

Global Aviation Safety Update

RASG-PA/9 – P/06

Marco Merens

*Chief, Integrated Aviation Analysis
Air Navigation Bureau, ICAO*

RASG-PA

23 June 2016, Panama City, Panama

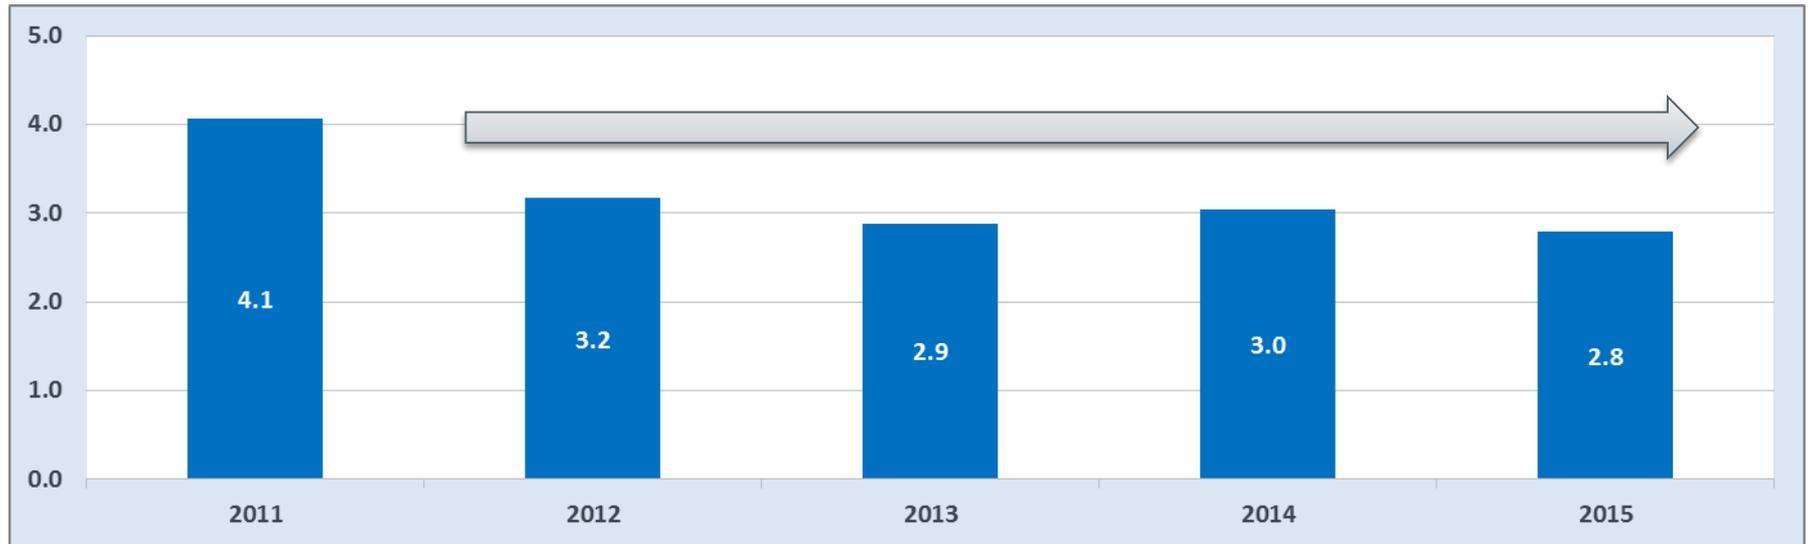

ICAO ANNUAL SAFETY REPORT 2016 EDITION

Global Accident Rate

Scheduled commercial above 5 700kg for 2011 - 2015

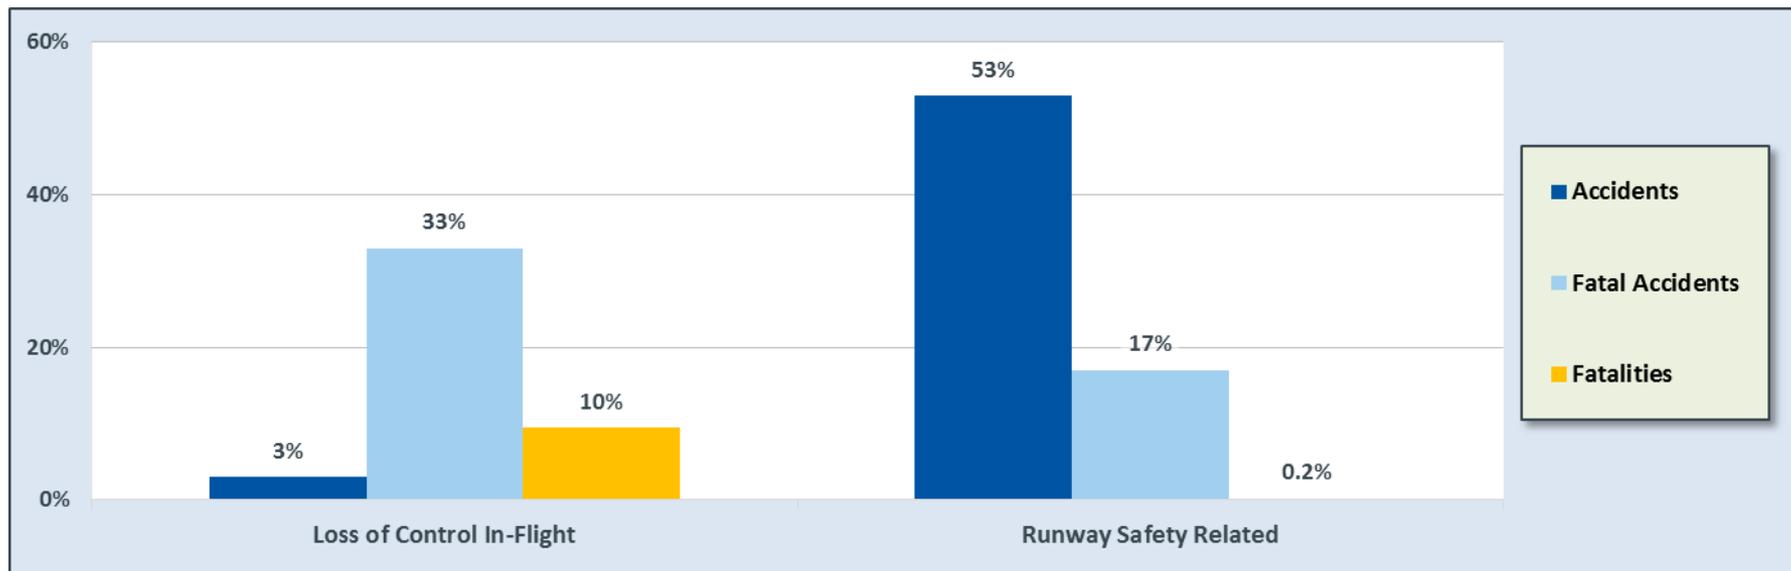

Global accident rate continues to be stable

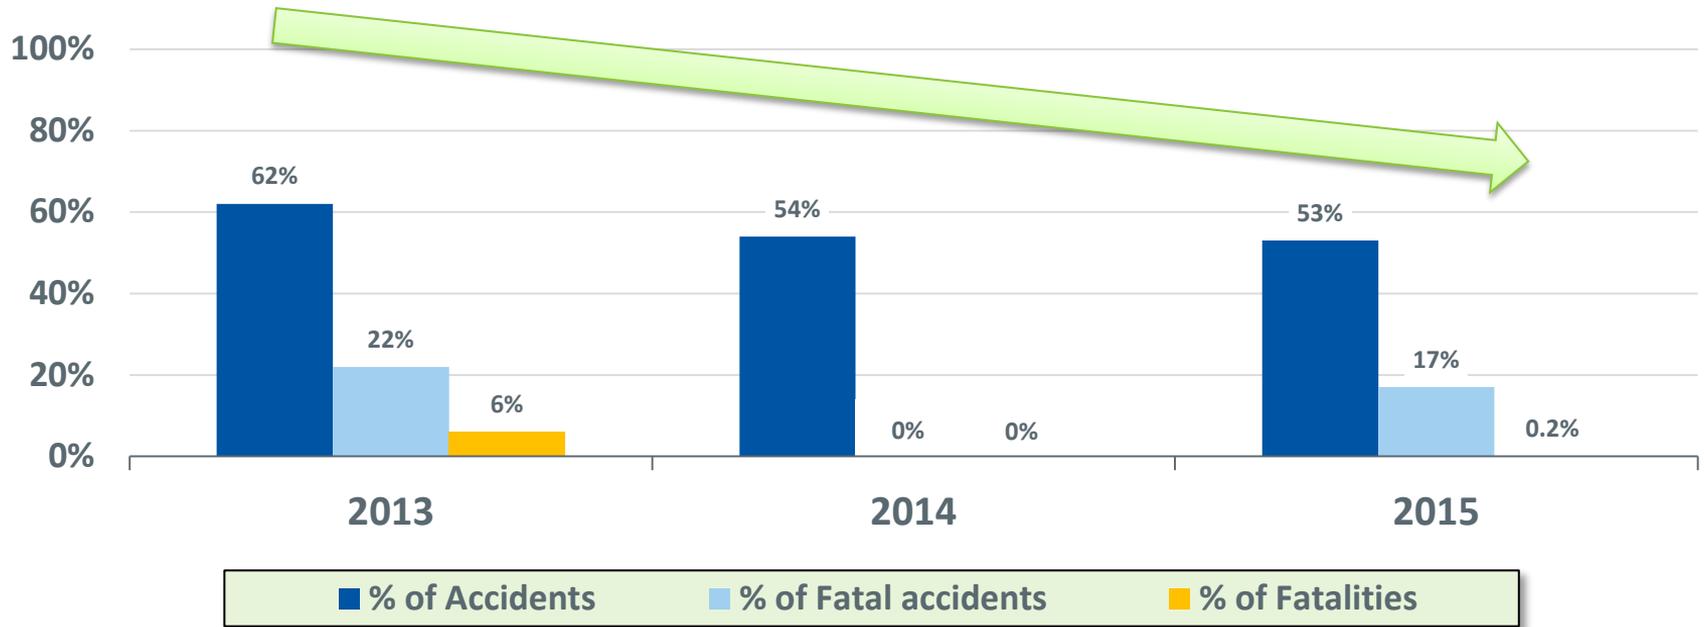

Percentage of All Accidents (2015*)

Scheduled commercial above 5 700kg

*Note: No CFIT accidents for scheduled commercial in 2015

Runway Safety related Accidents

Global Aviation Safety Update

REGIONAL STATUS (RASG-PA)

Risk Distribution for the Top 3 Safety Priorities

Scheduled commercial above 5 700kg for 2011 - 2015

RASG-PA

Continue focus on the **Top 3 Safety Priorities** (RS, CFIT, LOCI)

Source: *iSTARS 3.0 – ADREP et al.* (<https://portal.icao.int/space>)

Significant Safety Concerns (SSCs)

SSCs indicate that a State is not providing sufficient safety oversight to ensure the effective implementation of applicable ICAO Standards. SSCs may be issued in the area of operations, air navigation services, aerodromes, airworthiness or licensing.

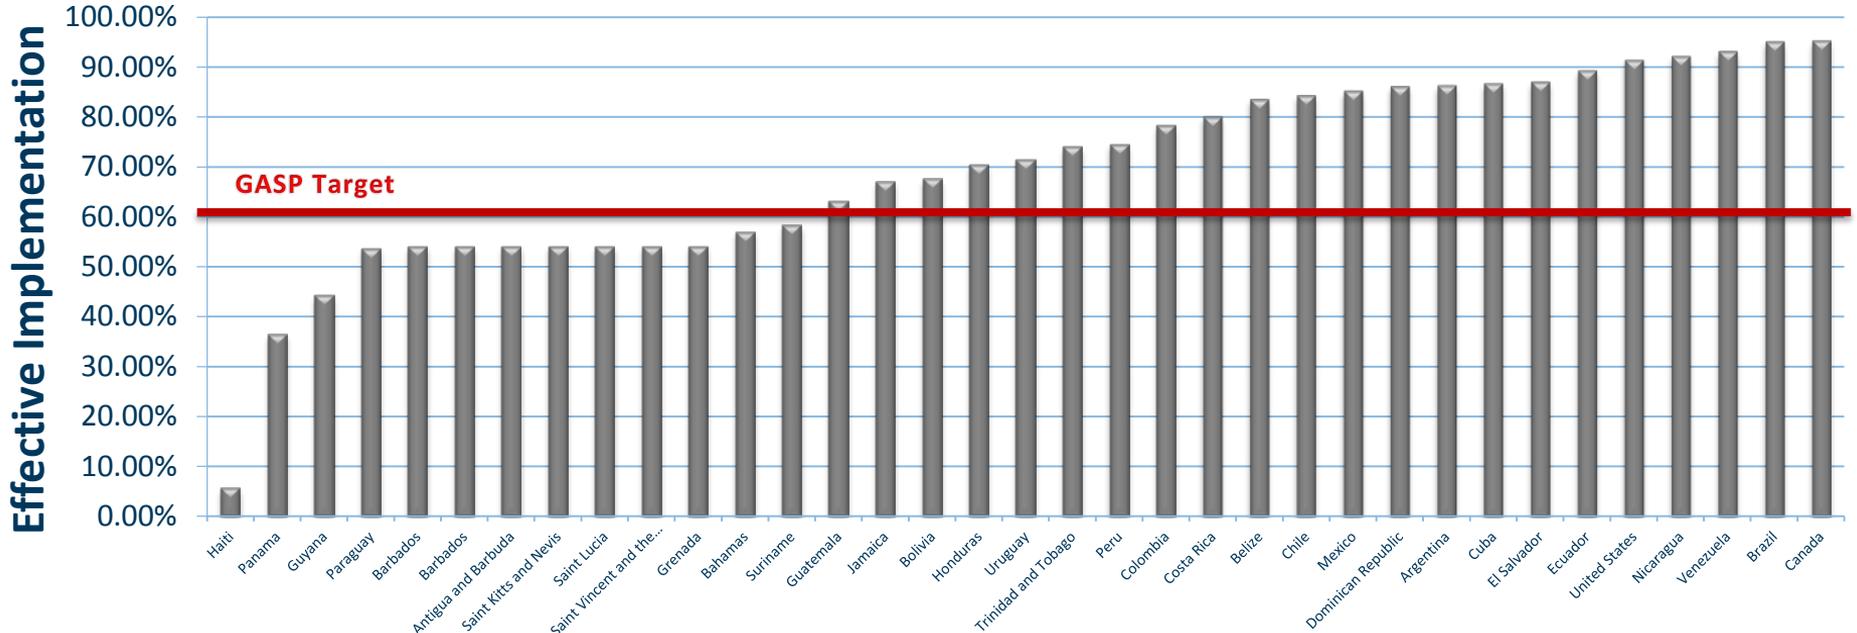

RASG-PA has 1 State with 1 SSC.

State	SSCs	SSC Areas				
		Airworthiness	Operations	Licensing	Aerodromes	Air Navigation
Haiti	1		✘			

ICAO Safety Audit Results for RASG-PA

Effective implementation of safety oversight systems by State

Global Aviation Safety Update

WORKING TOWARDS THE 39TH ASSEMBLY

GASP Update

- **Objectives**
 - No significant changes to technical content
 - Simplify document to improve comprehension and usability
- **Technical Content Review**
 - GASP objectives and framework remain the same
 - Adjust the long-term objective of 2027 to 2028 to align with Assembly and ICAO editing cycles
 - Clarifies expected roles of International, Regional, and National users of the GASP (Objectives, priorities, etc.)
 - NCLB Initiative
 - New Roadmap

Global Aviation Safety Update

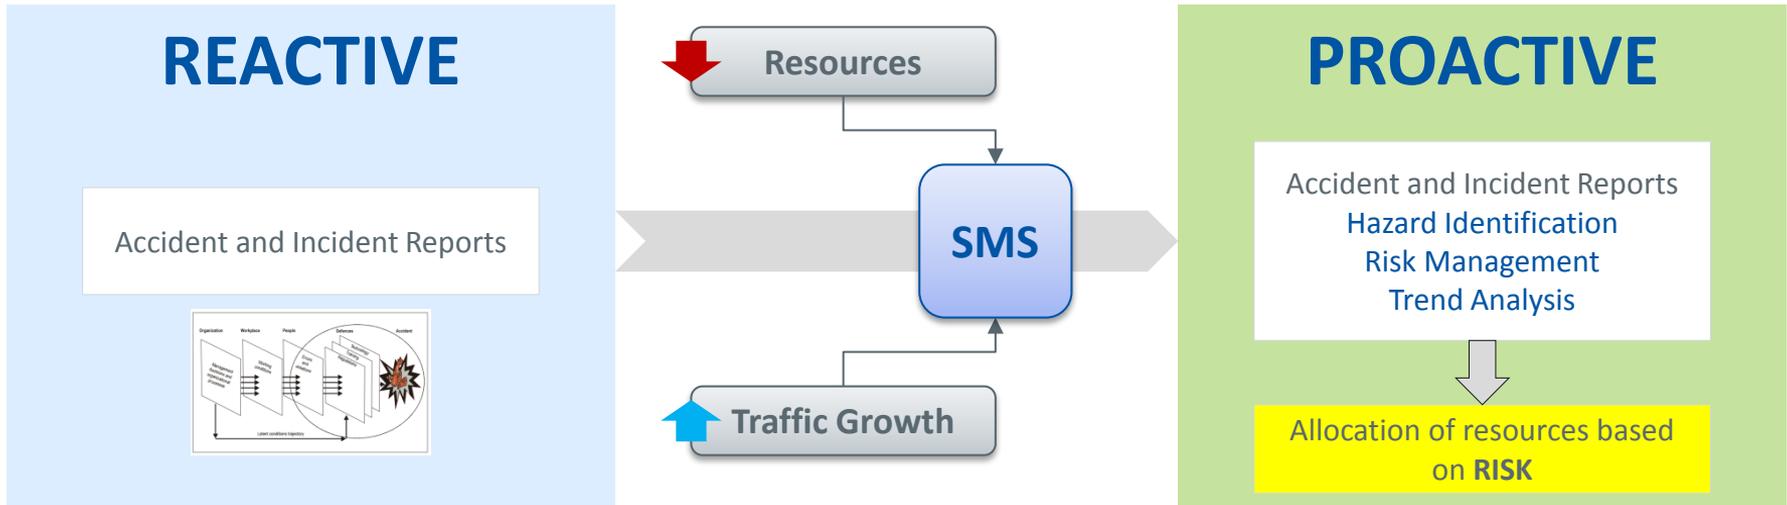

ANNEX 19 - AMENDMENT 1

Need for Safety Management and its Benefits

- Global air traffic is predicted to double in the next 15 years
- The GASP sets out a continuous improvement strategy for States to implement over the next 15 years
- Transition from a *reactive system*, to a *proactive system*
- Increased efficiencies with an effective SMS

Evolving Safety Performance

- **iMPLEMENT** is a data-driven decision making process that:
 - produces a High-level report showing State information
 - facilitates the enhancement of a State's implementation rate by helping prioritize activities based on data
 - provides a business case for the economic and social impact of aviation development.

All stakeholders should come up with a strategy to complement NCLB

Regional Aviation Safety Groups (RASGs)

Vision

To encourage the reporting of progress on the implementation of SSP and SMS provisions, which is essential to guide the future development of safety management provisions.

Mission

To identify activities, including required resources, to support the Annex 19 roll-out plan and the effective and continuing implementation of SMS and SSP provisions.

History

The RASGs exist in response to the C-DEC 190/4 taken in May 2010 to support a regional performance framework for the management of safety.

Start

Click Start to access the repository of RASG documents.

RASGs are an initiative of the International Civil Aviation Organisation which has headquarters situated in Montreal, Canada. There are 7 regional offices located in Bangkok, Cairo, Dakar, Lima, Mexico City, Nairobi and Paris, as well as 1 regional sub-office in Beijing.
