Mr. Christopher Hornek is an expert technical consultant with more than 15 years of border control, travel document and identity management experience working for the International Civil Aviation Organization (ICAO), International Air Transport Association (IATA), Organization for Security and Co-operation in Europe (OSCE) and International Organization for Migration (IOM). Currently he is ICAO's Passenger Data Exchange Expert and Project Manager for Developing a Doc 9303 Compliance Programme. At IATA Mr. Hornek worked on promoting cooperation between States and Airlines on a broad range of Facilitation issues and was also the Secretary of the IATA/Control Authorities Working Group (CAWG). From 2003-2015 Mr. Hornek worked for the OSCE, where he led the Organization's efforts to promote Travel Document Security in OSCE participating States.

Mr. Hornek initiated the OSCE Ministerial Council decisions on the ICAO Public Key Directory (PKD) (MC.DEC/11/09) and Advance Passenger Information (API) (MC.DEC/6/16). Mr. Hornek served as the Project Co-ordinator of the OSCE mission in Turkmenistan and has accumulated extensive experience advising States around the world on travel document security issues. He is an active contributor to various expert groups such as the ICAO Facilitation Panel, ICAO Technical Advisory Group (TAG)/Traveller Identification Programme (TRIP), as well as its New Technologies Working Group (NTWG). Furthermore, he regularly contributes to expert publications and is invited as a guest speaker at international fora.

Mr. Hornek holds a Bachelor of Arts in modern European history from Santa Clara University (U.S.A.) and a Master of International Relations from the Diplomatic Academy/University of Vienna (Austria).
