

# Haiti Datalink Planning and expectations

Presented by :

Nadia Leopold , Communication systems supervisor  
Rudy Mahault Dit Jean-Marie , Network supervisor

NAM/CAR/SAM ATS Datalink implementation workshop , Philisburg, Sint Maarten

Date : April 2016

# Our goals

- ▶ Improve the safety over Haiti airspace
- ▶ Reduce the lateral and longitudinal separation
- ▶ Increase the overflight traffic

# Done

- ▶ Our two international airports are equipped with a new VCS provided by Harris Canada
- ▶ The entire VHF radios system have been replaced
- ▶ New D-VOR from Thales have been installed in our two international Airports
- ▶ A new ILS is ready to be installed in Port-au-Prince international airport

# Planning

- ▶ Implementation of AMHS
- ▶ Implementation of surveillance system
- ▶ Increase of the qualified human resources

# Expectations

- ▶ Procurement of new technologies
- ▶ Go to an harmonized and efficient ATC data management (AIDC ...)
- ▶ Training of human resources

# Workshop's expectations

- ▶ More understanding of datalink concepts and technologies
- ▶ Guidance for implementation procedures
- ▶ Training curricula in the region

Thank you
