Data Sets

Regional Review

- 18 States

- Bahrain; Egypt; Iran (Islamic Republic of); Iraq; Jordan; Kuwait; Libya; Oman; Qatar; Saudi Arabia; Sudan; Syrian Arab Republic, United Arab Emirates; Yemen
- Algeria; Morocco; Tunisia

Regional Review (con't)

- 18 Flight Information Regions
- 73 International Airports
- 1,570,507 Departures per year
 - 1,112,422 (71%) International Departures per year

Regional Review (con't)

- 1,666 Airframes (51% <10 yrs)
- Average 3.6 % traffic growth
 - 56,538 flights per year
- 80 "unique" Direct Connections
 - 39% EUR; 23% APAC; 21% MENA; 15% AF; 2% NA; 0% C&SA

WORKING PAPER

AIR TRAFFIC MANAGEMENT REQUIREMENTS AND PERFORMANCE PANEL (ATMRPP)

THIRTY-NINTH ASSEMBLY

SAN JOSE, CALIFORNIA, UNITED STATES, 27 JUNE to 1 JULY 2016

Agenda Item 6: Any Other Business

Minimum Path and Essential Improvements to Global Modernization

(Presented by Steve Bradford and Henk Hof)

SUMMARY

The inclusion of Module Priorities and Minimum Path in the Fifth Edition of the Global Air Navigation Plan provides a necessary and valuable baseline for all nations to prioritize the implementation of the Aviation System Block Upgrades to meet the needs of global modernization and safety.

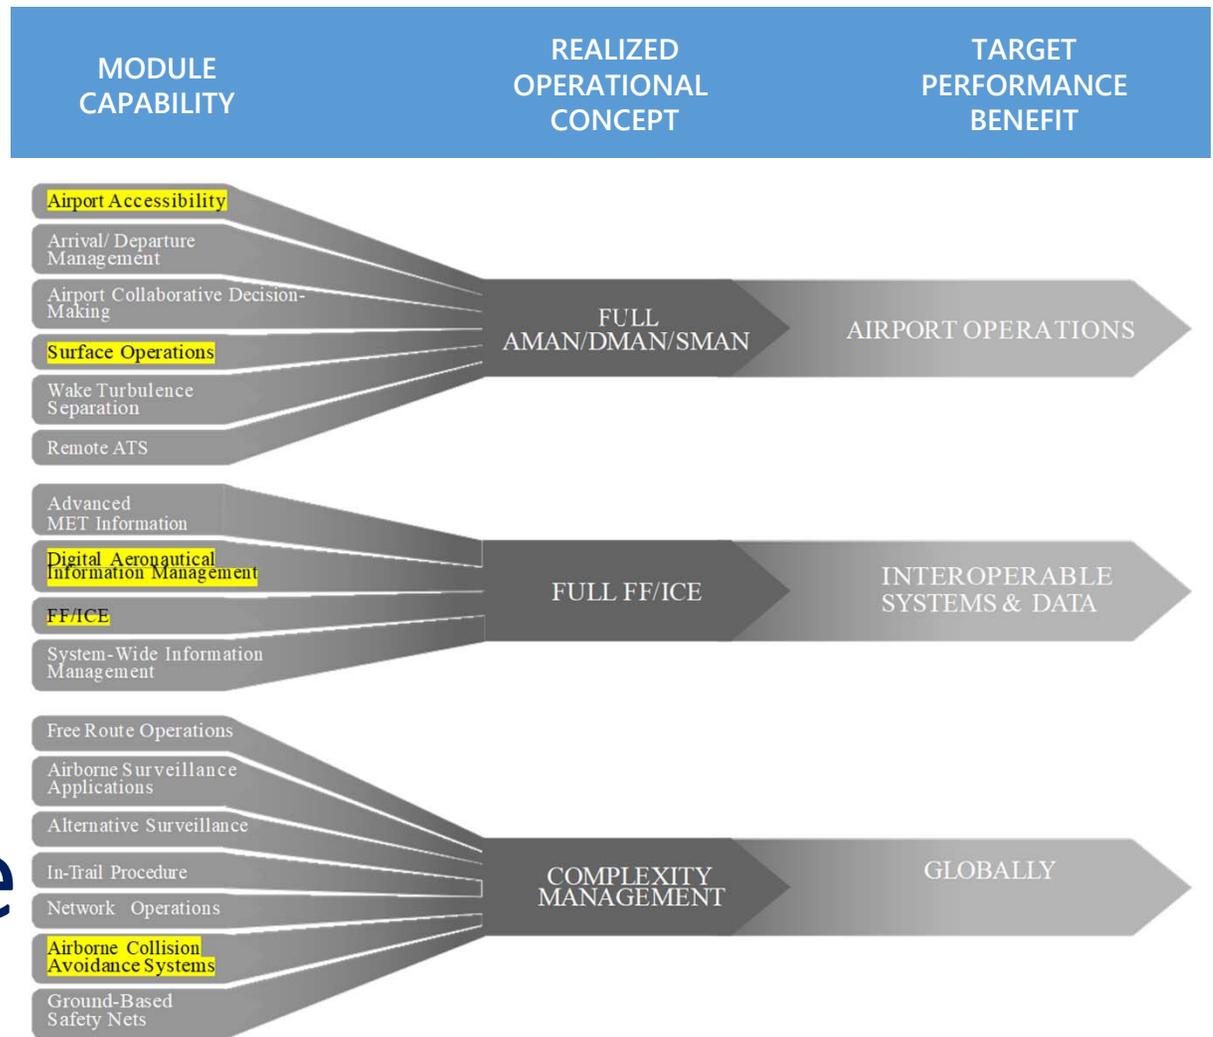

ATMRPP Considerations (con't)

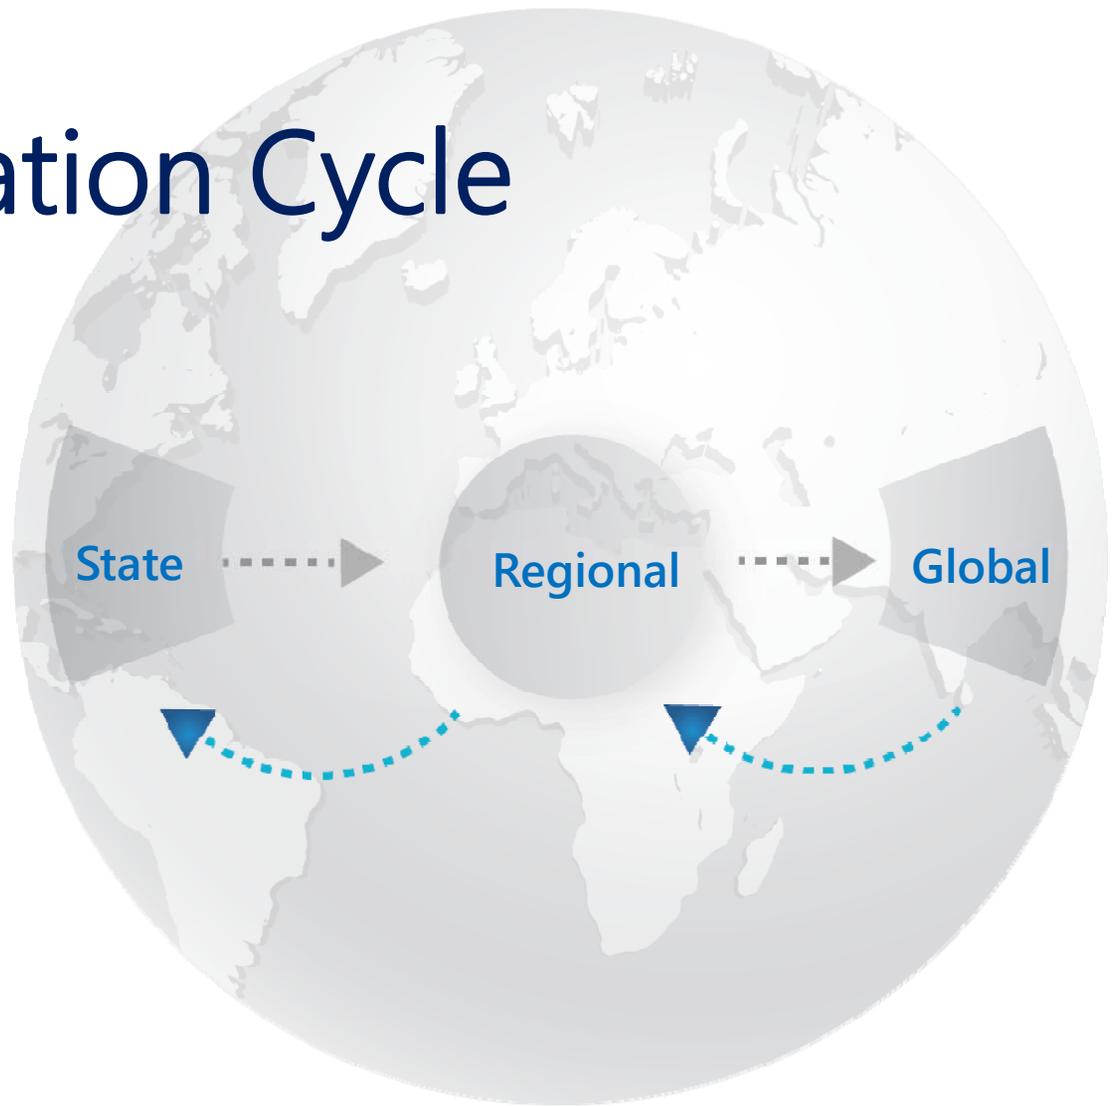

ASUR	APTA	ACAS	DATM	FICE	ICAO ASBU Threads
Operationally, the lower costs of dependent surveillance infrastructure in comparison to conventional radars support strategic investment and business decisions to expand radar-equivalent service volumes and the use of radar-like separation procedures into remote or non-radar areas. Additionally, the mechanical nature of the ADS-B ground infrastructure allows it to be sited in locations that are difficult for radar installations. MLAT requires more ground stations than ADS-B and has larger geometric requirements than ADS-B, but has the early implementation advantage of using current aircraft equipage.	Assembly Resolution urged States to achieve implementation of approach procedures with vertical guidance (APV) (Baro-VNAV and/or augmented GNSS) including LNAV-only minima for all instrument runway ends by 2016.	ICAO agreed to mandate the improved ACAS for new installations as of 1 January 2014 and for all installations no later than 1 January 2017.	Prepares the world for digital information exchange.	Improve coordination between air traffic service units (ATSUs) by using ATS interfacility data communication (AIDC). AIDC is the necessary first step for all improvements in FF-ICE, ATFM and collaborative decision making and the baseline of future advanced management processes.

B0-ACAS	
ATC16	Notes
Implement ACAS II compliant with TCAS II change 7.1	
Algeria 2018	The carriage and operation of ACAS is foreseen from 1 January 2017 onwards. A transitional period and derogation measures are foreseen until 31 December 2017. Algeria has published a circular to achieve implementation ACAS 7.1.
Morocco 80% (12/2018)	An ACAS II version 7.1 Condition is included in the airworthiness certification process. ATC reporting of ACAS RAs is implemented in the ACC.
Tunisia 2015	Tunisian registered aircraft are all equipped TCAS version 7.1. Regarding the monitoring, Air operators are invited to comply with manufacture procedures ATC RA monitoring provision implemented.
