

Saheed Sulaman
Director, Air Transport Management
Guyana Civil Aviation Authority

Mr. Saheed Sulaman is the Director, Air Transport Management with the Guyana Civil Aviation Authority. The scope of his responsibility entails economic regulation of air operators and airports; statistical analysis and forecasting; environmental affairs (implementation of State CO2 Action Plan and CORSIA); consumer affairs and negotiation of air services agreements. He also advises on policies relating to air transport development activities.

His previous employment includes Part-time lecturing and full-time as a Statistician in the National Accounts Department of the Guyana Bureau of Statistics with responsibility for computation of the Gross Domestic Product.

He is an economist by training, having completed his undergraduate degree in Economics from the University of Guyana. In 2013 he completed a MSc. Degree in Project Management from the University of West Indies. He also holds a Diploma in Civil Aviation Management from the Singapore Aviation Academy. In addition, he participated in numerous ICAO workshops, trainings, seminars, meetings and symposia on air transportation.

He has worked on several studies including the Connecting Guyana: Hinterland Aerodromes Study; The Impact of Aviation on Guyana's Economy.

Mr. Sulaman, is an air transport specialist who has been instrumental in the air transportation activities and programmes within the Caribbean Community (CARICOM).

He currently serves on the Advisory Council for the Transport and Harbours Department.
