3. Customs Compliance Programmes (13)134

Abstract

The 2014 edition of the WCO Compendium of Authorized Economic Operator Programmes (AEO Compendium) updates the previous edition based on the information available as of March 2014. Since the last edition, there has been considerable development within Customs administrations of trader programmes other than the SAFE Authorized Economic Operator Programmes (AEO) concept. These have included compliance based programmes and the development of the Authorized Operator concept under the WTO Agreement on Trade Facilitation. To assist administrations the compendium has been expanded to include these developments and to ensure that differences between the various programmes is understood.

As a result the 2014 edition consists of five parts dealing with AEO programmes based on the WCO SAFE Framework of Standards to Secure and Facilitate Global Trade (Part I), Customs compliance Programmes implemented by Customs administrations (Part II), Customs administrations' experiences of working together with other agencies (Part III), Authorized Operator scheme of the WTO Agreement on Trade Facilitation (Part IV) and Mutual Recognition Agreements/Arrangements of AEO schemes (Part V). The Appendix contains a list of the programmes.

The WCO SAFE Framework of Standards provides the global standards for launching an AEO programme. In addition, many Customs administrations having established AEO programmes are now seeking to formalize AEO mutual recognition agreements (MRAs) with other Customs administrations. The AEO Compendium summarizes information provided by the WCO Members and lists the concluded AEO MRAs as well as those under negotiation.

While under SAFE the Framework of Standards a single definition for a SAFE AEO is provided, there is currently no common understanding or definition of Customs compliance programmes. There are a number of concepts of trader related programmes that are contained within various international instruments.

Transitional Standard 3.32 of the Revised Kyoto Convention (RKC) refers to the concept of "authorized persons" who must have "an appropriate record of compliance with Customs requirements and a satisfactory system for managing their commercial records". On the other hand Article 7.7 (Trade Facilitation Measures for Authorized Operators) of the WTO Agreement on Trade Facilitation (ATF) makes provision for 'Authorized Operators' who meet a menu of criteria, which may include appropriate record of compliance with customs and other related regulations, a system of managing records for necessary internal control, financial solvency and supply chain security. The Authorized Operator concept does not, other than stating that the programme must exhibit one or more of the criteria listed, mandate any need to have security considerations as part of its design. If there is no security requirement the Authorized Operator scheme could also be considered yet another Customs compliance programme.

For the purpose of this compendium, a compliance programme should be clearly differentiated and defined as a Customs facilitation programme which requires of an operator an appropriate record of compliance with Customs requirements, a satisfactory system for managing commercial records and, where possible, a good financial solvency.

The main difference between a SAFE AEO programme and a compliance programme lies in the fact that security requirements such as those prescribed in the SAFE Framework's Annex III are not specifically included in a compliance programme. Also, unlike SAFE AEO programmes, Customs compliance programmes may not have common specified criteria and standards. As a consequence bilateral mutual recognition of such programmes remains a challenge.

The WTO ATF provides that the WTO Members are encouraged to develop Authorized Operator schemes on the basis of international standards, where such standards exist. The RKC and its guidelines and SAFE Framework of Standards provide such standards. These WCO Standards, supported by the tools in SAFE Package, i.e. the AEO Implementation Guidance, the AEO Compendium, the Model AEO Appeal Procedures, the Authorized Economic Operator and the Small and Medium Enterprise (FAQ), the AEO Template and the Mutual Recognition Arrangement/Agreement Guidelines, can effectively support and assist WCO Members in developing and implementing WTO ATF - Authorized Operator schemes. Given that the WTO ATF mentions all four criteria (even if non binding) for Authorized Operator scheme, it may be appropriate to use the AEO as in SAFE as a standard to develop Authorized Operator scheme under the WTO ATF. Using the AEO criteria as a standard to implement Article 7.7 of the WTO ATF will assist in ensuring a harmonized approach and in enabling those that go for it to achieve seamless mutual recognition at bilateral, sub-regional, regional and, global levels.

In a SAFE Framework context, a compliance programme could perhaps be a first step or stepping stone to a SAFE AEO programme. This is to say that unless all the requirements in Annex III are complied with by an operator in the supply chain, it would not have a SAFE AEO status.

Cooperation with other agencies

In a diverse global trade supply chain, it is essential for Customs not only to work with business stakeholders but also with the other government agencies involved in border management at the national as well as International level to meet the increasing demands for security and trade facilitation of the supply chain.

Working with other government agencies involves better understanding and mutual appreciation of each others' roles, regulatory requirements, business processes, standards and methods. It also involves the addressing of questions such as the alignment and harmonization of policy and practices, streamlining processes, co-ordination of processing at the borders and interoperability/integration of IT systems/an integrated information technology systems. Inter agency co-operation may also include the use of common risk analysis systems, joint audits and the monitoring of measures through standardized processes.

Cooperation and collaboration with other agencies leads to meeting common objectives of compliance with the various laws, the security of supply chain and enhanced trade facilitation. It enhances both Customs' and other government authorities' capability to carry out their responsibilities more effectively using limited resources in the most optimal manner, while integrating efforts with other government agencies in fulfilling the different mandated roles efficiently and effectively.

Acknowledging the need and importance of working together, the WCO has developed standards ranging from operational - the Revised Kyoto Convention (RKC) and the SAFE Framework of Standards to technical standards pertaining to data (e.g. WCO Data Model). The WTO Agreement on Trade Facilitation (ATF) also provides for Border Agency Cooperation (Article 8) and Single Window (Article 10.4).

Over the years, Member Customs Administrations have successfully developed and implemented varying levels of engagements with other national government agencies and with other Customs administrations. Such cooperation has been taking place at various levels: nationally within Customs Unions and with other Customs and international agencies. Some of such working experiences and best practices, provided and verified by the Members, are listed – in chapter 3.

Key words

Authorized Economic Operator, AEO, SAFE Framework, Customs Compliance programme, mutual recognition.

Disclaimer

The Compendium disseminates the findings of work in progress to encourage the exchange of ideas about Customs issues. The views and opinions presented in this paper do not necessarily reflect the views or policies of the WCO or WCO Members.

Note

AEO developments in the WCO regions

Introduction

The AEO Compendium is updated regularly to track the developments of existing AEO programmes, AEO programmes in the process of being launched, and Customs compliance programmes.¹ The AEO Compendium has become a single point of reference of information for Customs Administrations, the private sector and other stakeholders. Information in the Compendium is provided and verified by WCO Members. The AEO Compendium is incorporated in the WCO SAFE Package, which is a resource that contains tools to assist in establishing and administering AEO programmes.²

AEO has become a flagship programme for WCO Members as it offers an opportunity for Customs to share its security responsibilities with the private sector, while at the same time rewarding them with a number of facilitation benefits. Partnership programmes with trade allow Customs to achieve more with less effort and aim at ensuring sustainable and long-term compliance through incentives, such as reduced levels of control, periodic reporting, deferred payment, and reputational benefits.

Beyond developing standards and guidelines, the WCO provides capacity building support to its Members in establishing AEO programmes in close cooperation with donor organizations through international, national and regional activities. Partnerships with business are also indispensable, as evidenced by the contribution of the WCO Private Sector Consultative Group to the work of the WCO SAFE Working Group in reviewing the implementation of the SAFE Framework.

As of March 2014, 168 out of 179 World Customs Organization (WCO) Members have signed Letters of Intent committing to implement the SAFE Framework.

This edition of the AEO Compendium identifies 53 operational AEO programmes, 10 AEO programmes that are to be launched, and 13 Customs Compliance programmes that have been advised by Members.

In addition to the provision of basic information on AEO and Customs compliance programmes, the Compendium also includes a short overview of AEO programme accreditation procedures and benefits.

¹ Customs compliance programme can generally be considered to focus on compliance with traditional areas of Customs requirements, such as the payment of Customs duties, and can also be considered as trade facilitation programmes based on the Revised Kyoto Convention's *authorized persons* provisions.

² The SAFE Package is available at: < http://www.wcoomd.org/home_pfoverviewboxes_safepackage.htm >

AEO Developments – a Regional Summary

In the WCO Americas and Caribbean (AMS & CB) region the AMS & CB AEO Regional Strategy has delivered tangible results based on their three objectives: implementation of AEO programs, strengthening of AEO programs, signing of MRAs. 11 AEO programs within the region have been implemented, two recently in Panama in October 2013 and in Uruguay in March 2014. More than 250 companies have joined the programs (not contemplating USA and Canada). 1 AEO MRA was recently signed in March 2014 between Mexico and Korea.

In the WCO Middle East and Northern Africa region Morocco in their effort to launch their AEO programme has further enhance the programme to include from 2014 on – additionally to the “AEO”-status “customs simplification” - the status “Security and safety”. This will open the doors for negotiations towards MRAs with major trading partners in the near future. Many Members in the region have requested technical assistance on assisting them to develop an AEO programme either from scratch or moving forward from their compliance programme.

In the WCO East and Southern Africa region Uganda certified 10 companies as AEOs in fall 2013. In this first phase a certification is possible for importers and customs brokers. The following phases 2 and 3 (roll out in June 2014) will allow other supply chain actors to join the programme. The East Africa Community (EAC) has launched Compliance pilot programme in April 2013 encompassing five benefits, seven border posts and 13 economic operators. The pilot demonstrates the possibility of enormous cost and time savings by implementing the AEO concept. The EAC region is going for a possible second pilot of the regional AEO-scheme to manage more complex operators using more complex supply chains before opening the full scale regional AEO-programme. Designing and testing new benefits and procedures will broaden the future scope to make the scheme even more inclusive. After 11 months of the pilot including the 13 pilot operators, 3,413 consignments have enjoyed regional AEO-treatment. Each consignment, based on figures calculated by the trade and transport partners, equals at least savings equal to 400 US \$, giving a total of at least 1,365,200 US \$. In SACU, the regional scheme is under development, three regional benefits are defined, the participating border posts identified but not yet all of the pilot operators. A launch of the regional AEO-pilot is foreseen to take place in 2014.

The WCO Asia Pacific region is marked by significant activity in the field of MRAs. From 2013 to 2014, 4 MRAs have been concluded. 12 MRAs are under negotiation. For the future even more MRAs are planned, especially to avoid duplications in controls and enhance benefits for trade. Just as the WCO Asia Pacific region on the whole, India is planning to conclude MRAs with other countries. It signed MRA with Hong Kong, China in October, 2013. Indonesia launched an AEO pilot programme in December 2013 which is open for exporters only. In 2014, more certificates shall be issued. In February 2013 Thailand enhanced its AEO programme to include importers and customs brokers. Bhutan, Brunei Darussalam, Cambodia, Macao China, Maldives, Mongolia are developing AEO programmes.

In the WCO Europe region Croatia joined the European Union as their 28th member state on 1st July 2013. The AEO concept of the EU is legally binding for all member states and also serves as a general approach for such countries as Norway and Switzerland. The uniform implementation of the AEO concept in all member states is supported by regular AEO network meetings (attended by delegates from all member states), EU AEO guidelines³, developed together by the Commission and MS and an AEO helpdesk for questions of the member states. In the Customs union of

³(http://ec.europa.eu/taxation_customs/resources/documents/customs/policy_issues/customs_security/aeo_guidelines2012_de.pdf)

Russia, Belarus and Kazakhstan studies are being undertaken to develop an AEO system in line with the WCO SAFE AEO concept thus upgrading the existent system in the Union members. Other regional members such as Azerbaijan, Bosnia and Herzegovina, Ukraine, Moldova and Serbia are also working intensively on the introduction of a SAFE-compliant AEO scheme. In the beginning of 2013 Turkey launched its AEO programme. Montenegro has developed an AEO programme that still has to be launched.

Mutual recognition is one of the major benefits for businesses applying for AEO status. Every country that has launched or is about to launch an AEO programme aspires to conclude MRAs with its major trading partners. The SAFE Framework defines mutual recognition as an “action or decision taken or an authorization that has been properly granted by one Customs administration is recognized and accepted by another Customs administration.” The SAFE Framework also states that “mutual recognition can be a means to avoid duplication of security controls and can greatly contribute to the facilitation and control of goods moving in the international supply chain” (SAFE 2012; p 34. As of March 2014, 23 MRAs have been concluded and 10 AEO MRA negotiations are currently ongoing (see Chapter V Mutual Recognition Agreements).

In April 2012, the WCO and the Korea Customs Service hosted the first Global AEO Conference in Seoul, Korea. More than 800 delegates from 90 countries took part in the Congress.⁴ One of the outcomes of the Conference is the view that AEO is a major facilitation tool that leads to modernizing Customs when being introduced and AEO is seen as a tool that guarantees economic growth and competitiveness. AEO tackles security and facilitation, thus important for all countries. Supply Chain management is key to AEO implementation.

Conclusion

Customs administrations continue to enhance security and facilitation of the global supply chain by implementing WCO international standards. A core element of these developments is AEO programmes that are based on the SAFE Framework’s Pillar II and the Revised Kyoto Convention’s authorized persons provisions. Establishing AEO programmes and concluding AEO MRAs continue to be a priority for WCO Members.

AEO programmes which embrace risk management provide Member administrations added flexibility in the efficient use of limited resources. Achieving AEO programme compatibility and mutual recognition is in essence a harmonisation and simplification of Customs procedures, and thus contributes to balancing supply chain security and facilitation. The establishment of an end-to-end secure supply chain is supported by opening the AEO programmes for more supply chain actors as potential AEO applicants. Taking into account the requisite expenses needed to obtain AEO accreditation, Members continue to develop tangible and measurable benefits for AEOs. Apart from the significant benefits offered already such as a lower level of physical controls, guarantee waiver, recognition by other Customs administrations through MRAs etc. several Members provide AEOs with contact points delivering additional information, support and more tailor made customs training. Facilitation is also aimed at in the application process itself by establishing web-portals to submit AEO applications.

⁴ More information is available at <http://www.wcoomd.org/en/media/newsroom/2012/april/aeo-the-way-towards-secure-and-competitive-growth.aspx>

I. Operational AEO Programmes and AEO Programmes to be Launched

A. Operational AEO Programmes

1. WCO Americas and Caribbean Region

a) Argentina

Programme title	Date launched	Scope	Type of operator	Number of operators	Legislation	Further plans (deadlines)
Customs System of Reliable Operators (SAOC)	2006	Import/export (only for CUSE system ⁵)	Exporters (since 2006) Reliable Customs brokers (since 2009) Postal Service Providers System PSP/ safe couriers to be incorporated (CUSE System) (since 2012).	7 operators	External Note No. 37/2006 (requirements and responsibilities for export). External Note No. 50/2006 (determines the office in charge of receiving accession forms). General Resolution No. 2350/2007, issued by the Federal Administration of Public Income (AFIP) to establish the proceedings for the control of the destinations of the exports for consumption. External Note No. 48/2008 (a specific programme forSME). External Note No. 3/2009 (information to be registered in the Maria Computerised System (S.I.M.). The destinations indicated will go through green channel, except when the legal rules indicate otherwise). External Note No.37/2009 (requirements and responsibilities)	Reengineering of the Reliable Operators Customs System – Change in the name and new types of certifications signing of MRAs

⁵ CUSE System is a programme recently incorporated by the Federal Administration of Public Revenues of Argentina. Its main goal is to establish a process based on technological innovations as well as procedures of risk analysis and assessment that will allow certifying Courier service providers. With the aim of guaranteeing the traceability and safety of the deliveries made using Courier services, Resolution 3253/2012 has been enacted and is in its first phase of implementation.

					General Resolution N° 3253/2012 Customs procedure - Foreign Trade Importer/Exporter- Customs Service Auxiliaries.	
--	--	--	--	--	---	--

Accreditation (components, process)	Benefits
<p>General requirements:</p> <ol style="list-style-type: none"> 1. To comply with the rules and if appropriate, to provide a warranty; 2. To submit the application to the Customs General Directorate, together with the additional documentation proving the fulfillment of the requirements; 3. To describe the production process, the transportation, the security rules, among other things (secure supply chain); 4. Availability of the computerized management system – inventory and control. The controls are risk-based; 5. Availability of the image control system that facilitates a fluent and permanent communication with the Customs control areas. <p>Solvency criteria are lower for SMEs. The fulfillments of the tax and customs obligations are taken into account.</p>	<ol style="list-style-type: none"> 1. Saving costs and time. Reduction of operational costs for the exporters; 2. Anticipation of the consignments sent to other countries; 3. Competitive difference with other operators; 4. Use of non intrusive technology for cargo control; 5. International accreditation of the supply chain; 6. Identification as Reliable Operator by other Customs Administrations; 7. Gain access to the major facilities at the port of entry in the country of destination; 8. Ensure the smooth and secure flow of goods; 9. Keep the integrity of the shipment.

b) Canada

Programme title	Date launched	Scope	Type of operator	Number of operators	Legislation	Further plans (deadlines)
Partners in Protection (PIP)	1995, revision in 2002 and 2008	Import / export	Importers, exporters, carriers (rail, sea, air, highway), customs brokers, couriers, warehouse operators, freight forwarders, shipping agents	1535 approved members (11. 2013)	No specific AEO legislation	Simplify the application process through automation and streamlining of processes. Develop a web-based application processing system (web portal) to simplify program application, administration, and information exchange. Develop further benefits in consultation with private industry. Continue to provide AEO assistance and cooperation. Plan additional MRAs with compatible AEO programs.
Customs Self-Assessment (CSA)	2001	Import	Importers and carriers	95 Approved CSA Importers 884 Approved CSA Carriers (11.2013)	Customs Act, Section 32 Accounting for and Payment of Duties and Taxes Regulations	Establish cooperative agreements with other compatible programs. Expand CSA eligibility to other modes and partners. Enhance benefits and expedited clearance at ports of entry. Collaborate with Other Government Departments and Agencies to expand the CSA service options and enhance benefits for expedited/simplified Customs clearance..

Accreditation (components, process)	Benefits
Partners in Protection	
<p>Program Membership Application Process: Applicants to the PIP program complete and submit a Security Profile (the program's application form) in which they provide detailed information on how they meet the program's minimum security criteria, including: physical security and access controls; procedural security; conveyance, cargo, and equipment (container, trailer and rail car) security; data and document security; personnel security; security training and awareness; and business partner security.</p> <p>The Security Profile is reviewed, concerns identified, and a thorough risk assessment performed.</p> <p>An onsite validation of the company is performed to confirm the program requirements are met.</p> <p>The company is invited to sign a Memorandum of Understanding in which they commit to maintaining PIP's minimum security criteria and exchanging information.</p> <p>PIP members are revalidated at least every four years, in which an updated Security Profile, risk assessment, and site validation are performed.</p>	<p>Lower rate of physical examinations.</p> <p>Access to Canada Border Services Agency (CBSA) expertise (assignment of a single contact for customs issues).</p> <p>Dedicated access lanes at certain ports of entry for eligible highway carriers (FAST lanes).</p> <p>Program communications and stakeholder consultation.</p> <p>Recognition by international customs administrations via MRAs.</p> <p>The PIP program is factored into the CBSA's Business Resumption Plan in the event of trade flow disruptions.</p>
Customs Self-Assessment	
<p>Program Membership Application Process:</p> <p><u>Importers:</u> Two-part application; importer must meet the criteria in the first part of application process in order to qualify to submit the second part. Security profile information - risk assessment of client which includes the collection of corporate structure information, key business activities and products; company policies related to risk management; and upon request, a quarterly report or their most recent audited financial statements.</p>	<p><u>Importers:</u> Reduced importer data set for imports and reduced costs Expedited processing at ports of entry Streamlined, self-assessing and accounting</p> <p><u>Carriers:</u> Ends the transactional transmission of data elements Increases the certainty of expedited customs processing Enables carriers to meet their obligations easily</p>

Accreditation (components, process)	Benefits
<p>Importers have to demonstrate that their books, records and business systems have the necessary internal controls and procedures - including linkages, controls and audit trails to meet customs requirements.</p> <p><u>Carriers:</u> Two-part application; carrier must meet first part of application to qualify to submit second part. Carriers must provide detailed information such as a complete corporate structure and all relevant registration identifiers; details about their business specialty, clients, equipment and drivers; security measures for freight facilities and personnel policies; terminal and warehouse locations; and the location of all their divisions; Carriers are asked to demonstrate their internal process for an international Canada bound shipment; identify their current business process for all shipments, starting from the order through to billing; identify how they assign an internal control number for each order they accept; provide detailed dispatch procedure and systems; provide sample documents, descriptions and the appropriate linkages for each step in the shipping process; identify how CSA-approved importers, drivers and eligible shipments will be identified in the systems, identify how their reporting system to trace all Canada-bound shipments, including CSA-approved shipments; and identify the location of books and records.</p>	<p>Streamlines the process for legitimate trade</p> <p>The CSA program is factored into the CBSA's Business Resumption Plan in the event of trade flow disruptions.</p>

c) Colombia

Programme title	Date launched	Scope	Type of operator	Number of operators	Legislation	Further plans (deadlines)
AEO – Authorized Economic Operator	27 September 2011	Import / export	First stage: exporters of determined sectors Second phase: all export sectors Third phase: to be determined	N/A	Decree 3568 de 2011. Regulatory bylaws 11434 and 11435 of 2011.	Authorising operators; initiating MRA negotiations with the EU and regionally. Supporting projects to conceptually harmonise different AEO programmes.

Accreditation (components, process)	Benefits
<p>A company must apply to the enforcement agencies (inter-agency alliance: Customs, Police, Sanitary):</p> <ol style="list-style-type: none"> 1. The company must fulfill 'preconditions' and make a self-assessment of conditions and minimum requirements; 2. The company submits an application through the Colombian Customs Web portal that is forwarded to other government agencies; 3. Enforcement agencies verify compliance with preconditions and accept or reject the application; 4. Study and visit to the company from Program personnel to validate minimum requirements; 5. Technical report of each government agency assessing the level of compliance of the company; 6. Customs presents a consolidated report before the AEO Inter-agency Commission (high level) for it to issue a statement; 7. Customs reaches a decision on the authorization as AEO. <p>Preconditions:</p> <ol style="list-style-type: none"> 1. Residing or being legally represented in Colombia; 	<p>Initial benefits under the program are described below. As the program develops, more benefits will be included according to the needs of the Customs–Company alliance:</p> <ol style="list-style-type: none"> 1. Recognition as a safe and reliable operator in the supply chain by the Enforcement Authorities (inter-agency alliance: Customs, Police, Sanitary authorities); 2. Assignment of an operations officer of each enforcement authority to support AEO's operations; 3. Participation in the AEO Congress; 4. Participation in training activities scheduled for AEOs by the enforcement authorities; 5. Fewer physical and documentary inspections by Customs in export, import, and transit operations and fewer physical inspections by the Anti-Narcotics Police in export operations; 6. Special and simplified inspection procedures, when an operation is targeted for inspection by the risk assessment systems of enforcement authorities; 7. Dedicated lanes and special procedures for interaction with enforcement

Accreditation (components, process)	Benefits
<p>2. Firms or branches of foreign companies must be established in Colombia for at least 3 years before applying;</p> <p>3. Being enrolled and active in the National Tax Register (RUT) under the economic activity under which application was filled for authorization as AEO;</p> <p>4. Having at least 3 years of experience within the activity for which authorization is sought as AEO;</p> <p>5. Having valid sanitary authorizations and records;</p> <p>6. Obtaining a favourable rating from the Customs' Risk Management System;</p> <p>7. Not have been subject to cancellation of authorizations issued by the Customs, Police or Sanitary Authorities in the 5 years preceding the filing of the application;</p> <p>8. Not having been penalized during the last 2 years by the Customs, Police or Sanitary Authorities for infringement of tax, customs, foreign exchange, or sanitary regulations. This precondition extends to owners and business representatives of the applicant company;</p> <p>9. Having no debts related to their tax, customs, foreign exchange, or port obligations or other debts to the Customs, Police, or Sanitary Authorities;</p> <p>10. The applicant company, its owners, its shareholders, its representatives, and its accountants must:</p> <ul style="list-style-type: none"> a. not have criminal records b. not be included in domestic and international databases on the fight against terrorism, drug trafficking, money laundering, smuggling and other related offenses. c. not be or have been involved in international supply chain security incidents. d. not have represented companies that have been subject to cancellation of authorizations issued by the Customs, Police, or Sanitary 	<p>authorities during international trade operations;</p> <p>8. No need for a customs broker in import, export or customs transit operations;</p> <p>10. Reducing the amount of global guarantees lodged with Customs;</p> <p>11. Authorization to have Customs and Colombian Agricultural Institute (ICA) inspections of goods to be exported in the exporter's premises.</p>

Accreditation (components, process)	Benefits
<p>Authorities in the 5 years preceding the filing of the application; 11. 8. Mandatory training on Customs procedures approved by Malaysian Customs Administration are required for the personnel involved in Customs operations and its forwarding agents/Customs brokers.

Accreditation:

1. Submission of the application form with necessary supporting documents.
2. Verification on the application and the Company, the directors, staffs background and others.
3. Validation Audit (On-site Audit)
4. AEO status granted by AEO Panel
5. Post Approval Audit (Compliance Audit and Security Compliance Audit) – If there is a problem: the status would be suspended or revoked.

1. Direct Release (fast clearance) from Customs control for importation, exportation and movement of goods.
2. Customs clearance with minimum data and simplified process.
3. Self-assessed declaration in import, export and movement of goods periodically in accordance with specific schedules.
4. Deferred payments of Duties/taxes via Electronic Fund Transfer (EFT).
5. Simplified drawback claims based on self-accounting principles.

g) New Zealand

Programme title	Date launched	Scope	Type of operator	Number of operators	Legislation	Further plans (deadlines)
Secure Exports Scheme (SES)	2004	Export	Exporters NB: operates from point of pack to port of loading. As part of the scheme exporters are also responsible for their third party operators and logistics including transporters and brokers.	123 members (12.11.2013)	Customs and Excise Act 1996	

Accreditation (components, process)

Benefits

SES partners must maintain an agreed level of security and data integrity in their day to day operations. This includes a commitment to have measures in place to protect goods from the moment they are packed in the container to their delivery at the point of export.

This commitment ensures packed containers are secured with a Customs-approved seal or marking. This signals that it is under Customs control and can be considered secure by overseas customs administrations.

To become an SES member, exporters must supply Customs with a security plan which is physically validated by NZ Customs. A security plan documents the policies, processes and procedures that a company has in place to ensure that goods for export are securely packed, accurately accounted for and securely transported to the point of export from New Zealand.

Potential SES members must also supply a process map illustrating the flow of goods and documentation/information from receipt of order to the point of export, a site plan, and a security plan prepared in conjunction with their transport operator.

The following benefits to the SES scheme participants are offered:
Approved secure supply chain from point of pack to port of loading.
Predictability of the supply chain because of less government intervention; this means minimal disruption and fewer compliance costs.
Discounted Customs transaction fees.
Enhanced supply chain security means minimised trade disruption.

h) Singapore

Programme title	Date launched	Scope	Type of operator	Number of operators	Legislation	Further plans (deadlines)
Secure Trade Partnership (STP). From 1.10.2008, the STP programme comprises of two tiers, i.e. STP and STP-Plus.	25.05.2007 (STP); 1.10.2008 (STP-Plus)	Import/export	All supply chain operators based in Singapore	110 members (12.2013) 44 STP companies 66 STP-Plus companies Comprising about 24,45% of export value (12.2013)	No specific AEO legislation	To conclude MRAs that are currently being negotiated To complete the study on aligning STP and Regulated Air Cargo Agent regime in Singapore.

Accreditation (components, process)	Benefits
<p>General requirements: Under the STP Guidelines and Criteria, companies are required to have:</p> <ol style="list-style-type: none"> 1. A security management system; 2. Conduct risk assessment of their business operations; 3. Implement the security measures that address the 8 security elements (consistent with the WCO SAFE Framework of Standards) under the STP programme . <p>With the launch of a new trade engagement framework called "TradeFIRST" in January 2011, companies applying for any schemes administered by Singapore Customs, including the STP programme, will be assessed holistically based on a common set of assessment criteria applied across all schemes. The assessment criteria are broadly categorised into 5 areas :</p> <p>Company profile ;</p>	<ol style="list-style-type: none"> 1. Cargo less likely to be inspected; 2. STP – Serves as "Quality Mark", Enhanced branding (recognised as a low-risk company); 3. Reduced inspection or expedited clearance if the certified status be also recognised by overseas countries; 4. Automatic recognition as a known consignor (KC) under the Regulated Cargo Agent Regime (RCAR); 5 Designated account managers; 6. Trade Facilitation benefits under TradeFIRST bands; 7. Companies who wish to enhance their capabilities in supply chain security may get funding or assistance through training assistance schemes and development programmes offered by other government agencies.

Accreditation (components, process)	Benefits
<p>Inventory Management and Controls; Compliance; Procedures and Processes; Security.</p> <p>This holistic assessment and risk management approach will classify companies into 5 bands – Basic, Standard, Intermediate, Enhanced and Premium. As a company beefs up its internal control systems and supply chain security measures and moves up the bands, it will be offered more facilitation by SC.</p> <p>Accreditation: Companies applying for certification under the STP programme will first need to self-assess against the TradeFIRST self-assessment checklist which had incorporated the STP Guidelines and Criteria;</p> <p>Companies submit application form, complete TradeFIRST self-assessment checklist and supporting documents; Validation visit at all sites of the company conducted by Singapore Customs; Singapore Customs certify the company as</p> <ul style="list-style-type: none"> (i) STP status if the company achieves at least an “Intermediate” band in TradeFIRST; (ii) STP-Plus status if the company achieves the “Premium” band in TradeFIRST and implements effective security measures that fulfil all the minimum criteria stipulated in the STP Guidelines and Criteria. 	

i) Thailand

Programme title	Date launched	Scope	Type of operator	Number of operators	Legislation	Further plans (deadlines)
AEO	06.2011 Authorized Economic Operators for Exporters 02.2013 Authorized Economic Operators for Importers/Exporters and Customs brokers	Import/Export	Importers/Exporters, Customs brokers	Importers/Exporters : 61 Customs Brokers: 50 Total number: 111 operators (7.1.2014)	Customs Notification 12/2013 Customs Notification 13/2013 Customs Notification 79/2013 Customs Notification 80/2013 Customs Notification 113/2013	Expanding the amount of AEOs Continuously Plan to initiate MRA negotiation with other countries

Customs on the basis of a self-assessment questionnaire submit in advance by the operator. .	

b) Tunisia

Programme title	Date launched	Scope	Type of operator	Legislation	Further plans (deadlines)	Miscellaneous
AEO	26.01.2010 (pilot)	Import, export	Importers, exporters (commercial companies, "export-only" companies)	9 companies 30 requests pending	Art 118 and 120 of the Tunisian Customs Code. (Law N° 34/2008 of 02.06.2008 concerning the enactment of the Customs Code), Decree of the Minister of Finance, 28.01.2009, published in Official Journal of the Republic of Tunisia (J.O.R.T) N° 10 of 03.02.2009.	Develop the existing AEO concept and envisage extending the programme gradually to other commercial operators and to other players in the supply chain (port operators, forwarding agents, carriers, warehouse operators). Strengthen the security and safety measures (full option). AEO status to be granted to other operators in the course of 2011 (some 30 new requests under consideration).

Accreditation (components, process)	Benefits
General requirements and conditions for granting status : 1. Must have ISO certification; 2. Satisfactory financial situation; 3. Tax status in order; 4. Must not have committed any serious Customs offences;	1. Establishment of a climate of confidence between Customs and the company concerned; 2. Reduction of Customs controls and simplification of Customs procedures (rapid, efficient clearance); 3. Formalities for the inspection and clearance of goods are carried

Accreditation (components, process)	Benefits
<p>5. Lodge a certain minimum number of Customs declarations each year;</p> <p>6. Keep business accounts which comply with the standards laid down by the Company accounts system, and carry out cost accounting and inventory accounting using a model approved by Customs;</p> <p>7. Have suitable premises for storing imported goods, with the equipment and human resources required for loading, unloading and handling such goods;</p> <p>8. Submit to an accreditation audit examining the security of the premises and the company accounts.</p> <p>Guarantees:</p> <p>1. Provision of an annual financial or bank guarantee for import operations, based on the amount of the duties and taxes paid during the previous year (the percentage is fixed by the General Directorate of Customs);</p> <p>2. Opening of a customs bond account;</p> <p>3. Mandatory scanning of goods on removal;</p> <p>4. If necessary, Customs service which the company concerned is assigned to, will conduct an inspection of goods in the company's premises for each import operation, without exceeding the time periods stipulated in the agreement;</p> <p>5. The services of the General Directorate of Customs will conduct post-clearance control operations, which may be scheduled or unscheduled.</p> <p>Accreditation :</p> <p>1. Lodge a request with Customs, accompanied by the requisite documents and materials;</p> <p>2. Scrutiny of the request (checking that the formalities have been fulfilled);</p> <p>3. Internal diagnostic audit of the company (document-based) :</p> <ul style="list-style-type: none"> - maintenance of reliable accounts - existence of an automated management system – inventory - existence of an appropriate internal control and surveillance system - compliance with the necessary security criteria (secure supply chain); <p>4. Validation audit (on-site inspection), to check that the information provided reflects the true situation;</p>	<p>out on the company's commercial premises;</p> <p>4. Reduction of financial charges, logistical costs and costs caused by delays;</p> <p>5. Deferred payment of duties and taxes normally payable on removal of the goods;</p> <p>6. Promotion of quality and competitiveness within the company;</p> <p>7. Promotion of fair competition between companies;</p> <p>8. Promotion of the company's exports.</p>

Accreditation (components, process)	Benefits
<p>5. Decision of the competent advisory commission (chaired by the Director General of Customs, it consists of the relevant General Directorate of Customs services, together with representatives of the other departments concerned).</p> <p>6. Requesting party notified of the commission's decision;</p> <p>7. Granting of AEO status to the requesting party, through the signing of an agreement with Tunisian Customs; the agreement sets out the benefits granted by Customs and the obligations of the beneficiary, as well as the security/guarantees to be provided by the latter ,</p> <p>8. Company monitored by means of regular controls based on risk analysis. AEO status may be suspended or revoked in accordance with the regulations.</p>	

3. WCO East and Southern Africa Region

a) Botswana

Programme title	Date launched	Scope	Type of operator	Legislation	Further plans (deadlines)	Miscellaneous
TransKalahari Accreditation Scheme	Preliminary date – 2010. Current stage – national consultations	Import/export	Freight forwarders, bonded warehouse operators, importers, exporters, transporters.	SACU act is being reviewed but it does make provision for the implementation of the scheme. Security elements have to be incorporated as currently it reflects customs facilitation requirements and benefits.		Borrowed South African, EU and SAFE elements (for security). Since the programme is corridor based RSA, Botswana and Namibia are working on the development of the harmonised programme and will recognise operators registered in TKC Member States. The plan is to roll out the scheme to the SADC region, to ensure mutual recognition in the region. No other countries engaged as a group to negotiate mutual recognition. Once SADC becomes a Customs Union, it will be able to negotiate bi-laterals.

b) Seychelles

Programme title	Date launched	Scope	Type of operator	Legislation	Further plans (deadlines)	Miscellaneous
AEO	To be determined	Import/Export	Whole Supply Chain	Around 4	Awaiting approval of draft legislation from Attorney General's chamber	<p>Seek Technical Assistance to assist with the followings :</p> <p><u>Proposed Phase 1</u></p> <ul style="list-style-type: none"> • conduct facts finding mission to establish benefits/challenges for the implementation of AEO • conduct meetings/training workshop for Customs & stakeholders • develop capacity to facilitate proper implementation of the programme

<p>General requirements:</p> <ul style="list-style-type: none"> To comply with tax and customs regulations. To have an adequate system of logistic and accounting records. To be financially solvent. To have an adequate security level. <p>Accreditation:</p>	<ol style="list-style-type: none"> 1. Reducing examination rates to the export cargos according to risk; 2. Priority to handling clearance formalities; 3. Direct export from the business site; 4. Assigning special officers to help companies to coordinate and resolve Customs issues.

Accreditation (components, process)	Benefits
<p>Submit application to Customs. Documentary evaluation. Validation visits. Certification.</p> <p>Certification: The certification is issued by Customs Administration (SUNAT) and is valid for three years. Customs Administration may conduct periodical checking visits and post validation audits based on risk assessment.</p>	

II. Customs Compliance Programmes

Whilst the SAFE Framework provides a definition for an AEO, Customs compliance programmes are not defined or even mentioned. Transitional Standard 3.32 of the Revised Kyoto Convention does mention “authorized persons” who must have “an appropriate record of compliance with Customs requirements and a satisfactory system for managing their commercial records”. These elements are also featured in the SAFE Framework’s Annex III on Customs and AEO conditions, requirements and benefits. In this respect, for the purpose of this compendium, a compliance programme should be defined as a Customs simplification programme which requires for an operator, with an appropriate record of compliance with Customs requirements and a satisfactory system for managing their commercial records, and where possible, a good financial viability or solvency. The point of distinction between a compliance programme vis a vis an AEO programme lies in the fact that security requirements such as those prescribed in the SAFE Framework’s Annex III are not included in a compliance programme.

In a SAFE Framework context a compliance programme could be a first step or stepping stone to a SAFE AEO programme. This is to say that unless all the requirements in Annex III is complied a company would not have a SAFE AEO status. So the main difference between a SAFE AEO programme and a compliance programme is the fulfilment of the security requirements. The reason the distinction should be made is for many reasons.

Area of cooperation (application process, joint audit, joint monitoring, joint re-assessments)	Benefits for agencies and/or for programmes participants
<p>1) Canada-U.S.: Following the issuance of a joint declaration entitled <i>Beyond the Border: A</i></p>	<p>1) Related program benefits include: Applicants will have the opportunity to submit one application and</p>

Shared Vision for Perimeter Security and Economic Competitiveness, Canada and the United States developed an associated Action Plan to implement the goals of enhanced security and accelerated flow of legitimate people, goods and services. As set out in the Beyond the Border Action Plan, the adoption by both programs of a common framework will align program requirements and enhance member benefits.

2) Canada-Peru:

Canada is currently exploring the feasibility of a capacity building project to provide assistance to Peru in strengthening their AEO program.

3) Canada-Americas and Caribbean Region:

Following the decision of the Regional Conference of Customs Directors General of the Americas and Caribbean Region (RCCDG) to draft a regional strategy for the implementation of Authorized Economic Operator (AEO) programs based on World Customs Organization (WCO) guidelines, Canada was identified as a subject matter expert and appointed to the Steering Committee tasked with drafting the AEO Regional Strategy and its Implementation Action Plan.

4) Mutual Recognition Arrangements (MRAs) aim at expanding the international trade network of accredited low-risk companies and extending the security and integrity of the supply chain while facilitating trade. MRAs signify that both countries' customs administrations apply similar security standards and site validation practices when approving companies for membership in their respective AEO programs, and that both countries recognize each other's members, and may grant them similar benefits.

receive a single site validation when applying to both the Canadian and U.S. programs.

Development of a web-based application processing system (web portal) to simplify program application, administration, and information exchange. Better allocation of resources for customs administrations and program members resulting in more focus on areas of greater risk. Mutual recognition of site validations between the programs avoids duplication for both programs and members, thereby increasing efficiencies. Improved supply chain security for both government and industry.

2) Peru's AEO program will benefit from receipt of program expertise and sharing of best practices; Peruvian AEO program members will benefit from an improved commercial trade program; and the Americas and Caribbean Region will benefit from an improved regional AEO program that can in turn provide assistance to developing programs in the region.

3) Enactment of the RCCDG's AEO Regional Strategy Implementation Action Plan will result in benefits that include the promotion and development of AEO programs in the region; an increase in AEO program members in the region; strengthened partnerships with industry, foreign customs administrations and international organizations; and promotion of Mutual Recognition Arrangements (MRAs) within the region and worldwide that will contribute to increasing the security of the international supply chain.

4) MRAs between the CBSA and other customs administrations expand the international trade network of accredited low-risk companies, and allow customs administrations to work together to improve their capability to target high risk shipments while expediting legitimate low risk shipments. Program members are able to identify

	global business partners with similar high security standards and are recognized as trusted entities by MRA partner customs administrations.

Programmes involved	Agencies involved	Legislation	Type of operator	Further plans (deadlines)	Miscellaneous
Customs Cooperative Arrangement (21 bilateral arrangements)	21 Customs authorities				
Customs Cooperation Agreement (1 bilateral agreement)	EU Customs authorities				

Area of cooperation (application process, joint audit, joint monitoring, joint re-assessments)	Benefits for agencies and/or for programmes participants
Mutual administrative assistance (e.g. exchange of information, intelligence, best practices) between the contracting parties for the proper application of Customs laws and the fight against transnational Customs crimes	Strengthening Customs enforcement capabilities

b) Indonesia (at national level)

Programmes involved	Agencies involved	Legislation	Type of operator	Further plans (deadlines)	Miscellaneous
Regulated Agent	Directorate General of Civil Aviation, Ministry of Transportation Republic of Indonesia	Regulation of Director General of Civil Aviation number KP.152 Year 2012 on Air Cargo and Mail Security	Business Entities on Air Transport Legal Entities on Airport or Air Cargo and Mail. Manufacturers with regular production.	Companies that are stipulated as AEO are expected to be equalized to the companies stipulated as Regulated Agent	
Area of cooperation (application process, joint audit, joint monitoring, joint re-assessments)			Benefits for agencies and/or for programmes participants		
Cooperation in air cargo and mail security with the following procedures: Cargo and posts admission; Inspection; Storage; Build up; Loading to aircraft; Placement in aircraft;and Airfreight.			Ensuring supply chain security for air carried goods. May conduct an effective goods inspection for air carried goods efficiently.		

c) Japan (at national level)

Programmes involved	Agencies involved	Legislation	Type of operator	Further plans (deadlines)	Miscellaneous
Cooperation between AEO and Known Shipper / Regurated Agent Program	Japan Customs and Ministry of Land, Infrastructure, Transport and Tourism	National Civil Aviation Security Program	Exporter (Shipper)	Cooperation between AEO and Known Shipper / Regurated Agent Program	

Area of cooperation (application process, joint audit, joint monitoring, joint re-assessments)	Benefits for agencies and/or for programmes participants
Application process	To be able to avoid the duplication of application process.

d) Singapore (at international level)

Programmes involved	Agencies involved	Legislation	Type of operator	Further plans (deadlines)	Miscellaneous
<p>AEO programme: Secure Trade Partnership (STP)</p> <p>Regulated Air Cargo Agent Regime (RCAR)</p> <p>Cooperation with other government authorities at national level through the Inter Ministry Supply Chain Security Committee (IMSCSC)</p>	<p>The IMSCSC comprises 15 government agencies.</p>	<p>RCAR: Air Navigation (Regulated Air Cargo Agents) Regulations</p>	<p>All supply chain operators based in Singapore, including air cargo agents.</p>	<p>To complete the study on aligning STP and RCAR in Singapore.</p> <p>To coordinate and collaborate in the area of supply chain security and facilitation.</p>	
<p>Area of cooperation (application process, joint audit, joint monitoring, joint re-assessments)</p>			<p>Benefits for agencies and/or for programmes participants</p>		

The IMSCSC discusses all supply chain security relevant issues and provides the direction for various agencies to collaborate so as to improve our national practices and contribute further to global supply chain security. Singapore Customs has been tasked by the IMSCSC to lead the study on aligning the STP and RCAR. Customs is working closely with Singapore Police Force (Airport Police Division).

Agencies collaborate and make decisions collectively under IMSCSC to balance supply chain security with facilitation. The alignment of STP and RCAR could potentially reduce the administrative burden for regulators and the private sector.

3. WCO Europe Region

a) Denmark (at national level)

Programmes involved	Agencies involved	Legislation	Type of operator	Further plans (deadlines)	Miscellaneous
Cooperation on air security	The Danish Transport Authority (aviation)	Danish national legislation is based on standards that have been adopted within the international aviation organisation (ICAO)	Air carriers; freight forwarders; consignors	Informal ongoing cooperation	
Cooperation on maritime security (ISPS)	Danish Coastal Authority (ISPS)	The Danish national legislation is based on international maritime security and safety (ISPS-Code) from IMO	Company which operates in port		
Cooperation on Security issues in general	Danish Security and Intelligence Service (Police) / National Centre of Investigation (Police)	No legislation – only exchange of general information and new trends about safety and security			

Area of cooperation (application process, joint audit, joint monitoring, joint re-assessments)	Benefits for agencies and/or for programmes participants
<p>The cooperation on national level with the Danish Transport Authority (aviation) and Danish Coastal Authority (ISPS) is based upon exchange of information about issues relating to security and safety within these agencies and the AEO-concept to avoid duplication of the same checks.</p> <p>The cooperation on national level with the Danish Security and Intelligence Service (Police)/National Centre of Investigation (Police) comprises exchange of general information and new trends about safety and security.</p>	<p>The general feed-back from the agencies is that knowledge of the AEO-concept is valuable in the work with security and safety.</p> <p>From the AEO point of view knowledge of the work with security and safety within other agencies is an important part of the work with and further development of the AEO-concept.</p> <p>The Cooperation with the police provides the AEO-authorities with valuable general information including new trends on security and safety, which is profitable in the assessment of security and safety issues during an AEO-audit.</p>

1) AEO 2) Regulated Agent 3) Known Consignor	1) Customs (AEO-Network Group, CCC-Gen Subgroup AEO, EOS-Group) 2) and 3) Civil aviation authorities 4) Maritime Safety administration	Regulation (EC) No. 300/2008 on common rules in the field of civil aviation security Commission Regulation (EU) No. 185/2010 laying down detailed measures for the implementation of the common basic standards on aviation security Regulation (EC) No. 725/2004 on enhancing ship and port facility security Commission Regulation (EC) No. 324/2008 laying down revised procedures for conducting Commission inspections in the field of maritime security	Any person involved in activity covered by customs legislation and 3) Air carriers; freight forwarders; consignors Company which operates in port	Currently an update of the respective legislation and other relevant tools is under discussion with a view to further develop already existing cooperation.	

Area of cooperation (application process, joint audit, joint monitoring, joint re-assessments)	Benefits for agencies and/or for programmes participants
All indicated areas	<p>Cooperation is beneficial for the competent authorities and programmes participants.</p> <p><u>For competent authorities</u>: more efficient use of resources through avoidance of duplications; enhancement of the respective programmes through more efficient exchange of information.</p> <p><u>For programmes participants</u>: avoidance of duplicated checks and examinations.</p>

IV. WTO Agreement on Trade Facilitation

WTO members completed the Agreement on Trade Facilitation (ATF) at the Bali Ministerial Conference in December 2013. In response to this decision, the WCO Policy Commission in December 2013 issued the Dublin Resolution which states that the WCO will engage immediately with the WTO in respect of the governance and future implementation of the ATF.

The ATF contains 13 Articles regarding Trade Facilitation (Section I) and special and differential treatment for developing countries and least-developed countries (Section II); it deals almost entirely with Customs-related topics.

Article 7.7 (Trade Facilitation Measures for Authorized Operators) of the ATF incorporates trade facilitation measures for WTO Authorized Operators (AO). AOs in this context are specified traders who comply with certain criteria and can therefore benefit from additional trade facilitation measures.

The criteria shall be related to compliance or the risk of non-compliance. They may include an appropriate record of compliance with customs and other related regulations, a system of managing records for necessary internal control, financial solvency and supply chain security. It is important to notice that none of these criteria are mandatory. An AO scheme may therefore include only some of them.

If the specified criteria are fulfilled, AOs shall benefit from at least three of the following trade facilitation measures: low documentary and data requirements, low rate of physical inspections, rapid release time, deferred payment of duties /taxes, use of comprehensive guarantees or reduced guarantees, periodic customs declaration, clearance of goods at the premises of the AO or another place authorized by Customs.

It is imperative to differentiate between AOs as stipulated in the WTO ATF and AEOs as defined in the WCO SAFE Framework of Standards. The focus in the AO scheme is on trade compliance ; supply chain security may be one of the components. AEOs on the other hand must always - but not exclusively - comply with a range of security standards to ensure supply chain security.

Another difference is that AEO is based on global standards for launching and maintaining the status (provided in Pillar Two of the WCO SAFE Framework of Standards) while WTO AO scheme is apparently non-standardised and could vary from one Member to another depending upon the criteria and the thrust specified by Members. In such a scenario, mutual recognition of AOs will be a challenging task.

Para 7.4 of Article 7.7 of the WTO ATF therefore encourages Members to develop AO schemes on the basis of international standards. The Revised Kyoto Convention and its guidelines and SAFE Framework of Standards provide such standards. A common and shared understanding of an AO scheme based on an agreed set of common standards is essential for any meaningful and effective mutual recognition in the future.⁷

⁷ Further information on the WTO ATF is available on the WCO website and regularly being updated: <http://www.wcoomd.org/en/topics/wco-implementing-the-wto-atf/wto-agreement-on-trade-facilitation.aspx>.

V. Mutual Recognition Arrangements/Agreements

Under the WCO's SAFE Framework Customs administrations are encouraged to develop partnerships with business and between each other to secure and facilitate trade. It calls upon Customs administrations to work with each other to develop mechanisms for mutual recognition of AEO authorizations and validations, mutual recognition of Customs security control standards and control results and other mechanisms that may be needed to eliminate or reduce redundant or duplicated efforts.

Mutual Recognition is a broad concept embodied within the WCO SAFE Framework whereby an action or decision taken or an authorization that has been properly granted by one Customs administration, is recognized and accepted by another Customs administration. The document that formalizes this action or decision has generally been termed a « Mutual Recognition Arrangement/Agreement » (MRA).

The objective of Mutual Recognition of AEO is that one Customs administration recognizes the validation findings and AEO authorizations by the other Customs administration issued under the other programme and agrees to provide substantial, comparable and – where possible – reciprocal benefits/facilitation to the mutually recognized AEOs. This recognition is generally premised on the existence or creation of both relevant legislation and operational compatibility of both or more programmes.

Mutual recognition of AEO programmes may ultimately lead to the globalization of supply chain security and compliance standards and is therefore of great importance for those companies seeking true global supply chain security and compliance benefits.

1. Concluded MRAs (23)

Date	Country
June 2007	New Zealand – USA
May 2008	Japan – New Zealand
June 2008	Canada – USA
June 2008	Jordan – USA
June 2009	Japan – USA
July 2009	EU – Norway**
July 2009	EU – Switzerland**
June 2010	Canada – Japan
June 2010	Canada – Korea
June 2010	Canada – Singapore
June 2010	EU – Japan
June 2010	Korea – Singapore
June 2010	Korea – USA
January 2011	Andorra – EU**
May 2011	Japan – Korea
June 2011	Korea – New Zealand
June 2011	Japan – Singapore
