

Border Force

Current challenges and opportunities in the use of technology at the border.

Ian Neill

Border Systems Programme

9th ICAO MRTD Symposium

How to cope with increasing passenger numbers at a time of increased security threat

Cross border passenger movement by air alone is forecast to increase from under 200m people in 2007 to 375m in 2030

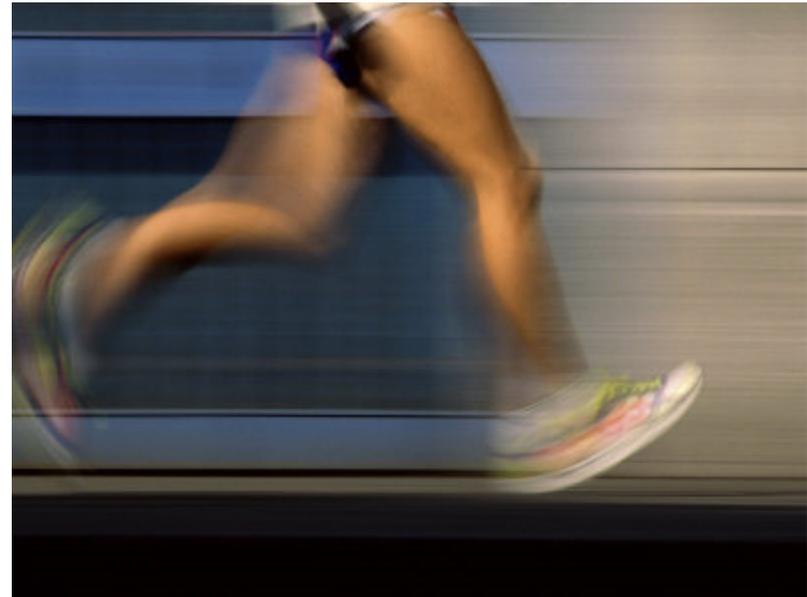

Security and Facilitation- the next steps

Passenger data and its quality

How does this facilitate the passenger experience?

Biometrics in process

What are the benefits?

- Identity assurance
- Greater security for Carriers and Governments
- Speeding the passenger Journey

How can industry and government work collaboratively to achieve this goal?

- Airlines
 - Maritime
- Rail
 - Suppliers
- Ports

Automation, crossing final frontiers.

- What might be possible?
