

Alternative Fuels for Aviation Side Event SUMMARY

- In addition to technical, operational and market-based measures, alternative fuels provide a key approach for addressing aviation emissions
- Need “drop-in” fuels solutions for short/medium term
- Aviation is a highly technical oriented industry and committed to achieving fast progress in development and deployment of biofuels
- Concrete solutions exist – some alternatives test proved, still more to come

Alternative Fuels for Aviation Side Event SUMMARY

- Challenges
 - define “sustainable biofuels”
 - public acceptance of biofuels
 - cultivate the quantities of feedstock required
 - develop the facilities to process and refine
 - economic viability
- Incentives/investment are paramount for development/deployment
- Global flexible solution with environmental benefits while providing economic opportunities to local communities
