WELCOME TO THE GLOBAL AIR NAVIGATION PLAN PORTAL

The GANP Portal is a web portal where all aviation stakeholders will be able to find the most relevant information related to the GANP.

THE GLOBAL AIR NAVIGATION PLAN

The Global Air Navigation Plan (Doc 9750) is the ICAO's highest air navigation strategic document and the plan to drive the evolution of the global air navigation system, in line with the Global Air Traffic Management Operational Concept (GATMOC, Doc 9854) and the Manual on Air Traffic Management System Requirements (Doc 9882). It also supports planning for local and regional implementation.

In order to better communicate with technical and high-level managers and to not leave any State or stakeholder behind, a multilayer structure, tailored for the various audiences, is proposed for the sixth edition of the GANP. This multilayer structure of four layers; two global levels, a regional level and a national one, would also provide a framework for alignment of regional, sub-regional and national plans.

Draft GANP 7th Edition addresses:

It will be discussed under Item 30:

Aviation Safety and Air Navigation Policy

- GANP performance framework – safety
- Resilience in the GANP – cyber-resilience
- Linkage between BBB and USOAP
- Minor updates to the ASBU framework

Item 31: Aviation Safety and Air Navigation Standardization

A lot of WPs related to ICNSS, GNSS interference, Surveillance

ICNSS : A hot topic related to CNS!

For example, ICNSS related papers are as follows.

A41-WP/58 TE/5	NEW ICAO STANDARDIZATION INITIATIVES TO IMPROVE THE EFFECTIVENESS OF THE STANDARDS DEVELOPMENT PROCESS – THE INTEGRATED COMMUNICATIONS, NAVIGATION, SURVEILLANCE AND SPECTRUM (ICNSS) PROJECT	Secretariat Paper
A41-WP/84 TE/13	A ROADMAP FOR INTEGRATED CNS AND SPECTRUM (ICNSS)	
A41-WP/108 TE/28	CHALLENGES IN IMPLEMENTATION OF NEW INTEGRATED CNS/ATM PROJECT	

Also, some ICNSS-relevant WPs will be discussed under Agenda item 23 as well.

ICNSS & SARPS Streamline Project

The Project

INTEGRATED CNS and Spectrum Task Force

ICNSS roadmap Task

Develop ICNSS roadmap on flexible and continuing technical evolution

CNSS Standards Task

Define Performance Standards vs Technical Specifications

SECRETARIAT PROJECT TEAM

Define intra-organizational framework to support development/validation of International Industry Standards

End goal

ICNSS roadmap

(TBD Minimal Essential) SARPs framework

Global Technical Specification framework

Item 31: Aviation Safety and Air Navigation Standardization and Item 23: Innovation in Aviation

The Assembly WP: ICNSS

A41-WP/58 TE/5 explains the progress made by the Integrated CNS and Spectrum Task Force.

The Roadmap task is almost complete:

Socialization, Review and Feedback now in progress

*Air Navigation
Commission has
been briefed*

*(Much) Work
needed on CNS
Standards Task
Only at the concept stage*

Action: The Assembly is invited to:

- note the progress made by ICAO to date, related to the ICNSS project;
- encourage States, Int Orgs and industry to **support the continued development and implementation of a medium to long-term roadmap for the evolution of ICNSS and a new streamlined framework for CNS and frequency spectrum standardization;** and
- task ICAO to continue to **develop and finalize a new streamlined framework for CNS and frequency spectrum standardization.**

Item 31: Aviation Safety and Air Navigation Standardization

A lot of WPs related to ICNSS, GNSS interference, Surveillance

GNSS: A hot topic related to CNS!

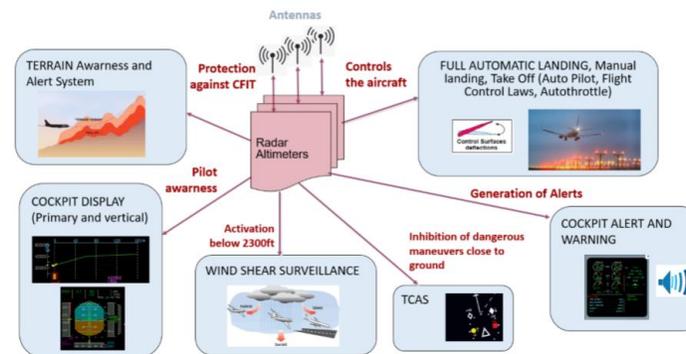

For example, GNSS-related WPs are as follows.
