

## Instructions to access a public Wireless network

Access to a Public Wireless network is available throughout ICAO's Facilities. Using the public wireless network, users with computer equipment compatible with WiFi 802.11b/g will get access to the Internet. Here are the specifications for ICAO's Public wireless network:

Protocol	802.11 b and g
Speed	11 or 54 Mbps
DHCP	yes
ESSID	broadcasted, Intl. Civil Aviation Org. INET
Shared key	yes
Encryption	None
Available	Conference Block, all rooms and open areas
Services Available	Public Internet access

Under normal circumstances, users of Windows 2000 and XP will not have to set any special configuration parameters.
