ATFM Measure

## DISTRIBUTED MULTI-NODAL ATFM NETWORK

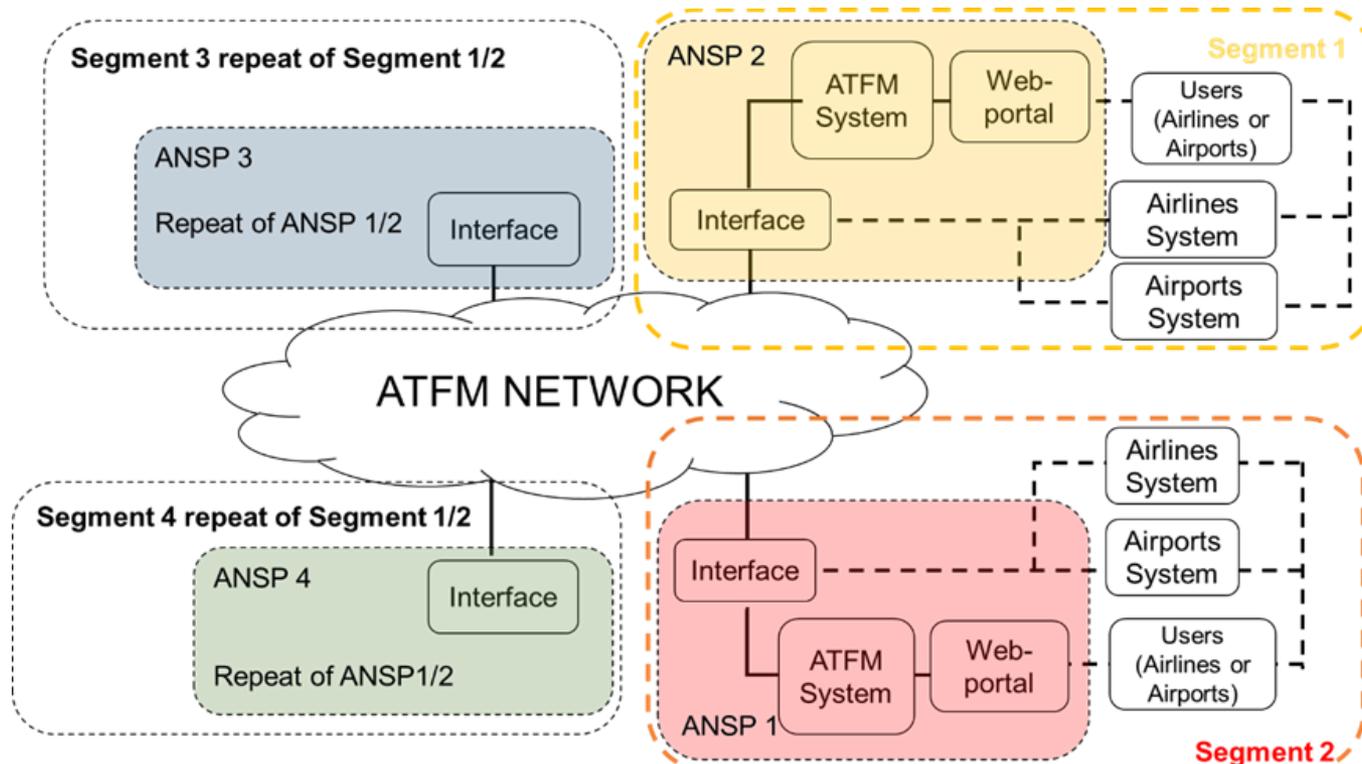

# Near Future

- Improved availability of quality data and information
- Improved shared situational awareness
- Improved decision making
- More flexible and cost-effective communications
- Increased system performance

- Loose system coupling
- Use of open standards
- Use of interoperable services

# What've been done so far

- Mini Global Demonstration in 2014 and 2016
  - Flight data
  - Airborne track data
  - NOTAM → **AIXM**
  - TAF → **IWXXM**

} **FIXM**

- ICAO APAC/MID Workshop on SWIM in 2016
  - Cross-border ATFM
  - International information sharing

**DISTRIBUTED MULTI-NODAL ATFM NETWORK**

# What've been done so far

- Technical Sub-Group of Distributed Multi-Nodal ATFM Network Project
  - System-to-system connection designed based on SOA with the use of XML-based information exchange model

✓ Operational Scenarios  
(Operational Requirements)

✓ Required Data Elements

✓ Mapping to FIXM

✓ Develop FIXM Extension

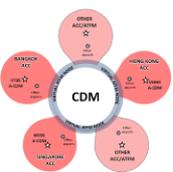

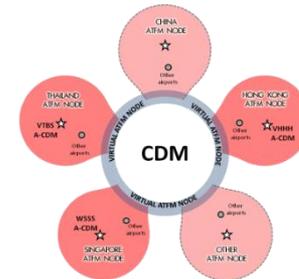

ATFM Sys-Sys Connection

ATFM Sys-Sys ICD

System Test

**DRAFT**

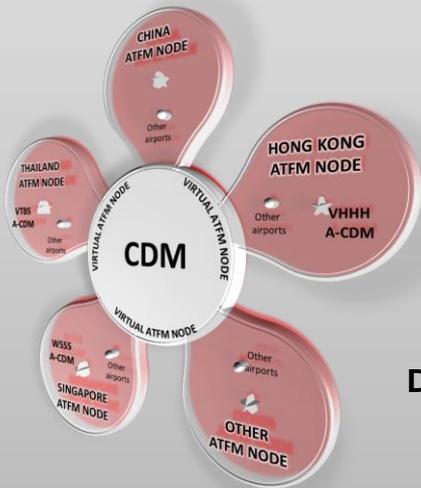

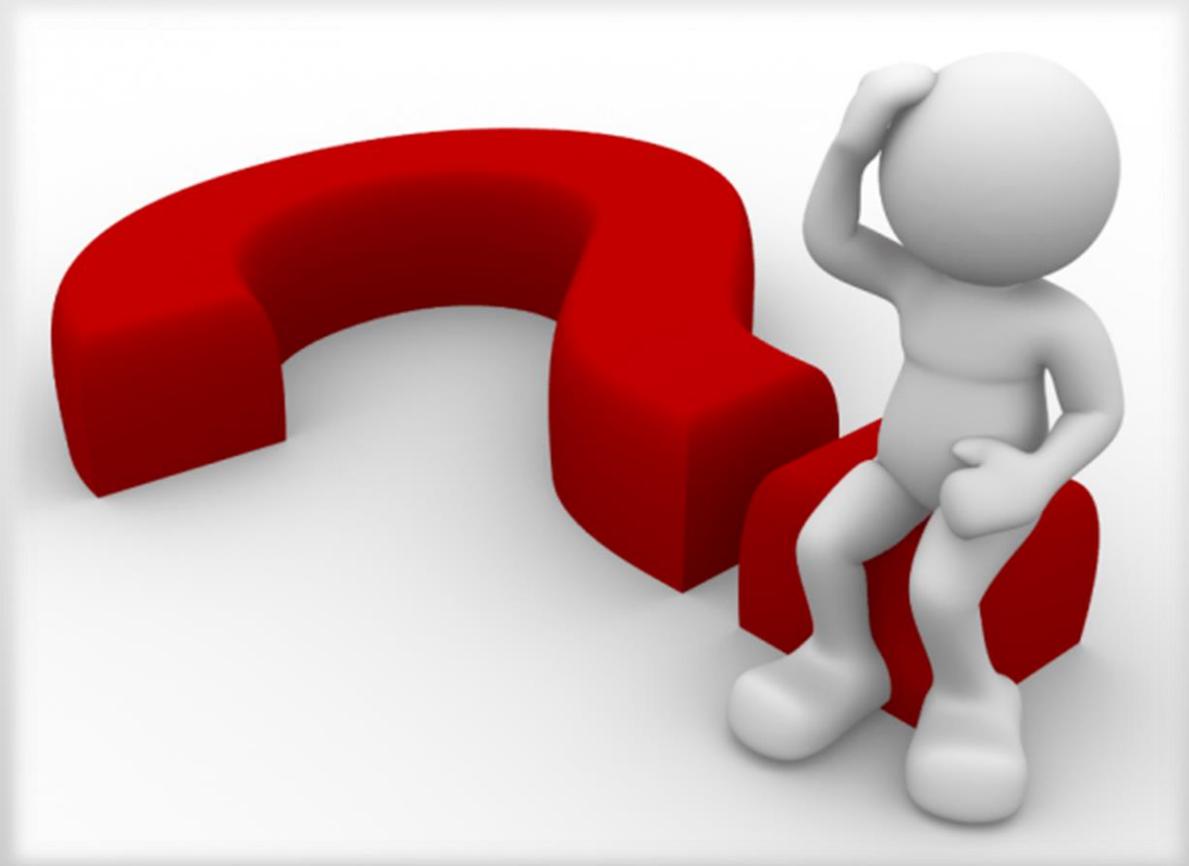

! CTOT, CLDT, etc. not included in FIXM4.0 Core

DISTRIBUTED MULTI-NODAL ATFM NETWORK
