من التأسيس لرجاء التعميم

What is ATFM?

What is ATFM?

ATFM is an **enabler** of air traffic management **efficiency** and **effectiveness** in a way that **minimizes delays** and **maximizes/optimizes** the use of the available airspace contributing to the **safety** and **environmental** sustainability of an ATM system.

Long Term Objective is **Global ATFM**

Over time, **local** ATFM implementations conducted worldwide are going to shape a **Global** ATFM supporting the implementation of ATFM processes and operating procedures in an **effective, coordinated, Standardized** and **Harmonized** manner.

DGCA-MID/5

Fifth Meeting of the Directors General of Civil Aviation- Middle East Region

Kuwait 4-6 Nov 2019

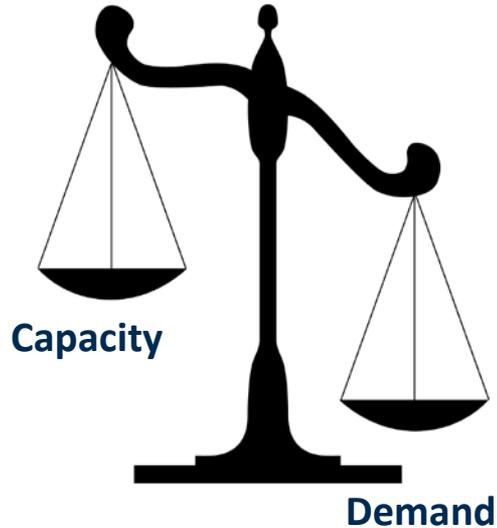

الإيكاو ٢٠١٩

من التأسيس من أجواء التعاون

ATFM is demand/capacity
balancing

When demand exceeds capacity then
“flow” management is required

The objectives of ATFM/CDM

- Enhance **safety**
- Reduce **workload**
- **Optimize** the use of available airspace
- Improve operational benefits, **predictability** and efficiency
- Effective management of **capacity** and **demand**
- Increased situational **awareness** among stakeholders
- Provide for **coordinated**, **collaborative** development and execution of operational plans
- Reduce **fuel** burn and operating **costs**
- Support **effective** traffic management of irregular operations, **Contingency**, **Emergency**, and the **recovery** of such situation

Keys to successful implementation

- ✓ The Collaboration Decision Making (CDM) process is a key **enabler** of an ATFM to achieve a robust **coordination** among aviation **stakeholders**.
- ✓ All the stakeholders work **together** to improve the **overall** performance of the ATM system
- ✓ Due to their **far-reaching** effects on the flow of traffic elsewhere, ATFM and its applications should **NOT** be restricted to **ONE** State or FIR
- ✓ PANS-ATM, Doc 4444 states that **ATFM** should be implemented on the basis of a **regional air navigation agreement** or, when appropriate, as a **multilateral agreement**.

Doc 9971: Manual on...

Doc 9971 was published in 2012 (3rd Edition in 2018)

Part 1 – Collaborative Decision Making (CDM)

Part 2 – Air Traffic Flow Management (ATFM)

Part 3 – Airport CDM (A-CDM)

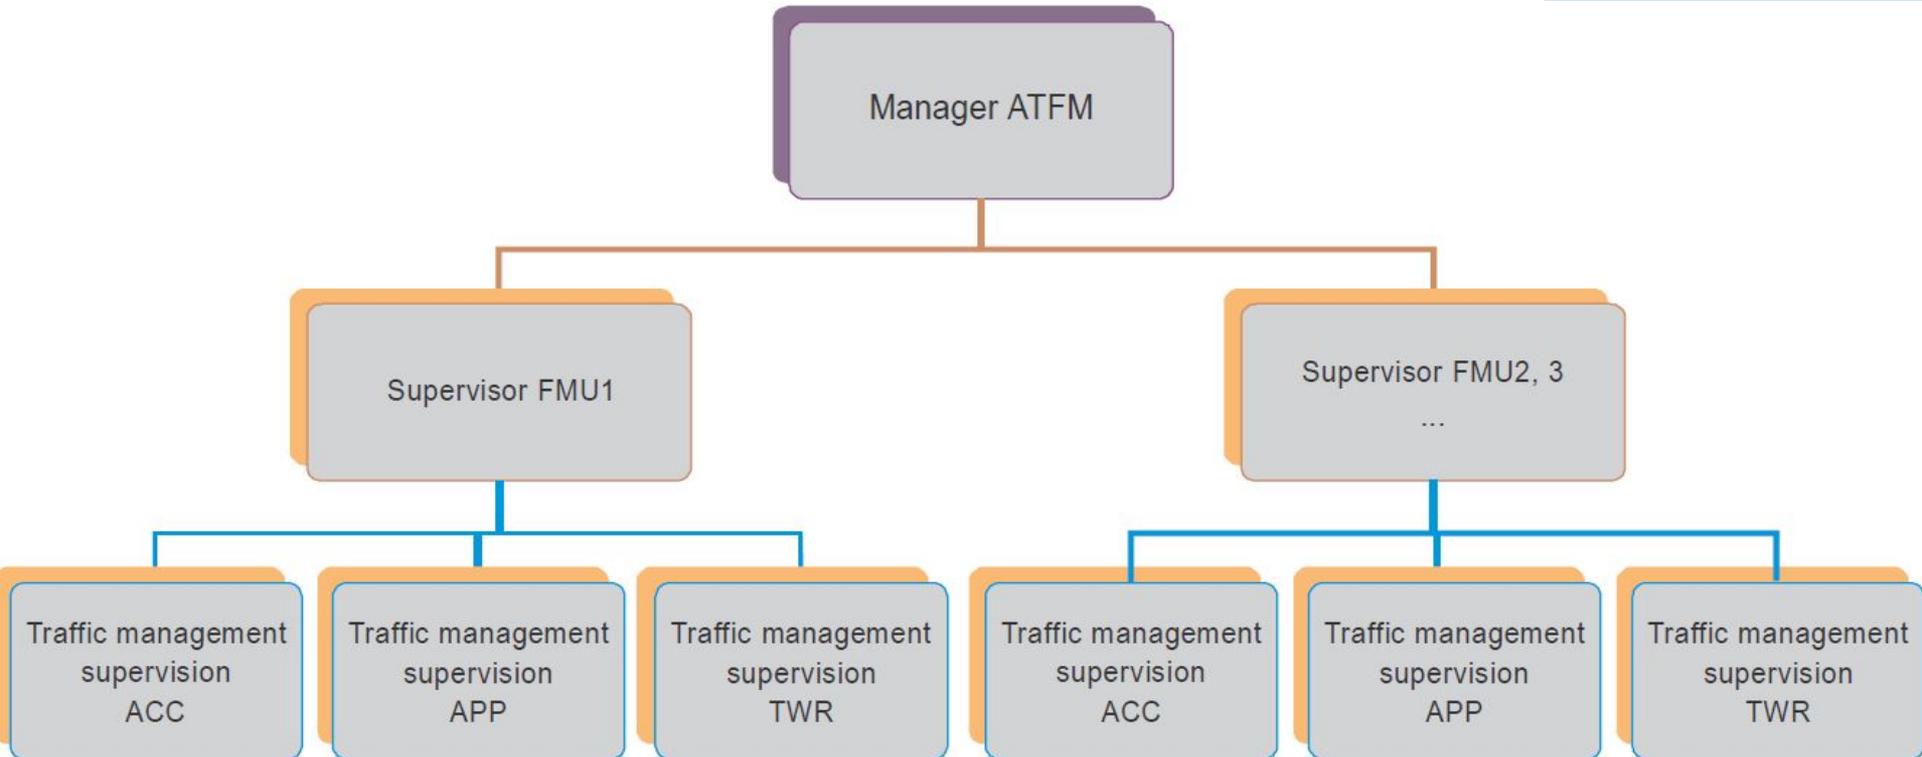

ATFM Service and Organization Structure

- ❑ State should ensure that an **ATFM organizational structure** which meets the needs of the aviation community is **developed**.
- ❑ This structure should, at a **minimum**, allow the management and **oversight** of the ATFM service and the **coordination** and **exchange of information**, both **internally** and **externally**.
- ❑ The structure should also ensure the **existence** of a **line of authority** for the implementation of **decisions** and **compliance** with the **mission requirements** assigned to the ATFM services.
- ❑ A line of authority to support the ATFM service should to include the following:
 - a) an **ATFM service manager**;
 - b) the flow management unit (**FMU**) that provides ATFM service for a specific set of ATS units; and
 - c) flow management positions (**FMPs**) at specific ATS units responsible for the day-to-day ATFM activities

Sample of an ATFM Service and Organization Structure

ATFM Training Requirements

- States should ensure that ATFM service is provided by **adequately trained, qualified and competent** personnel

- Staff of other units/areas/entities should be aware of and understand the ATFM services such as:
 - a) **ATC;**
 - b) **aircraft operators;**
 - c) **pilots;**
 - d) **airport operators;**
 - e) **military, both service providers and users; and**
 - f) **regulatory bodies (CAAs and equivalent).**

ICAO Middle East Region is composed of **15 States:**

- | | |
|---------|--------|
| Bahrain | Oman |
| Egypt | Qatar |
| Iran | Saudi |
| Iraq | Arabia |
| Jordan | Sudan |
| Kuwait | Syria |
| Lebanon | UAE |
| Libya | Yemen |

ATFM TF Meetings

- The First Meeting of the Air Traffic Flow Management Task Force (**ATFM TF/1**) was successfully held in **Muscat**, Oman, **23 - 25 September 2018**. The meeting was gratefully hosted by the Public Authority for Civil Aviation (PACA), Oman.
- The **ATFM TF/2** was successfully held in **Casablanca**, Morocco, **19 – 20 March 2019**. The meeting was gratefully hosted by the Arab Civil Aviation Organization (ACAO).
- The Meeting supported the recommendations emanating from the **ACAO/ICAO ATFM Workshop** (Casablanca, Morocco, **17 – 18 March 2019**) held-back-to-back with the ATFM TF/2 meeting
- The **ATFM TF** and **FWC2022** TF meetings are being held **back-to-back**

DGCA-MID/5

Fifth Meeting of the Directors General of Civil Aviation- Middle East Region

Kuwait 4-6 Nov 2019

Where we stand Now?

The ATFM TF/1 meeting established the **ATFM Core Team** composed of volunteer experts from Bahrain, India, Oman, Qatar, Saudi Arabia, UAE (ATFM TF Chairman), USA, ACAO, AEROTHAI, CANSO, EUROCONTROL, IATA and ICAO to carry out the task assigned by the ATFM Task Force that include but not limited to:

1. Carry out a survey to assess the status of the MID Region related to ATM/ATFM capabilities, airspace, sectors and airports capacity, etc.
2. Carry out teleconferences with States' ATFM focal points to explore their views and thoughts related to ATFM taking into`set of data that should be exchanged and explore means that would be used for the exchange of data including the development of a common template.
3. Prepare an initial draft ATFM CONOPS.

DGCA-MID/5

Fifth Meeting of the Directors General of Civil Aviation- Middle East Region

Kuwait 4-6 Nov 2019

4. Develop guidance as required to support States addressing issues related mainly to:
 - a) aerodromes and airspace capacities;
 - b) regular review for aerodromes and airspaces where traffic demand is expected to reach capacity, or is resulting in traffic congestion;
 - c) compliance by airspace users with ATFM measures
 - d) any other guidance relevant to the regional ATFM Framework
 - e) mechanisms for ATFM data gathering, collation and sharing between States, Organizations and ICAO
5. Develop a Template to support States with the development of National ATFM Implementation Plan.

Main Outcome of ATFM TF based on the Core Team work that was supported by MIDANPIRG/17

- The meeting reviewed the responses to the survey received from 10 States.
- It was recognized that the MID Region is still in the first steps related to the establishment of ATFM capabilities.
- It was recommended that qualification of experts in ATFM as well as raising awareness should be given high priority.
- The meeting agreed to a set of criteria to be used for the evaluation of the scenarios based on the severity of the challenge to achieve the criteria as well as its weight/importance on the success of the scenario.
- The meeting emphasized that establishing a **centralized ATFM Unit** would be the optimal solution followed by the scenario in having **2 Centres for 2 participating areas**, then a centralized scenario through a **third party providing the ATFM service** and the last one would be the **Multi-Nodal**. However, considering the challenges, feasibility and time and efforts required, the **Multi Nodal Scenario** achieved the highest Score
- MIDANPIRG/17 agreed that **Multi Nodal Scenario** to be implemented as initial **start**

High level outline to be considered during the development of the CONOPS

Phase I- Building State's National ATFM Capabilities

1. Raising awareness related to ATFM
2. Establishing the regulatory framework for ATFM at national level
3. Establishment of ATFM Services within the ATS organizational structure (FOC, FMP, FMU, etc.)
4. Human resources
5. Training
6. Operating Procedures
7. National ATFM Team to ensure Collaborative Decision Making (CDM)
8. Tools to be used
9. Determine and declare Airspace and airports capacity
10. Establishment of State's National ATFM CONOPS

High level outline to be considered during the development of the CONOPS

Phase II – Establishment of Regional Framework

- 1- Setting up the concept/framework for Cross border ATFM in the MID Region
- 2- Define which ATFM Measures would be required including GDPs (where applicable to be defined by States)
- 3- Agreement on the Format of the ATFM Messages
- 4- Means to be used for Communication between adjacent States ATFM FOC
- 5- Development of Common Operating Procedure (COP)
- 6- Agreement on LoA template for ATFM (App G of ATS LoA Template)
- 7- Agreement on the coordination procedures
- 8- Signature of LoAs between adjacent ATFM FOC
- 9- Establishment of platform to be used for sharing of information

High level outline to be considered during the development of the CONOPS

Phase III- Implementation of Cross border ATFM

- 1- Exchange of information through the established platform and/or periodic daily teleconferences
- 2- Sharing of the ATFM Daily Plan
- 3- Implementation of the ATFM/CDM process for regulating traffic when required (regional and later inter-regional)
- 4- Post Implementation Review
- 5- Research and future development

Action by the meeting

The meeting is invited to:

- a) commend the work carried out till today by all the experts supporting the ATFM TF and the ATFM Core Team
- b) encourage States and Organizations to continue their collaboration and provide further support in order to prepare the MID Region to accommodate the significant increase of traffic due to the FIFA World Cup 2022 or any other major events in a safe and efficient manner; and
- c) urge States to take necessary measures to ensure the establishment of ATFM service at the national level, including the promulgation of the required regulations, organizational structure, human and financial resources, training, etc.
