PBN implementation status by ASBU APTA element

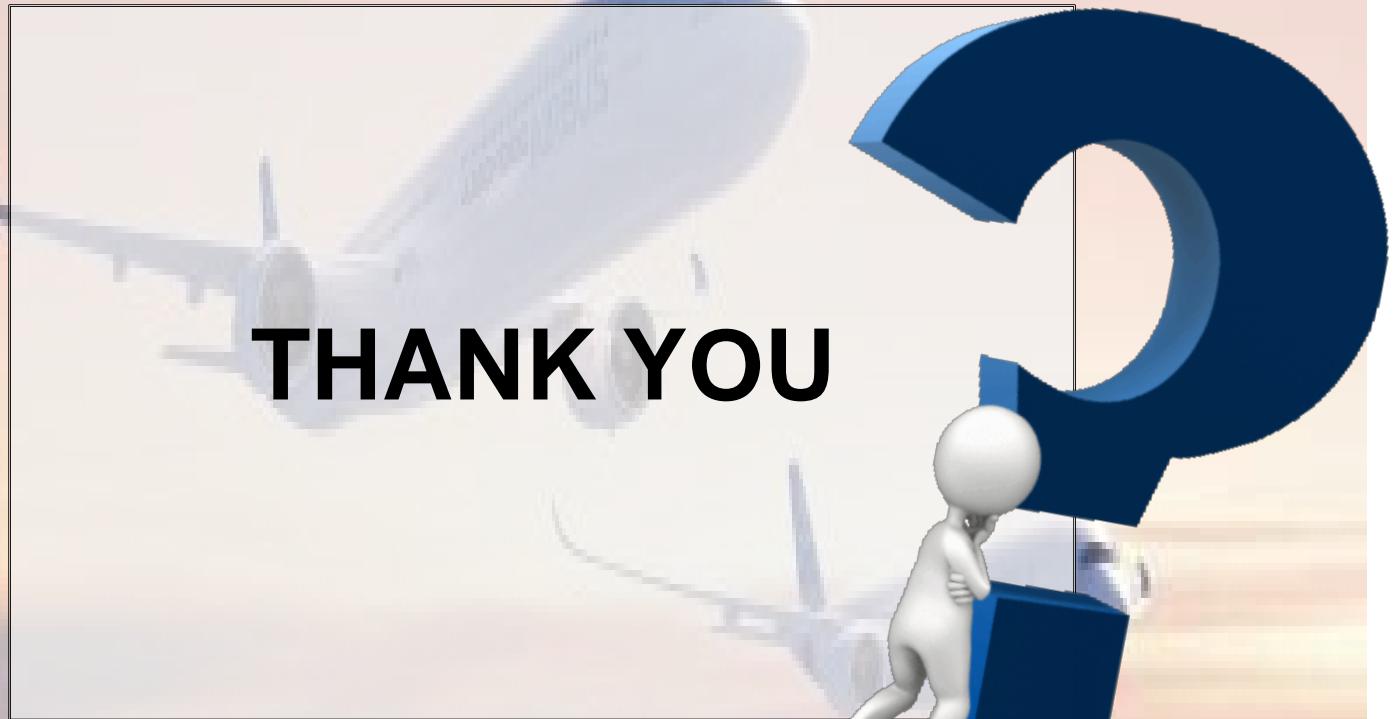

Challenges

- Training of personnel employed by the CAA, ANSP and aircraft operators.
 - Lack of airspace and procedure design training: initial, OJT, and/or recurrent.
- Airspace complexity.
- GNSS signal vulnerability.
- Level of civil/military cooperation.
- Shortage of PANS-OPS, Airspace Planners and OPS-approval experts.

Recommendations

- Involvement of stakeholders to reach mutual agreements for the effective implementation of PBN.
- Organize workshops and seminars on PBN at national level, in order to support PBN implementation according to international standards and current development.
- Enhance harmonization between adjacent FIRs to promote the sharing of good practices and to improve and speed up the implementation of PBN.
