INTERPOL SLTD Database

Date of Creation	2002
What Do You See?	Lost, stolen, revoked and invalid, stolen blank travel and identity documents such as Passports, ID cards, Visas
How to Record?	Easy Form, WSDM
How to Search?	e-ASF, FIND, MIND, I-Batch, IMD

PURPOSE AND BENEFITS

The STLD database can be accessed by National Central Bureaus (NCBs) and other authorized users – such as officers at border control, immigration and customs – in order to instantly verify if a person is attempting to enter/leave the country by using a travel document fraudulently.

This process directly assists law enforcement authorities in identifying the misuse of travel documents in order to prevent criminals from:

- crossing international borders,
- concealing their true identities,
- carrying out criminal acts by means of stolen or falsified travel documents.

- PROVIDING OPERATIONAL PROCEDURES FOR THE P.I.U
- INTEGRATING INTERPOL'S EXTENSIVE DATABASES, INCLUDING 'NOMINAL' and 'SLTD'

INTERPOL JOURNEY (I-JOURNEY)

MULTIPLE SCREENING POINTS

FIN Integration Impact in Mongolia : From 182 to 3.1 Million Searches

For 2023:

Total searches: **182**

Positive results (HTs): **1**

Following FIN integration – 2025 (as of July 1st):

Total searches: **3.1 million**

Positive results (HTs): **22**

FINs integration through API/PNR has enhanced operational effectiveness at borders, enabling law enforcement to detect persons of interest in real time — clearly reflected in the surge of system queries and actionable HTs.

WAY FORWARD

- Integrate Fixed INTERPOL Network Database (FIND) web service into national border management systems.
- Implement WSDM SLTD to automatically populate INTERPOL databases from national databases of member countries.
- Inter-Agency SOP for reporting and recording stolen and lost travel documents, and responding to SLTD search HITs.
