18 October 2023

Subject: Month of Knowledge for the Future of ANS (MOKFANS) 2023
(from 31 October to 16 November 2023, Series Webinars)

Action required: Register online for the Webinars

Sir,

I have the honour to invite your Administration/Organization to attend the Fourth Series of MOKFANS Educational Webinars “Air Navigation Services for A Greener Future”, organized by the **United Arab Emirates General Civil Aviation Authority (GCAA) in collaboration with ICAO, ACAO and IATA** during the period **31 October to 16 November 2023**.

The objective of the Month of Knowledge for the Future of ANS initiative is to bring together the expertise of Air Navigation Services Providers (ANSPs) and the aviation community, to share knowledge, experiences and discuss best practices to facilitate enhancement of Air Navigation Services to all people around the globe. Further details are available in the attached flyer, including subjects and schedule.

Your Administration/Organization is strongly encouraged to participate in this series of Webinars; your participants could register online through the link <https://www.gcaa.gov.ae/en/Pages/MOKFANSWorkshop2023.aspx> or through the QR code in the flyer. Should you need further details, please contact the ICAO MID Office Focal Point, Mr. Ahmad Amireh (AAmireh@icao.int).

Accept, Sir, the assurances of my highest consideration.

for/ Mohamed Abubaker Farea
Regional Director
ICAO Middle East Office

Month of Knowledge for future of Air Navigation Services

AIR NAVIGATION SERVICES
FOR A **GREENER FUTURE**

MOKFANS 2023

Date: 31 October 2023 – 16 November 2023

From UAE to the world

Month of Knowledge for Future of Air Navigation Services is an initiative founded by the United Arab Emirates General Civil Aviation Authority (GCAA), in collaboration with the International Civil Aviation Organization (ICAO), the Arab Civil Aviation Organization (ACAO), and the International Air Transport Association (IATA) . This initiative aims to bring together the expertise of Air Navigation Services providers (ANSP) and the aviation community, to share knowledge, experiences and discuss best practices and facilitate enhancement of Air Navigation Services to all people around the globe.

MOKFANS

The MOKFANS initiative is a virtual event that was introduced in 2020. At that time, the COVID-19 pandemic had a profound impact on the aviation sector worldwide. This situation necessitated convening the aviation community to discuss the pandemic's impact on Air Navigation Service Providers (ANSPs), how to adapt to it, overcome its challenges, and collaboratively plan the future of ANSPs. In 2021, the event continued with the objective of establishing a robust foundation for agility and ensuring the business continuity of aviation and Air Navigation Services. In 2022, the primary focus of the event was on "Ensuring Learning Continuity and foreseeing the Future." Throughout the previous cycles, the event has been conducted in a virtual format.

MOKFANS 2023

In 2023, the event will virtually place a stronger emphasis on exploring new solutions to support the development of innovative systems. The goal is to create a solid foundation that enables organizations to be resilient and prepared for any future events that might impact the aviation sector and its sustainability.

Objectives

- Sharing knowledge.
- Oversighting challenges.
- Envisioning future.
- Business continuity.
- Collaboration.
- Promoting best practices.
