ICAO SEMINAR ON
ALTERNATIVE FUELS 2017

ICAO Headquarters, Montréal, 8-9 February 2017

Roundtable CWR Questions

- 1) Airport role – support for airport to fund infrastructure (e.g., blending capacity) and other potential actions?
- 2) Subsidy parity – ensure that sustainable alternative jet fuels have at least same level of financial support as fossil-based fuel?
- 3) Value non-energy attributes - recognize and quantify sustainable jet fuel benefits that include economic development, air quality, climate stewardship and price volatility reduction?

Transforming global energy use to create a clean, prosperous, and secure low-carbon future.
