Government Solutions

**Why Document Quality is Essential**  
All the security you need for your passports

Dr. Bernhard Deufel  
Business Advisor Passports Systems

Giesecke & Devrient  
Creating Confidence.

# Business Units and Divisions

## Banknote

### Paper

- For banknotes
- Security paper/foils
- Plant engineering

### Printing

- Banknotes
- Printing plant services

### Processing

- Banknote processing systems and identification modules
- Security features and sensor technology
- Services and technical support

## Mobile Security

### Secure Devices

- Cards, tokens, and embedded software
- Personalization and data management

### Server Software and Services

- Over-the-air management
- Trusted service management

### Applications

- Electronic payment transactions
- Secure mobile communications
- Ticketing and transit
- Authentication

## Government Solutions

### Security solutions for governments and their agencies

- ID documents
- Passports
- Healthcare cards
- Security printing
- Product and brand protection
- IT security

# Government Solutions offering

## Document lifecycle systems

- Data capturing / enrolment systems
- Personalization system
- Verification systems
- Border control systems - eGates
- PKI systems
- Secure Voice

## Security printing

- Securities
- Customs and tax documents
- Security labels and seals
- Security features
- Track and trace technology (Brand Protection)

## ID

- National ID cards
- Drivers licenses
- Tachograph calibration cards

## Passport

- Passports
- E-Passports
- Border control systems
- Visa labels

## Health

- E-Health cards
- Health professional cards

# The Identity Threat

## ■ Counterfeit

- falsifying the whole document
- replacement of the complete bio-data page
- replacement of the electronic component

## ■ Forgery

- photo substitutions (lifting of the laminate, transparent foil in case of plastic)
- intentional damage of the electronic component

## ■ Impostor

- illegal use of the documents of another person = look-alike fraud

## ■ Falsely obtained documents

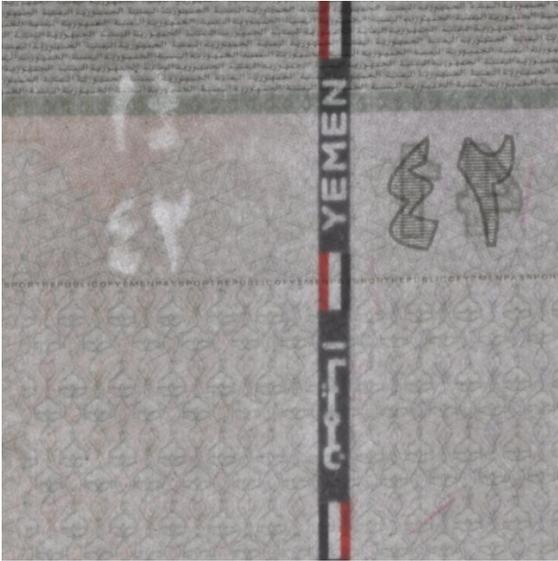

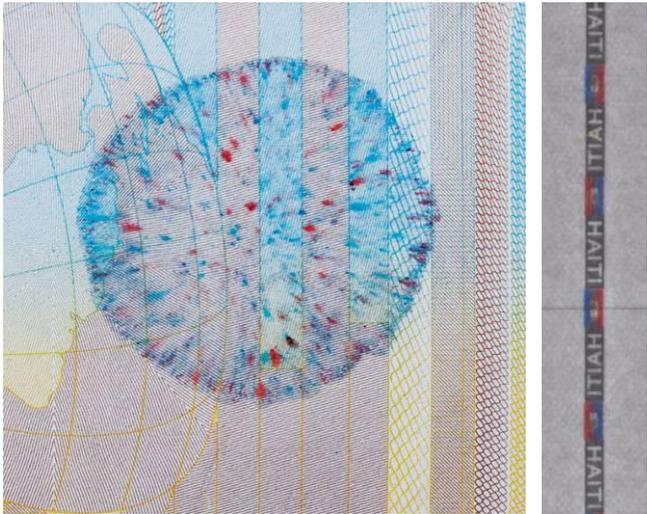

- by using forged birth certificates
- double applications

## ■ Stolen blank documents

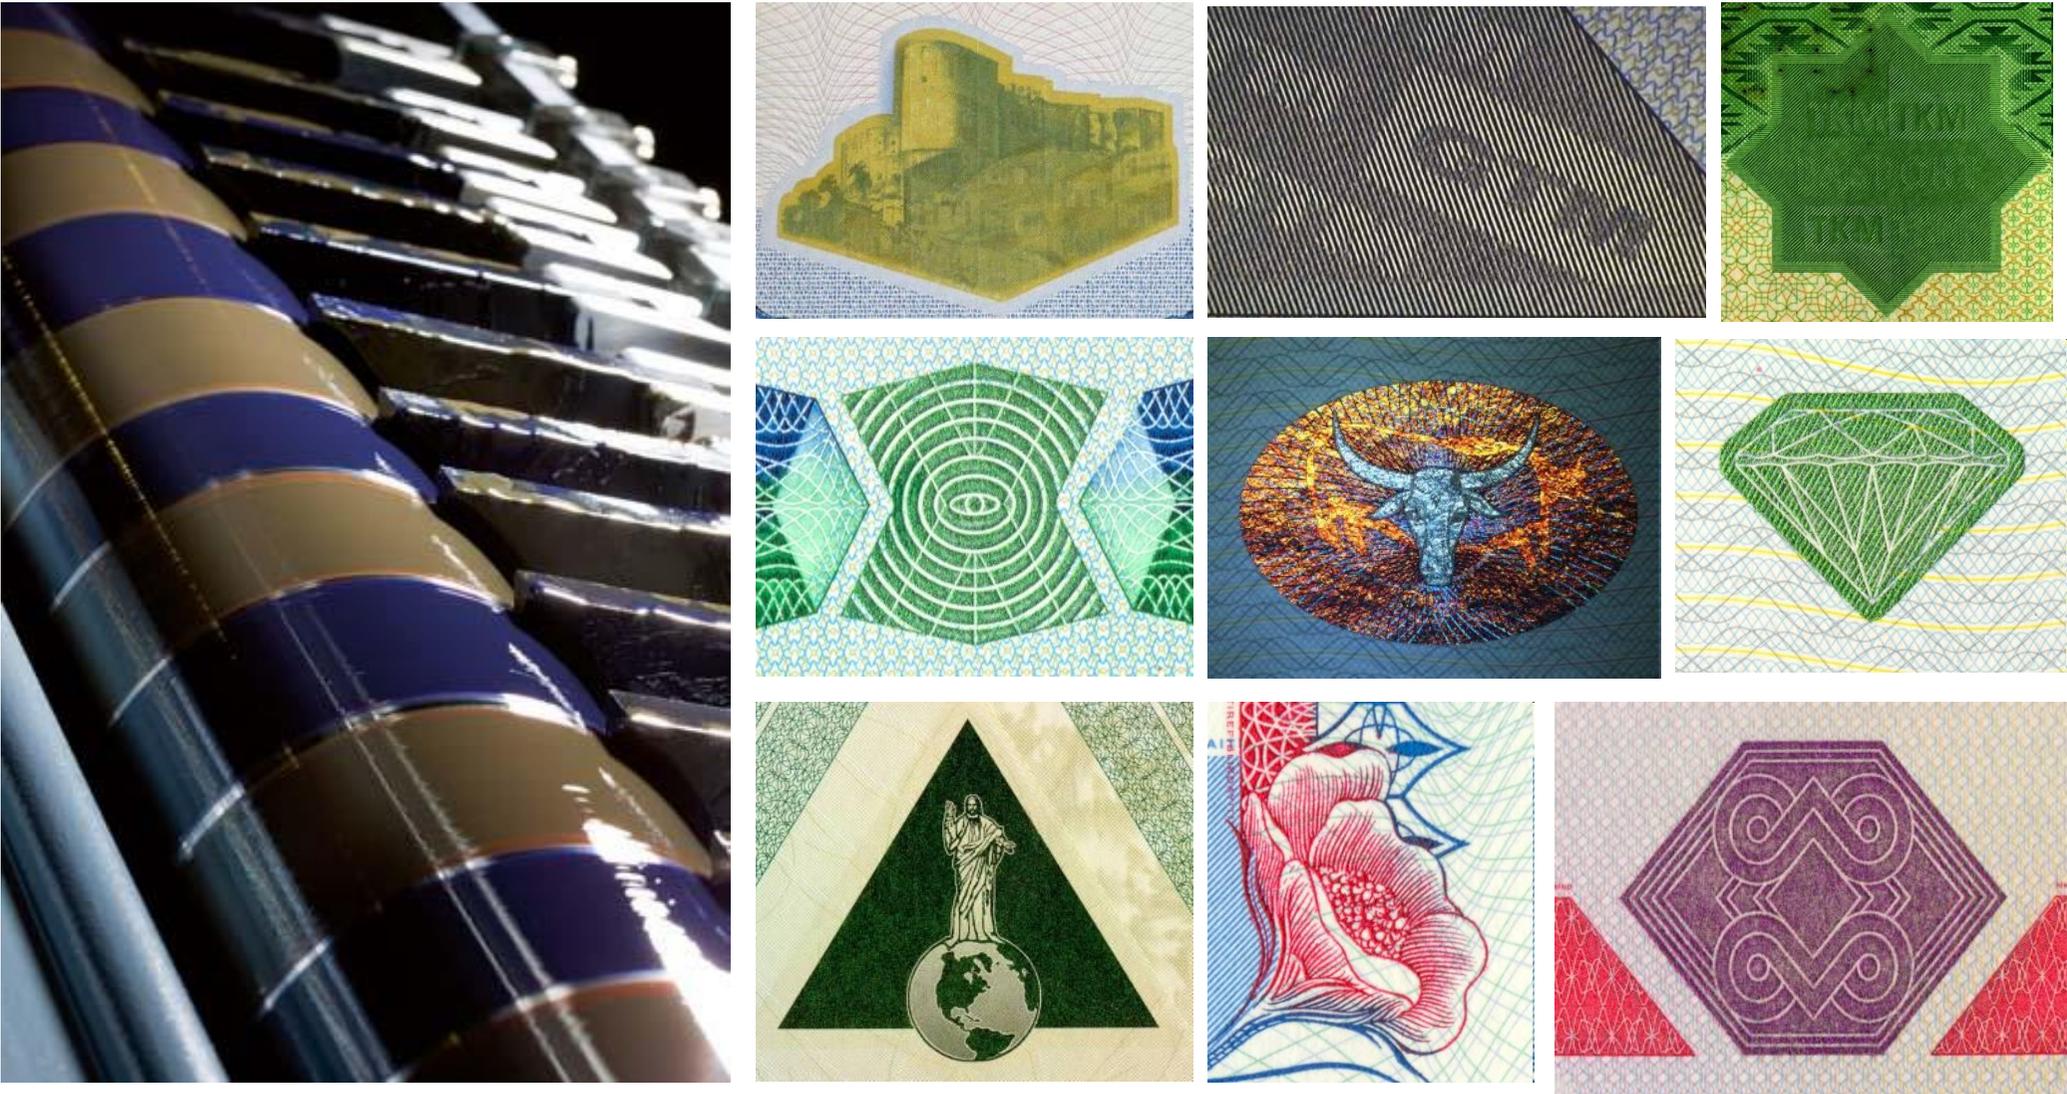

- Exploiting security holes in the handling process

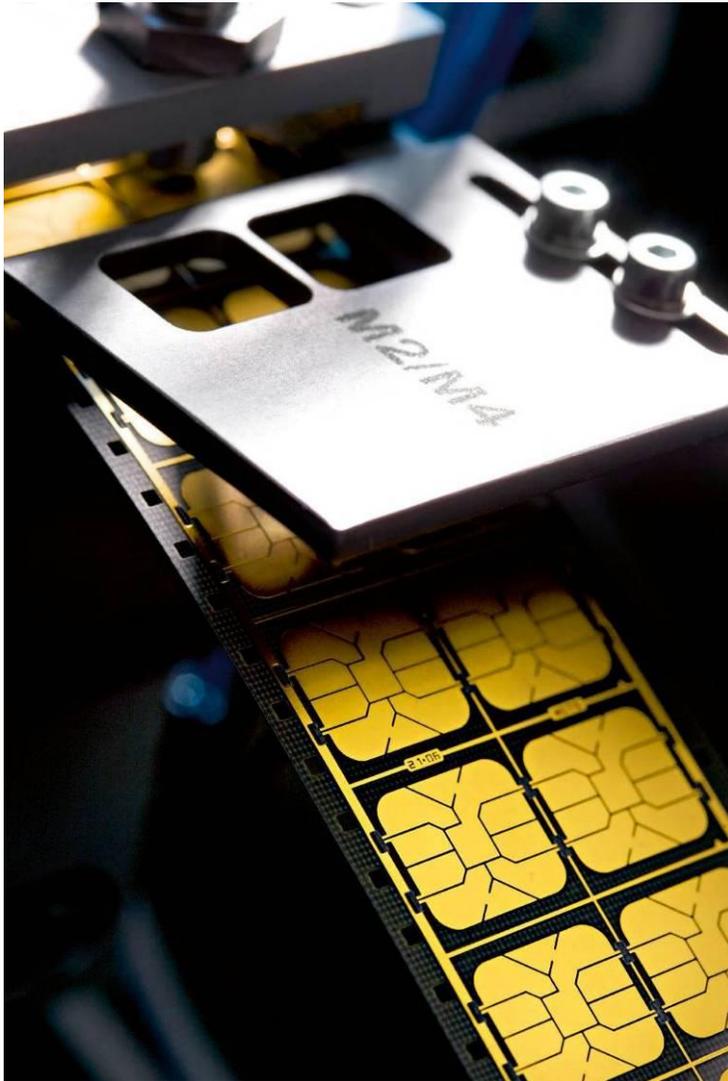

# Performance of the security paper

# Performance of printed security features

# Performance of the electronic component

## G&D's STARCOS® OS:

- Fully certified (security, conformity & durability)
- Available in inlays, eCovers, plastic data pages
- One of the fastest e-passport OS on the market
- Supporting
  - Basic Access Control BAC
  - Active Authentication AA
  - Extended Access Control EAC v1.11
  - PACE v2 (=SAC: mandatory in E from December 2014)

# Performance of the Border Control System

## **HIGHSEC® VeriGO system solution:**

- **Border Control Management Systems**
- **eGates**
- **Mobile Verification Solution**
- **Interfaces to national data bases**

# Conclusion

---

- Regarding security features: quality is more important than quantity
- All production components should come out of one hand
- Electronic document brings benefits to the citizens
- Mobile verification allows reliable and fast identification of people anywhere
- Don't safe money when it comes to security

**AND: The best document/system is only as good as its weakest link!**

# Many thanks for your attention!

---
