REPUBLIC OF ZIMBABWE

REPUBLIC OF ZIMBABWE

Zimbabwe Population Registration System

The purpose of the system is to have a secured system while paying special attention to improving service to the public.

The system is tailor made for the Department to support functions as per the different Acts of parliament administered by the Department.

REPUBLIC OF ZIMBABWE
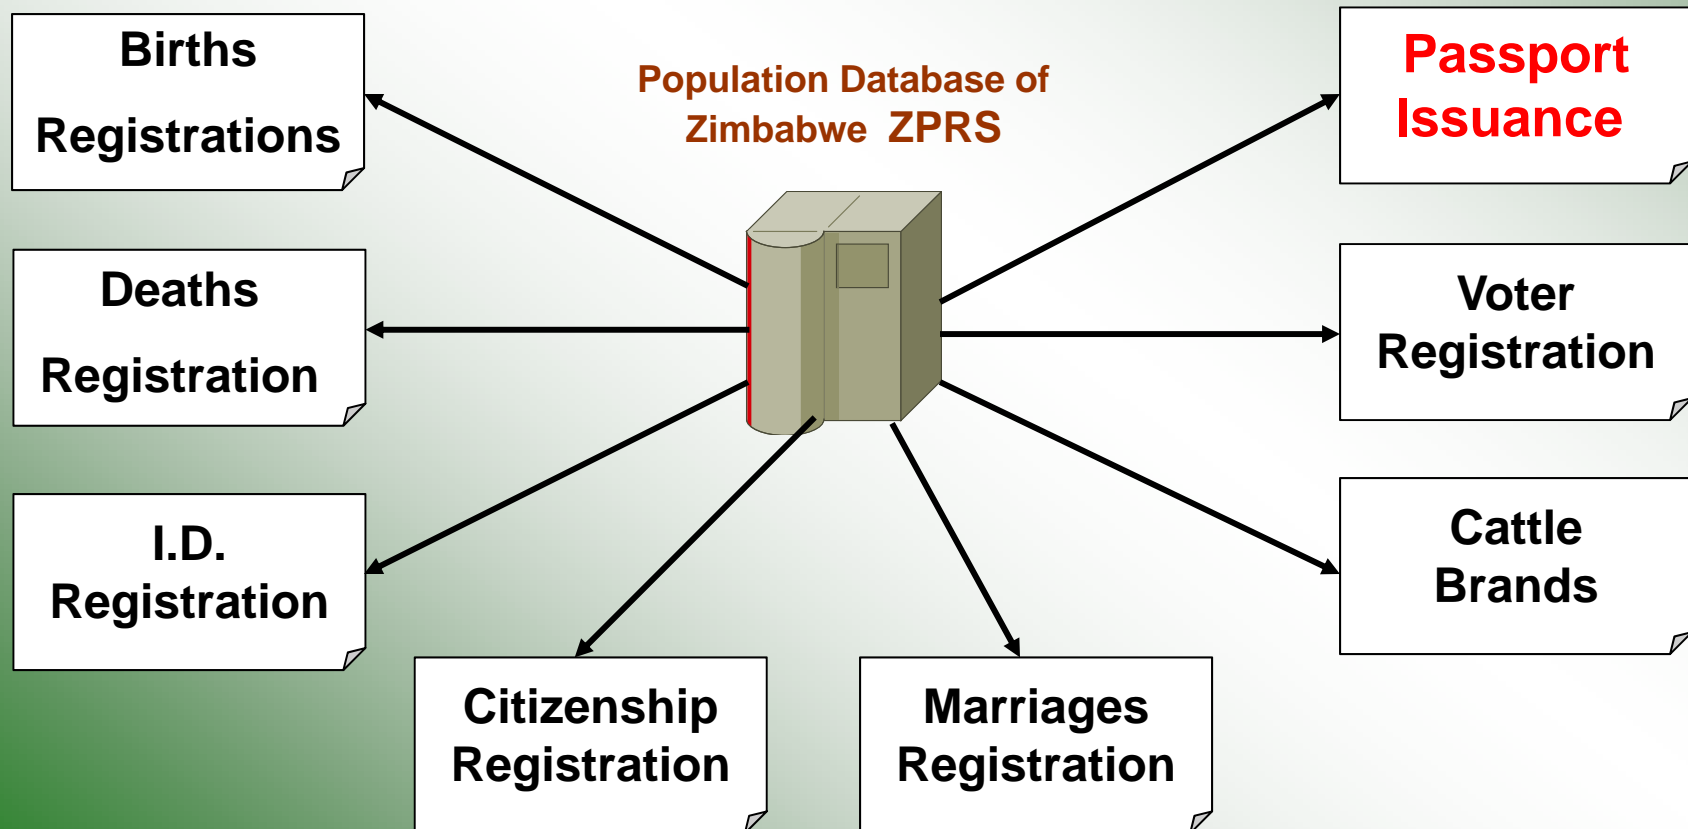

Zimbabwe Population Registration System

The Database contains all essential demographic personal data which is shared by all functional users. The system also has full application software for managing all sub-systems in the database.

It is a real time on-line system.

When registrations are processed at Provincial and District Offices, be they passports, births and Deaths or I.Ds. system users will be retrieving data and making changes to the database instantly.

Tightening the Security Procedures

- The documents issued by the Registrar General's Department now have many tight security features that make it impossible to forge. This is the key issue in our solution.

REPUBLIC OF ZIMBABWE

Application submission Stage

- Verification of documents.

- Payment

- Data entry & visual identification & uplifting fingure prints and signature.

- Data verification/authorisation.

REPUBLIC OF ZIMBABWE

Passport Production

- **The Passport Production Centre is located in a security area.**

- **Entry into premises strictly controlled.**

- **Production system has audit trail which keeps track of each passport booklet.**

REPUBLIC OF ZIMBABWE

Storage: The passport booklets are then kept in an air conditioned strong room and access to the storage room is by two supervisors with different keys which makes it impossible for one person to gain entry.
