Compelling Issues

- *Close to 75% of new passports issued each day are ePassports (an increasing trend)*
- *The proportion of border crossings equipped to read ePassports is approximately 10% at best*
- *Border control has not caught up with the attention given to issuing the ePassport*
- ***Failure to address this issue relegates the ePassport to the status of its paper-based predecessor***
- ***The benefits of the "e" remain untapped without the right equipment***

A Weapon against Terrorism ?

- *Mobility enhances productivity and security at border crossings*
- *Designed for outdoor use*
- *Uninterrupted operation with Always On Technology*
- *Choice of connectivity options guarantees backend connectivity*
- *Camera and flash for facial recognition and record archival purposes*
- *Optional fingerprint scanner for added verification*

© IRIS CORPORATION BERHAD 2012. ALL RIGHTS RESERVED.

Summary of the Issues Addressed

- *Airport congestion*
- *Verify anywhere: in airport, in aircraft*
- *Verify anywhere within country*
- *Cost effective deployment on demand*
- *Connectivity to PKD for downloads and upgrades*
- *Easy to use, easier to deploy*
- *Not need for power for verification*
- *Full interoperability within design*
