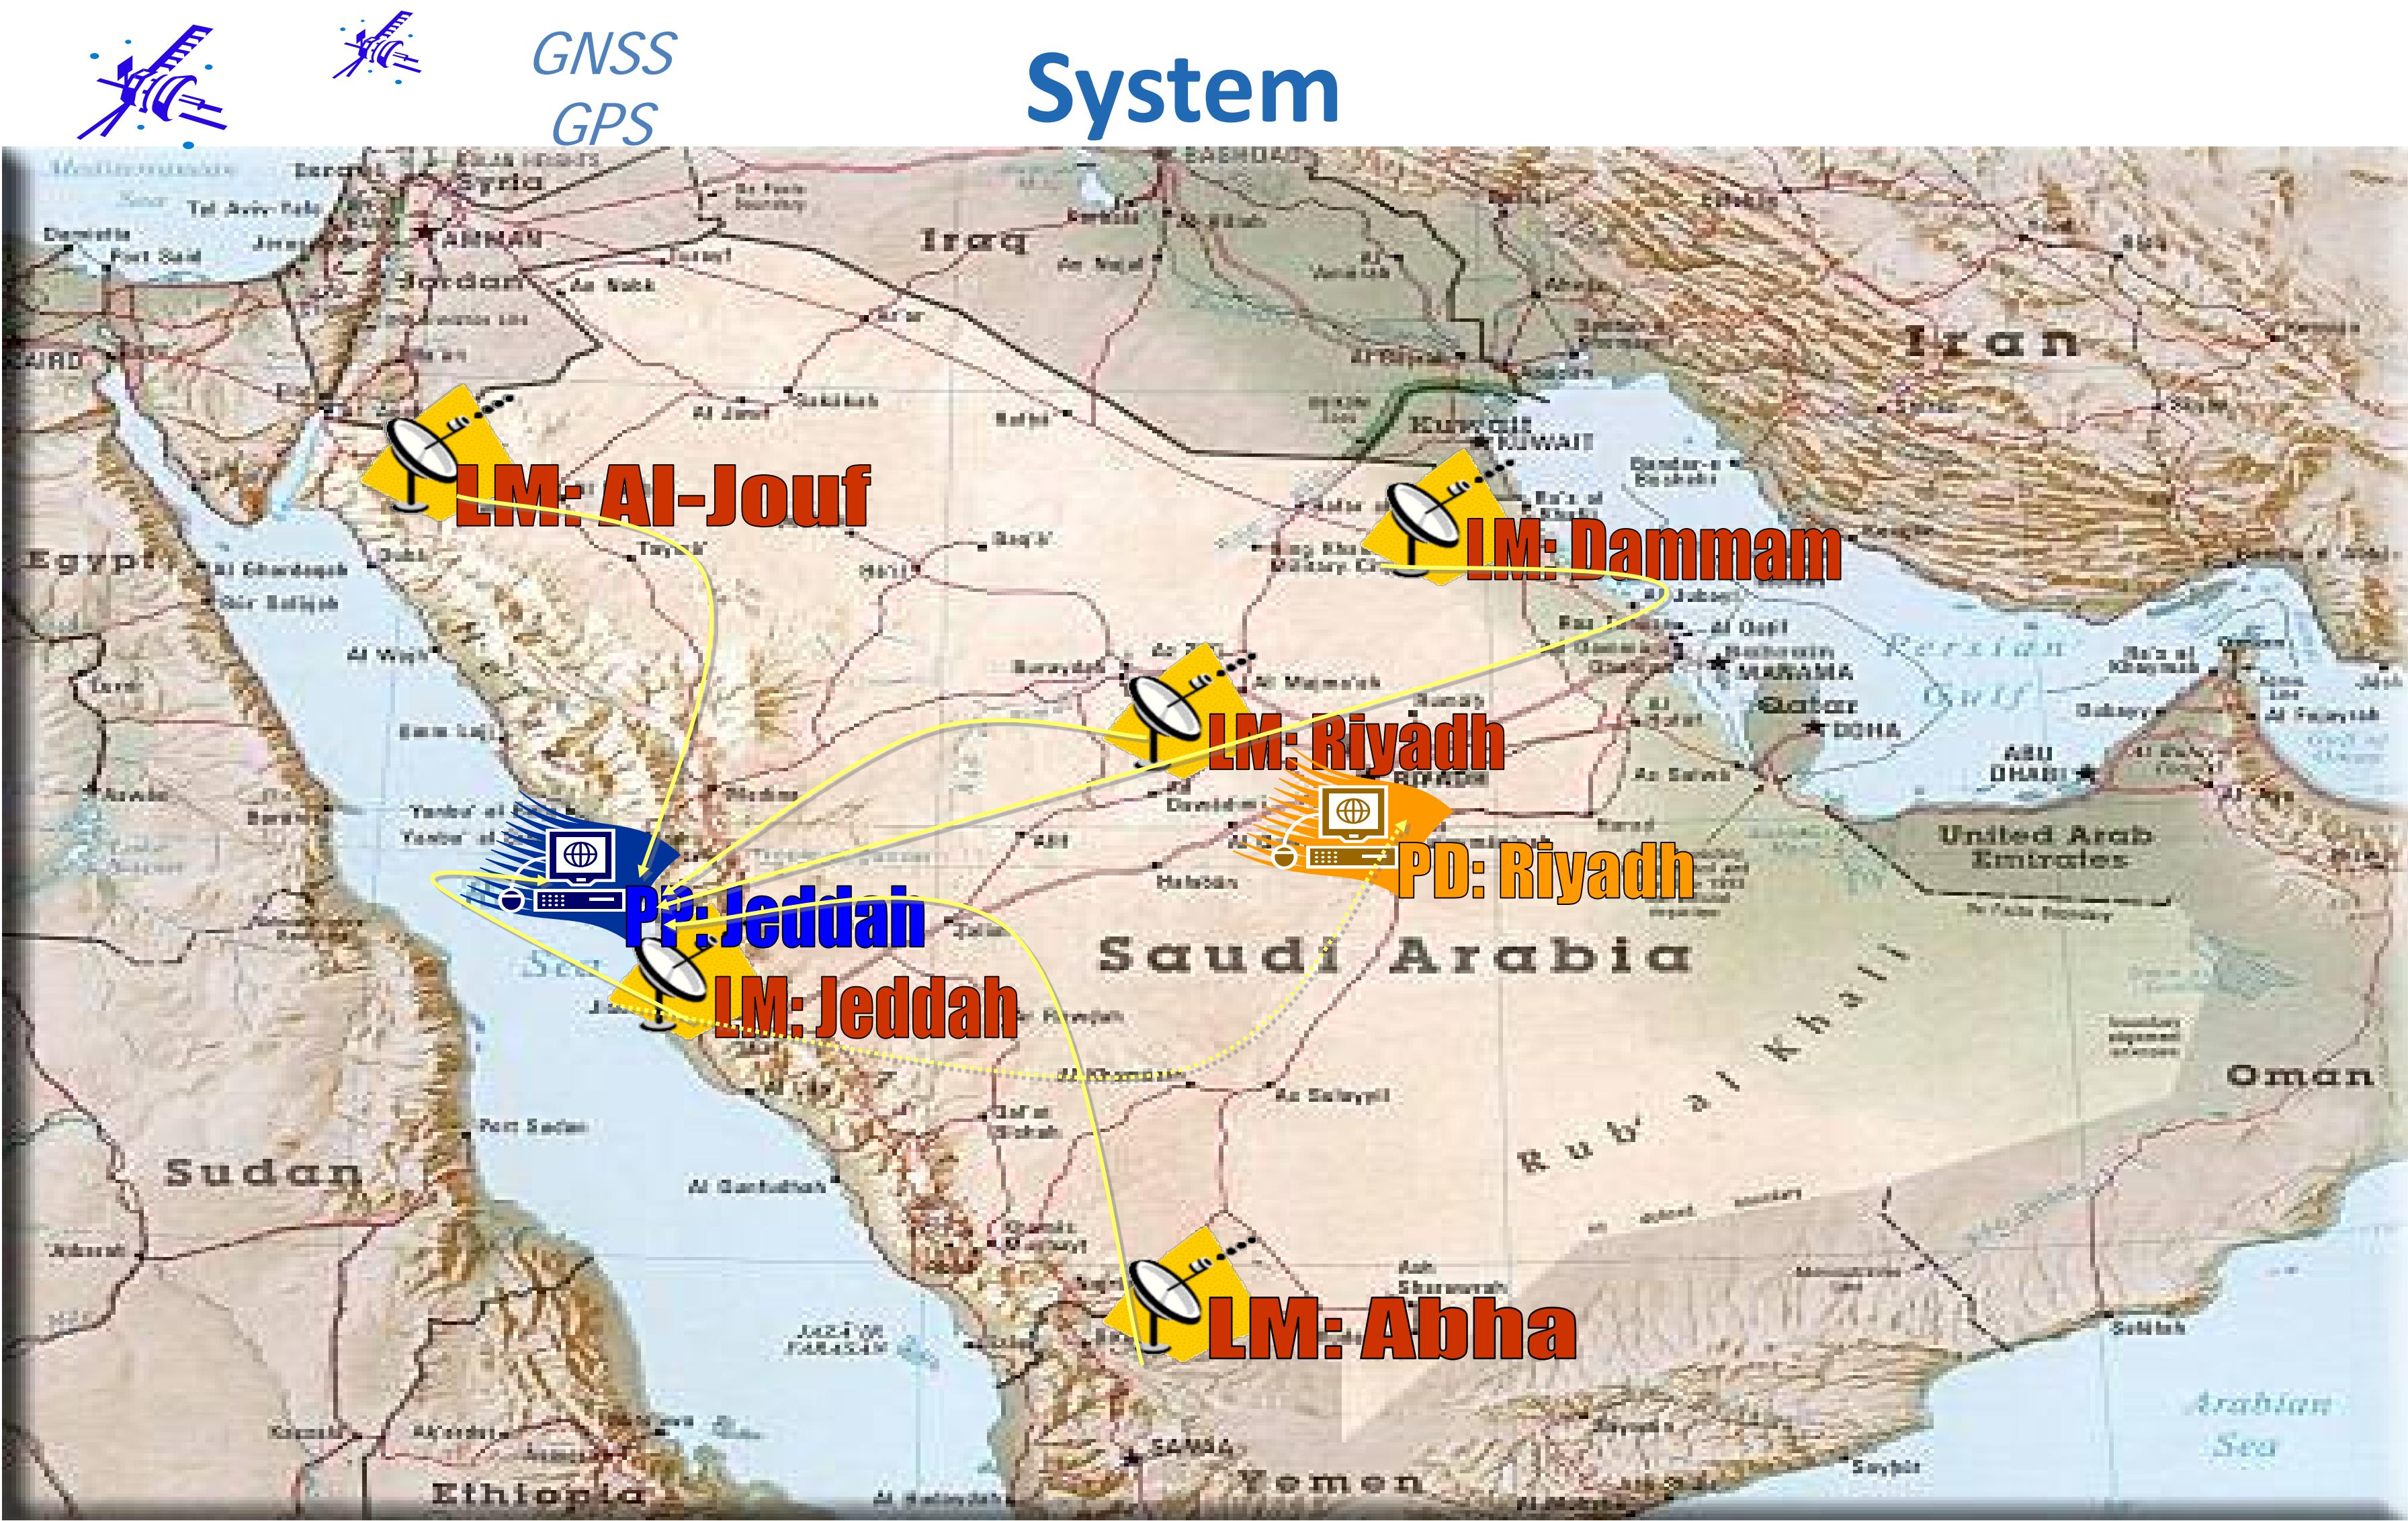

GPMS composed of:

- (5) Local Monitors (LM) subsystem.
- Performance Processing (PP) subsystem.
- (2) Performance Display (PD) subsystem.
- Data Link (DL) subsystem.

KSA GPMS Functional Description

- System to monitor GPS performance in real time
- Store data for historical assessment
- Built-in GPS RAIM prediction capability
- 5 LM sites deployment:
 - ✓ Receiver Sites: GPS receiver + Antenna at:
 - ✓ Jeddah, Riyadh, Dammam, Abha, Al Jouf
 - ✓ Central Database Server at Jeddah
 - ✓ Performance Display at:
 - ✓ Jeddah
 - ✓ Riyadh

KSA GPMS System Overview

System

Applications

LM: Local Monitor
PP : Performance Processing
PD: Performance Display

Architecture

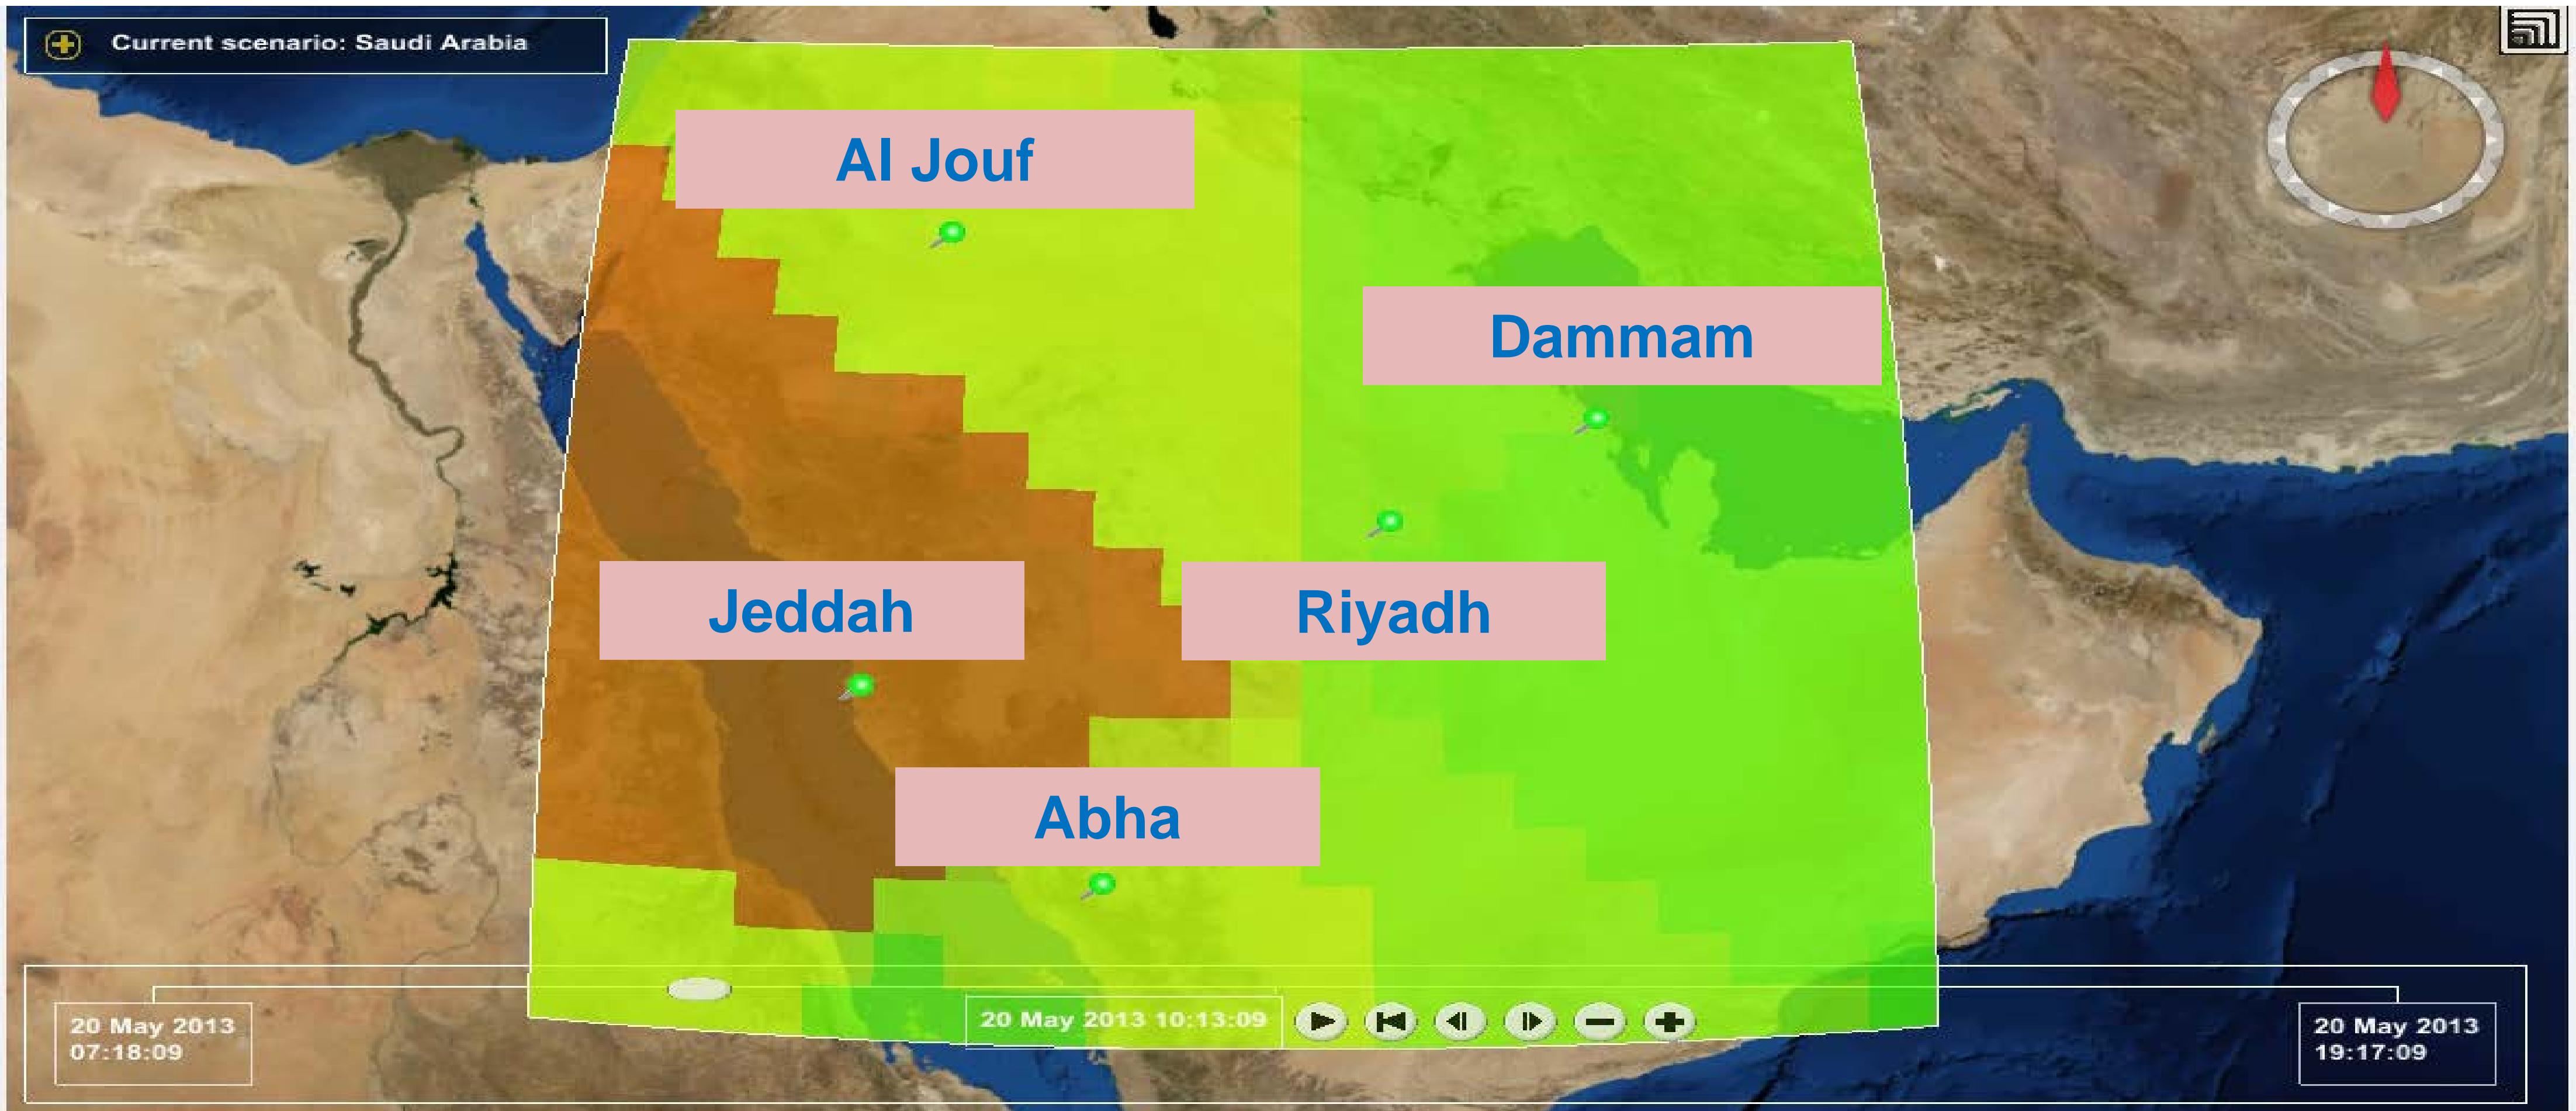

Local Area Monitor – (LAM)

- Live monitoring of receiver data
- Charts and tabular display
- Rule-based alerting (includes Jamming and ionospheric Interference)
- Historical data replay

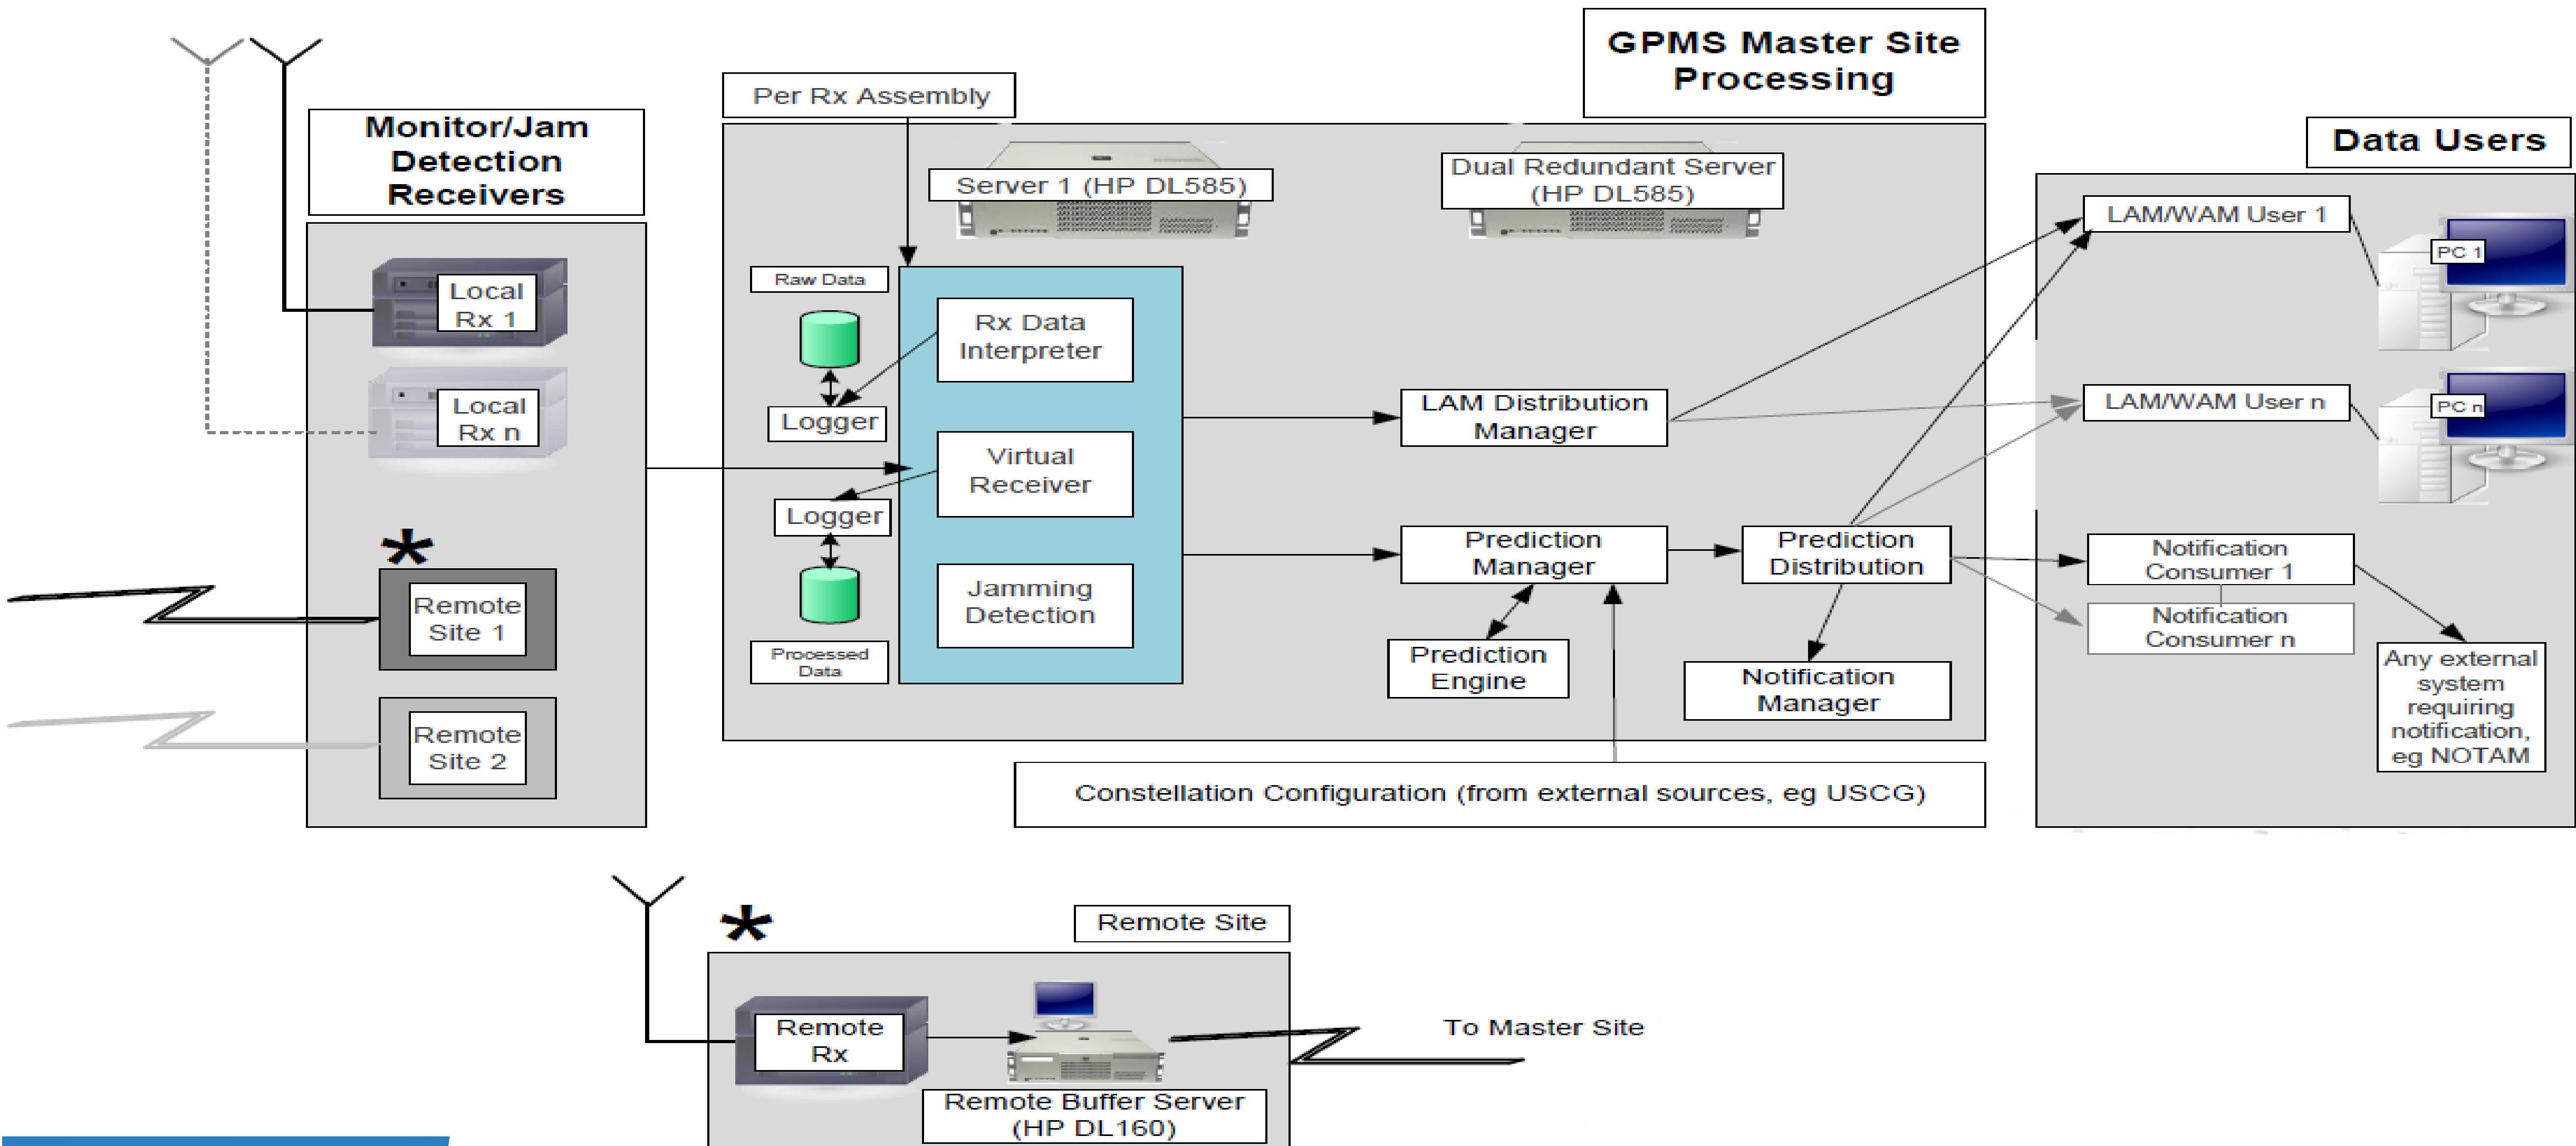

Wide Area Monitor – WAM

- WAM Performance Data Types:
 - ✓ RAIM prediction capability
 - ✓ Load prediction results
 - ✓ Map display
- Region predictions:
 - ✓ Time animation
 - ✓ Service assessment
- Point predictions:
 - ✓ Time series
 - ✓ Service availability reports

- NovAtel GPS Receiver ProPak-V3-RT2
- NovAtel Antenna GPS-702-GG

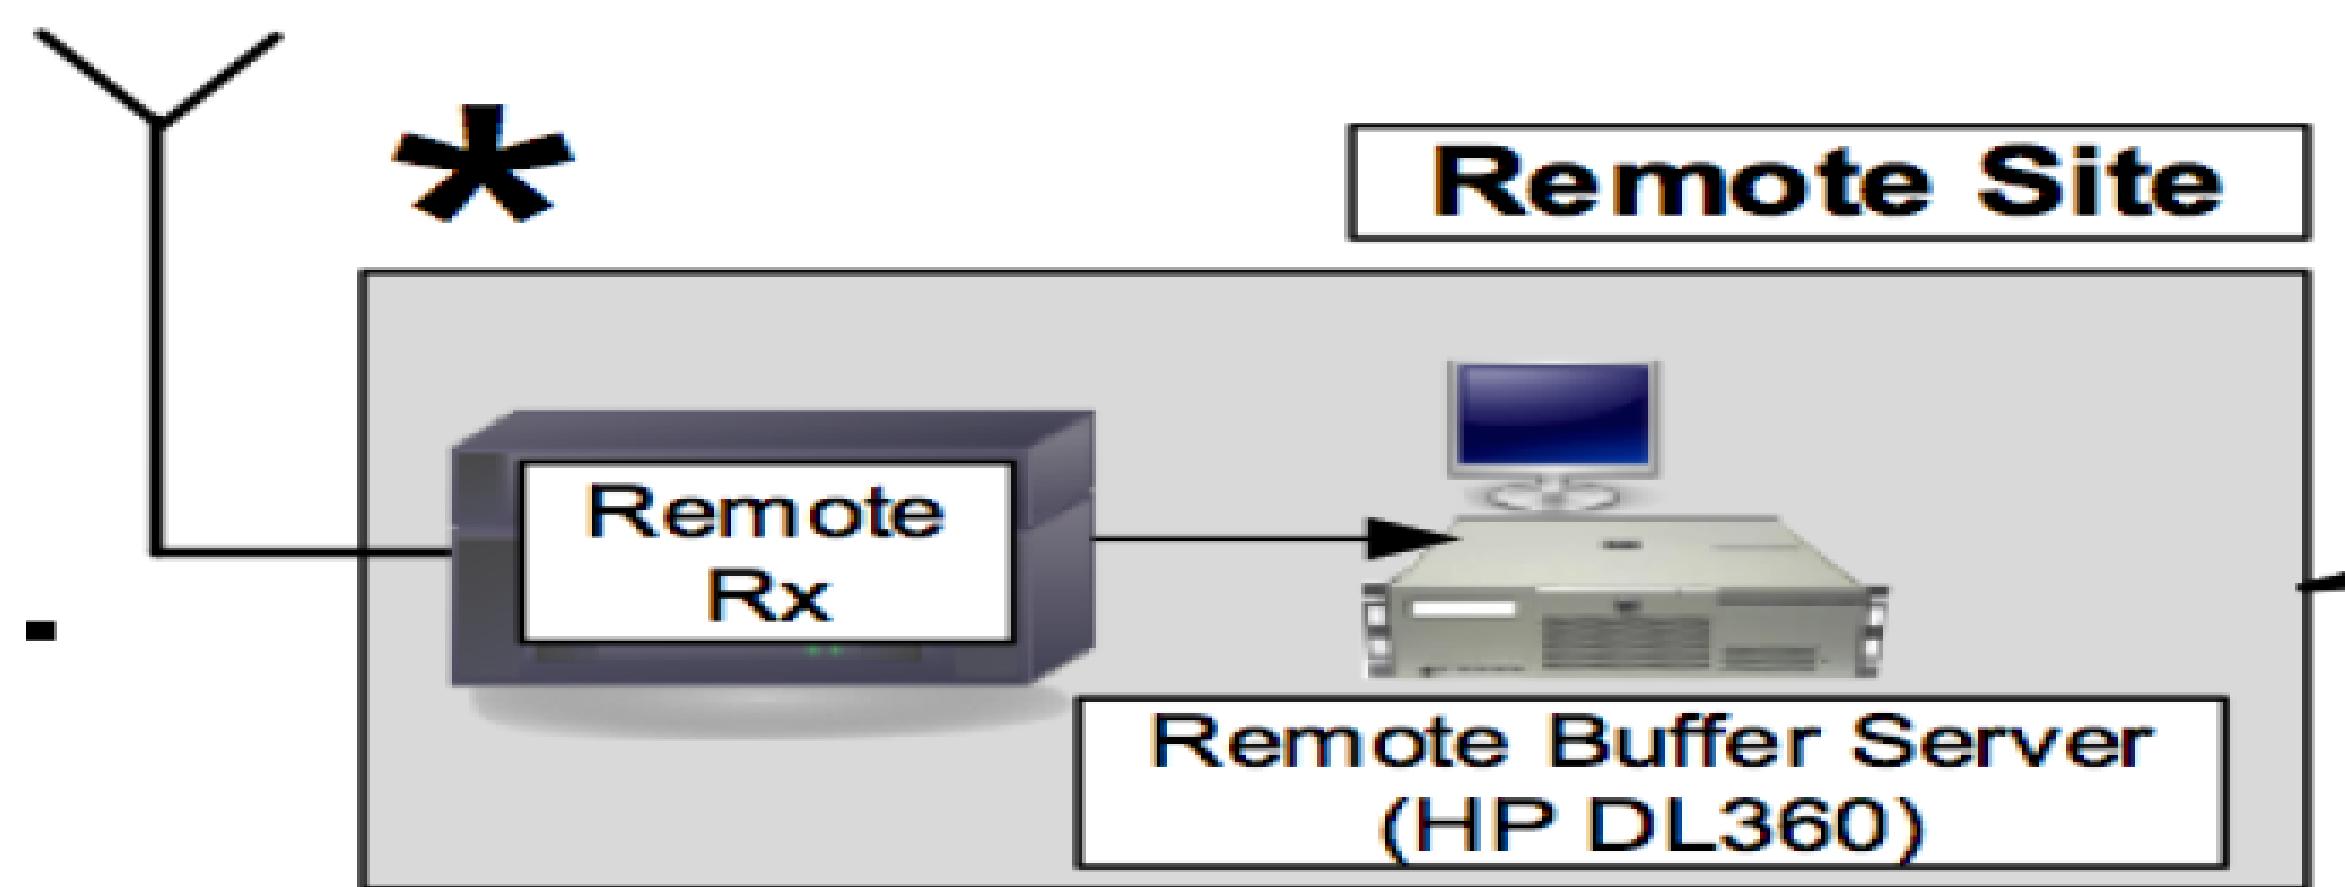

Architecture

Receiver Site Location

Architecture

- 1x GPS Antenna
- 1x GPS Receiver
- 1x Server (HP Proliant DL 360 Gen8)

NOTAM Post Processing

GPMS has the ability to generate GPS NOTAMs based on outages predicted in a calculation scenario, usually airport 0.3 NM RNP approach (NPA) NOTAMs are generated for point predictions only and are automatically sent to the GACA AIS system

The background of the slide is a photograph taken from an airplane window, showing the dark silhouette of the aircraft's wing and engine on the left, and a vast expanse of dark blue ocean and white clouds below.

Challengers

- PBN IFP for all International, Domestic and Regional airports
- IFP Maintenance (Obstacles, data, regulations, etc..)
- eTOD area 2 and 3
- One integrated and complete system (IFP, AIM, eTOD)
- Restructure of KSA airspace and ATS routes (including civil/military coordination)
- New technology, GLS, SBAS, GBAS, etc.

Thank you
