

IAC activities in the issues of readiness and cooperation in Civil Aviation to cope with threats in Public Health

Sergey Ivashov
Head of aviation
medicine department,
Chairman of IAC CAAC
Cairo.
May 19, 2025.

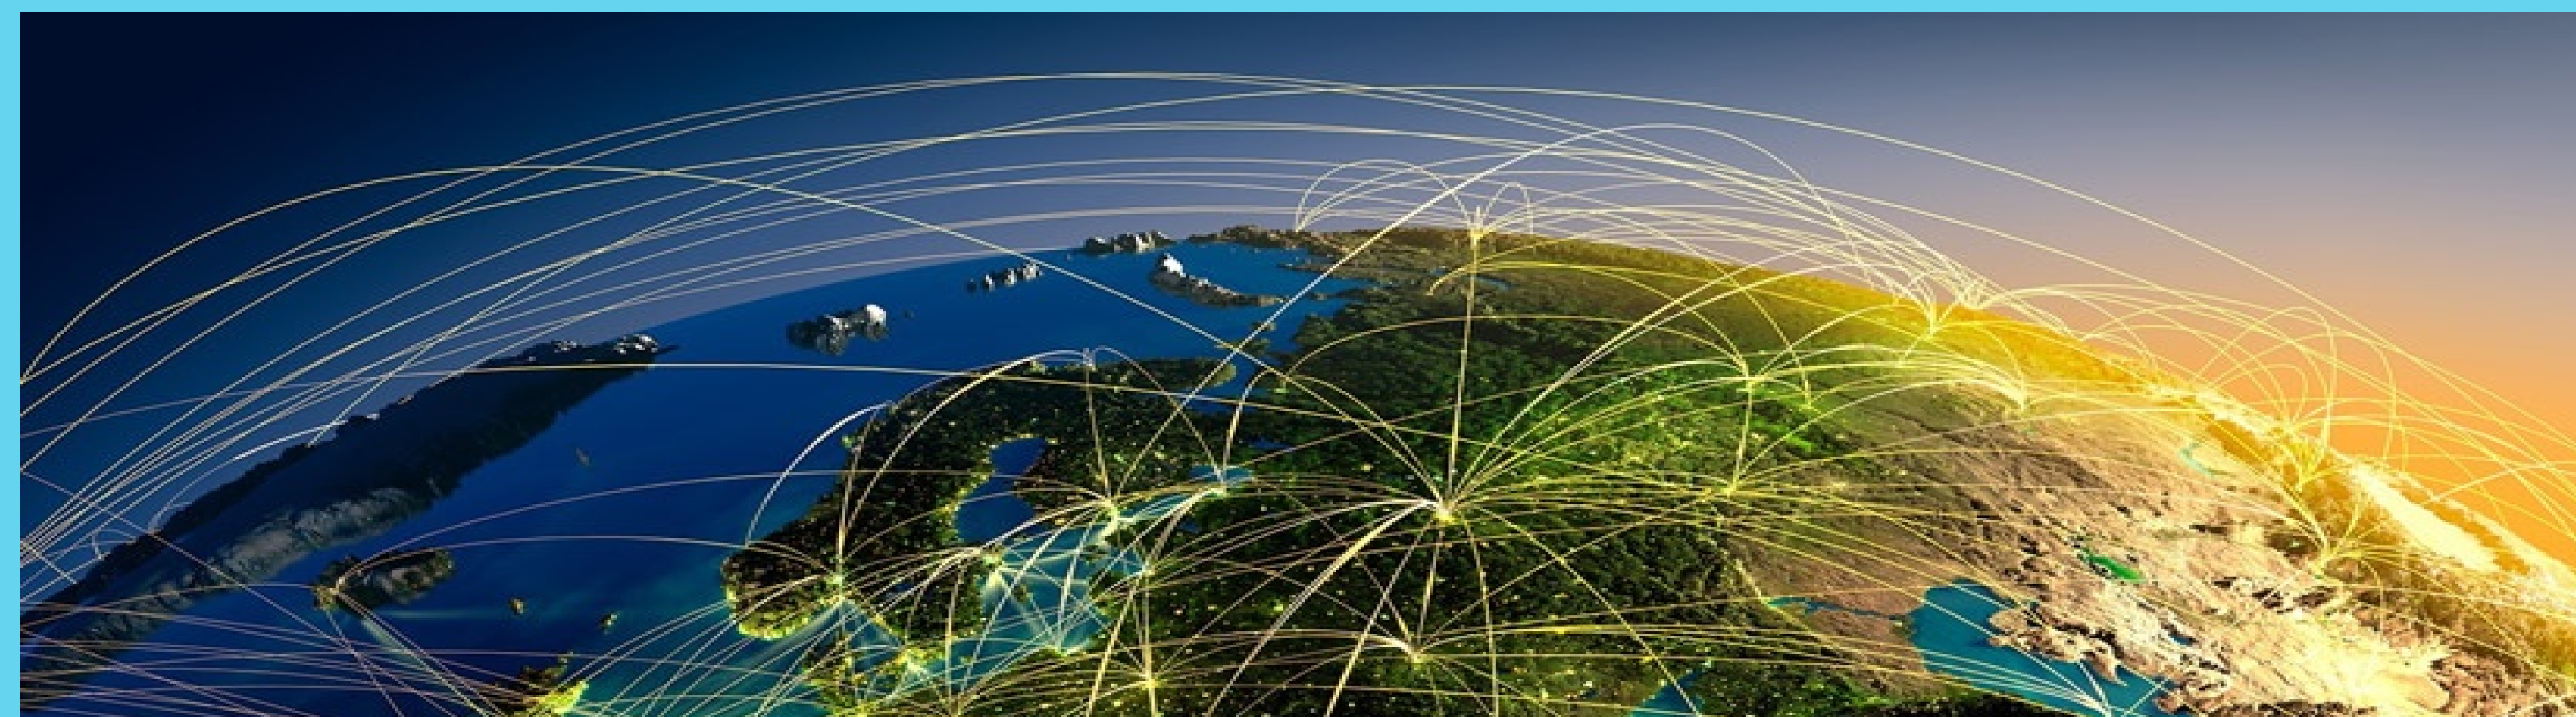

**74 COUNTRIES
19 INTERNATIONAL
ORGANIZATIONS**

**The IAC and Council on Aviation and Use of Airspace
cooperate on the basis of**

**International Agreements in the field airworthiness and flight safety with
such countries as India, Canada, China, the USA, countries of Asia and
Pacific region, Africa, Middle East and Latin America,
as well as such organizations as ICAO, IATA, EASA, CIS, EurAsEC,
CSTO and other organizations.**

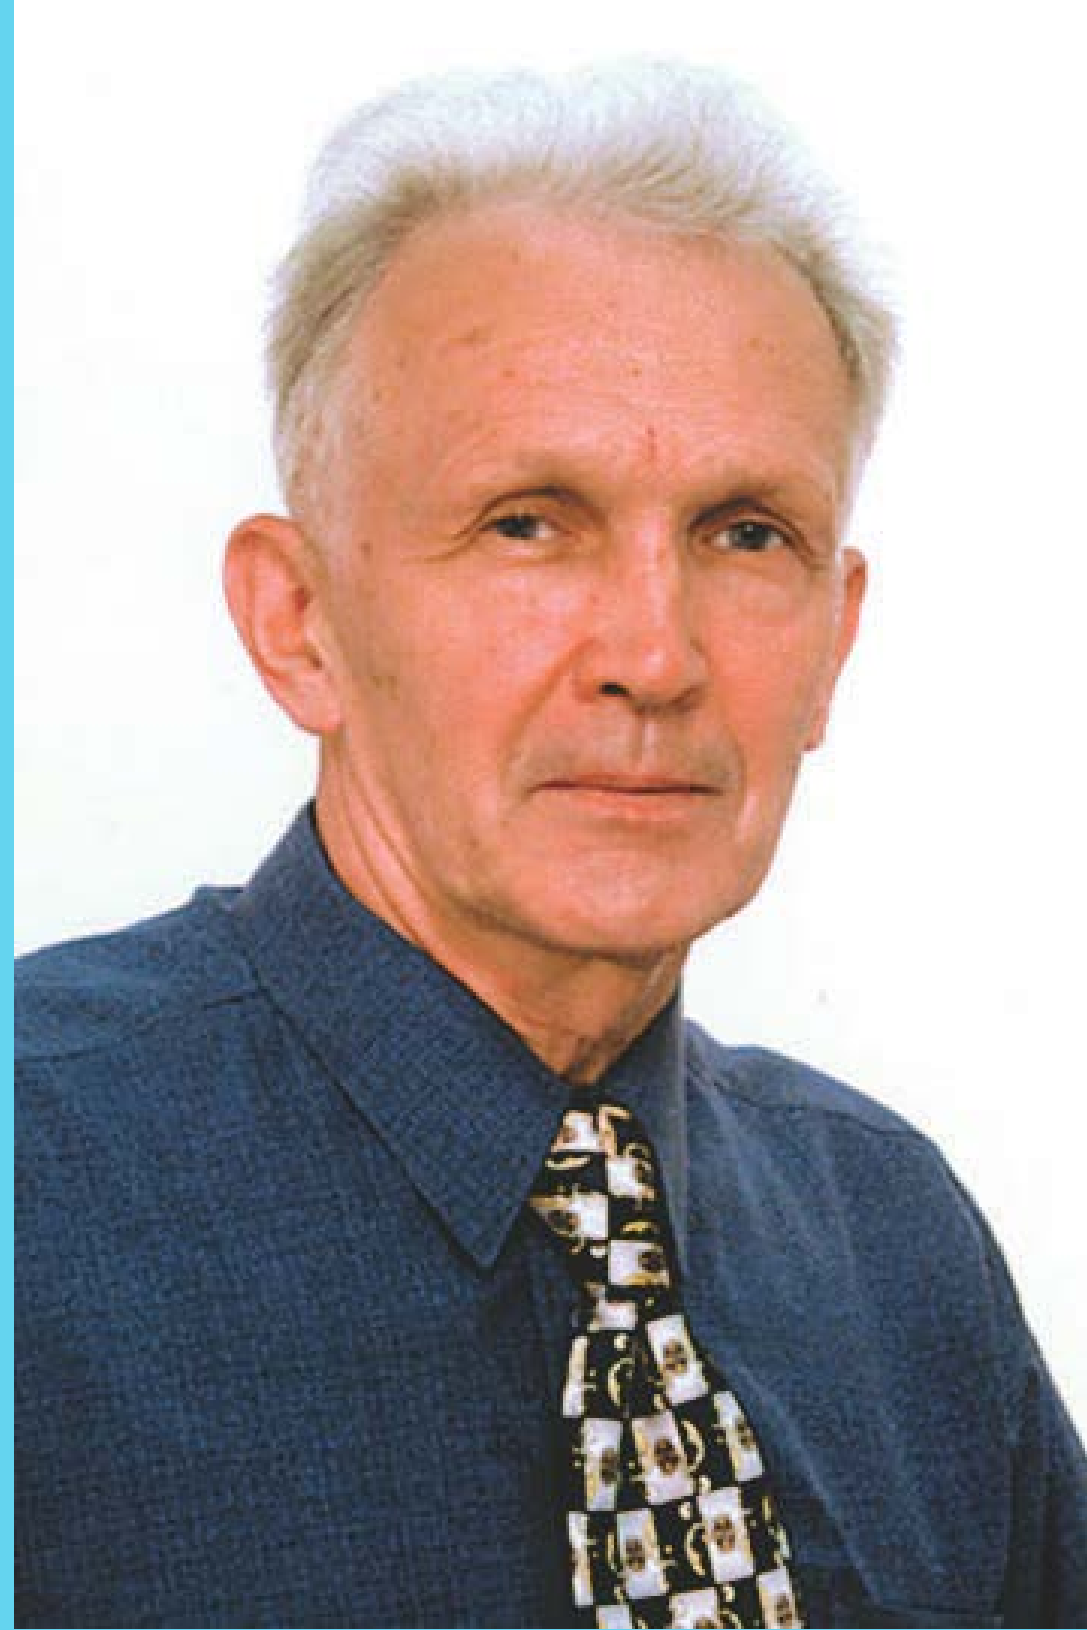

The Interstate Aviation Committee is a platform for coordination, interaction and consolidation of the medical community of Russia and the Commonwealth of Independent States in order to form harmonized principles of medical flight safety, taking into account the ICAO Standards and Recommended Practices, WHO Regulations, and Standards and Regulations of other International Organizations.

IAC CAAC

The Coordinative Advisory Aeromedical Council (IAC CAAC) was established in the Interstate Aviation Committee to cooperate and harmonize issues of intersectoral cooperation on medical flight support in the Commonwealth countries.

In November 30, 1992, the Department of Aviation Medicine was created. The Head of the Department was prof. Vlasov V. D. over the period of 17 years. The organization of activities, training, annual meetings of IAC CAAC and implementation of its decisions is under the responsibility of the Department of Aviation Medicine of IAC.

The members of IAC CAAC are the representatives of medical services of civil, state, experimental aviation and interested Ministries and Departments of the Commonwealth countries. The IAC CAAC is an interstate specialized body which acts in accordance with its Regulations.

IAC CAAC MAIN TASKS:

- accommodation and coordination of aviation medical services activities in the States;
- creation of long-term interstate programs and signing of Agreements to preserve the health of aviation specialists;
- formation of a unified approach in the development of aviation medicine, flight medical support, medical and flight examination, training and skill enhancement of aviation doctors;
- requirements standardization to professional education level, certification of medical institutions and medical and flight expert commissions;
- development, coordination and implementation of norms, rules, regulations and standards in the field of aviation medicine, medical and flight examination and rehabilitation of aviation specialists, considering the ICAO Standards and Recommended Practices;
- implementation of medical science achievements and best practices in the practice of medical and flight expert commissions and aviation medical institutions.

IAC CAAC works to establish common principles of aviation medical support for Civil Aviation, as well as intersectoral, interstate and international cooperation on the implementation of the developing Standards and Regulations of medical support in aviation.

IAC CAAC offsite meetings

- Kyiv
- Baku
- Bishkek
- Kishinev
- Yerevan
- Minsk

participants from
Public Health Ministries,
Medical Institutes and
Aeromedical organizations of
Commonwealth and different
countries

Since the formation of CAPSCA EUR, the IAC took active part in the Program and the implementation of its goals. The IAC supports CAPSCA and encourages all participants to promote the cooperation between all parties.

СОГЛАШЕНИЕ О СОТРУДНИЧЕСТВЕ ПО ПРЕДОТВРАЩЕНИЮ И
УПРАВЛЕНИЮ СОБЫТИЯМИ В ОБЛАСТИ ОБЩЕСТВЕННОГО
ЗДРАВООХРАНЕНИЯ В ГРАЖДАНСКОЙ АВИАЦИИ - CAPSCA

As a result of cooperation, the IAC has been established as a member organization of CAPSCA EUR and a coordinator to cooperate with Civil Aviation and Public Health Authorities in the Commonwealth countries.

Participation of the Commonwealth countries in CASPCA Program, CAPSCA EUR 06 meeting in the Republic of Belarus and demonstration exercises in the airports encouraged to increase Civil Aviation sanitary and epidemiological readiness in the Commonwealth countries.

The IAC holds the following:

- regional meetings to promote intersectoral cooperation, incorporation and sharing experiences, resources and best practices;
- meetings to develop programs and training of CAPSCA experts, providing assistance in the Commonwealth countries to improve public health readiness plans at the regional, national and operational levels;
- assessment of States readiness to manage public health events in aviation and provision of recommendations to States.

С этой же целью МАК сотрудничает с региональными межгосударственными организациями (Исполнительным Советом государств СНГ, ЕвроАзиатским Экономическим Советом), учебными центрами, общественными организациями и с другими заинтересованными сторонами.

По инициативе МАК образована региональная межведомственная рабочая группа органов общественного здравоохранения и гражданской авиации государств Содружества при Совете по здравоохранению Исполкома СНГ.

IAC actively cooperates with the IRT Center of the Republic of Belarus.

The IRT Center and the IAC have signed an Agreement on scientific and technical cooperation and training of specialists.

The IAC and the IRT Center are developing training programs for aviation personnel and medical specialists of airports in the Commonwealth countries to prevent threats in the field of Public Health and emergency situations considering ICAO Standards and Recommended Practices.

Safety Management

The pandemic has once again demonstrated how united and fragile our world is. It showed the necessity to apply a set of organizational measures which should be well-developed, interregional, interstate, interdepartmental and the effective work should be done at all levels.

The basis of Public Health safety in Civil Aviation is mutual trust between States based on the assessment of the level of readiness and cooperation mechanisms in order to prevent and overcome the threats.

“Uniting aviation” and “No issues in the flight safety should be left without attention” are the concept principles in all ICAO and IAC activities. And as always the IAC relies on the support of aviation and medical community and cooperation.

Thank you!
