

Mr. Kester Meijer

Director Operational Integrity, Compliance & Safety – KLM

In my job at KLM Cargo and in Industry, I enjoy working at building international relations with relevant stakeholders. I am active in various industry groups like WCO-ICAO JWGACI, IATA, TIACA, Cargo iQ.

My goal is to shape global concepts - where industry and regulators work together – and enable safe, secure and effective air cargo supply chains. Utilizing my unique and extensive Cargo and ICT knowledge and experience in the industry, I try to find paths that lead to the most value for our industry and then drive the team to get things done. I have driven programs that elevate new ways of working into becoming industry standards. My motto is: Keep the cargo moving, always safe and secure! I strongly believe that our industry is in the era of a paradigm shift, where data will become equally important as the shipment. My career at KLM consists of 11 years in corporate ICT and 16 years in Cargo.
