sponsorship presentation

ICAO 2013

# Beauty in ID documents

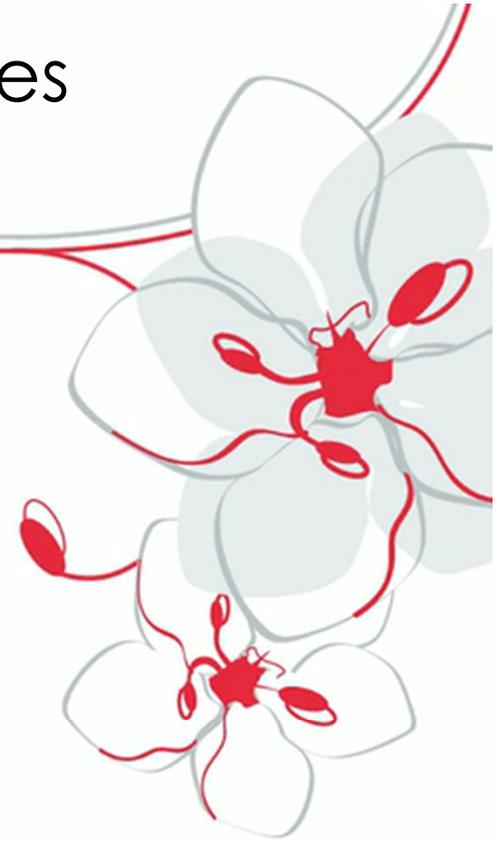

Beauty in ID documents is an artful combination of the newest protective elements, forms and colour solutions.

# The knowledge, technologies and experience

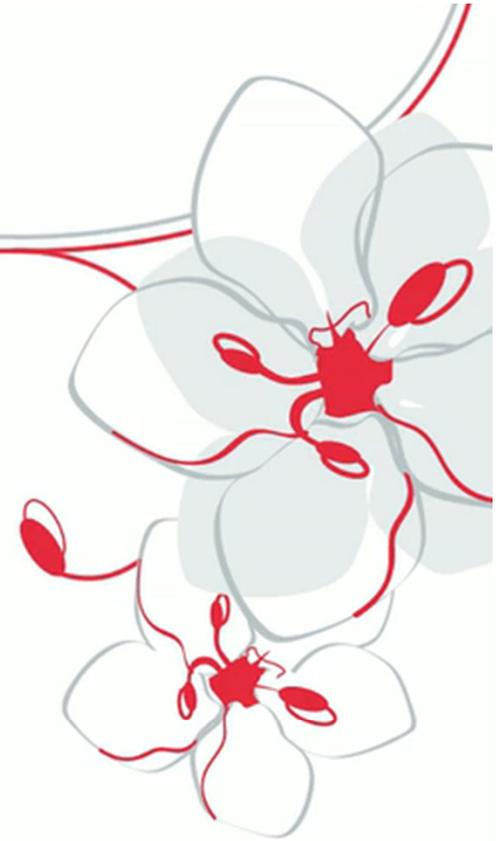

'The knowledge, technologies and experience' are three main components in production.

# Security requirements

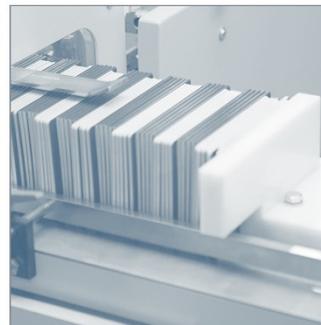

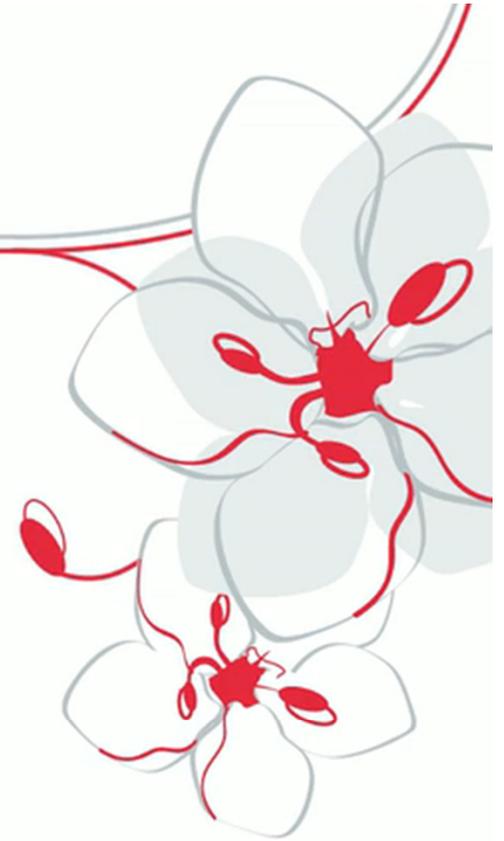

Production of documents should meet the security requirements of a changing World.

# High technology and aesthetic beauty

Availability of knowledge, technologies and experience allow to create a document that will be technologically, as well as aesthetically beautiful.
