

RNP/RNAV TF/5  
Report on Agenda Item 2

---

**Agenda item 2:           Status of the amendment proposal to the Regional Supplementary Procedures Doc 7030.**

2.1           Under this agenda item the meeting was apprised of the status of the proposed amendment to the Regional Supplementary Procedures (SUPPs) Doc 7030 which was developed by the Fourth RNP/RNAV Task Force Meeting (Cairo, 68 June 2000) pursuant to LIM/MID (COM/MET/RAC) RAN Meeting Conclusion 2/24 c) for the inclusion of provisions regarding RNP 5 operations in the MID Region. It was pointed out that as provisions for RNP 5 operations were reviewed in the EUR Part of the SUPPs (*Amendment No 200*), in particular, regarding phraseologies to be used by State aircraft which are RNP 5 approved but not RNAV equipped, there was a need to harmonize the MID and EUR procedures accordingly (See **Appendix A** to the Report on Agenda Item 2). States were thus requested to delay implementation to 14 June 2001, pending approval of the revised proposal by the ICAO Council.

2.2           The meeting noted that some States had already initiated action for the implementation of RNP 5 on the agreed date of 22 March 2001 and could not delay implementation due to commitments already made. It was furthermore indicated that the proposed changes to the original text did not have any significant impact on safety of RNP 5 operations in the Region.
