UNITING AVIATION

E-GAP

ICAO Global Aviation Partnerships on Emissions Reductions (E-GAP) Multiplying Environmental Action

Session IV

Partnerships to Develop Sustainable Alternative Fuels for Aviation

ICAO

Ted Thrasher, Chief, Environmental Standards Section

Environment, Air Transport Bureau

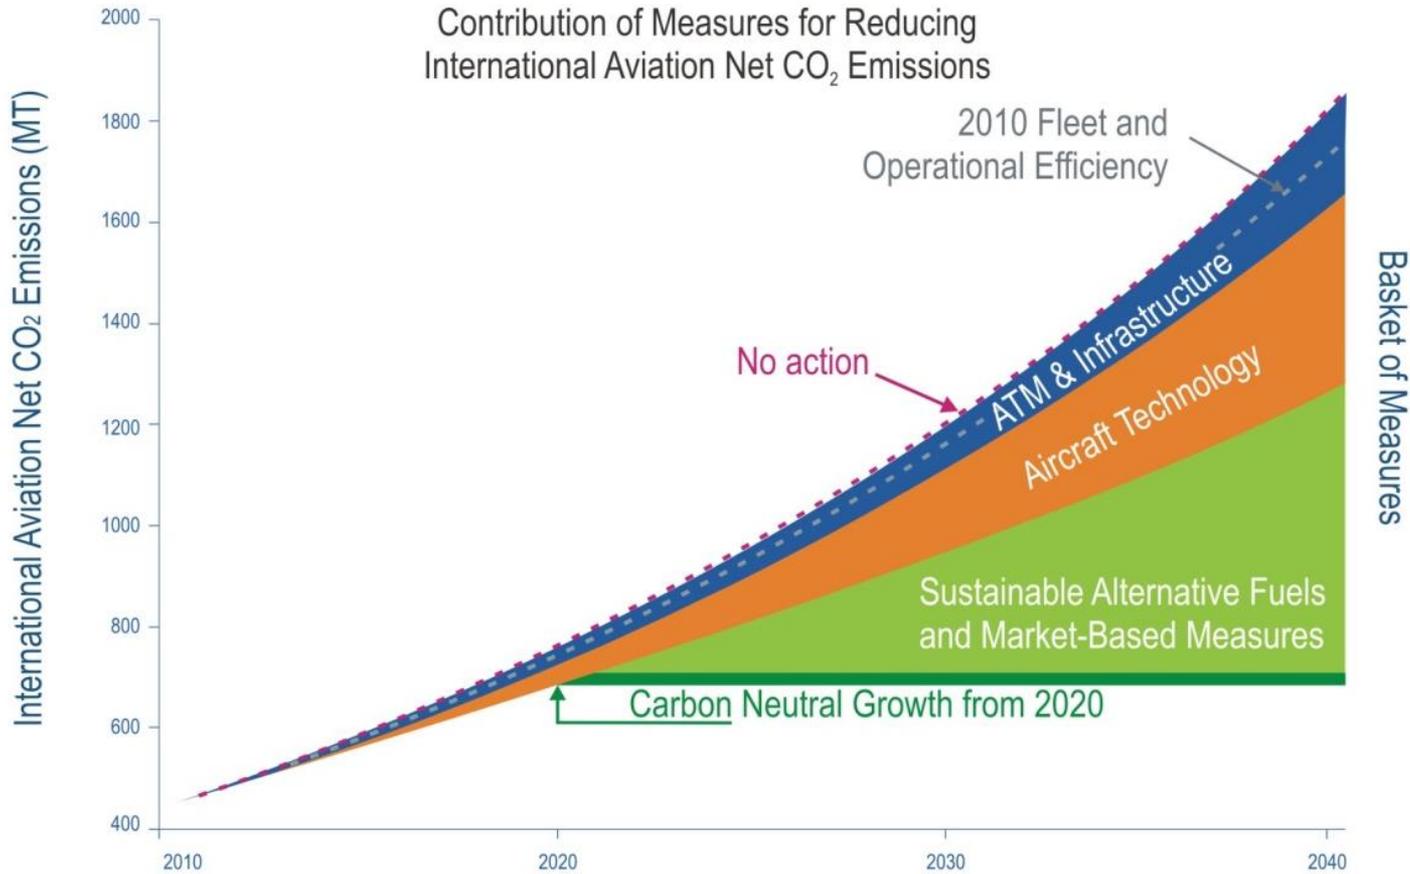

International Civil Aviation Organization (ICAO)

ICAO Global Aviation Partnerships on Emissions Reductions (E-GAP) Seminar
ICAO Headquarters, Montréal, 16 to 17 September 2015

ENV2015

CAEP International Aviation Net CO₂ Emissions Trends

ICAO's Role and Activities

Supports Member States and stakeholders efforts' by fostering information exchange and providing a global perspective

Progress in the Industry

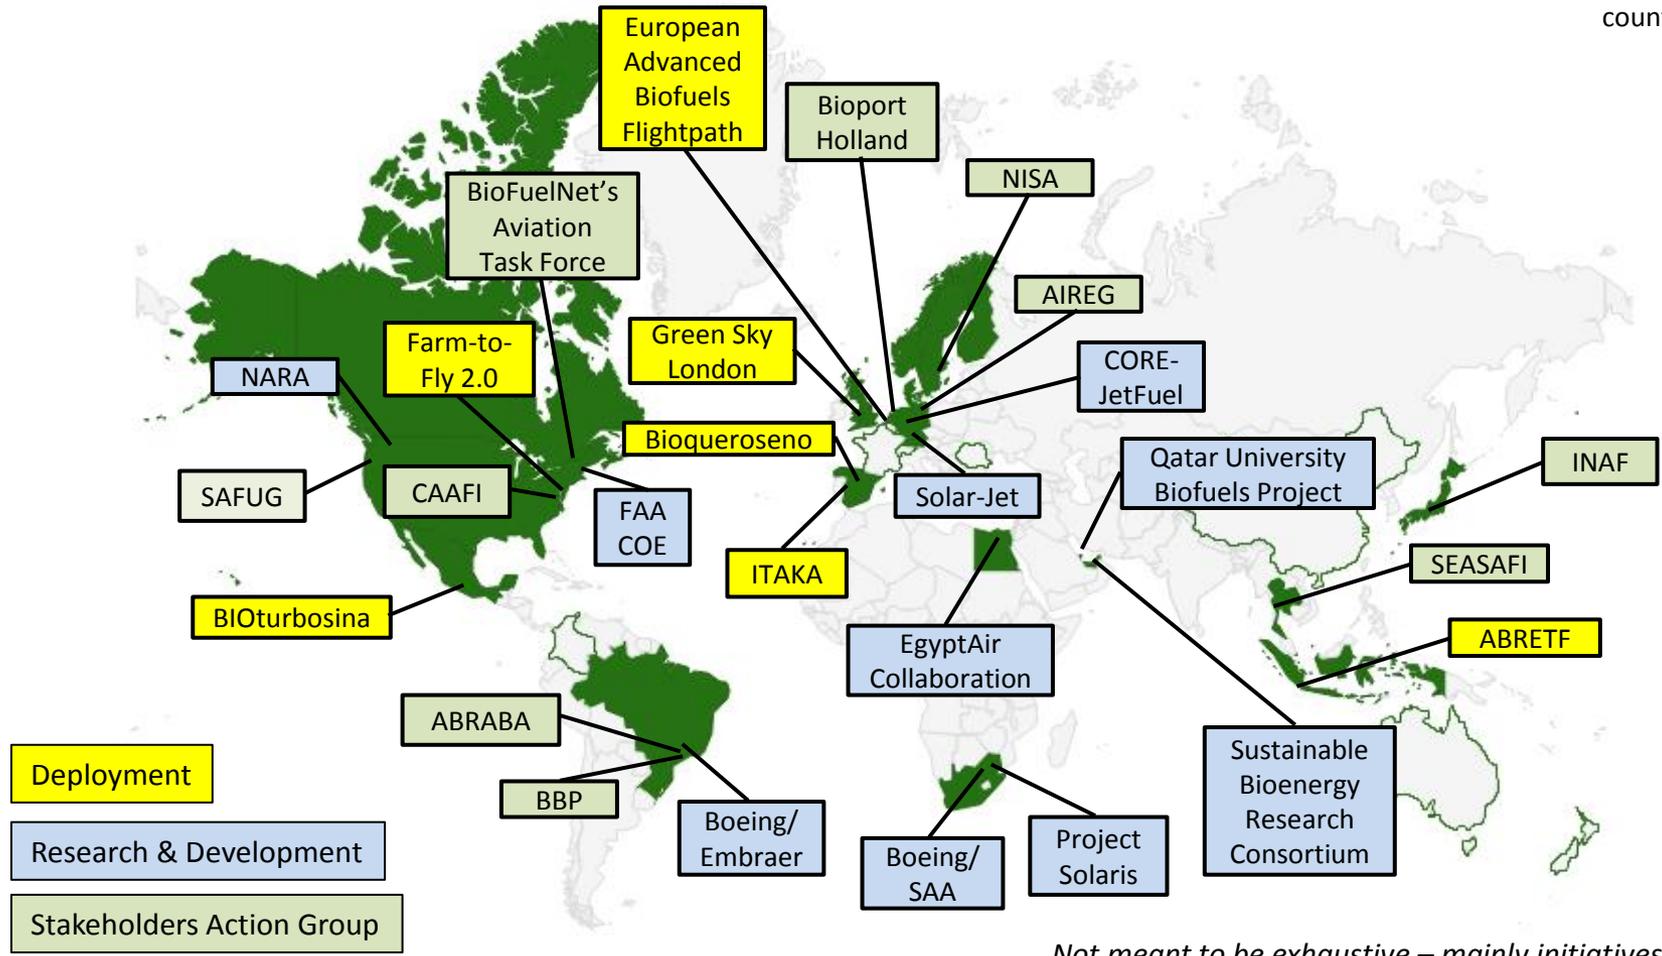

- 3 alternative fuel pathways certified for aviation
 - Fischer-Tropsch (F-T) Processing 2009
 - HEFA Hydroprocessing 2011
 - Synthetic Iso-Paraffin (SIP) Hydroprocessing 2014
- About **1700 commercial flights** operated since 2011 by 20 airlines
 - Over 200 commercial flights operated on alternative fuel in 2014 alone

Project Solaris

Not meant to be exhaustive – mainly initiatives since 2013

How ICAO Can Help the Industry Move Forward

- ICAO will continue to support international cooperation by:
 - Providing a **global view** that assists States and stakeholders to overcome remaining challenges
 - Facilitating **information exchange** on progress, regulations, and best practices – including maintaining the GFAAF
 - Working towards **quantifying the effects** of alternative fuels as a measure to mitigate aviation's release of greenhouse gasses
- Cooperation among stakeholders in the aviation industry and the energy sector is key to the sustainability of aviation
