Air Transport Bureau, ICAO

ICAO Big Data Dashboards

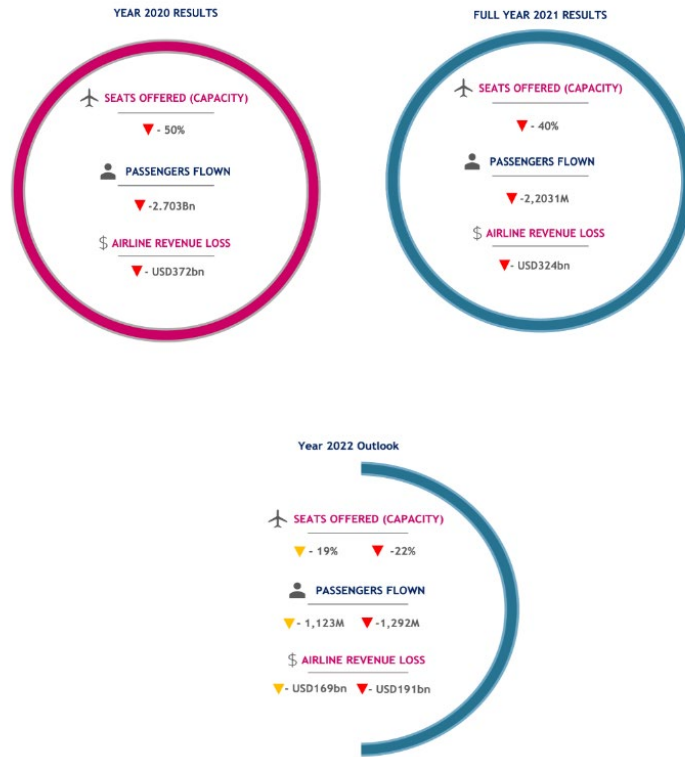

Setting the Scene

Tableau Dashboards to monitor State of Industry and
COVID-19 related economic and operational impacts

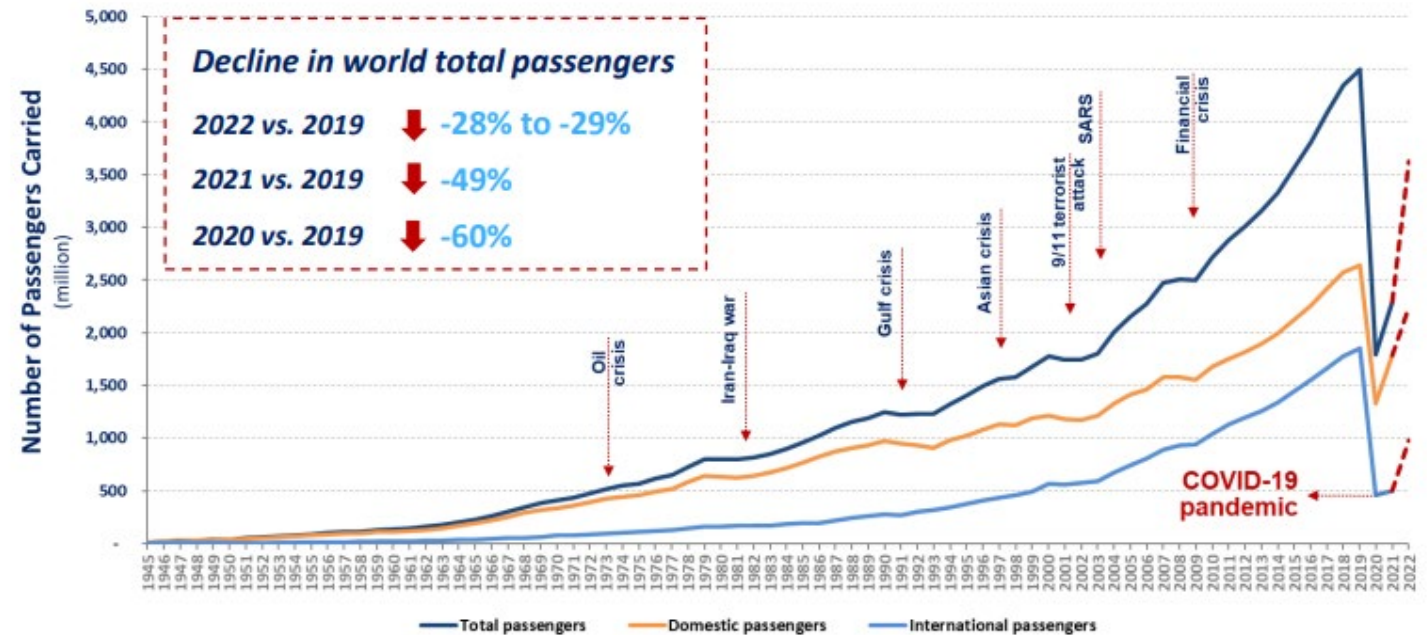

Covid-19 Pandemic impact on civil aviation

Global Economic Impact in brief

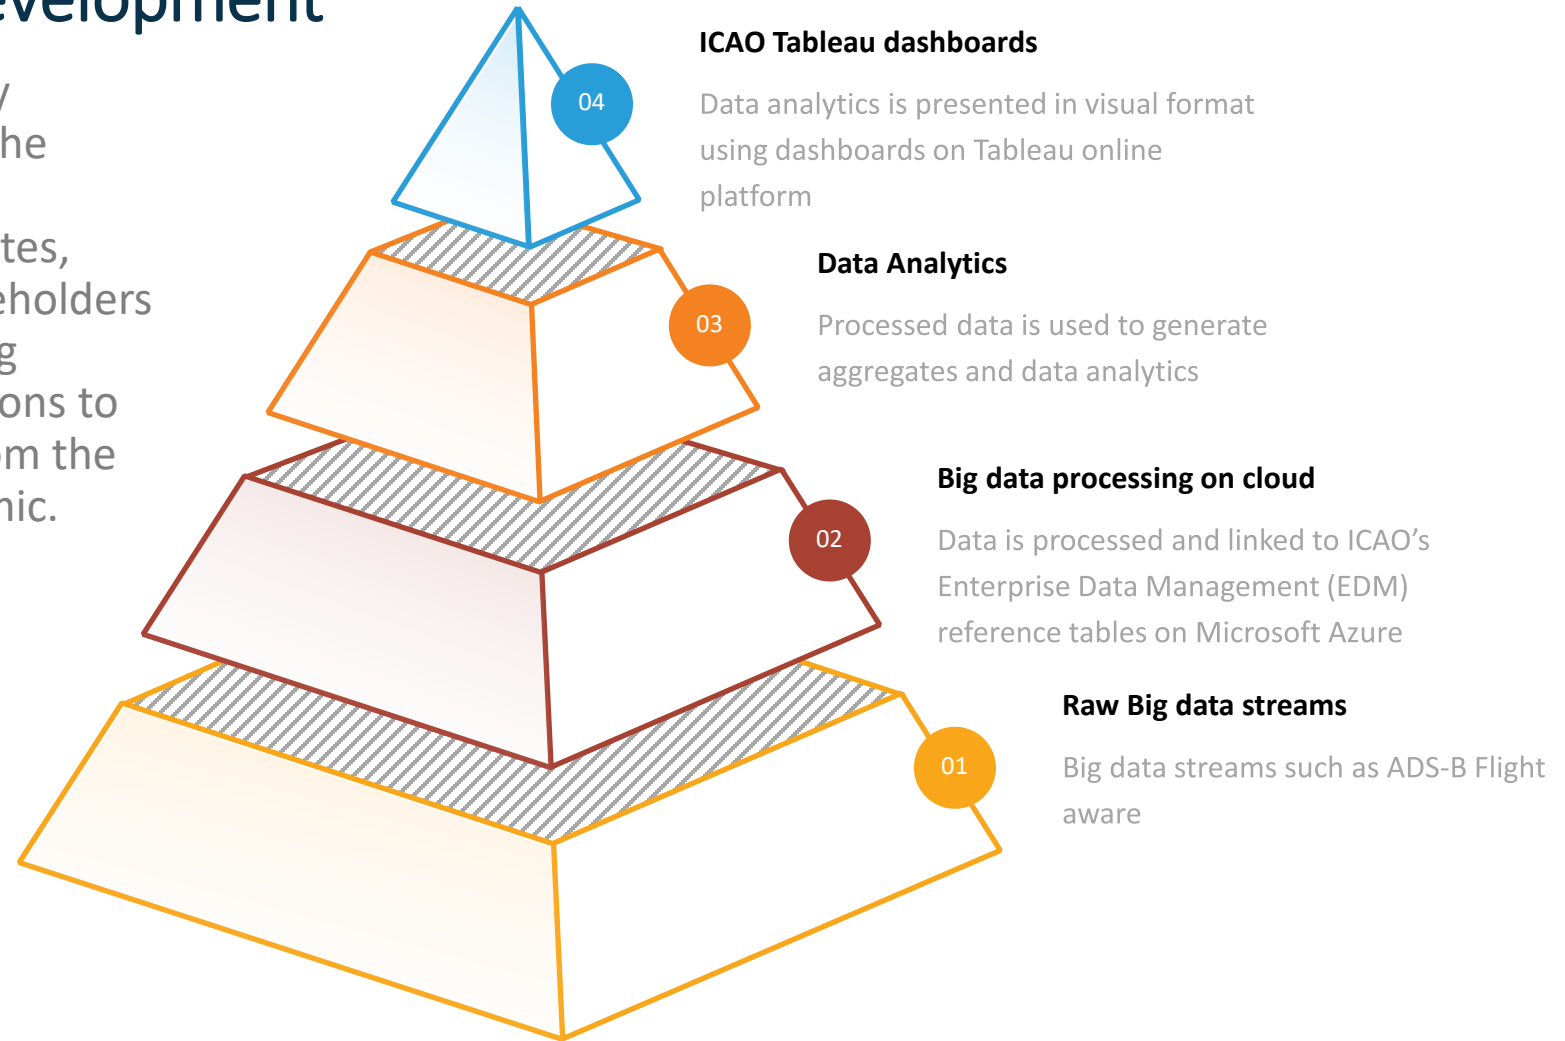

World passenger traffic evolution 1945 – 2022

Dashboards Development

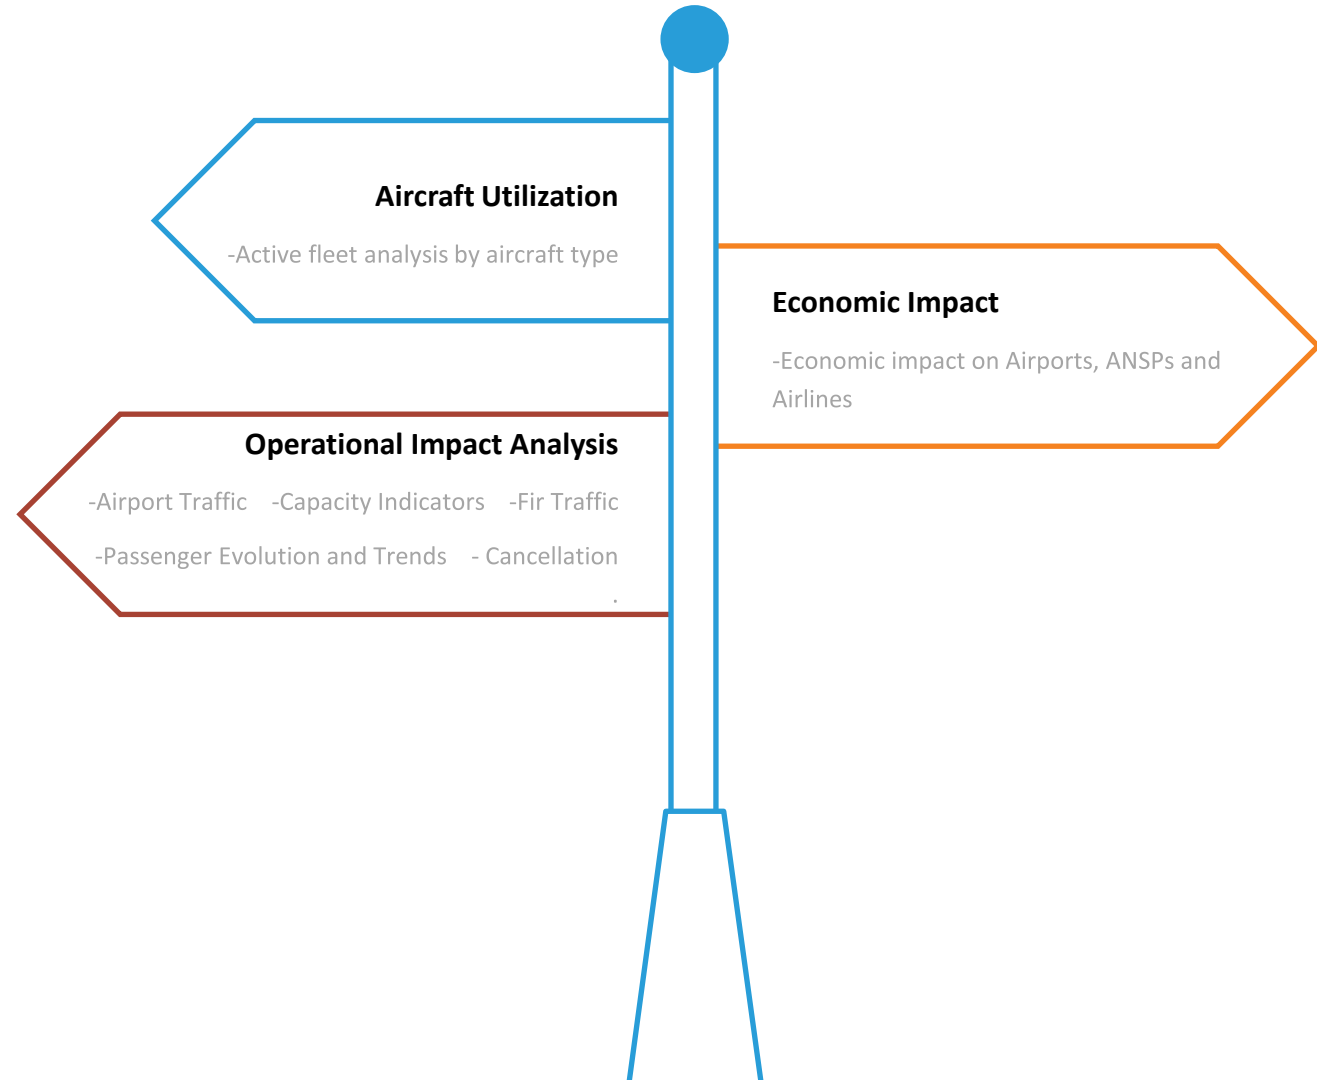

The reliable and timely analysis presented in the dashboards will be of significant value to States, industries and all stakeholders in planning and making implementation decisions to restart and recover from the impacts of the pandemic.

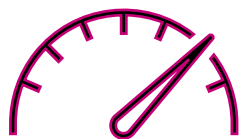

ICAO Tableau Dashboards

These dashboards cover impact of the pandemic on different aspects of civil aviation and help monitor the State of the Industry and COVID-19 pandemic related economic and operational impacts.

- Member States have been provided with one free license to access the dashboards
- Instructions to nominate focal points in State letter 2022/67
- Presented in the 11th session of statistics division in spring of 2022
- Presented to council in June 2022
- Training sessions for regional offices and states

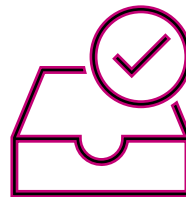

ICAO BUSINESS INTELLIGENCE DASHBOARDS

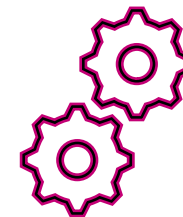

FUNCTION

- Operations and economic impact tracker
- Interactive visualization
- Data download by parameters
- Scalable

RESULT

- Informed planning and implementation
- Data-driven decision-making
- ICAO cooperation with external stakeholders

UPDATES

- Weekly updates
- Integration of States' feedback
- Machine learning algorithms to continuously improve future forecasts and estimates

All States - as well as Council Members and delegates – have a free license to access ICAO dashboards
