

## **Session I**

### **Introduction**

### **Opening of the Security Culture Seminar**

**Ricardo Fernandes**

**ICAO AVSEC Panel Member – Portugal**

**Member of ICAO Working Group on Training (WGT)**

# Security Culture Seminar

- **Security Culture and Human Capability** – One of the Key Outcomes of the **GASeP**.
- Fully supported by ICAO WGT of the AVSEC Panel who have developed this Seminar in collaboration with ICAO Secretariat.
- Importance of establishing and maintaining a **strong and robust security culture**, alongside the development of human capital, skill and competency.

# Security Culture Seminar

- Security Culture in an organization is an essential component of a protective security regime.
- Security Culture supports and maintains a risk-resilient organization, that mitigates both insider threats and external threat.

# Security Culture Seminar

- Include presentations and interactive group exercises led by UK subject-matter expert.
- Participants will have the opportunity to:
  - understand what is necessary to build a security culture and the benefits of implementing and maintaining it.
  - Learn and share best practices to develop behaviour change campaigns.
  - Understand the tools to implement a positive security culture.

# Security Culture Seminar

- I – Introduction
- II - Understanding what is Security Culture
- III - Benefits of an effective Security Culture
- IV - Project Plan and implementation
- V - Interactive Exercises
- VI – Conclusions by the Rapporteur of WGT of the AVSEC Panel

The banner at the top of the slide features a dark blue background. On the left, there is a close-up of an orange suitcase. In the center, an orange rectangular box contains the text 'ICAO AVSEC2018' in white, with '2nd Global Aviation Security Symposium' and 'Montréal, Canada | 26-28 November 2018' in smaller white text below it. On the right, there is a blue suitcase containing various electronic components like cables and a small circuit board. Faint white arrows point towards the center from both sides.

**ICAO AVSEC2018**

2nd Global Aviation Security Symposium

Montréal, Canada | 26-28 November 2018

## **Session II**

# **Understanding What is Security Culture**

**#AVSEC2018**

# What is Security Culture?

- Largely unconscious
  - “Just the way things are done around here”
- No “one size fits all”.

# What is Security Culture?

An organisational culture that encourages optimal security performance through a set of norms, beliefs, values, attitudes, and assumptions.

These norms, beliefs, values, attitudes, and assumptions determine how people are expected to think about and approach security.

The diagram consists of three concentric ellipses. The outermost ellipse is light orange and labeled 'National Culture'. Inside it is a medium orange ellipse labeled 'Organisational Culture'. The innermost ellipse is dark orange and labeled 'Security Culture'. This visualizes that Security Culture is a subset of Organisational Culture, which is a subset of National Culture.

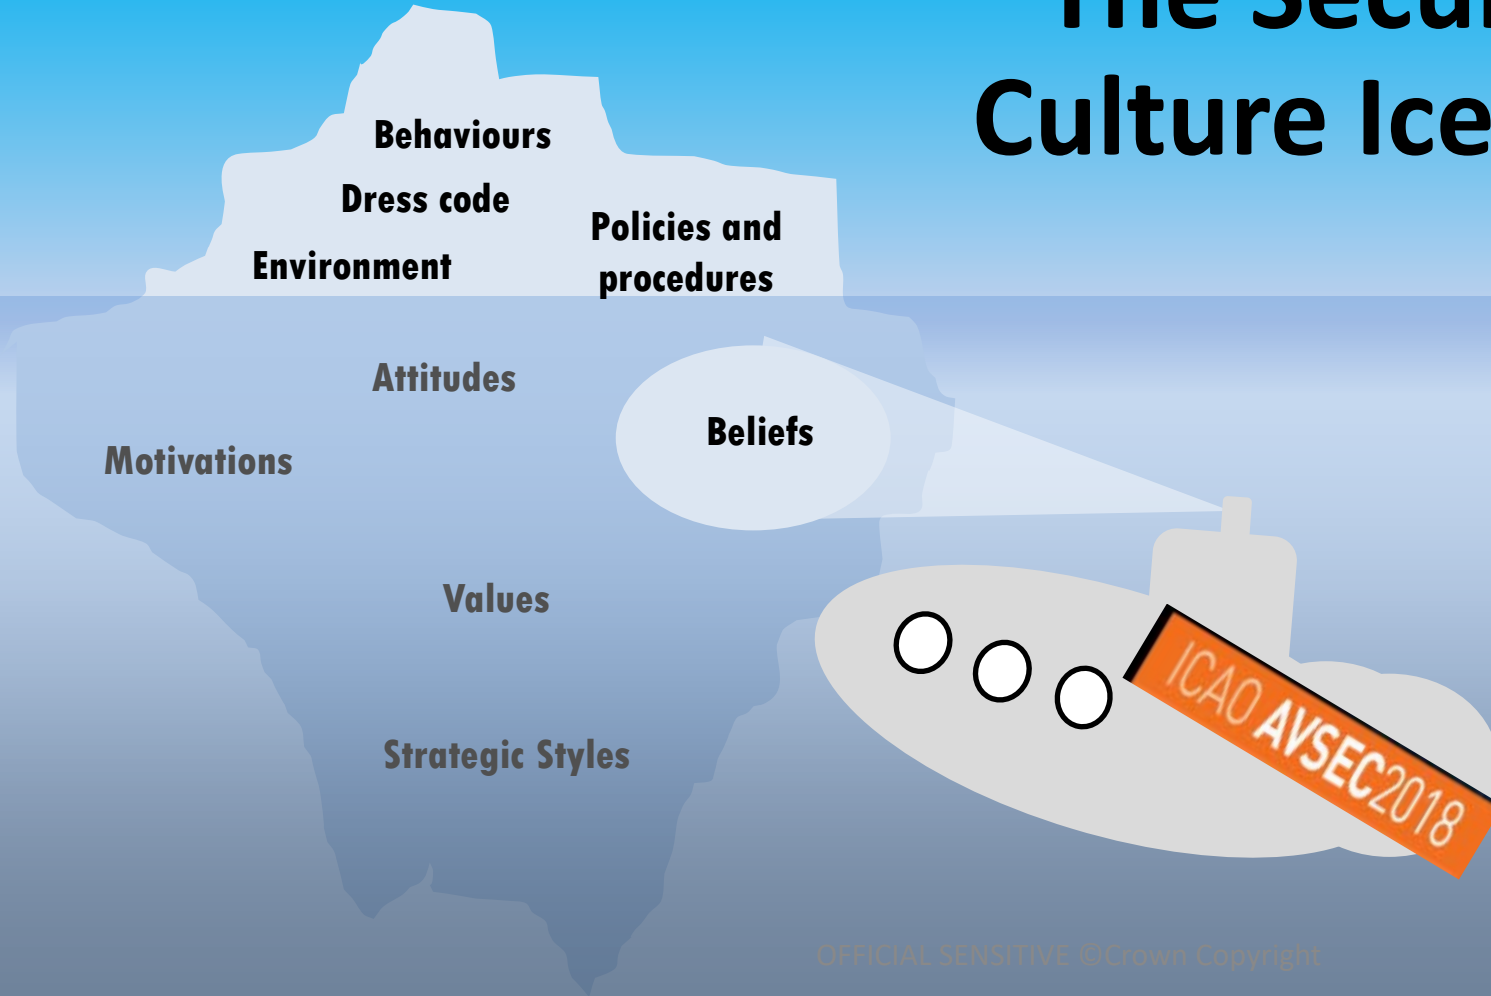

National Culture

Organisational Culture

Culture

# The Security Culture Iceberg

## **Section III**

# **Benefits of an effective Security Culture**

# Why assess Security Culture?

**People** help keep your organisation secure (alongside buildings and IT systems)

**The landscape has changed** – working practices, technology, threats

The **security behaviours and practices** we need staff to demonstrate may have changed

**Organisational approaches**, processes and activities may required change to help support employees with being security savvy

# Why is Security Culture important?

## Without a good security culture:

Unintentional security breaches are likely to be more frequent

Employees may be more vulnerable to social engineering

First impressions count; the organisation may be perceived as an easy target

It becomes harder to identify behaviours of concern

Insider cases are often linked with a poor security culture

- Cross context – physical, cyber, personnel – “holistic”

# The Insider Threat

## Metrojet Flight 9268 – Oct '15

### Heathrow fined for USB stick data breach

5 October 2018

f o t Share

GETTY IMAGES

Heathrow Airport has been fined £120,000 by the Information Commissioner's Office for "serious" data protection failings.

# The External Threat – Assessing state of security from a hostile's perspective....

# Essential Ingredients for an effective Security Culture

Communication &  
awareness of risks

Clear roles  
in security

Supportive  
Processes

Clear guidelines  
& procedures

Personal ownership  
/senior sponsorship

Incentives/  
Enforcement

Reporting and  
challenging

# Essential Ingredients for an effective Security Culture

## Communication & awareness of risks

Attaining a strong security culture that is fit for purpose rests on a good understanding of what risks the organisation faces

- Risks must be properly understood at all levels of the organisation (e.g. board)
- Staff undertake awareness training to develop awareness of risks
- Understanding risks helps to educate people as to why security is important to them and their organisation

# Essential Ingredients for an effective Security Culture

## Personal ownership /senior sponsorship

- All staff should take ownership and responsibility for their role in security
- Staff should be proactive and make decisions autonomously in the event of security occurrences
- Appropriate senior leaders and managers should visibly endorse security initiatives

# Essential Ingredients for an effective Security Culture

## Clear roles in security

In order to act as part of the security function, staff must understand clearly what their roles and responsibilities are in relation to security

- Clear guidelines and policies that are embedded in training
- Consistent application of security responsibilities that are properly enforced.

# Essential Ingredients for an effective Security Culture

## Incentives/ Enforcement

To promote the desired security culture there need to be clear enforcement and incentive mechanisms for security behaviours

- Deliberate or malicious security breaches must be dealt with consistently
- Careful consideration of how accidental security breaches are handled – a clear and consistent policy

# Essential Ingredients for an effective Security Culture

## Clear guidelines & procedures

In order for security processes to become embedded into culture there must be clearly defined procedures that are well researched (e.g. consultation with staff), and applied organisation wide.

- Apply policies consistently, organisational wide
- Make the policies accessible and available
- Consider channels for how policies might be changed in response to feedback

# Essential Ingredients for an effective Security Culture

## Reporting and challenging

Reporting mechanisms are a key part of a strong security culture – reporting helps to understand what is going on in security. A strong culture also supports peers challenging one another when security processes are broken/ignored.

- Design reporting mechanisms that are easy to use, and reinforce reporting behaviour (e.g. feedback, visible acknowledgement of the value of reporting)
- Cultivate an atmosphere where it is acceptable to challenge people on their security (easier said than done!)

# Essential Ingredients for an effective Security Culture

## Supportive Processes

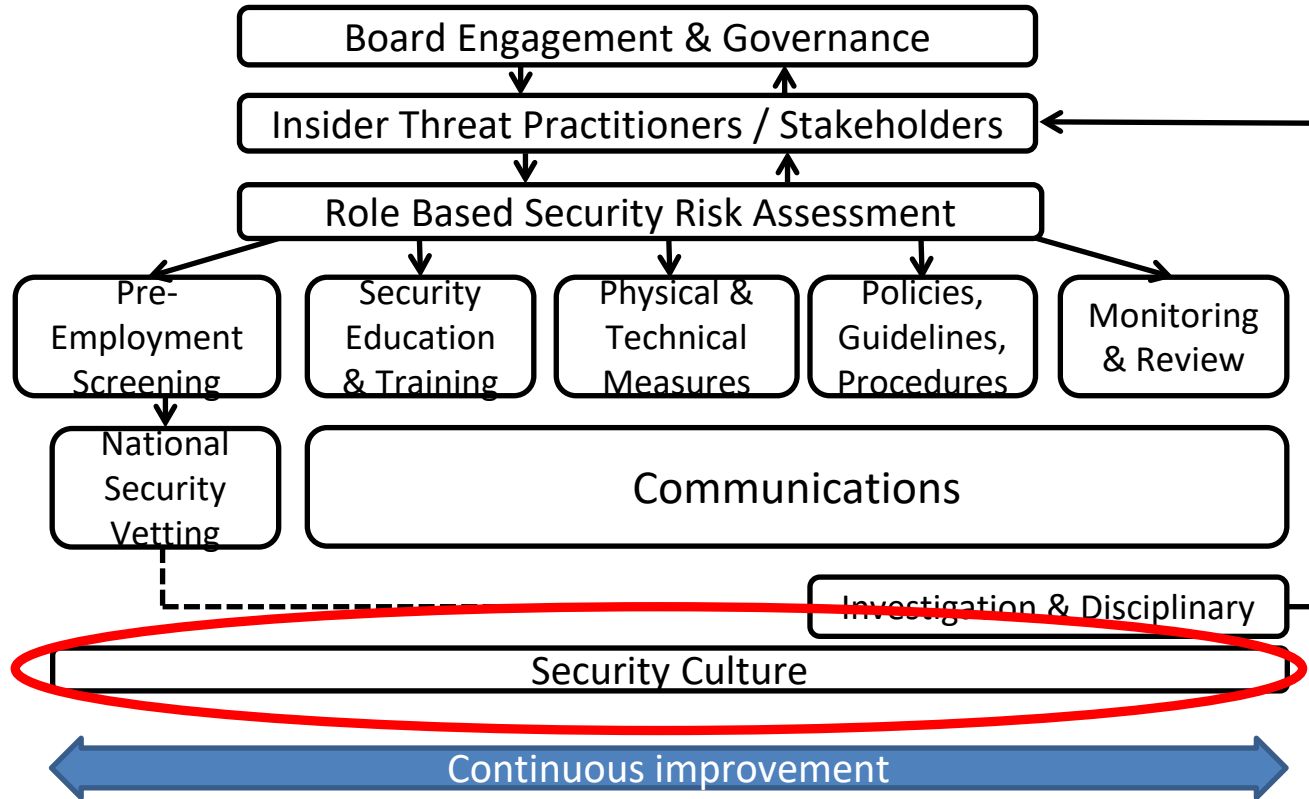

### Design Supportive Processes and Environment

Security processes should be designed with normal business processes in mind so that they **help** rather than **hinder**

- Security is sometimes seen as obstructive; design systems so that they work more effectively with other business needs (e.g. delivery pressure, work demands (Heathrow example))
  - Must allow necessary time to comply with security measures
  - Foster critical thinking regarding security and in identifying potential security vulnerabilities
- Shape the environment to enable staff to enact security behaviours (e.g. enough storage lockers for personal possessions)

## - Opportunities & touchpoints

Employee 'Journey': multiple opportunities to deliver key security messages

## **Section IV**

# **Project Plan Implementation**

# PROJECT PLAN – Implementation

**Understanding your requirements**

**Defining the aims and objectives of the security culture improvement plan** (strategy planning workshop)

**Creating the security culture mission statement and strategy** (to include identifying the key messages to present to employees)

**Developing an implementation plan** (workshop to map out a timeline of activity,

**Evaluating the impact** (identifying key performance indicators and taking measures pre and post the implementation activity)

The banner features a blue background. On the left is a close-up of an orange suitcase. On the right is a blue suitcase containing various electronic items like cables and a power adapter. In the center, there is an orange rectangular box with white text. Below this box, the text 'Montréal, Canada | 26-28 November 2018' is displayed in white. Two large, faint grey arrows point towards each other in the background.

# Next Steps

- A strong security culture is important – focus of the GAsEP and the High Level Conference
- Do use the knowledge and best practices learnt to promote a positive security culture back home
- Challenge yourself to change behaviours: develop an Action Plan or organise a Campaign to implement a strong security culture
- The Security Culture Toolkit can help
