

ICAO

2023  
ICAO **TRIP**  
SYMPOSIUM

MONTREAL, CANADA | 12 - 14 SEPT 2023

---

# Mika Hansson

Finland/National Police Board

Mika.Hansson@poliisi.fi

# Overview

---

01 DTC

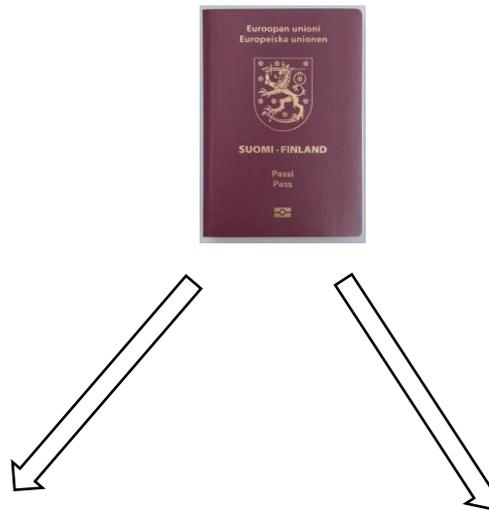

02 DTC in EU

03 FIN & HRV Pilot

04 FIN Pilot

# 01 DTC

Different types

**Type 1**

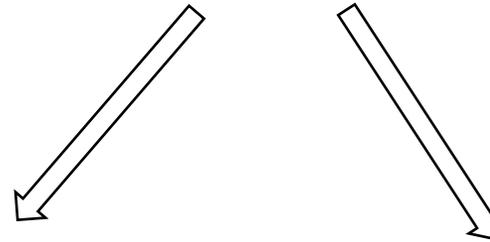

**Type 2**

**Type 3**

01  
Focus on  
type 1

**Type 1**

**Type 2**

**Type 3**

## 02 DTC in EU

- DTC specifications
  - ICAO
    - ICAO NTWG
- EU legislation
  - Travel Facilitation Group
    - Pilots
      - FIN & HRV
      - NLD & CAN
  - Focus on DTC type 1

## 02 DTC in EU

### Why type 1

- Specifications are ready
- Technology is ready for use
- Passport booklet acts as a backup system
- Facilitation of travel, for example to airport functions, is already possible with type 1 DTC

## 03 FIN & HRV Pilot

- Finland and Croatia have a joint project on EU funding
- Both countries have their own implementations
  - This will provide a richer set of data for EU lawmaking.
- The pilot is likely to run until the end of February 2024.

**Co-funded by  
the European Union**

Participating  
Organisations

Co-funded by  
the European Union

Border Guard Headquarters  
main responsibility of the project  
responsible of EU funding

National Police board  
experts of eMRTDs and DTC

Eastern Uusimaa Police Department  
registration process

Helsinki Police Department  
Defect Management

Finnish Immigration Service  
digital residence permit

Finnair

Finavia

04

FIN

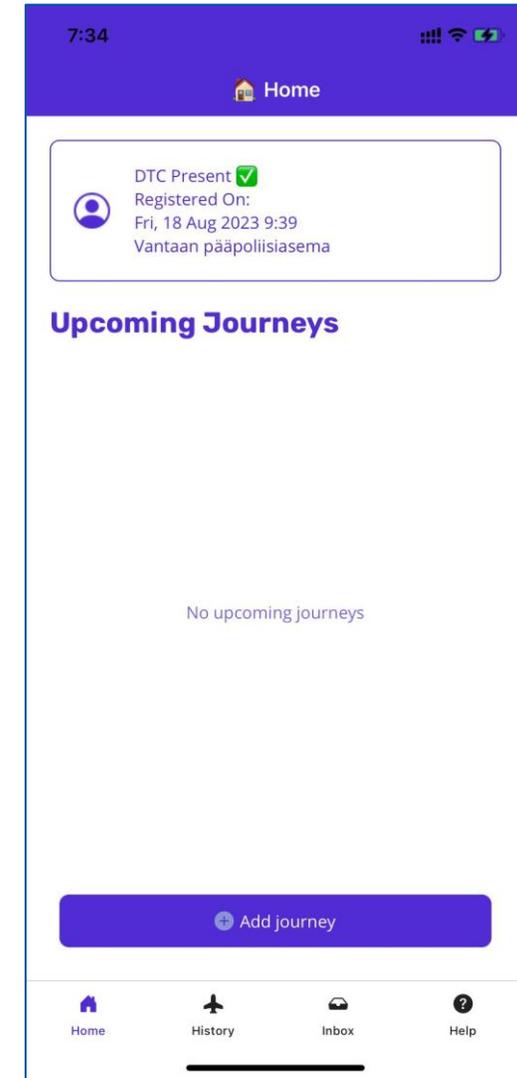

Principles

- No integration to the current BGC-system
- Use of manual lines (entry/exit)
- Need to pilot something for future use but still fulfil current EU and national legislation
  - Secure registration process (live registration)

# 04 FIN Registration

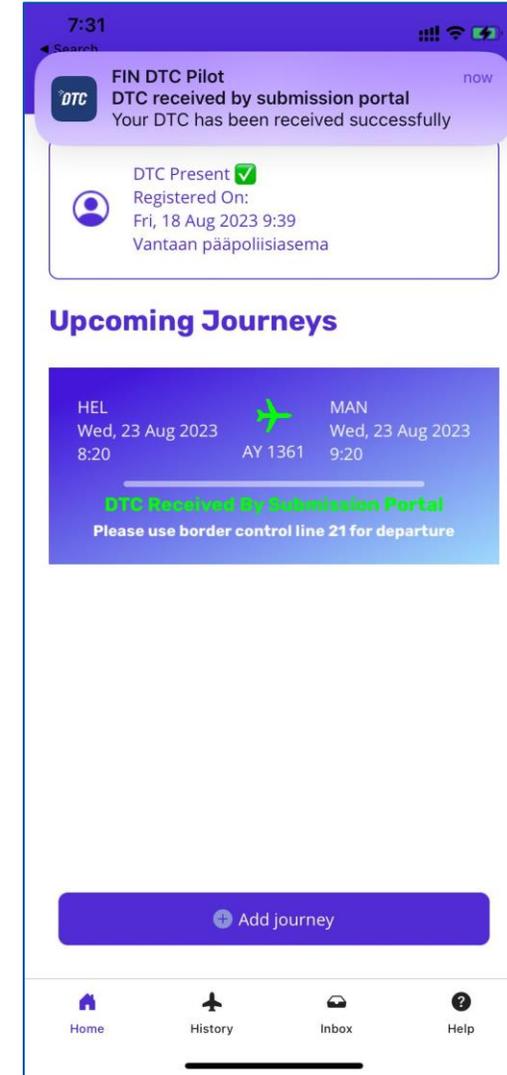

- Identification
- Chip validation
- Live photo
  - DTC v.1.5
- Creation of DTC on mobile device
- DTC is stored encrypted on the pilot person's phone

# 04 FIN

## Before the Trip

- Submission of DTC from the app 4-36 hours before departing or arriving flight at Helsinki Airport together with the flight information
- Pre-screening of pilot person

## 04 FIN

### At the Border

Hold your passport over the reader and look into the camera.

- No need to open the passport booklet

## 04 FIN

### Inspection System Process

- Take a photo
- Search for the correct DTC based on the photo
- DTC data is used to have access to the passport chip
- No further data is read, only the Chip Authentication protocol is performed
- The port is opened

### Border Control

Stop, Tap and Go

06

FIN

## Conclusions

- DTC type 1 specifications have been proven in practice to be well suited for border control.
- It is possible to have a secure and fast border control at the same time using DTC.
- The pilot has only just started. Statistical analysis will be available as the project progresses and more passengers are involved in the pilot.

FIN

Flaunting

The first real flight, preceded by the use of DTC for border control, departed from Helsinki Airport to London on 1 September 2023.

To our knowledge, this was the first time in the world that DTC was actually used for border control!

# Thank You
