

# OMAN VHF & RADAR TELECOM NETWORK

- The aviation community has always supported the development of communication services and use of technologies to enhance the operation of Communications, Navigation, and Surveillance and Air Traffic Management , hence the safety and efficiency of ATC operations.

## CHALLENGES

1. Increased demand on more reliability and availability of VHF and Surveillance.
2. CNS Sites are either in the desert or on mountains. Hence, difficulty to secure telecom and utilities.
3. Sever weather conditions resulting in heavy flooding's experienced in 2007, 2010, where most of the telecom infrastructure was damaged.
4. Increased traffic volumes within Muscat FIR.

The logo for Omantel, featuring the Arabic word "عمانتل" in blue and orange, with "Omantel" in blue and orange below it.

عمانتل  
Omantel

The logo for PACA, featuring a stylized aircraft icon in grey, red, and green, with the acronym "PACA" in bold black letters and the Arabic text "الهيئة العامة للطيران المدني" below it.

PACA  
الهيئة العامة للطيران المدني
