Vision towards Future...

Equality of women was included in the United Nations Charter's first article.

It has been one of its main goals since its foundation.

Our mission:

Act for and on behalf of **women's visibility consolidation in the Spanish aerospace industry.**

Including the political, university, corporate and the Public Administration fields and following the United Nations Charter's vision of gender equality and the empowerment of women.

Our mission:
Being active
members of
society.

A government
model that fits our
purposes.

Targets.

Professional
relationships and
connections

How are we going to achieve it?

The association's objectives

- Enhance the participation of women in public and professional life.
- Developing projects that offer visibility and recognition to women's competences.
- Promote the empowerment of women in the Spanish aerospace industry.
- Work in order to achieve gender equality and as partners and beneficiaries of economic and social development in Spain.

Activities

- Roundtable discussions to share different points of views on current topics in our industry.
- Meetings with women who undertake professional challenges and are role models of success.
- Workshops about specific gender equality initiatives.
- Publications and posts.
- Conferences.

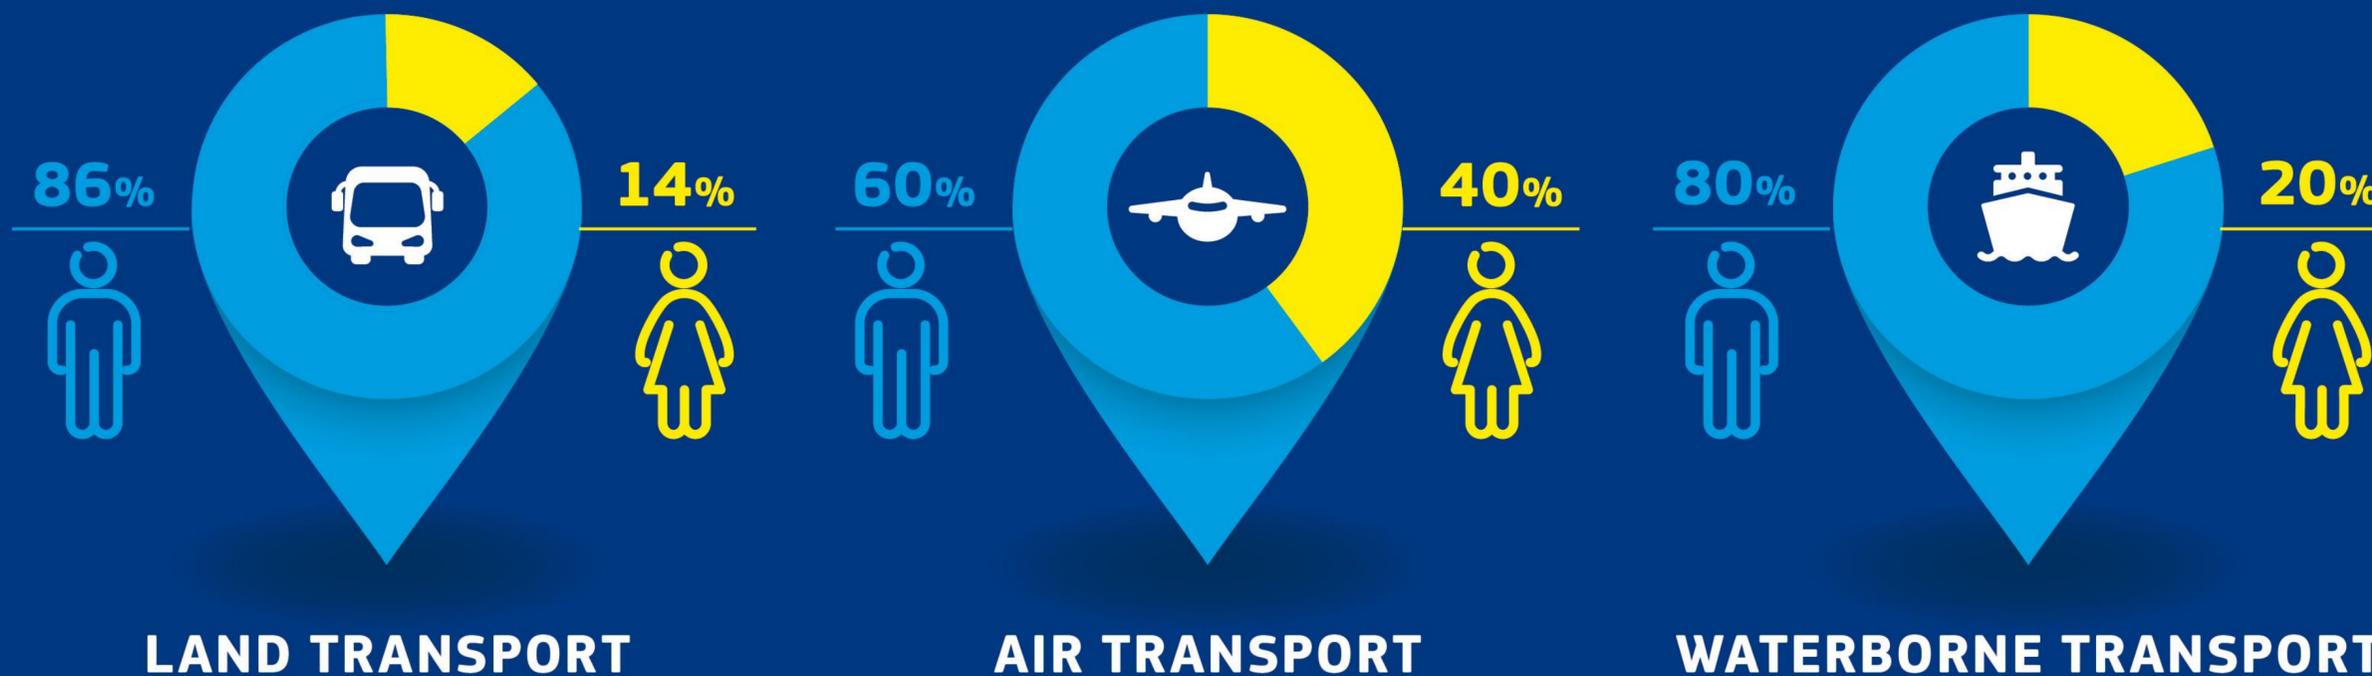

“If we want our society to flourish, we need to engage all of its talents, all of its human resources, at all levels. By engaging women and men, together, towards gender equality we will make it happen”

WOMEN IN TRANSPORT
