

Interaction between SSP and SMS

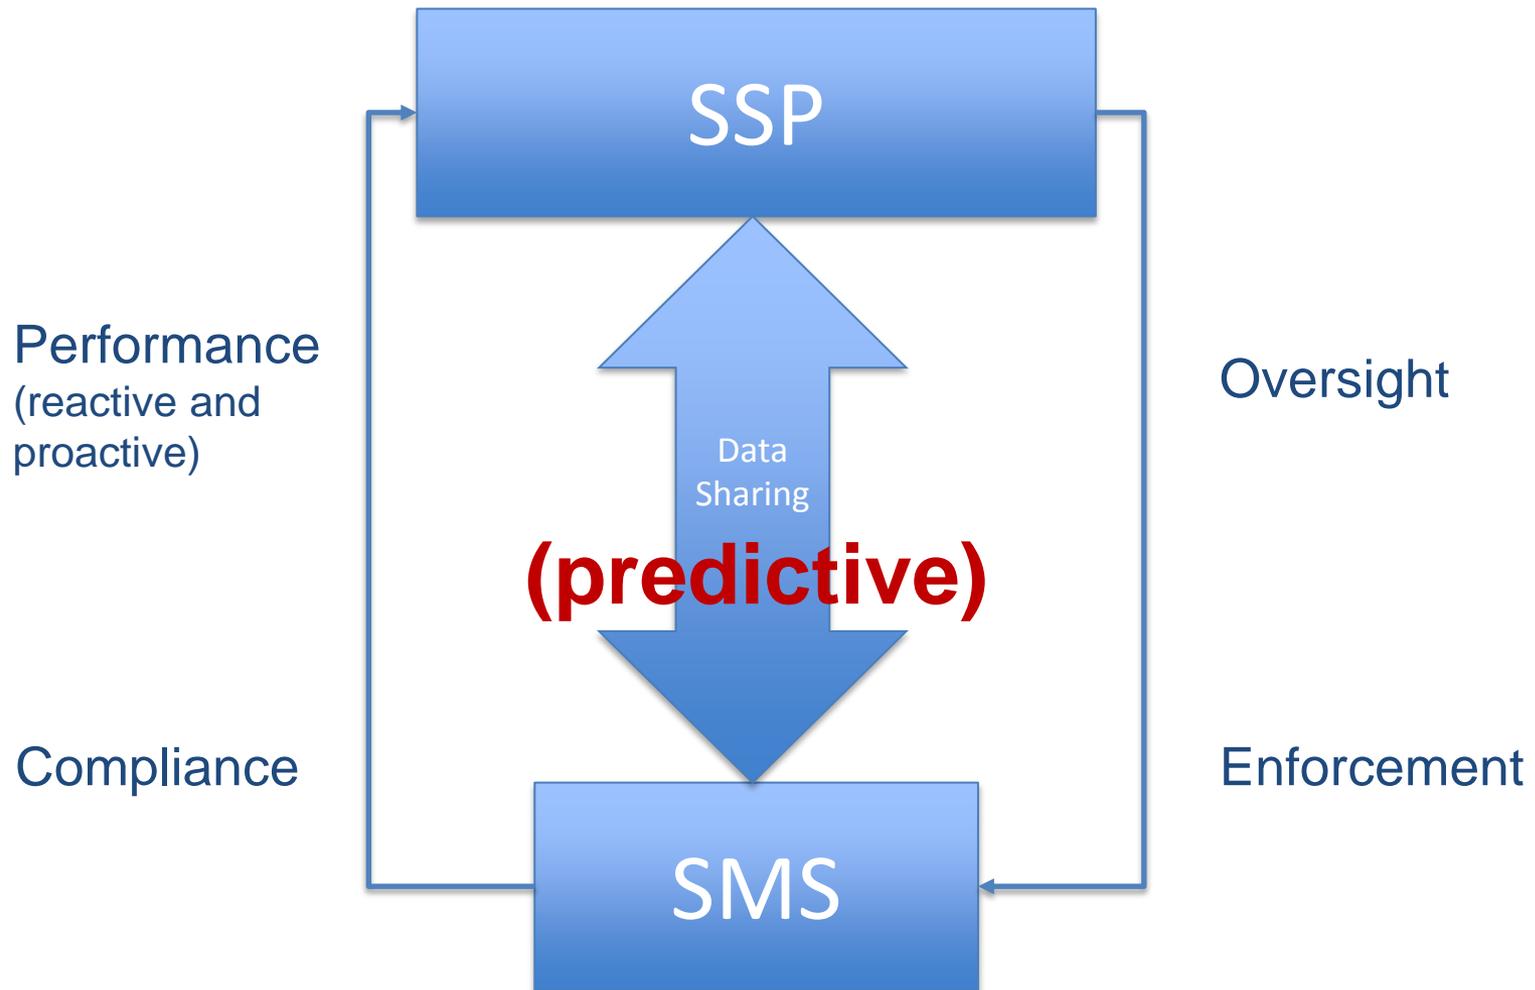

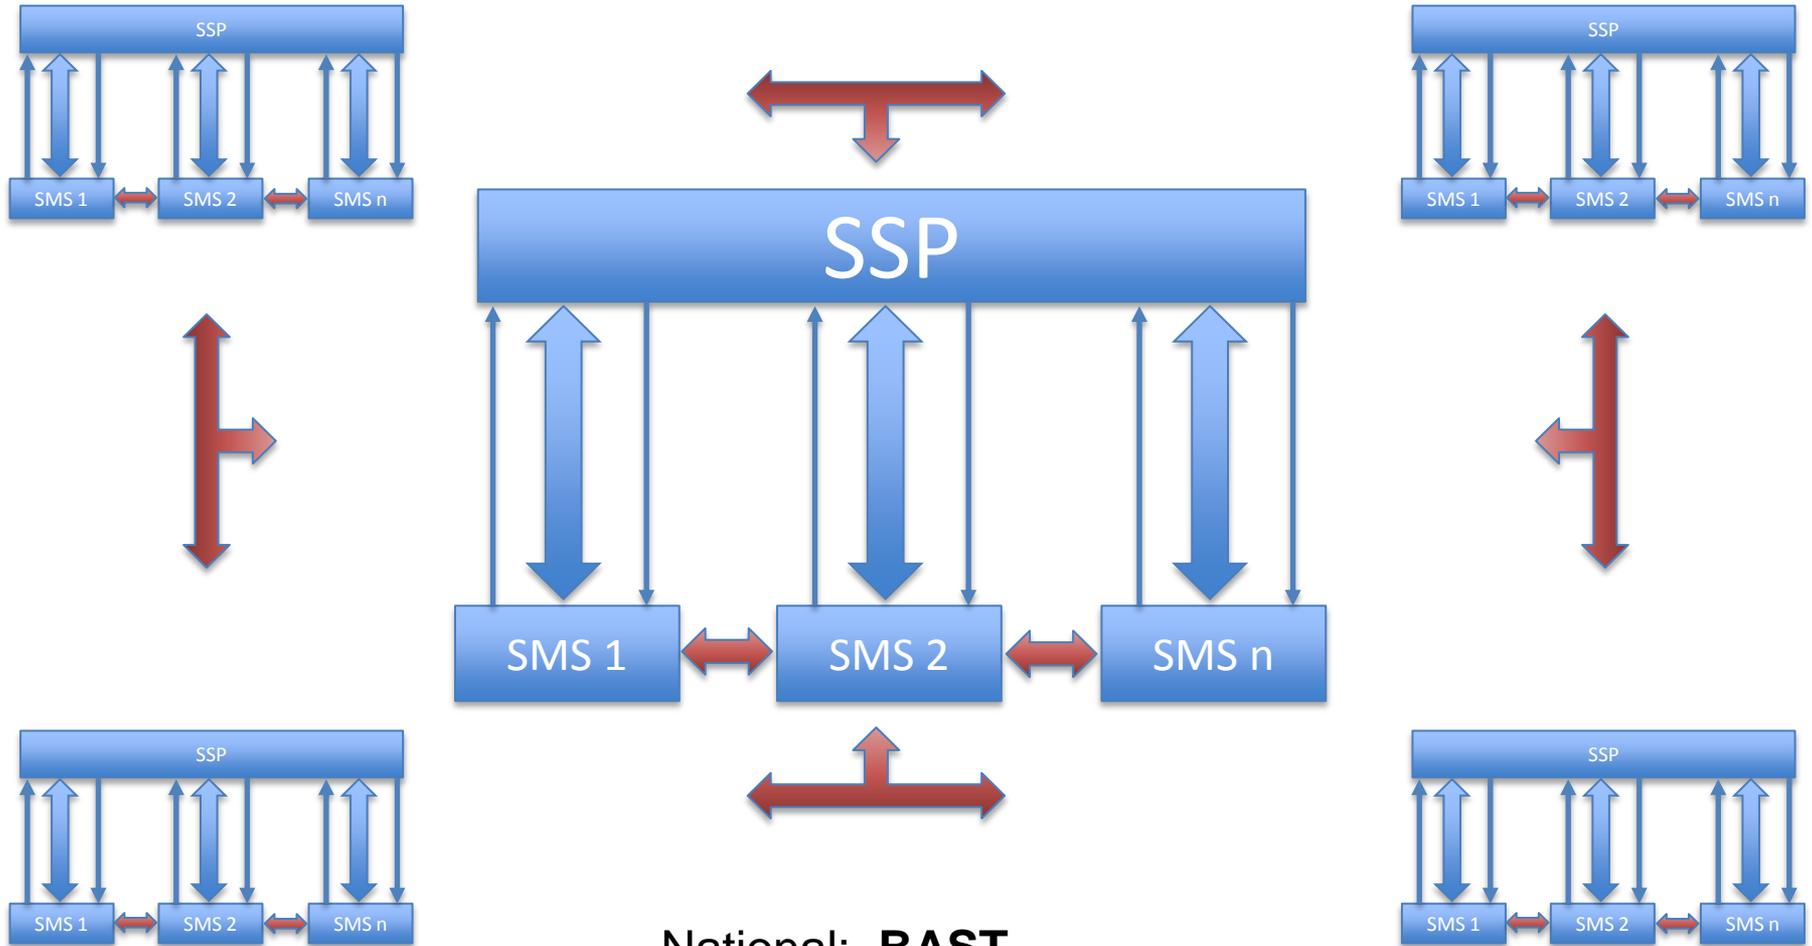

SMS required for:

- ✓ All flight ops (except private)
- ✓ All maintenance workshops
- ✓ All Public Airports

Key remarks:

1. The operator is responsible to manage its own risk, not the State.
2. State is responsible to assess if the operator does it properly.
3. State is responsible to manage the risk of the aviation system.

National: **BAST**
Regional: **RASG-PA**

Challenges:

- ✓ Develop a trust environment (State and Industry)
- ✓ Develop data analysis methods
- ✓ Prepare the workforce for the new environment

THANK YOU!
