ATS route designator update in Iran

- Iran update the national publication based on MID ANP VOL II, Table ATM II-MID-I (deletion of prefix “Upper” and change ATS route designators) with close coordination with ICAO MID office;

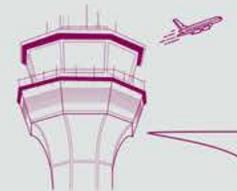

W148, PAMTU (FIR boundary) to KER

- Issue declared by ICAO MID office: This route based on agreed definition for regional ATS route could be considered as regional network, to this end, we need your confirmation at the first step then ICAO MID will allocate required regional and RNAV route designator for that route.
- Action: The airway considered as regional network and route has been added in ANP with the new route designator **B418** with ICAO MID office coordination.

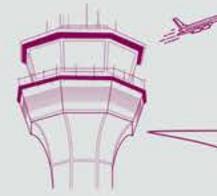

L126, PUSTO to ILM

- Issue declared by ICAO MID office: This ATS route was deleted, but still available in ANP.
- Action: This route has been deleted in ANP by Iran acknowledgment.

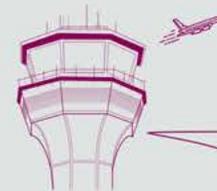

M316, KATUS to GOKSO

- Issue declared by ICAO MID office: This route designator has duplication with another one in our region, in addition currently this route entirely located inside on Tehran FIR.
- Action: This route has been extended to IMLOT in ANP and the route designator kept.

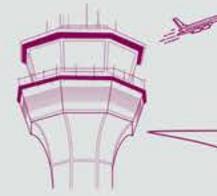

M573, TRN to TBZ

- Issue declared by ICAO MID office: Based on agreed regional route definition in ATM SG/8, this route entirely located inside on Tehran FIR.
- Action: This route has been extended to DASIS in ANP.

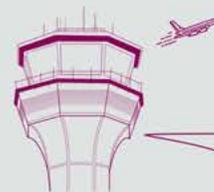

R205, ANK to BJD

- Issue declared by ICAO MID office: Based on agreed regional route definition in ATM SG/8, this route entirely located inside on Tehran FIR.
- Action: This airway-R205 the RD had been changed to W159 (domestic).

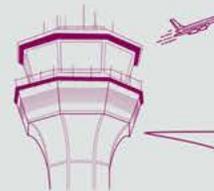

W147, SIR (FIR boundary) to PRG

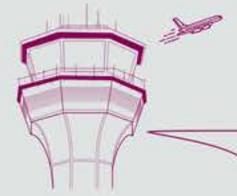

- Issue declared by ICAO MID office: This route based on agreed definition for regional ATS route could be considered as regional network, to this end.
- Action: This route has been added in ANP with the new route designator **B547** with ICAO MID office coordination.

Z680	RIKOP to ITELO	Is added to ANP RD should be change to L720	

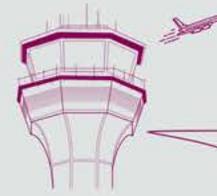

SSR Code Management in the IRAN

- The Middle East SSR Code Management Plan (MID Doc 005: MID SSR CMP) has been established to provide States in the ICAO MID Region with means to coordinate the use of SSR codes based on the principles of the Originating Region Code Assignment Method (ORCAM), which provides for the most efficient and economical use of codes.
- The new SSR Code management has been implemented in Iran from 23rd Feb 2023 according last table of SSR code assignment of MID DOC 005.
