

Destination Green

ICAO Symposium on Aviation and Climate Change, "Destination Green", 14 – 16 May 2013

IGMC

ICAO GREEN MEETINGS CALCULATOR

Sainarayan A

Environment Officer, ENV Branch/ATB, ICAO

About ICAO GMC

- **Decision Support System**
- **Facilitates travel planners in the UN and other entities to reduce emissions from air travel.**
- **Facilitates reduction of travel offset costs where applicable.**

How does it Work

- **User inputs details of proposed meeting –**
 - **Threshold time for business class travel**
 - **Origin cities from where attendees will attend the meeting**
 - **Number of attendees**

What does ICAO GMC report

- **Suggested Venue points for the meeting in ascending order of CO2 emissions**
 - **Economy class and Business Class emissions reports generated.**
 - **Direct routings emissions and one stop route emissions reports generated.**

Decision Support

- Select the meeting point that has the lowest emission, offset costs (if applicable) considering –
 - Travel related costs
 - Accommodation costs
 - Other factors
