## Technical aspects of e-Visa Application System

e-Visa web application has been developed with "asp.net" in ".net Framework 4.5" platform.

"Responsive" design pattern which is compatible with mobile devices and tablets is adopted.

It works in credit card payment system 3D secure architecture (if available).

The database working behind the system hosts failover and disaster recovery at the same time.

Microsoft SQL Server 2012 database server is used.

ICAO

UNITING AVIATION

## Security aspects of e-Visa Application System

Web page and other components are subject to regular leakage and safety tests.

The system is also subject to data storage and security review by related institutions for 4 times a year due to credit card transactions.

e-Visas have a special to country designed algorithm and randomly generated 12-digit number.

2D PDF417 standard is provided with Error Correction Level 7 barcode on e-Visas.

Although an e-Visa is physically a PDF document, it takes the form of a secure travel document by 2D (two-dimension) barcode providing offline verification and online data sharing.

**Thank You.**
