CANSO's GLOBAL VISION ON THE FUTURE OF ANS

CANSO's GLOBAL VISION ON THE FUTURE OF ANS

SEAMLESS AIRSPACE

CANSO's Seamless Airspace Workgroup (SAWG) proposes the following definition for Seamless Airspace:

Seamless airspace is contiguous airspace that is technically and procedurally interoperable, universally safe, and in which all categories of airspace users transition between Flight Information Regions, or other vertical or horizontal boundaries, without requiring a considered action to facilitate that transition and without any noticeable change in:

- 1) Type or quality of service received,**
- 2) Air navigation and communications performance standards, and**
- 3) Standard practices to be followed.**
