ICAO STOCKTAKING SEMINAR
TOWARD THE 2050 VISION FOR
SUSTAINABLE AVIATION FUELS

ICAO Stocktaking Seminar toward the 2050 Vision for Sustainable Aviation Fuels – Setting the Scene

Jane Hupe

Deputy Director Environment, ICAO

Vision

Achieve the sustainable growth of the global civil aviation system.

Mission

To serve as the global forum of States for international civil aviation.

ICAO Strategic Objectives:

Safety

Security & Facilitation

Environmental Protection

Air Navigation Capacity and Efficiency

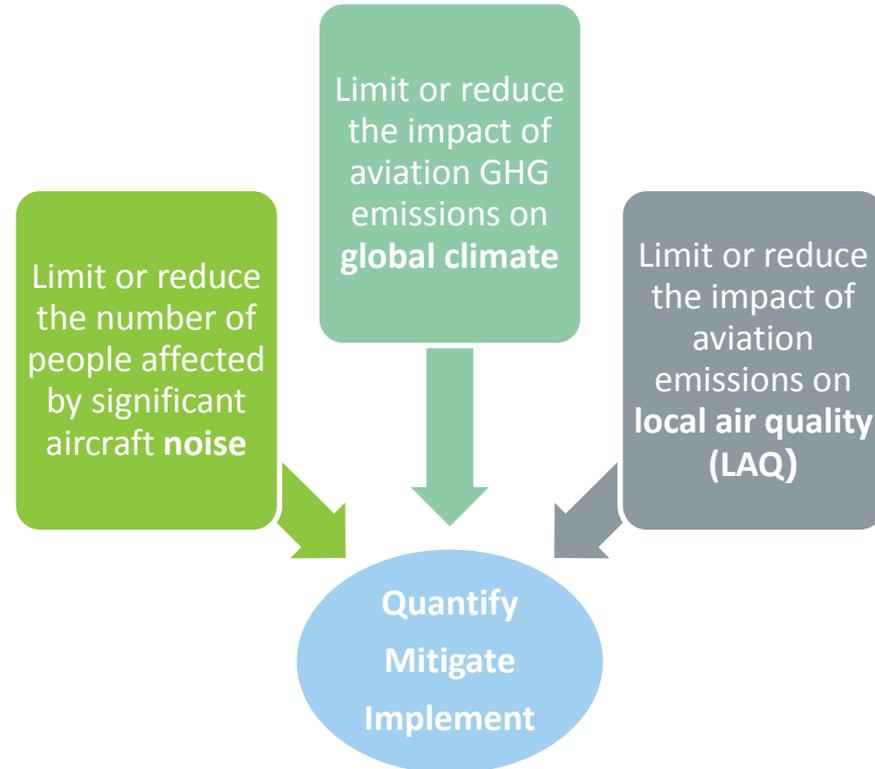

Economic Development of Air Transport

ICAO Environmental Goals

ICAO Strategic Objective on Environmental Protection:

Minimize the adverse effect of global civil aviation on the environment

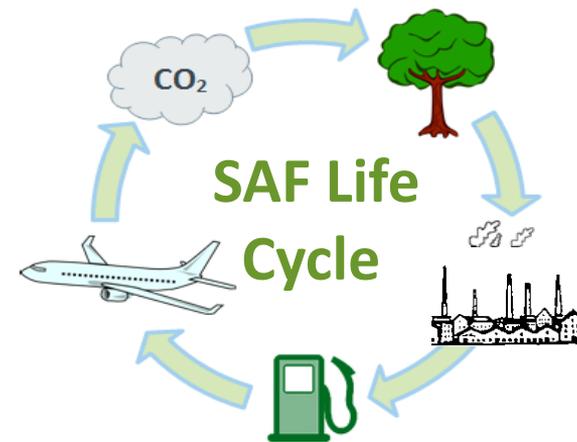

What is SAF

- Must meet the same safety standards as current aviation fuels
- “Drop-in” fuels : fuels that are fully compatible with existing aircraft and fuel-supply systems
- In addition to safety standards, SAF needs to meet **Sustainability Criteria** (e.g. minimum CO₂ reductions on a life cycle basis)

Example: *Fuels made from biomass*

CO₂ emitted by combustion is up-taken by plant growth

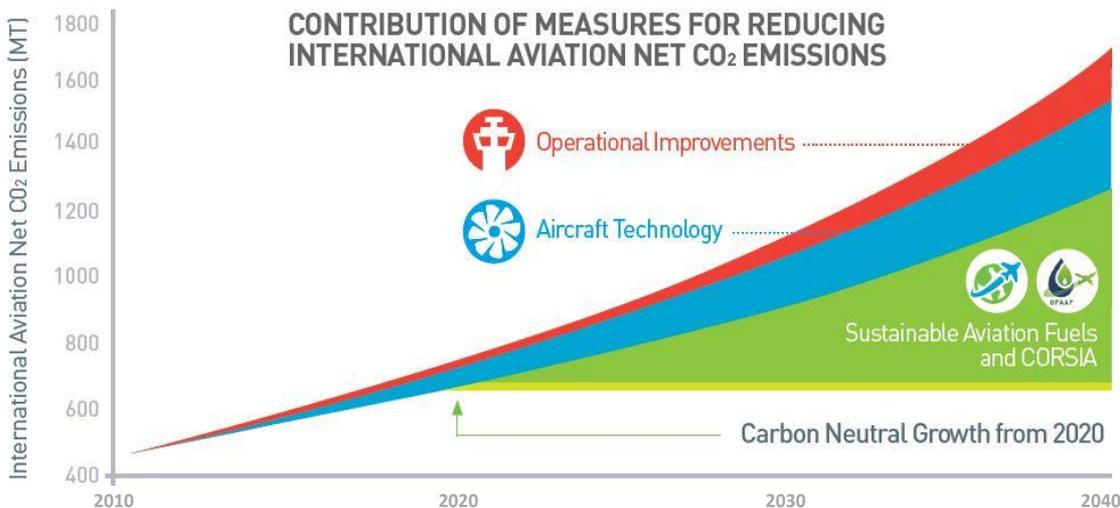

ICAO is facilitating SAF development and deployment by:

- 1) Establishing **policies and measures** that foster the use of SAF (i.e., CORSIA, Assembly Resolution A39-3)
- 2) Developing globally-accepted **sustainability criteria** and **life cycle methodologies** (through the work of CAEP)
- 3) Organizing **events** for information-sharing and outreach
- 4) Sharing information and best practices, including through ICAO's **Global Framework for Aviation Alternative Fuels (GFAAF)**
- 5) Assisting on the development on SAF feasibility studies.

ICAO Global Aspirational Goals

- ICAO aspirational goal - Carbon neutral growth (CNG) from 2020 onwards.
- To be achieved with a “basket of measures” for CO₂ reduction (A39-2).

ICAO Basket of Measures

- Technology and Standards
- Operational Improvements
- Sustainable Aviation Fuels
- Market-Based Measures

Range of CO₂ reductions from Sustainable Aviation Fuels (SAF)

10 years ago

- **Technical feasibility and safety under consideration**
- **No certified conversion processes**
- **Very few demonstration flights**
- **Then, in 2009, CAAF/1 was convened and recommended:**
 - the use of SAF as a means to reduce aviation emissions;
 - the establishment of the ICAO Global Framework for Aviation Alternative Fuels (GFAAF);
 - the development of life cycle analysis methodologies;
 - the development of a common definition of Sustainability requirements

Since 2009...

6

conversion processes certified for use in aviation

4

Feasibility studies concluded at ICAO

6

Airports regularly distributing blended alternative fuel

>160,000

Commercial flights have used a blend of alternative fuel

CORSIA-Related agreements

ICAO Global Framework for Aviation Alternative Fuels (GFAAF)

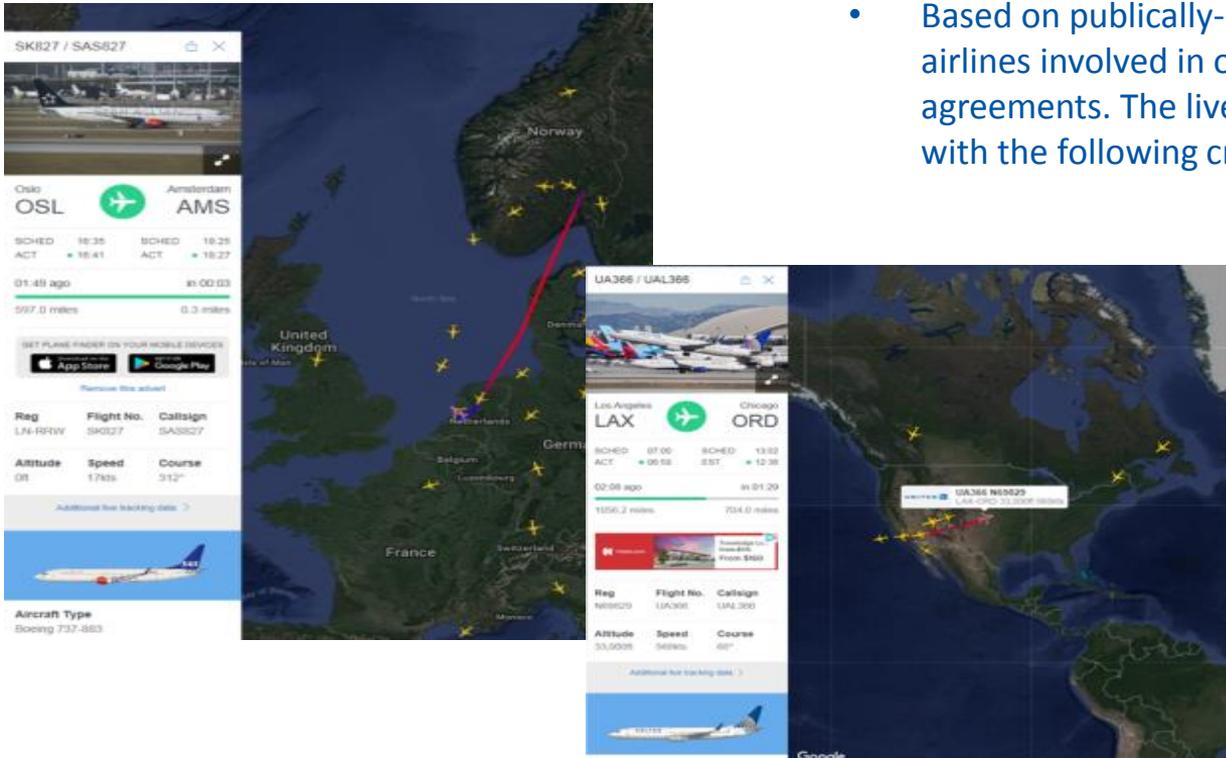

Global Framework for Aviation Alternative Fuels

- Over 600 news announcements dating back to 2005
- Details of 35 past and on-going projects
- Answers to frequently asked questions
- Facts and Figures
- And...

ICAO GFAAF Live-Feed

- Based on publically-available information from airports and airlines involved in on-going alternative fuel purchase agreements. The live feed displays all flights that comply with the following criteria:

Airlines	Departing from
United Airlines	Los Angeles International Airport
KLM	
Lufthansa	Oslo Airport
SAS	
KLM / KLC	
SAS	Stockholm Arlanda Airport
KLM	
BRA	
All Departures	Bergen Airport
Batches of AAF have also been delivered to: Stockholm Bromma Airport, Åre Östersund Airport, Göteborg Landvetter Airport, Karlstad Airport, Halmstad Airport, Brisbane Airport, Chicago O'Hare International Airport.	

ICAO Capacity Building and Assistance Projects

ICAO-EU project Capacity Building for CO₂ Mitigation from International Aviation

ICAO-UNDP-GEF project *Transforming the Global Aviation Sector: Emission Reduction from International Aviation*

Four SAF Feasibility Studies:

- Burkina Faso
- Trinidad and Tobago
- Kenya
- Dominican Republic

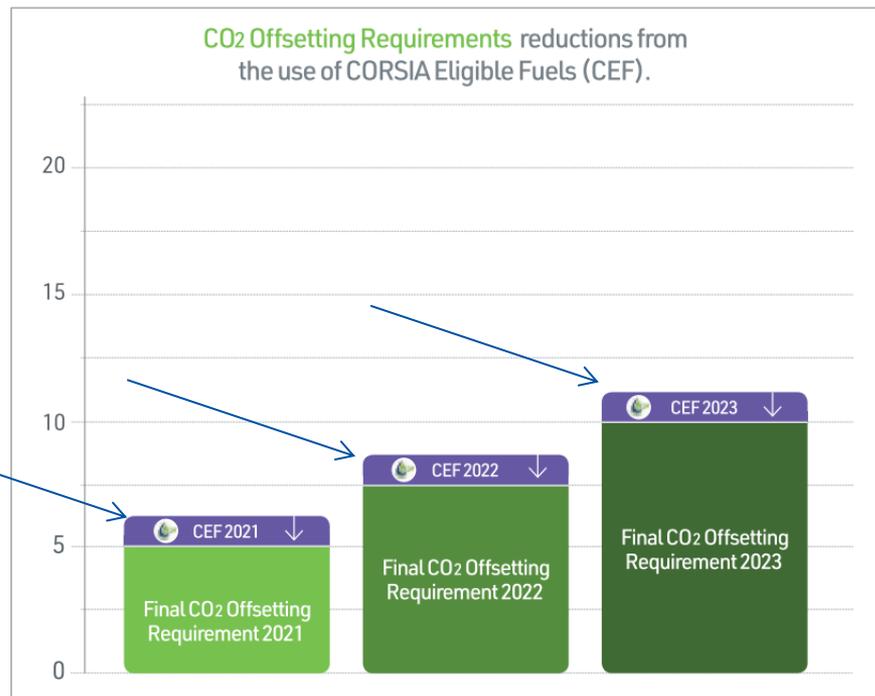

- *Development of guidance documents*
 - *Sustainable Aviation Fuels*
 - *Renewable Energy*
 - *Governance*
 - *Financing of Clean Energy projects*
- *Pilot project on renewable energy at two airports in Jamaica*

Carbon Offsetting And Reduction Scheme for International Aviation (CORSAIA)

- From 2021 onwards, the total CO₂ emissions each year will be compared against the average of CO₂ emissions from international aviation covered by CORSIA in 2019 and 2020
- The use of Sustainable Aviation fuels or lower carbon aviation fuels may reduce the airlines offsetting requirements under CORSIA.

ICAO Conference on Aviation Alternative Fuels in Mexico City (CAAF/2)

(11 to 13 October 2017) - <https://www.icao.int/Meetings/CAAF2/>

- Endorsement of the **2050 ICAO Vision for Sustainable Aviation Fuels**
- Calls for a **significant proportion of SAF use by 2050**
- **A quantified long-term goal for SAF** to be defined in CAAF/3 (by 2025)
- A **Stocktaking process** will support the definition of this goal

Now - This Seminar

Aim:

- Take stock of the progress in the deployment of Sustainable Aviation Fuels
- The first step towards the establishment of a quantified 2050 ICAO Vision for SAF (expected by 2025).

Agenda:

Day 1

- Agenda Item 1. Development in certification and deployment of aviation fuels
- Agenda Item 2. State and Organization initiatives for the deployment of alternative fuel
- Networking Session. Facilitating Partnerships for the Deployment of SAF

Day 2

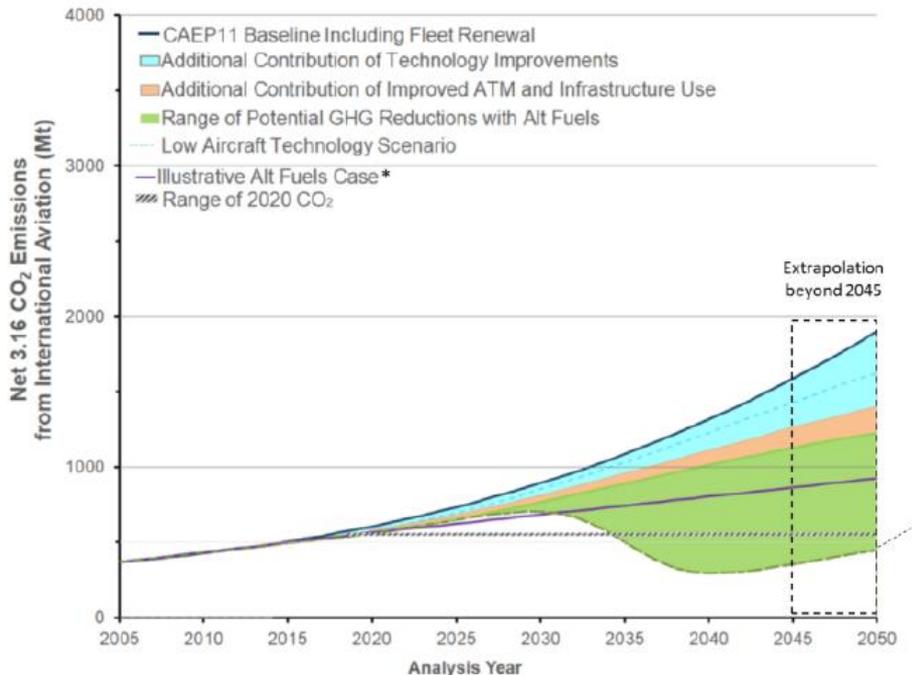

- Agenda Item 3. Financing and assistance programmes for aviation fuels
- Agenda Item 4. Developments in sustainability of aviation fuels
- Agenda Item 5. Current information for updating the 2050 ICAO Vision for Sustainable Aviation Fuels

Future

SAF can be a game changer!

- SAF will play a major role in reducing international aviation emissions.
- ICAO 40th Assembly is an opportunity to establish policies to support SAF deployment
