# 1. Overview

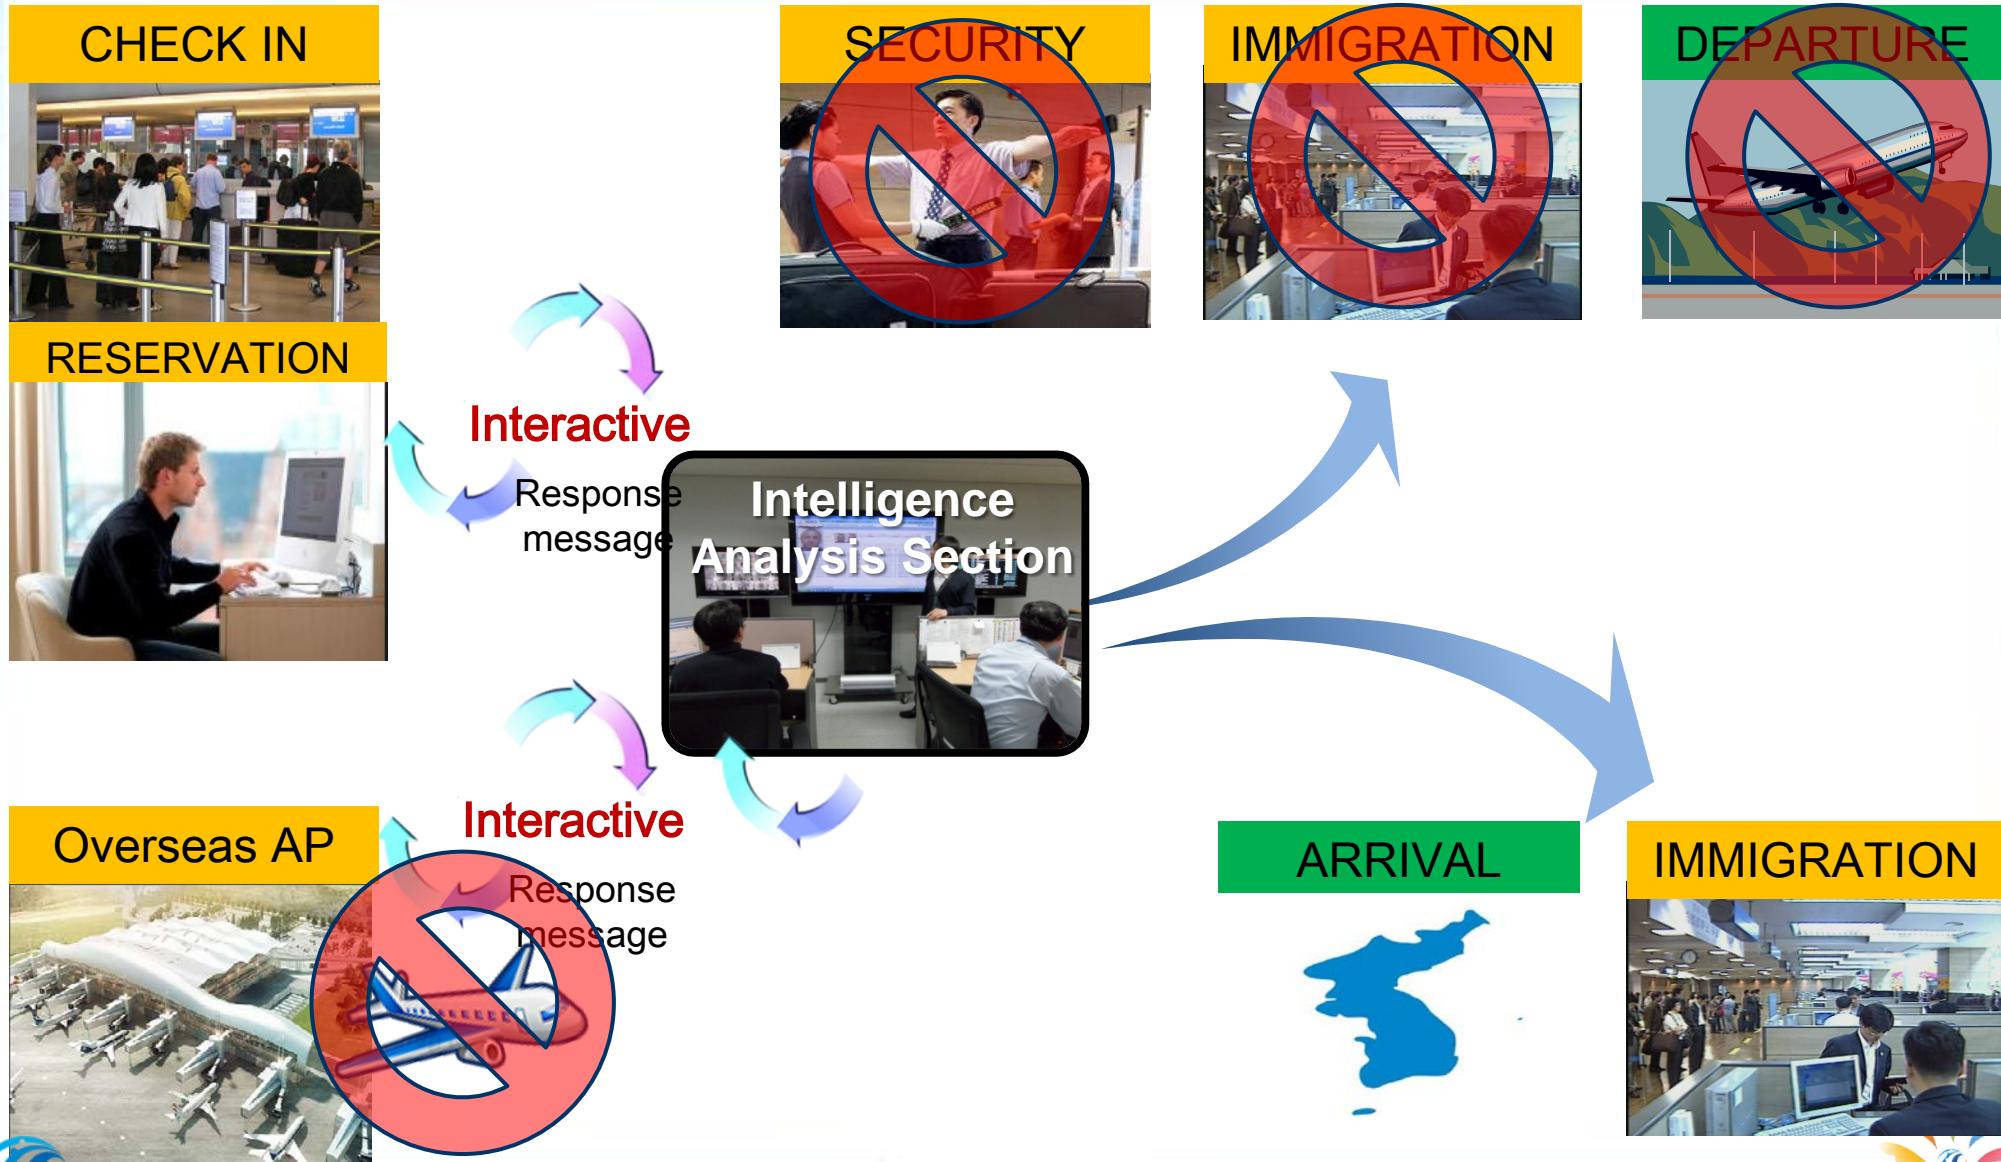

### The Goals : Safety and Facilitation

## Effective Border Management

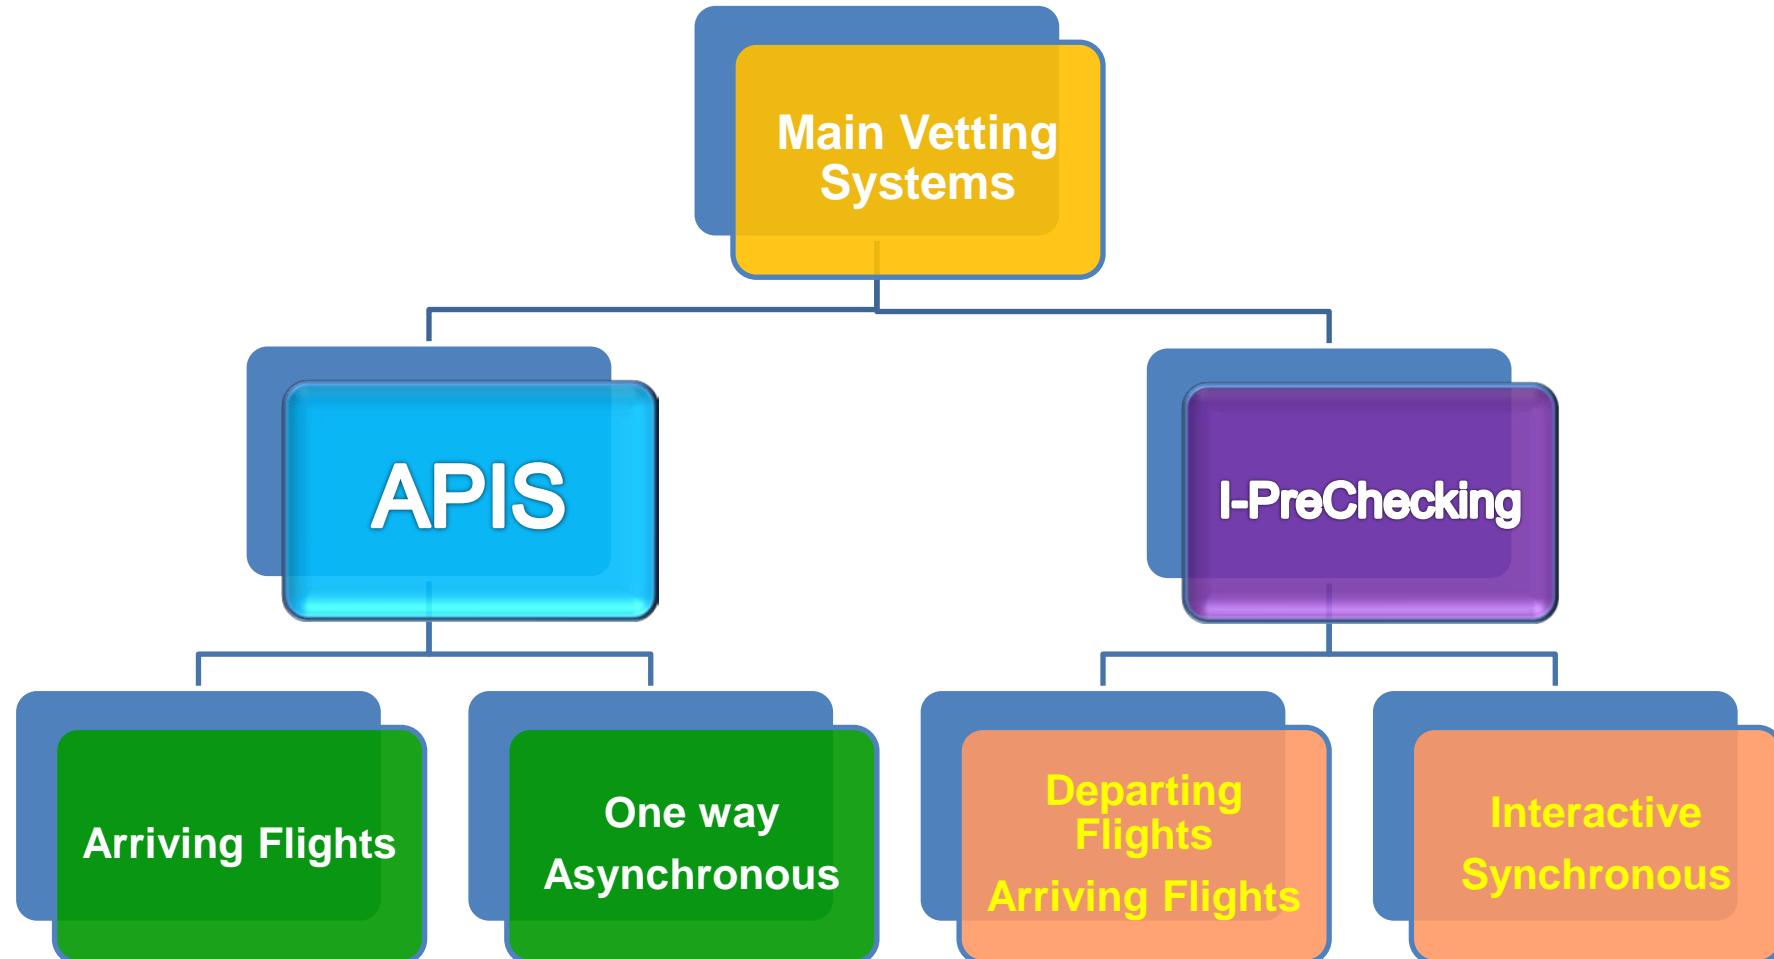

## 2. Flow Chart

# 3. Border Control System

## 1. Overview

### Main Vetting System

# 4. Border Control System

## 1. Overview

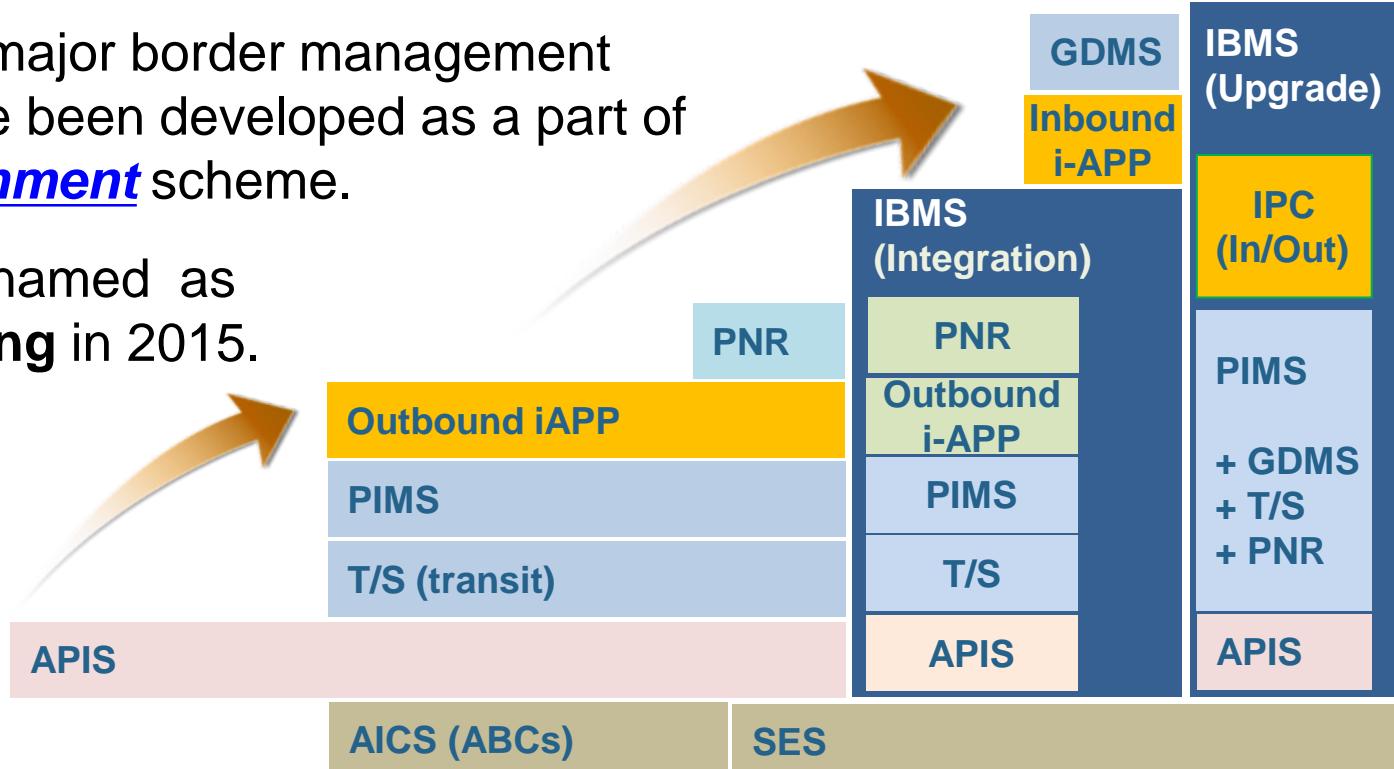

### Introduction of Major Border Control System

Since 2004, major border management systems have been developed as a part of the **e-Government** scheme.

iAPP was renamed as **i-PreChecking** in 2015.

ICRM (Immigration Clearance System)

2000 ... 2004 2005 2006 2007 2008 2009 2010 2011 2012 2013 2014 2015 2016 2017

## 2. i-PreChecking

# 1. Background

## 2. i-PreChecking

### ● Increase of Need for Safety

### A Lack of Consistent Screening

Despite the existence of this strong police tool, criminals are still able to use stolen and altered travel documents to cross international borders. This fact was brought to the world's attention when on March 8, 2014, Malaysia Airlines flight 370 disappeared. It quickly came to light that two Iranian nationals had been allowed to board the flight and leave Kuala Lumpur for Beijing using falsified passports that were registered in INTERPOL's SLTD database by Austria and Italy.<sup>5</sup>

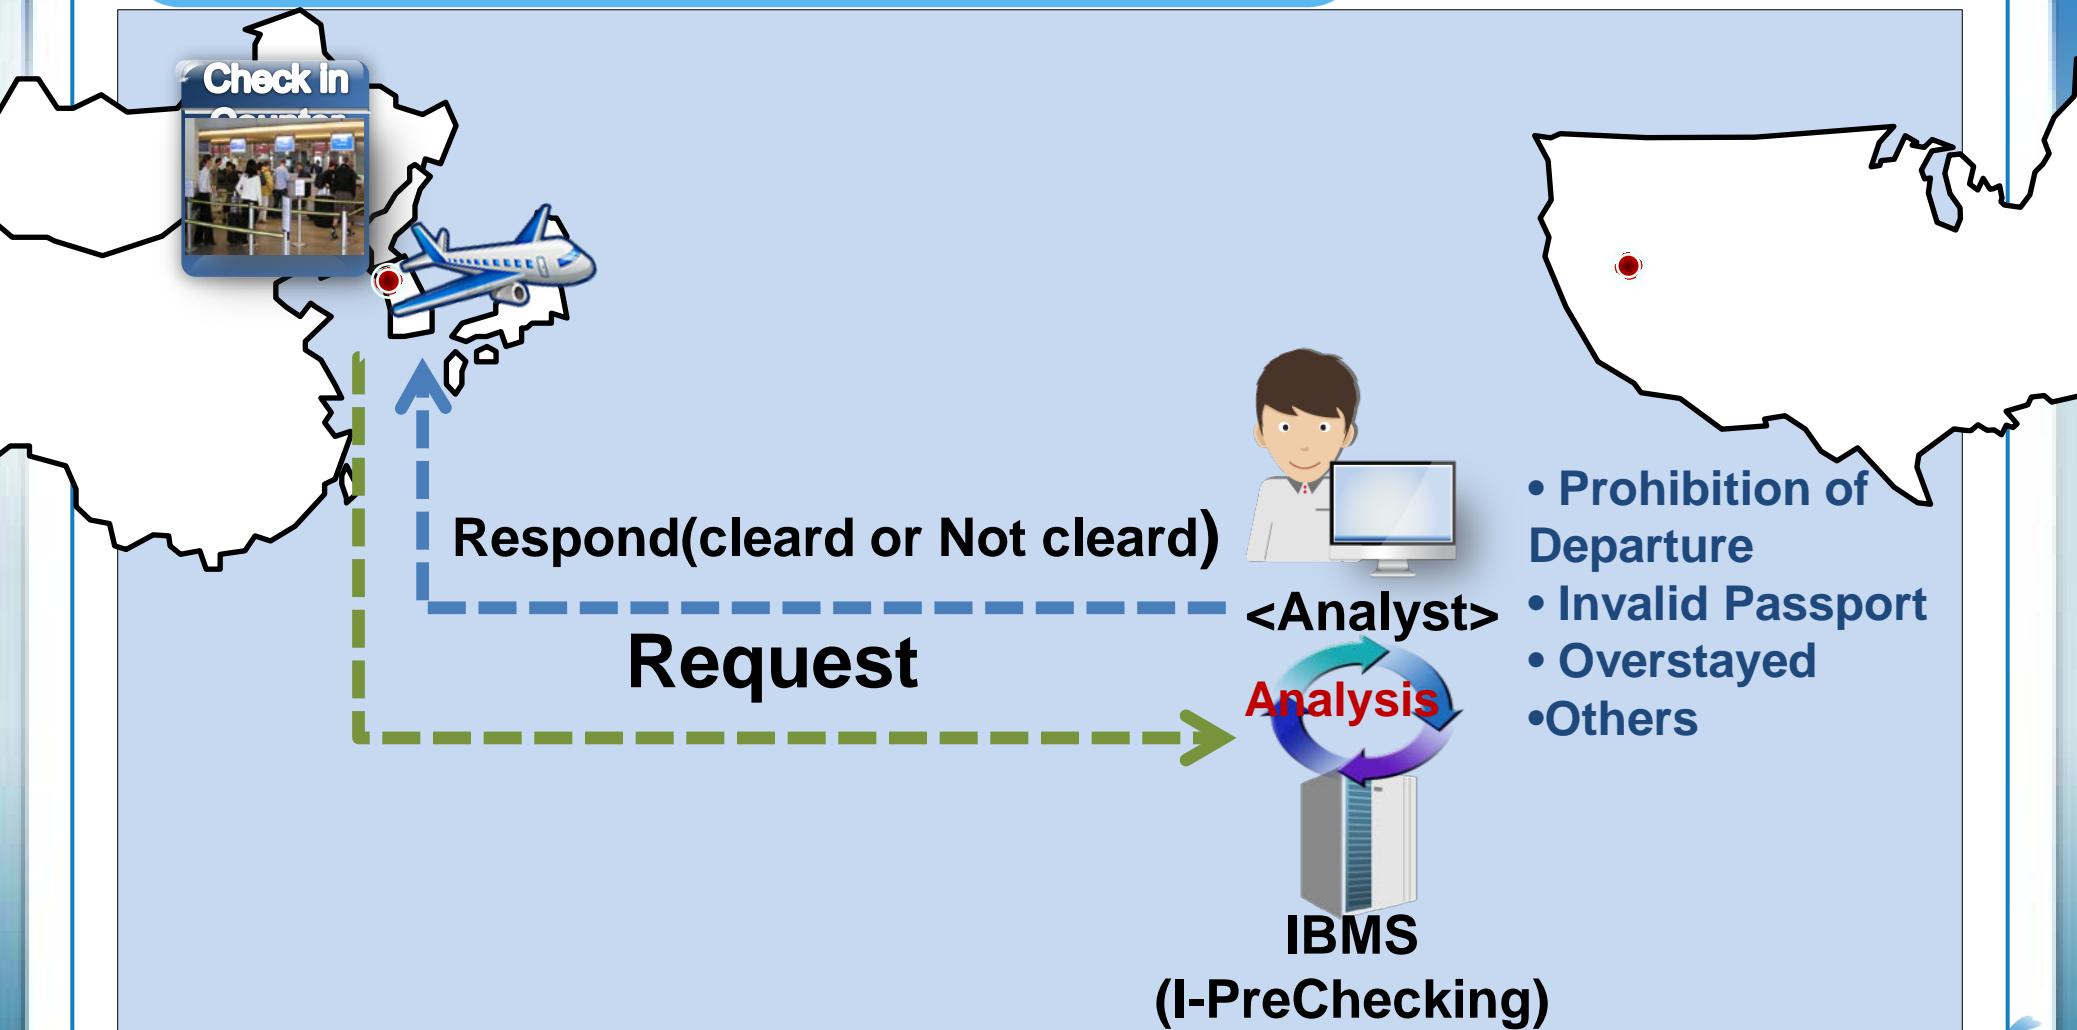

These individuals were not properly screened by authorities, which raises a number of disturbing questions. How could this be allowed to happen? And how often do crimes like this occur? If the flight had landed safely, the authorities may never have recognized those individuals as carriers of stolen passports. How often are unscreened individuals travelling on commercial airlines using fraudulent travel documents without law enforcement ever knowing?

## 2. i-PreChecking System

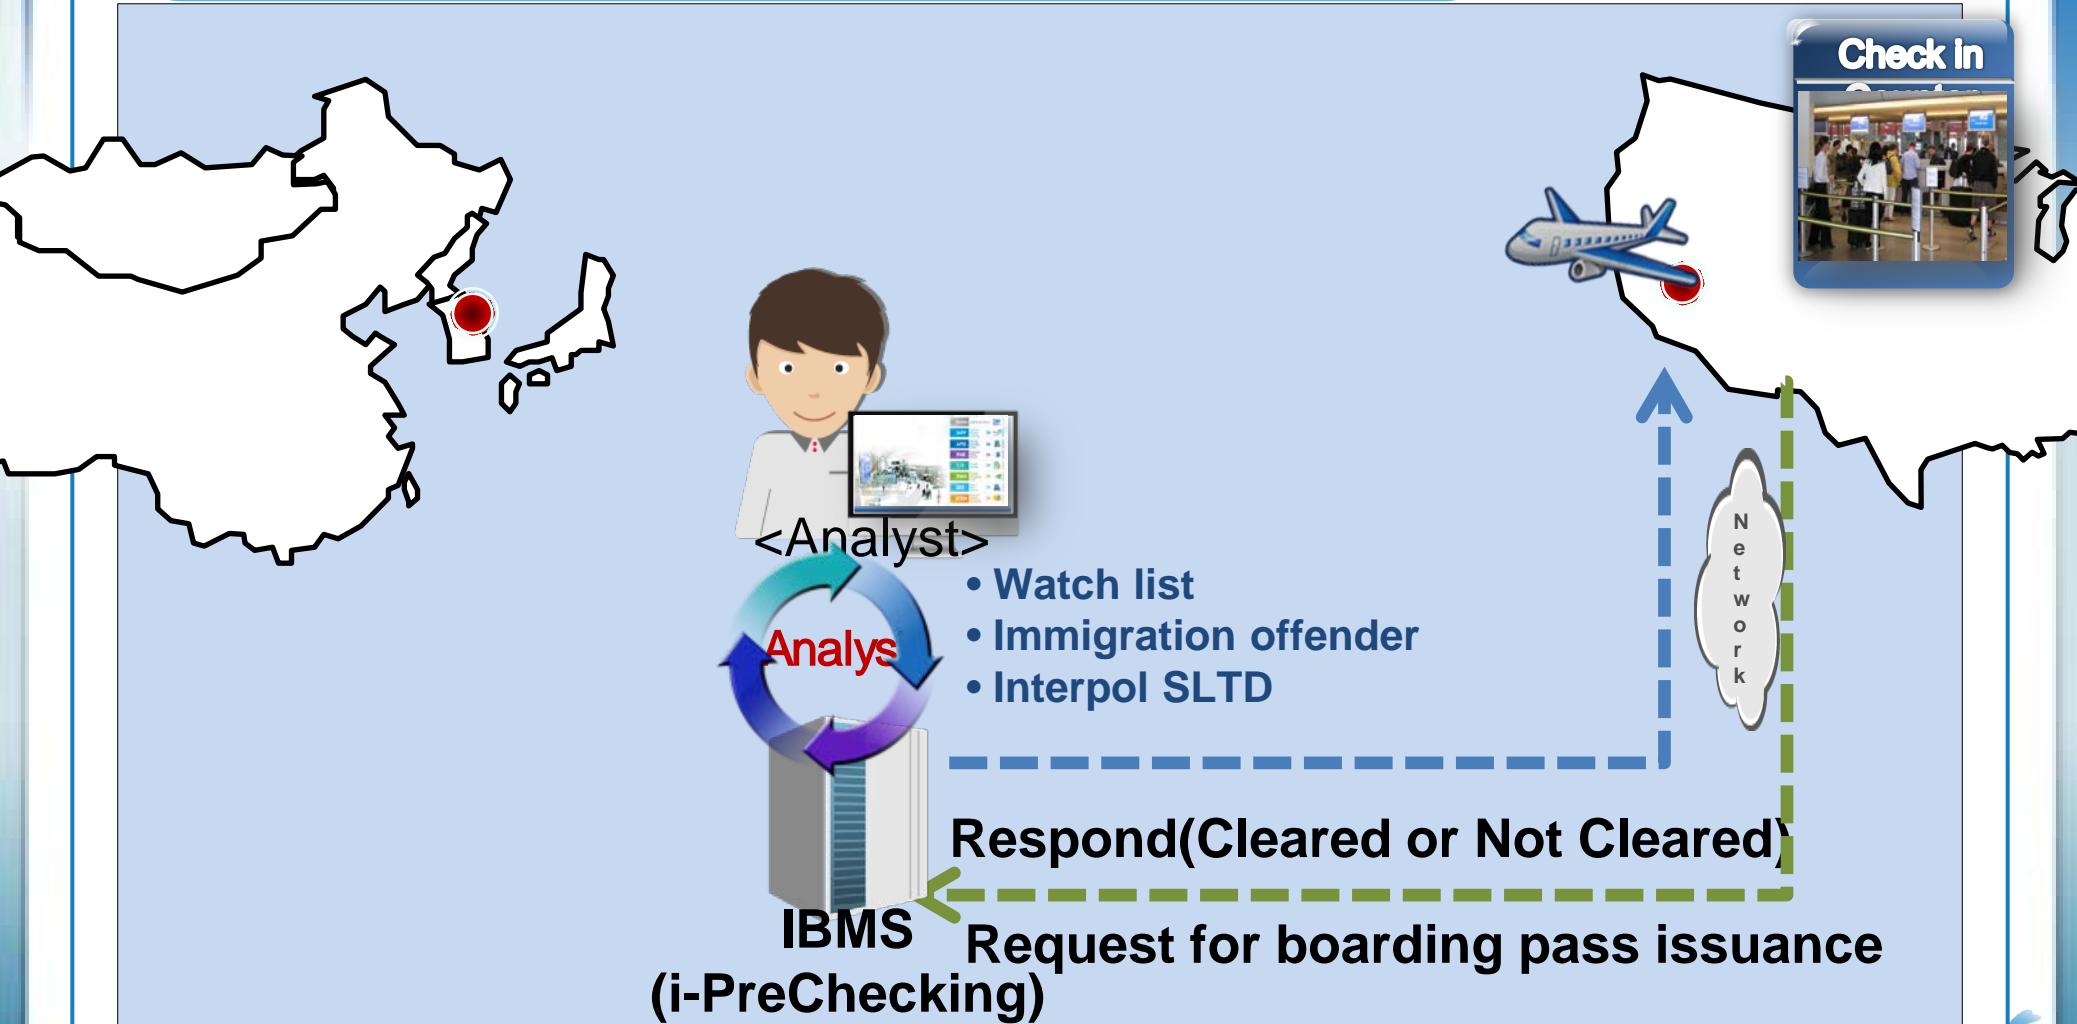

### 2. i-PreChecking

#### Outbound i-PreChecking (IPC)

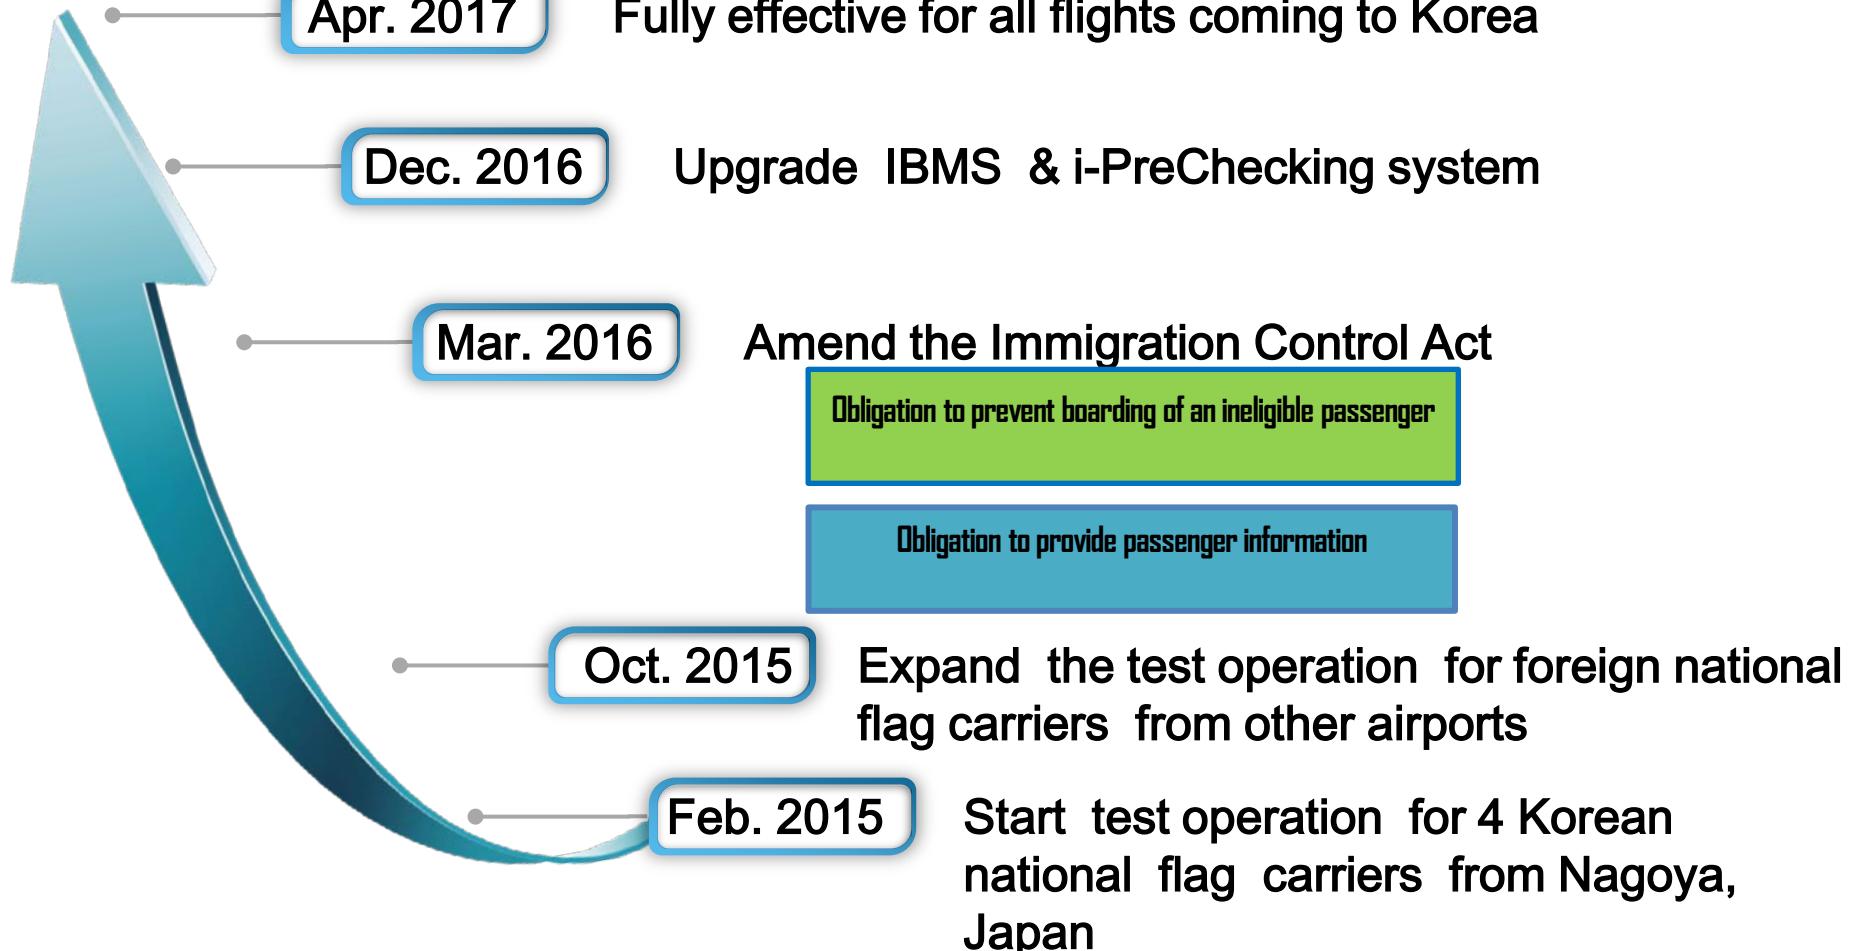

# Overview of vetting system(i-PreChecking)

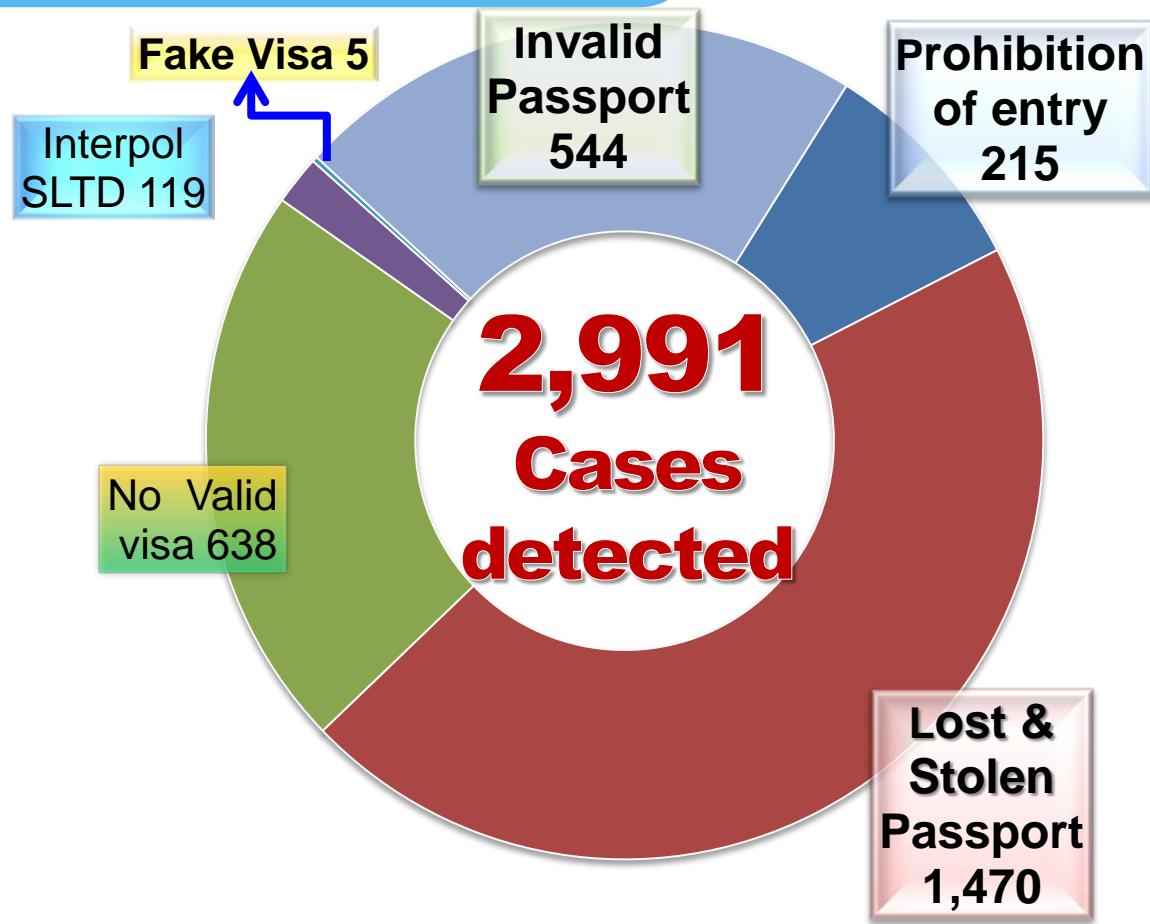

## Inbound i-PreChecking Process

### operation history

### Outcome of the i-PreChecking(in-bound)

### Daily Analysis

- 98,000 Passengers
- 570 Flights

### • The Merits of Implementation

- Enhancing the safety of flights, passengers and the country
- Expediting entry processing of legitimate passengers
- Reducing airlines' cost in repatriation and shortening check-in process time
- Blocking illegal attempts of high risk passengers by using Korea-bound flight
- Analyzing '**NOT TO BOARD**' cases for screening travel patterns of high risk passengers

Interpol SLTD

## 4. Challenge & Future tasks

# 1. Insufficient information

## Lack of Information

### Source of Overseas Information

Intelligence Agency

Information

Interpol

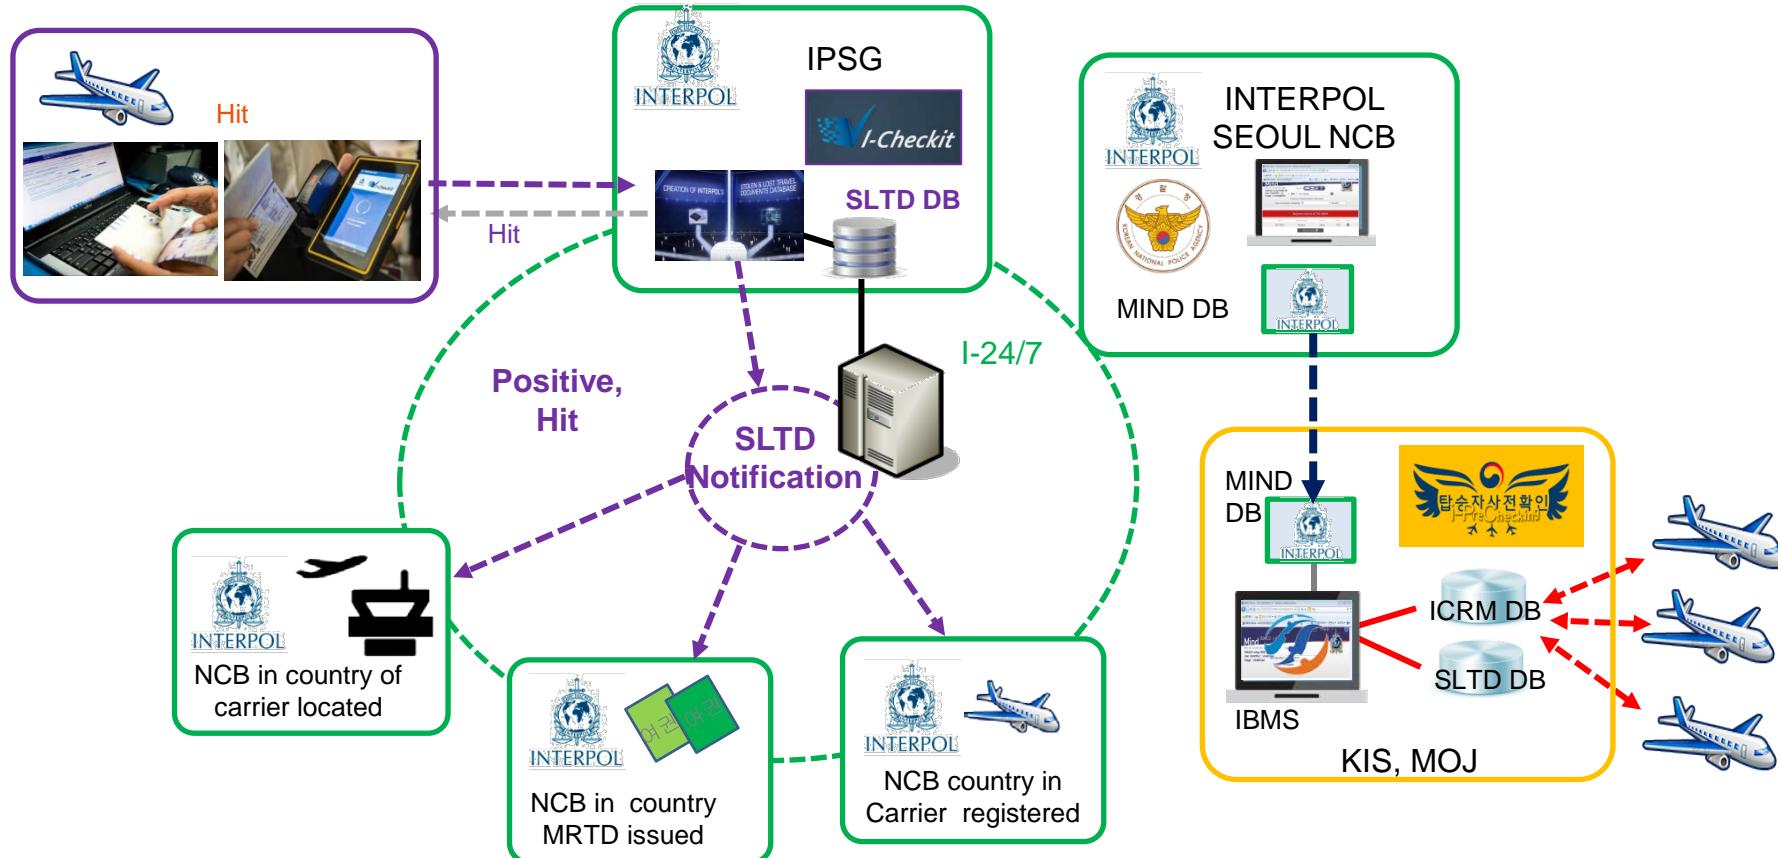

- Lack of sufficient information
- Enhancement of privacy act  
Exchange of information is impossible without legal grounds
- Information discrepancy

## 2. Interpol SLTD

### Cooperation with INTERPOL (AS-IS)

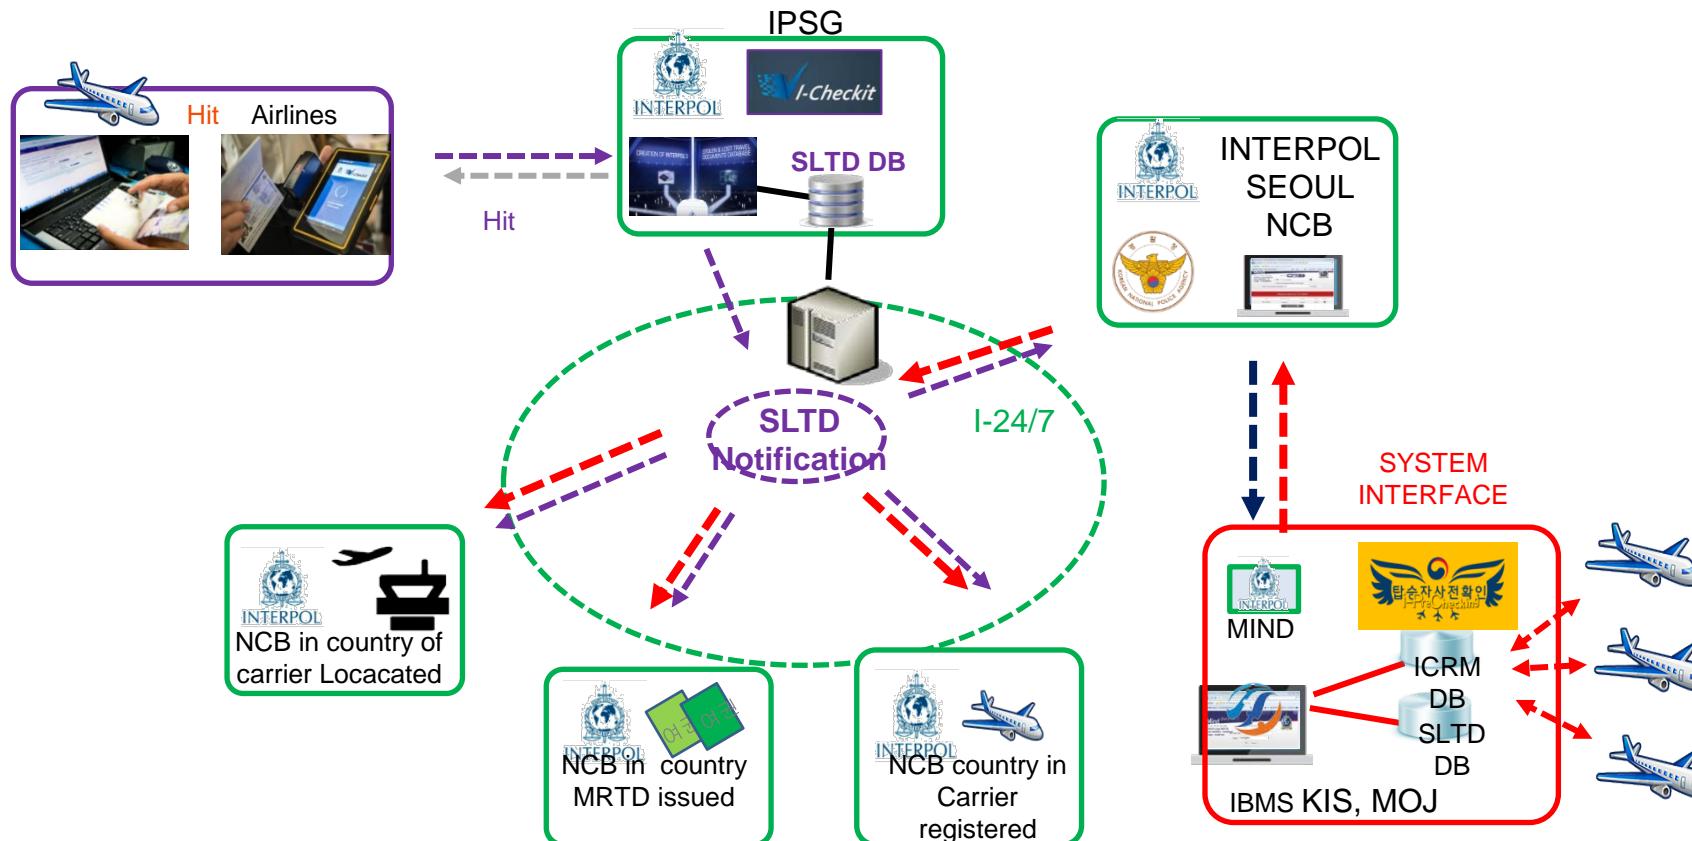

Lack of information sharing between Interpol and related agencies of other countries

# 3. Future Task

## Cooperation with INTERPOL (TO-BE)

Pushing ahead with system link able to share interpol SLTD information among Related national agencies including interpol

# Thank You
