# INTERPOL databases directly actionable through API and PNR data

Six core data elements relating to each passenger as they are found in the Document's MRZ

1. Issuing State or Organization of the Official Document
2. Official Travel Document Number
3. Official Travel Document Type
4. Surname
5. Given Name(s)
6. Date of Birth

# INTERPOL's integration in national PIU

FIND

INTEGRATION

## 1. AGREEMENT

MOU Signed between NCB & PIU

## 2. COORDINATION

1-24/7 Extension

## 3. INTEGRATION

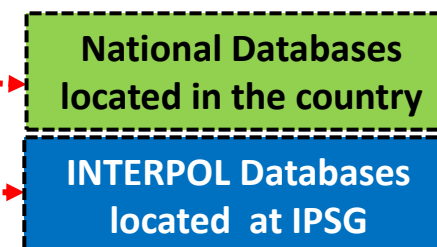

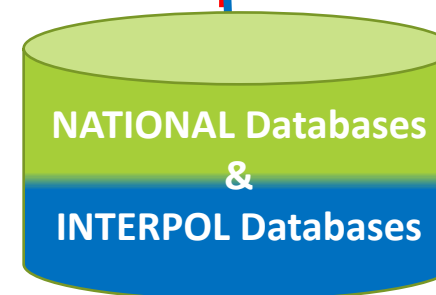

WS integration in national system

## 4. STANDARDIZATION

Standard Operating Procedures

National network

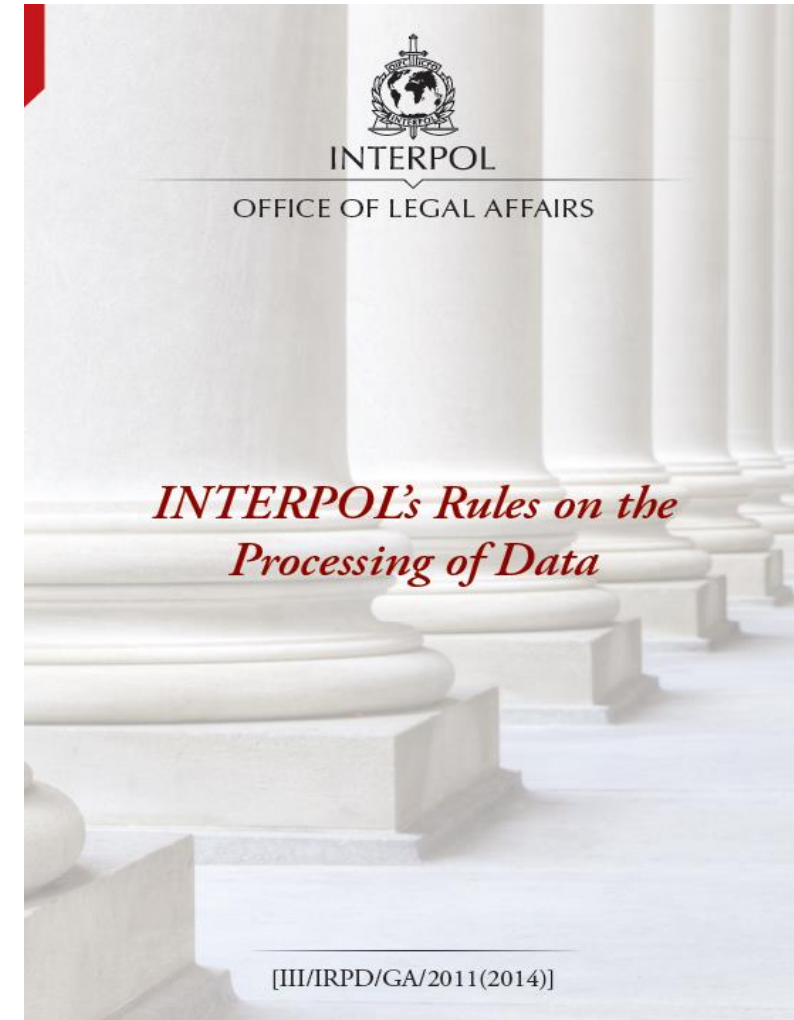

STOP-LISTS, BLACK LISTS  
INTERPOL SLTD, Nominal.

# INTERPOL's Rules on the Processing of Data (RPD)

## Key Elements (RPD)

- INTERPOL owns the database;
- Property: the data remains property of Member Countries (*right to monitoring the use of the data*);
- Quality/Compliance: INTERPOL performs data quality and compliance checks and not compliant data is placed off-line;
- Restrictions: data owners can restrict access to their data by countries they do not want to share information with.

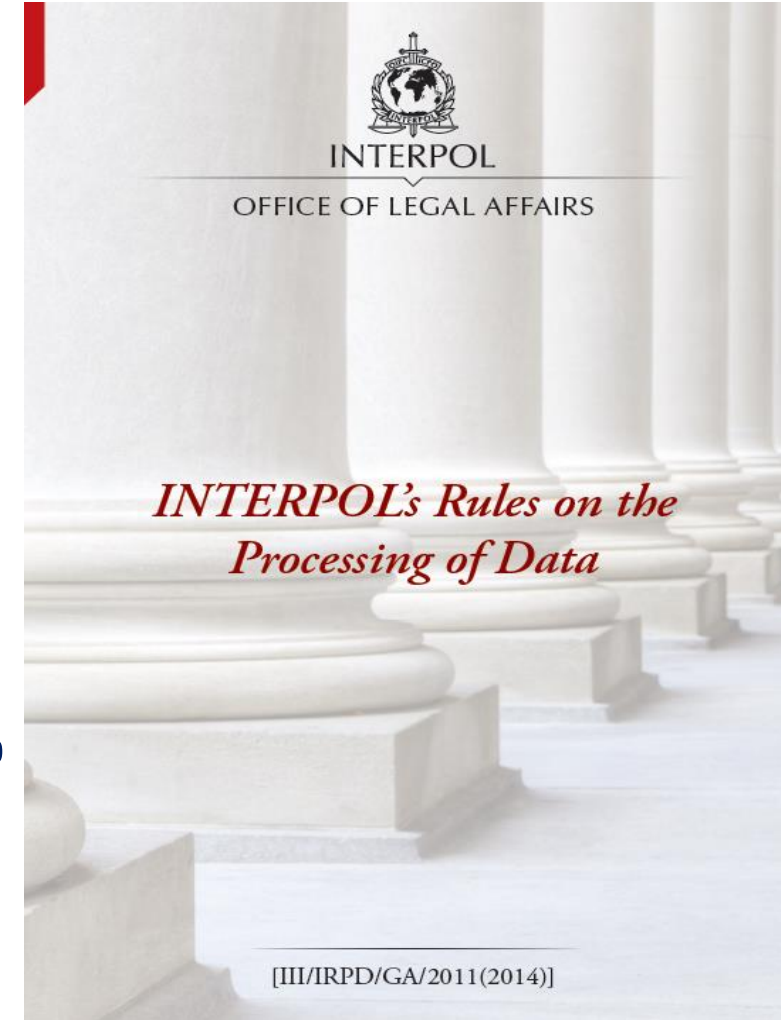

# INTERPOL's National Central Bureau

## Setting up of a national PIU

- Ensure the integration of INTERPOL's watchlist
- Support in the development of national SOP for a clear and accurate API/PNR data processing flow and appropriate management of positive match

## Business-as-usual

- "HIT follow-up" with the source of the information
- Access to INTERPOL databases other than Nominals and SLTD to better support analysis
- Facilitate global cooperation with national agencies
- Continuously foster timely and accurately update of INTERPOL databases

---

# Thank You
