Wildlife Habitat Management

Past – Present – Future

A Bird Controllers
Perspective

Wildlife Habitat Management

Plays a critical part in Flight Safety

So Birds and airfields don't mix

Male Airport

Sofia Airport

Gibraltar Airport

Beijing Airport

Wildlife Management is not just the art of scaring things!!

A good Bird Controller must be visually aware of the surroundings at all times

They must have a good understanding of bird psychology

And they must be dedicated to the job

But remember

Birds will stop at nothing to get their own back!

Thank you
