- 四、发展展望 IV. Development Prospect**
- 五、关于我们 V. About Us**

1. 无人机发展 1. Development of UAV

近年来，我国民用无人消费型无人机呈现爆发性增长趋势，大量低空无人机的出现对公共安全、民航安全和国防安全造成严重影响。加强民用无人机的管理与服务已经成为整个社会的迫切需求。

In recent years, the civil consumer UAV market in China has been growing explosively. With the emergence of a lot of low-altitude UAVs, the public security, civil aviation security and national defense security will be impacted seriously. To enhance the management and service of civil UAVs has become an urgent social requirement.

2. 无人机监管情况-国内 2. UAV supervision -China

- 无人机管理法律法规 : Laws and regulations on UAV management:

序号 No	时间 Time	名称 Description
1	2015.12	轻小 <u>无人机</u> 运行规定 Interim Provisions on the Operation of Light and Small UAVs
2	2016.9	民用 <u>无人驾驶航空器</u> 系统空中交通管理办法 Measures for ATC of Civil UAV
3	2017.9	四川省民用无人驾驶航空器安全管理暂行规定 Interim Provisions on Security Management of Civil UAVs in Sichuan Province
4	2018.1	无人驾驶航空器飞行管理暂行条例(征求意见稿) Interim Provisions on UAV Flight Management(draft for comment)
5	2018.8	民用 <u>无人机</u> 驾驶员管理规定 Provisions on Management of the Operators of Civil UAVs

分类 Classification	空机重量 (千克) Empty Weight (kg)	起飞全重 (千克) Takeoff Gross Weight (kg)
I	0<W≤1.5	
II	1.5 < W ≤ 4	1.5 < W ≤ 7
III	4 < W ≤ 15	7 < W ≤ 25
IV	15 < W ≤ 116	25 < W ≤ 150
V	植保类无人机 Agriculture spraying drones	
VI	无人飞艇 Unmanned airship	
VII	可100米之外超视距运行的I、II类无人机 Classes I and II UAVs that can operate at ranges greater than 100m	

- **无人机协同监管:** 主要通过GPS/BD+2G/4G实现, 现有无人机云管理系统8个 (截至2018.8) 。 **Collaborative supervision and management of UAVs:** mainly enabled by GPS/BD+2G/4G. By August 2018, 8 UAV cloud management systems have been approved.
- **无人机探测反制:** 主要有低空雷达、光电探测、无线电监测及反制。 **UAV detection and countermeasure:** mainly including low altitude radar, photoelectric detection, radio monitoring and countermeasure.

2. 无人机监管情况-国外 2. UAV supervision-abroad

- 无人机管理法律法规 : Laws and regulations on UAV

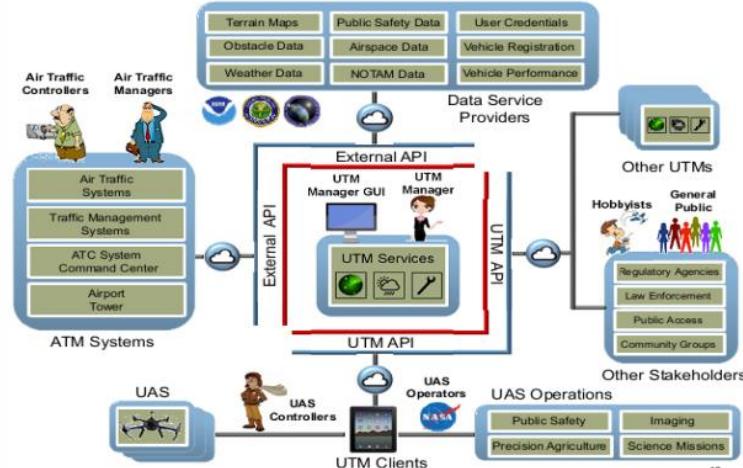

序 No.	management: Time	国别 Country	名称 Description
1	2015.12	美国 U.S.	《轻型无人航空器系统的运行和审定》 Operation and Approval of Light UAVs
2	2016.7	欧洲航空安全局 EASA	《无人机运营规则》 Rules on Operation of UAVs
3	2016.9	英国、澳大利亚 UK and Australia	

- 无人机协同监管 : 主要依靠NASA推动, 要求纳入国家空域运行系统, 主要依托空域信息平台+移动通信网络+移动互联网实现。主要参与方有NASA、Exelis、Airware、Skyward等 ; Collaborative supervision and management of UAVs:

It's promoted mainly by NASA, required to be included into the national airspace operation system, and realized mainly relying on the airspace information platform, the mobile communication network and the mobile internet. Main participants include NASA, Exelis, Airware, and Skyward.

- 无人机探测反制 : 德国Dedrone的DroneTracker、美国Battelle公司的DroneDefender、英国Blighter的AUDS等。

UAV detection and countermeasure: Typical companies include DroneTracker under Dedrone (Germany), DroneDefender under Battelle (America) and AUDS under Blighter (UK) .

- 二、系统方案 II. System Scheme**
- 三、应用情况 III. Application**
- 四、发展展望 IV. Development Prospect**
- 五、关于我们 V. About Us**

1. 系统目标

1. System Goal

针对民用无人机运行需求，构建综合化无人机监管平台，实现无人机行政管理、空域管理、飞行管理、飞行服务及治安协同功能，适应多种应用场景和用户角色。

Aiming at the operational requirements of UAV, an integrated UAV monitoring platform is constructed to realize the functions of UAV administration, airspace management, flight management, flight service and security administration, and to adapt to various application scenarios and user roles.

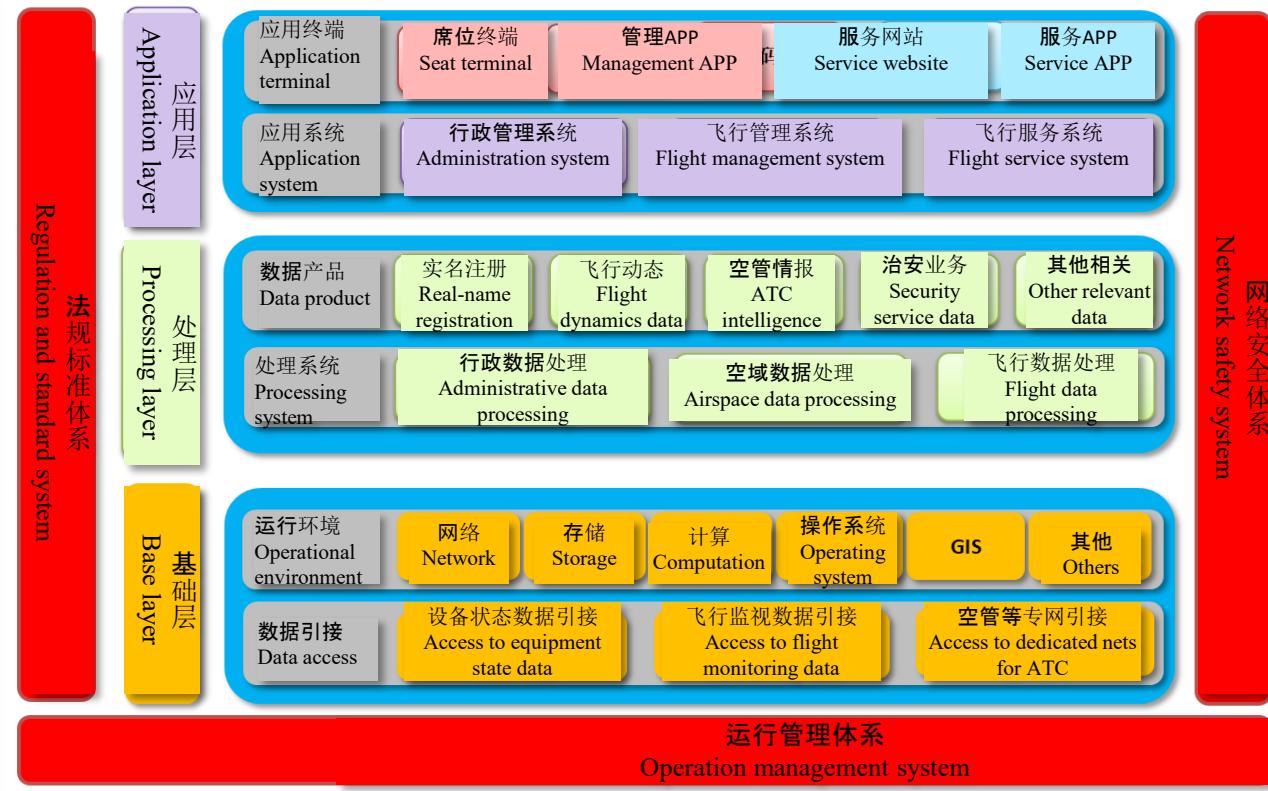

二. 系统方案II. System Scheme

2. 系统架构 2. System architecture

3. 体系设计

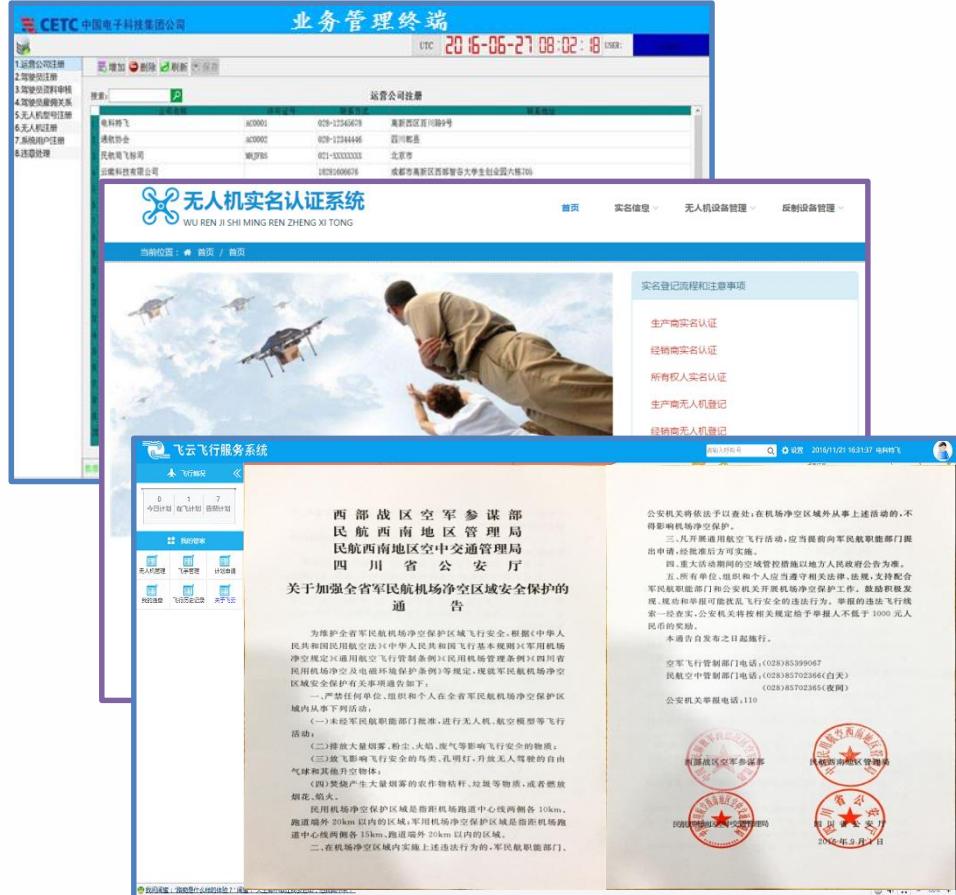

3. System design

4. 系统功能
4. System functions

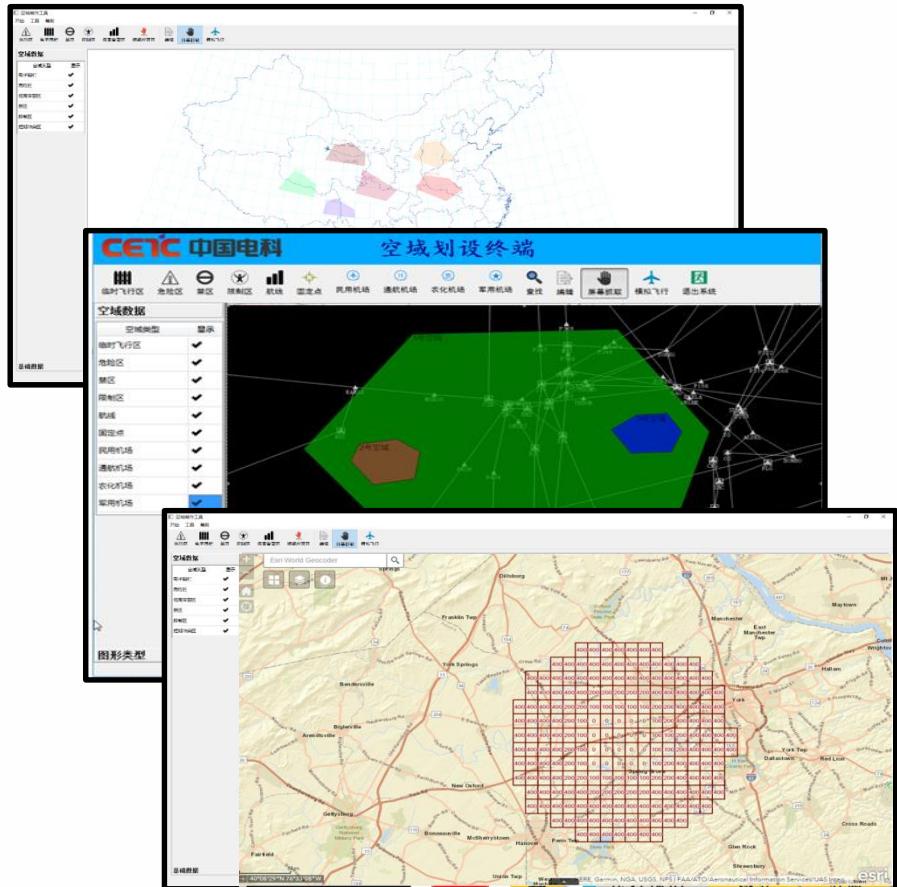

4. 系统功能 4. System functions

4. 系统功能 4. System functions

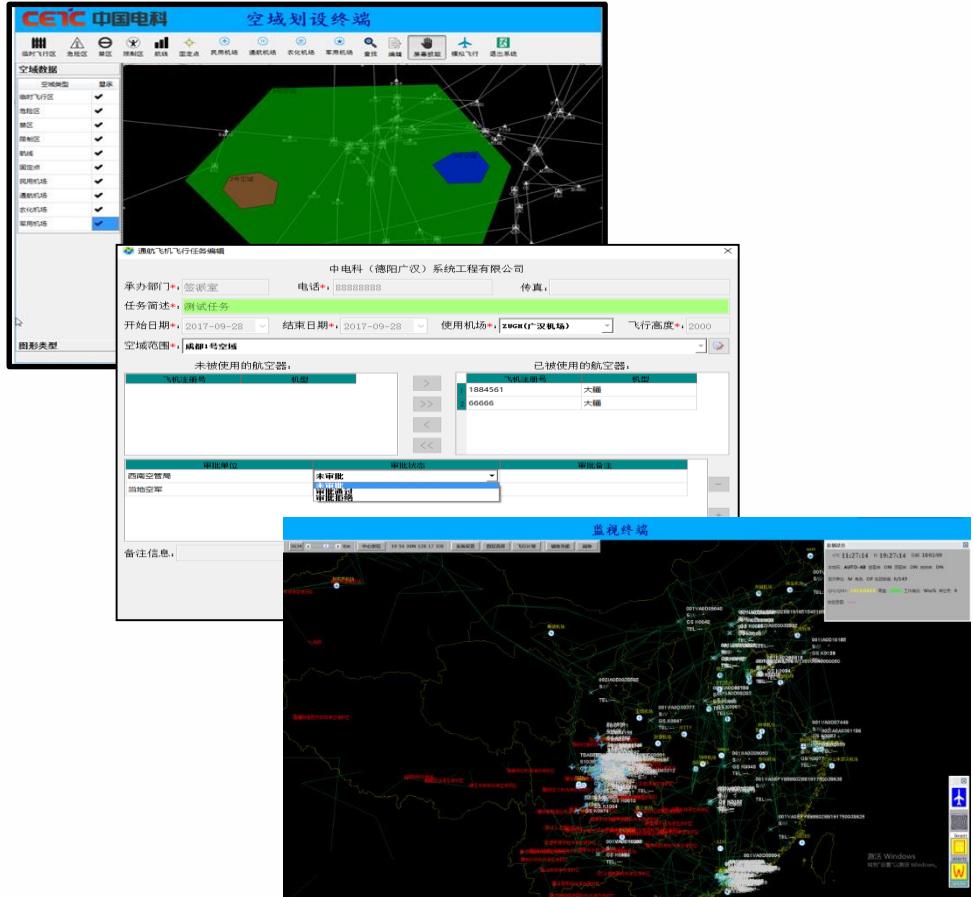

空域管理 Airspace management

- 飞行空域划设
Delineating flight airspace
- 电子围栏划设
Delineating electronic enclosure
- 航路航线划设
Setting air route
- 空域数据发布
Publishing airspace data
- 空域效能评估
Assessing airspace efficiency

4. 系统功能

4. System functions

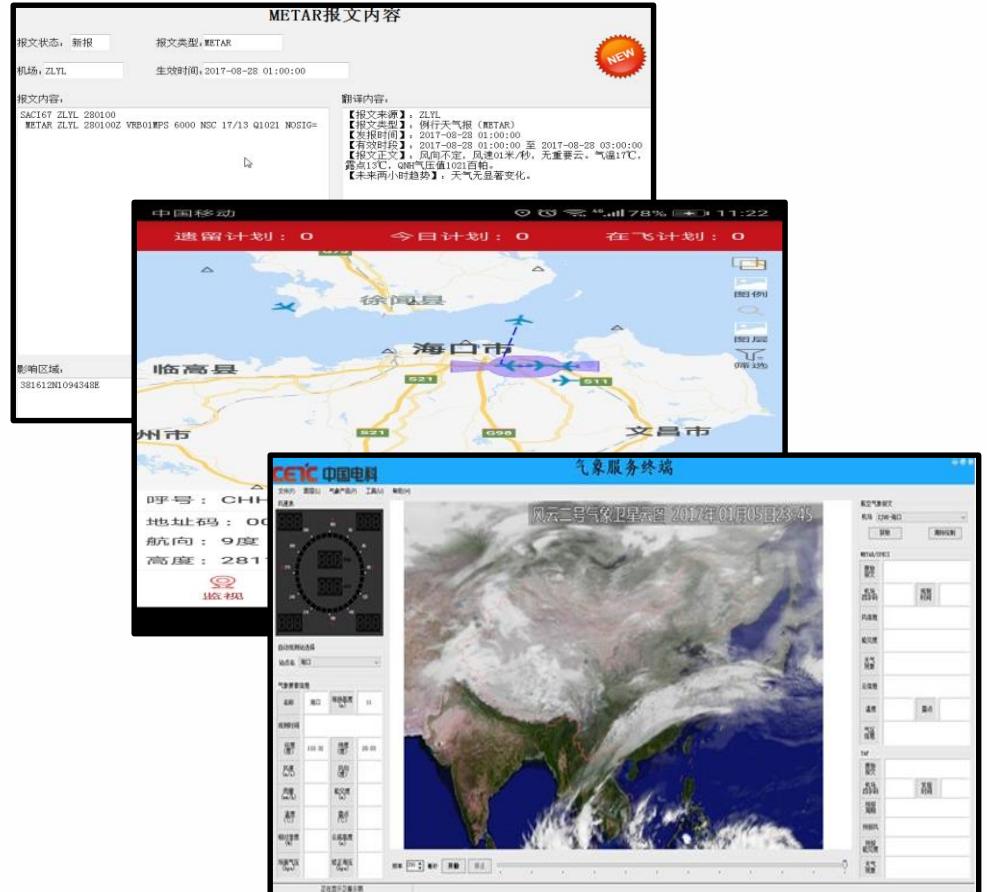

4. 系统功能 4. System functions

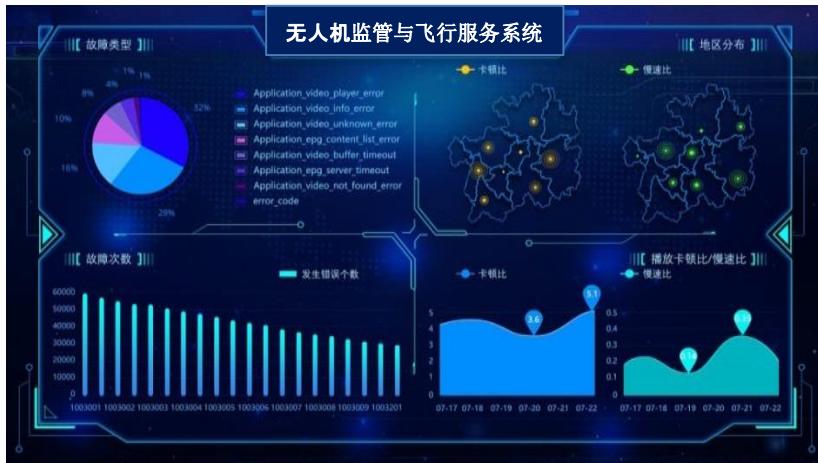

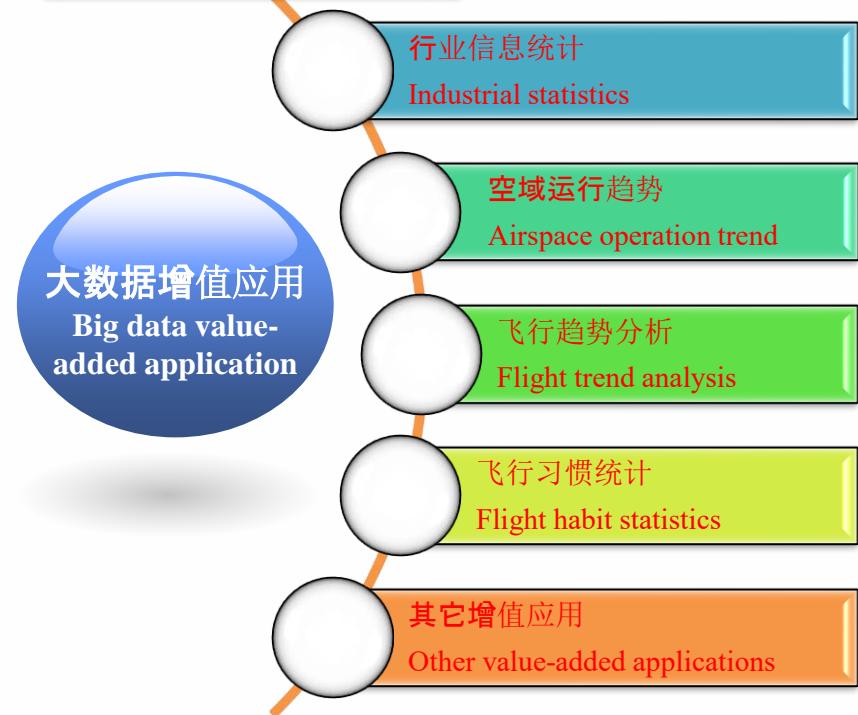

治安协同
Security administration

4. 系统功能 4. System functions

4. 系统功能 4. System functions

5. 系统特点

5. System features

功能体系完整

Complete
functional
system

多方一体协同

Multi-party
coordination

网络安全可靠

Safe, reliable
network

运行模式灵活

Flexible
operation
mode

中电科特种飞机系统工程有限公司(CETC-SMA)，隶属于中国电科集团 (CETC) ，专业从事**特种飞机、无人机、智慧低空**等系统的研发、生产和服务的军民融合国有高科技企业，总部位于成都，是中国电科通用航空核心发展平台和智慧低空总体单位。

CETCA-SMA, as a member of China Electronics Technology Group Corporation (CETC), our company is a high-tech enterprise specializing in R&D, production and service of products such as **special mission aircraft, UAS and intelligent low-altitude system**. It is based in Chengdu. The company is the core development platform of Intelligent low-altitude system and GA business of CETC.

服务低空开放，助力无人机发展

Serve for low-altitude opening and facilitate UAV development

谢 谢

Thank You
